

UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN

ACADEMIC CATALOG 2014-2015

Home

The University of Illinois at Urbana-Champaign was founded in 1867 as a state-supported, land-grant institution with a threefold mission of teaching, research, and public service. The University has earned a reputation as an institution of international stature. It is recognized for the high quality of its academic programs and the outstanding facilities and resources it makes available to students and faculty. Scholars and educators rank it among a select group of the world's great universities.

The Campus

Located in the adjoining cities of Champaign and Urbana, approximately 140 miles south of Chicago, the University and its surrounding communities offer a cultural and recreational environment ideally suited to the work of a major research institution.

The University is a residential campus of classrooms, laboratories, libraries, residence halls, and recreational and cultural facilities with 211 major buildings on the central campus. Nearby are the University's Willard Airport; Robert Allerton Park, the University's nature and conference center; and agricultural land. More farmland elsewhere in Illinois is used by the College of Agricultural, Consumer and Environmental Sciences as experimental fields.

Nearly every facility on campus is accessible to people with physical disabilities, and the University's programs and services for people with disabilities have served as models worldwide.

Colleges and Schools

Nine undergraduate-serving colleges and schools offer over 150 programs of study leading to baccalaureate degrees. They are the Colleges of Agricultural, Consumer and Environmental Sciences; Applied Health Sciences; Business; Education; Engineering; Fine and Applied Arts; Liberal Arts and Sciences; Media and the School of Social Work. Postbaccalaureate students study in more than 100 fields through the Graduate College and in professional programs through the Colleges of Law and Veterinary Medicine. National surveys consistently rank the University of Illinois at Urbana-Champaign among the top ten institutions in many fields of study, with several colleges and departments ranked among the top five.

General Information

The *University of Illinois at Urbana-Champaign 2014-2015 Academic Catalog* is the official listing of courses, programs, and degree requirements for undergraduate and graduate students. The *Catalog* is published annually in August. Information on courses, curricula, fees, policies, regulations and other matters is subject to change during the period for which the *Catalog* is in effect.

The *Class Schedule* is available each term at my.illinois. The *Class Schedule* lists those courses that will be offered during specific terms, as well as times and locations. Not all courses listed in this *Catalog* are offered every term.

Course Descriptions

The Catalog lists courses of instruction alphabetically by subject and numerically by course number. The course number denotes the level of the course:

Courses numbered 000-099 do not carry academic credit but do count for tuition and load. In general, the 000-level courses are for preparatory work that does not count toward a degree.

Courses numbered 100-199 are intended primarily for freshmen and correspond to entry-level work. They may be taken by sophomores, juniors, and seniors. In certain instances they may be taken by graduate students to make up undergraduate deficiencies, but they may not be taken for graduate credit.

Courses numbered 200-299 are intended for lower division students who satisfy the published prerequisite(s), if any. Transfer credit from 2-year colleges around the state would correspond to 100 and 200-level offerings. In certain instances they may be taken by graduate students to make up undergraduate deficiencies, but they may not be taken for graduate credit.

Courses numbered 300-399 are intended primarily for juniors and seniors who satisfy the published prerequisite(s), if any. Transfer work from a community college does not correspond to these numbers. In certain instances they may be taken by graduate students to make up undergraduate deficiencies, but they may not be taken for graduate credit.

Courses numbered 400-499 are available for credit for upper division undergraduate students and typically for graduate students.

Courses numbered 500-599 are intended for graduate and professional school students. Certain seniors, with Graduate College approval, may enroll for credit.

Courses numbered 600-799 are available for certain professional school courses with restricted enrollments. These courses apply primarily to law and veterinary programs.

Course credit is listed after each course title. The University counts credit in credit hours. Following the credit hours is a brief description of the content, requirements for registration to the course (if any), and other advisory statements. Additional information relating to the course content is available in the *Class Schedule*.

A **crosslisted** course refers to a course offered under the same course title by a different department. Courses may be crosslisted with one or several departments and will be noted by the statement: "**Same as.**" The description of a crosslisted course is found only in the entry for the controlling department. Reference to the controlling department's course is noted by "See...."

Prerequisites are advisory statements that refer to special requirements for registration in certain courses. These may include one or more courses that must be completed prior to, or in the same term. These statements may also recommend knowledge, skills or standards, or class standing that must be demonstrated prior to registration.

Degree Programs

The undergraduate degree programs of study are organized by Colleges and Schools. Specific majors can be found by clicking on degree programs in the left-hand navigation or by exploring offerings in each college or school or by using the "Undergraduate Programs" link in the upper navigation bar to find an alpha list of programs offered as majors, minors or concentrations. Graduate programs of study are organized by program. A listing of programs is found in the left-hand navigation as well as the "Graduate Programs" tab in the upper navigation bar.

General Education Requirements

The General Education (GenEd) requirements describe the core courses all students must take in order to graduate. They are an important component of students' education at the University of Illinois. Besides specializing in a major and training for a career, students should become familiar with some of the many rapidly changing disciplines. Through these requirements, Illinois undergraduates:

- expand their historical, aesthetic, cultural, literary, scientific, and philosophical perspectives
- improve critical and analytical thinking; and

- learn skills in finding, managing, and communicating knowledge.

Courses are noted as fulfilling one or more of the following categories:

- Composition I
- Advanced Composition
- Humanities and the Arts: Literature & the Arts or Historical & Philosophical Perspectives
- Natural Sciences and Technology: Life Science or Physical Science
- Social and Behavioral Sciences
- Cultural Studies: Western/Comparative Cultures or Non-Western/US Minority Culture(s)

Policy Notes

Illinois Copyright Policy

The University of Illinois at Urbana-Champaign makes every effort to comply with laws and institutional policies on copyright and to encourage awareness within its community of both responsibilities and appropriate actions for compliance.

Copyright law can be a complex topic to navigate, and the issues students, faculty and staff must confront when it comes to copyright are often different. For that reason, the University has compiled a variety of resources to help you navigate your copyright responsibilities.

Copyright Resources (<http://copyright.illinois.edu/resources>)

Annual Copyright Notice to Students (p. 11)

In addition, a variety of laws and regulations shape the specifics of copyright law. The Higher Education Opportunity Act is one of the laws that shapes copyright policies and education efforts at colleges and universities in America. How the University of Illinois at Urbana-Champaign satisfies the requirements of HEOA are outlined on this page (<http://copyright.illinois.edu/heoa>).

Religious Observances

The University of Illinois at Urbana-Champaign complies with the University Religious Observances Act (110 ILCS 110/). Details of the Act are available here (<http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=1076&ChapterID=18>).

Smoke-Free Campus

As of January 1, 2014, smoking is prohibited on all campus property at the University of Illinois at Urbana-Champaign, both indoors and outdoors, in university-owned vehicles and in privately-owned vehicles parked on campus property. The advertising, sale, or free sampling of tobacco products is also prohibited on campus property. Littering the remains of tobacco products or any other related waste product on campus property is further prohibited. The complete policy is available here (<http://cam.illinois.edu/v/v-B-2.1.htm>).

Student Code

Policies and procedures applying apply to all undergraduate, graduate, and professional students enrolled at the University of Illinois at Urbana-Champaign are found in the Student Code (<http://studentcode.illinois.edu>).

Annual Announcement of Copyright Policies

Provided below is the University of Illinois at Urbana-Champaign annual announcement of copyright policies, please note that it is not necessary to reply to this email.

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under Section 106 of the Copyright Act (Title 17 of the United States Code). Infringement may occur when a copyright protected work is reproduced or distributed without authorization, including when it is uploaded or downloaded from the Internet or otherwise published without permission. Protected works may include (among other works) music, movies and television programs. Although there are limited exceptions not requiring permission, such as the doctrine of fair use, sharing substantial portions of such works, including on peer-to-peer networks, without authorization by the rights owner or by meeting the exception requirements is an infringement.

Penalties for copyright infringement include civil and criminal penalties. In general, anyone found liable for civil copyright infringement may be ordered to pay either actual damages or "statutory" damages set at not less than \$750 and not more than \$30,000 per work infringed. For "willful" infringement, a court may award up to \$150,000 per work infringed. A court can, in its discretion, also assess costs and attorneys' fees. For details, see Title 17, United States Code, Sections 504 and 505.

Willful copyright infringement can also result in criminal penalties, including imprisonment of up to five years and fines of up to \$250,000 per offense.

All campuses of the University of Illinois make every effort to comply with laws and institutional policies on copyright. Students that receive a copyright infringement notice may face disciplinary actions. These disciplinary actions may include, and are not limited to, loss of network access, mandatory training about copyright infringement, sanctions of record on academic transcripts, and potential dismissal from the University.

For more information about copyright at the University of Illinois, please visit: <http://copyright.illinois.edu>.

Undergraduate

The Colleges of Agricultural, Consumer and Environmental Sciences; Applied Health Sciences; Business; Education; Engineering; Fine and Applied Arts; Liberal Arts and Sciences; Media; and the School of Social Work offer over 150 programs of study leading to baccalaureate degrees. Undeclared students begin their college career in the Division of General Studies before transferring to a degree program.

Agricultural, Consumer and Environmental Sciences, College of

227 Mumford Hall
1301 W. Gregory
Urbana, IL 61801-9015, (217) 333-0460
<http://aces.illinois.edu>

The College of Agricultural, Consumer and Environmental Sciences plays a key role in national and international research initiatives in biological, physical, social, and economic sciences. The scope of the College has broadened dramatically since its founding in 1867, while its purpose remains focused on advancing scientific knowledge that makes life better, healthier, safer, and more profitable for people in Illinois and around the globe. The College offers 10 undergraduate majors with 39 different concentrations.

The ACES College enrolls more than 2,700 students in the seven departments leading to a bachelor of science degree. Students can select from majors and concentrations that direct the focus of study to their specific interests.

Teaching, research, and outreach opportunities are supported by excellent resources. The College of ACES Library and Information Center houses the college's collection of educational resources, computing facility and the College of ACES career development and placement office, which assists students in personal and career development through internships and placement after graduation. The Family Resiliency Center, Institute for Genomic Biology, Child Development Laboratory and extensive research centers in Champaign-Urbana and across the state are other examples of unique and excellent college resources. For instance, the Morrow Plots, a national historic landmark established in 1876, are the oldest agronomic research plots in the United States. The Morrow Plots are located on campus next to the undergraduate library.

The ACES James Scholar Honors Program and the Jonathan Baldwin Turner Undergraduate Research Program offer excellent opportunities for students to be involved in cutting edge research and solving contemporary challenges. Research is conducted in the broad areas of consumer behavior, biotechnology, environmental quality and protection, financial planning, food science, human nutrition, natural resource systems, and individual and family well-being.

Increasing the international knowledge and experience of students and faculty helps meet the growing demand for graduates who are internationally literate and able to work effectively in different countries, in different languages and with people of different cultures. The academic programs office provides initiative and focus to College international study abroad programs as well as integrating an international dimension to the educational experience.

The distinguished faculty, innovative programs, and pioneering achievements in teaching, research, and outreach activities, together with an enthusiastic and competitive student body, place the College of ACES among the top institutions in the country in a survey of peers.

Departments and Curricula

The Department of Agricultural and Biological Engineering offers two majors: Agricultural and Biological Engineering/Agricultural Engineering Sciences and Technical Systems Management. Students in the Agricultural and Biological Engineering major earn that degree from the College of Engineering and have the option of a second degree in Agricultural Engineering Sciences. This major is designed to produce graduates who have a basic engineering education for careers of engineering service to the agricultural, environmental, and biofuels industries. The intent of the program is to provide a combination of engineering theory and applications courses to permit students to pursue goals in academia, government or industry. The graduates are expected to provide engineering solutions in agricultural production, bioprocesses and product utilization, natural resources conservation, and are exposed to current social and cultural concepts and ideas. The Technical Systems Management major is designed to prepare students for careers requiring the application, management, and marketing of engineering technologies. Students study technological systems, business and economics (including organization, operations, management, marketing, and sales), and oral and written communications. Graduates of the TSM program accept positions of employment at highly competitive salaries.

The Department of Agricultural and Consumer Economics offers programs designed to prepare students for business- or policy-related fields with special emphasis on agriculture, consumers, and environmental protection. Students' study is concentrated in one of the following areas: agri-accounting; finance in agribusiness; agribusiness markets and management; consumer economics and finance; environmental economics and policy; farm management; financial planning; policy, international trade and development; and public policy and law.

The Department of Animal Sciences offers undergraduate students unique opportunities to conduct research projects with faculty. In addition, many students gain animal experience by working part-time at the U of I Farms. Internships and field study trips are additional avenues of gaining knowledge

and experience. Study Abroad experiences are also strongly encouraged. Areas of concentration are companion animal and equine science; science, pre-veterinary and medical; and technology and management.

The Department of Crop Sciences houses majors in Crop Sciences and in Horticulture. The Crop Sciences major offers concentrations of study in plant biotechnology and molecular biology, crop agribusiness, biological sciences, agroecology, integrated pest management, and crops. In each of these concentrations students receive a strong grounding in science and can apply that knowledge through internship experiences with a wide range of agricultural employers. Each concentration can lead to employment immediately after completion of the B.S. degree, or to graduate or professional study. Students majoring in Horticulture choose from one of two concentrations to meet their educational interests: specialty crops or sustainable landscapes.

The Department of Food Science and Human Nutrition offers concentration of study in dietetics, food science, food industry and business, hospitality management, and human nutrition. Courses in the department include the applications of biology, engineering, chemistry, physics, and microbiology to the processing, formulation, packaging, and distribution of food.

The Department of Human and Community Development offers the major in Human Development and Family Studies, in which students can choose to concentrate their study in either child and adolescent development or family studies. The program prepares students for graduate education or employment in areas such as child care services, family life education, social work, human services, marriage and family counseling, pediatric services in hospitals, cooperative extension work or business activities related to children and families. Students select course work according to their interests in human development, such as infancy, early childhood or adolescence, or family studies, such as the marital relationship, parent-child interaction, family change or conflict and conflict management in the family. Basic courses in these areas are linked to practical experiences in educational and community settings, and most courses emphasize issues related to cultural diversity and gender.

The Department of Natural Resources and Environmental Sciences provides students the opportunity to study resource and wildlife conservation and management, restoration ecology, the impacts of global change, and human dimensions of the environment. NRES is an interdisciplinary program that brings biological, physical, and social scientists together to teach and discover techniques to improve the health and integrity of urban and natural ecosystems.

Agricultural Communications is a major offered jointly by the Colleges of ACES and Media. The program is administratively housed in the College of Media. Students specialize in advertising or journalism and go on to careers and graduate study in newspaper and magazine writing and publishing, advertising, broadcasting, and public relations.

The program in Agricultural Education offers the Agricultural Leadership and Science Education major. Students select a concentration of either Agricultural Leadership Education or Agricultural Science Education. This curriculum prepares students for positions requiring expertise in formal and non-formal education. Examples include teaching agriculture in the public schools; cooperative extension work; training and program development; and other education-related positions in agricultural and environmental agencies and businesses. Students completing the agricultural science education concentration will be eligible for Illinois teacher certification in agricultural education, and will have instruction in key pedagogical areas as well as agriculture. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (<http://www.cote.illinois.edu/>).

Requirements

Admission

Freshman applicants must meet general course pattern admission requirements of the University.

Applicants for freshman admission are evaluated on the basis of their ACT scores, high school percentile rank, and statements of personal and professional interest, among other factors. Detailed information on the admission process may be obtained from the Office of Undergraduate Admissions.

Transfer applicants are evaluated on the basis of their transfer grade point averages and completion of core course requisites. Transfer applicants to the Dietetics and Human Nutrition major must have a grade point average of at least 3.0; applicants to Agricultural and Consumer Economics and Agricultural Science Education need a minimum GPA of 2.75, and all other curricula require at least a grade point average of 2.5. Applicants are encouraged to consult the Office of Undergraduate Admissions for specific course requirements.

Graduation

The number of hours required for graduation varies between 126 and 130 for all curricula within the college. Included in the total must be all courses prescribed in the given curriculum and a sufficient number of electives to obtain the total number. The student should consult the College of ACES Student Handbook for a listing of credit restrictions that apply in evaluating elective credits toward graduation.

Each candidate for graduation must have a grade point average of not less than 2.0 (A = 4.0), including grades in courses transferred from other institutions, and a grade point average of not less than 2.0 in all courses taken at the University of Illinois at Urbana-Champaign. Candidates for graduate from Dietetics, Human Nutrition, and Agricultural Science Education must have institutional and overall grade point averages of at least 2.5 (A = 4.0).

Special Programs

Scholarship Information

A number of scholarships for undergraduate students enrolled in the College of ACES are made available through the generous support of alumni and friends of the College. Incoming and currently enrolled ACES students are eligible for consideration for almost \$2,000,000 in merit-based awards will be awarded annually by the College. Additional information on scholarships for ACES students can be found at <http://academics.aces.illinois.edu/scholarships>.

abe.illinois.edu

The Department of Agricultural and Biological Engineering offers two academic majors through the College of ACES: the five-year combined program in Agricultural and Biological Engineering Sciences and the major in Technical Systems Management. The Department also offers a four-year major in Agricultural and Biological Engineering through the College of Engineering.

- Major in Agricultural and Biological Engineering (p. 15)
- Dual Major in Agricultural and Biological Engineering Sciences (p. 23)
- Major in Technical Systems Management (p. 24)
- Minor in Technical Systems Management (p. 27)
- Minor in Agricultural Safety and Health (p. 27)

Agricultural and Biological Engineering

abe.illinois.edu

The Department of Agricultural and Biological Engineering offers a four-year degree program in Agricultural and Biological Engineering through the College of Engineering that is described below.

The Department also offers a five-year dual degree program through both the College of Engineering and the College of ACES. Students who successfully complete this five-year academic program receive the Bachelor of Science in Agricultural and Biological Engineering degree from the College of Engineering as well as the Bachelor of Science in Agriculture degree with a major in Agricultural and Biological Engineering from the College of ACES. Both degree programs are joint between the College of Engineering and the College of ACES with students beginning as new freshmen in the College of ACES.

For the Degree of Bachelor of Science in Agricultural and Biological Engineering

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This ABET-accredited program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures.

The agricultural and biological engineering program requires one of two concentrations: Agricultural Engineering and Biological Engineering.

Orientation and Professional Development

These courses introduce the opportunities and resources that your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ABE 100	Intro Agric & Biological Engrg ¹	1
ENG 100	Engineering Orientation ¹	0

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
MATH 221	Calculus I ²	4
MATH 225	Introductory Matrix Theory	2
MATH 231	Calculus II	3

MATH 241	Calculus III	4
MATH 285	Intro Differential Equations	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
Agricultural and Biological Engineering Technical Core		
ABE 141	ABE Principles: Biological	2
ABE 223	ABE Principles: Machine Syst	2
ABE 224	ABE Principles: Soil & Water	2
ABE 225	ABE Principles: Bioenvironment	2
ABE 226	ABE Principles: Bioprocessing	2
ABE 430	Project Management	2
ABE 469	Industry-Linked Design Project	4
CS 101	Intro Computing: Engrg & Sci	3
ECE 205	Elec & Electronic Circuits	3
GE 101	Engineering Graphics & Design	3
TAM 211	Statics ³	2-3
or TAM 210	Introduction to Statics	
TAM 212	Introductory Dynamics	3
Concentration Requirements		
Students will select one concentration:		14
Agricultural Engineering Concentration		
Biological Engineering Concentration		
Technical Electives		
Technical electives for the selected concentration		21
Liberal Education		
The Liberal education courses develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning. ⁴		
ECON 103	Macroeconomic Principles ⁵	3
Electives from the campus General Education social & behavioral sciences list.		3
Electives from the campus General Education humanities & the arts list.		6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.		6
Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.		
Composition		
These courses teach fundamentals of expository writing.		
RHET 105	Writing and Research	4
Advanced Composition ⁶		
Free Electives		
These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site, give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors. ⁷		
Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. ⁷		6
Total Hours		128

¹ External transfer students take ENG 300 instead.

² MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

- 3 *The extra hour of credit for this course may be used to help meet free elective requirements.*
- 4 *Liberal education courses*
- 5 *ECON 102 or ACE 100 maybe substituted by petition.*
- 6 *Satisfied by completing ABE 469 in the Agricultural and Biological Engineering Technical Core.*
- 7 *College of Engineering advising Web site.*

Concentrations

- Agricultural Engineering (p. 17)
- Biological Engineering (p. 20)

Agricultural Engineering Concentration

The B.S. Degree in Agricultural and Biological Engineering provides a concentration in Agricultural Engineering. This concentration includes the integration of physical and biological sciences as a foundation for engineering applications in agriculture, food systems, energy, natural resources, the environment, and related biological systems. Students pursuing this concentration are involved in the design of systems for renewable energy, off-road equipment, water quality, and the utilization and protection of soil and water resources. Important design constraints are economics, conservation of materials and energy, safety, and environmental quality. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Renewable energy Systems
- Off-Road Equipment Engineering
- Soil and Water Resources Engineering

Agricultural Engineering Concentration Requirements

Select one of the following:		3
CEE 202	Engineering Risk & Uncertainty	
IE 300	Analysis of Data	
ABE 440	Applied Statistical Methods I ¹	
STAT 400	Statistics and Probability I ¹	
ECE 206	Elec & Electronic Circuits Lab	1
ME 300	Thermodynamics	3
TAM 251	Introductory Solid Mechanics	3
Select one of the following:		4
TAM 251	Introductory Solid Mechanics	
TAM 335	Introductory Fluid Mechanics	
CHBE 421	Momentum and Heat Transfer	
ME 310	Fundamentals of Fluid Dynamics	
Total Hours		14

- ¹ *The extra hour of credit for this course may be used to help meet free elective requirements.*

Technical Electives

This elective course work must be completed to fulfill the concentration. The subjects build upon the agricultural and biological engineering technical core.

Biological and natural sciences electives chosen from a departmentally approved list of Biological and Natural Sciences Electives – Group A ¹	6
Technical electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives – Group A, and the remainder approved Other Technical Electives – Group A. ²	15
Total Hours	21

- ¹ *Biological and Natural Sciences Electives – Group A* (<http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-BioNatSciElectives>)
- ² *Technical electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives – Group A* (<http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-TechElectives>), *and the remainder approved Other Technical Electives – Group A* (<http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-TechElectives/#tag1>).

Suggested Sequence

First Year

First Semester		Hours
ABE 100	Intro Agric & Biological Engrg	1

Free elective ⁴		3
Semester Hours		16
Total Hours:		128

¹ RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is GE 101. Students may take CMN 111 and CMN 112 in place of RHET 105.

² MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

³ Liberal education electives (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 103 (or ECON 102 or ACE 100 by permission) must be one of the social & behavioral sciences courses, recommended to be taken early. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

⁴ One elective course must satisfy the General Education Advanced Composition requirement.

- 5 *The extra hour of credit for this course may be used to help meet free elective requirements.*
- 6a *Students in the Agricultural Engineering concentration must complete 6 hours from the approved list of Biological and Natural Sciences Electives – Group A (<http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-BioNatSciElectives>).*
- 6b *Students in the Biological Engineering concentration must complete 6 hours from the approved list of Biological and Natural Sciences Electives – Group B (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-BioNatSciElectives>).*
- 7a *Students in the Agricultural Engineering concentration must complete 15 hours of technical electives chosen in consultation with an advisor. At least 8 hours must be from the approved list of Agricultural Engineering or Biological Engineering Technical Electives – Group A (<http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-TechElectives>), and the remainder selected from the approved list of Other Technical Electives – Group A (<http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-TechElectives/#tag1>).*
- 7b *Students in the Biological Engineering concentration must complete 15 hours of technical electives chosen in consultation with an advisor. At least 8 hours must be from the approved list of Agricultural Engineering or Biological Engineering Technical Electives – Group B (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives>), and the remainder selected from the approved list of Other Technical Electives – Group B (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives>).*
- 8 *Satisfies the General Education Advanced Composition requirement.*
- 9 *May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.*

Biological Engineering Concentration

The B.S. Degree in Agricultural and Biological Engineering also provides a concentration in *Biological Engineering*. This concentration integrates biology and engineering to provide solutions to problems related to living systems (plants, animals, and microorganisms). Engineered biological systems vary widely in scale. At the molecular level, nanometer-scale devices consist of a few biomolecules inside individual cells. At the other extreme, regionally-scaled complex ecosystems depend upon multiple species of interacting living organisms. Such systems are becoming increasingly important in areas such as bioenergy, bioprocessing, nanotechnology, biosensing, bio-informatics, and bioenvironment. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Bioenvironmental Engineering
- Ecological Engineering
- Food and Bioprocess Engineering
- Nanoscale Biological Engineering

Biological Engineering Concentration Requirements

ABE 341	Transport Processes in ABE	3
CHBE 321	Thermodynamics	4
CHEM 232	Elementary Organic Chemistry I ²	3 OR 4
MCB 150	Molec & Cellular Basis of Life	4
Total Hours		14

- 1 *The extra hour of credit for this course may be used to help meet free elective requirements.*
- 2 *May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.*

Technical Electives

This elective course work must be completed to fulfill this concentration. The subjects build upon the agricultural and biological engineering technical core.

Biological and natural sciences electives chosen from a departmentally approved list of Biological and Natural Sciences Electives – Group B ¹	6
Technical electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives – Group B, and the remainder approved Other Technical Electives – Group B ²	15
Total Hours	21

- 2 *Technical electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives – Group B (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives>), and the remainder approved Other Technical Electives – Group B (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives/#tag1>)*

Suggested Sequence

The schedule that follows for each concentration is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. Refer to the appropriate sequence below for each concentration.

First Year

First Semester

		Hours
ABE 100	Intro Agric & Biological Engrg	1
CHEM 102	General Chemistry I	3
Liberal education elective ^{3,4}		3
CHEM 103	General Chemistry Lab I	1

Dual Major in Agricultural and Biological Engineering Sciences

Students who successfully complete this five-year academic program receive the Bachelor of Science with a major in Agricultural and Biological Engineering from the College of Engineering as well as Agricultural and Biological Engineering Sciences from the College of ACES. Students first enroll in the College of ACES and then transfer to the College of Engineering after two years. The suggested program of study that follows fulfills graduation requirements for both the College of Engineering and the College of ACES. Graduates are employed by industry, consulting firms, and government for research, education, and manufacturing. Departmental advisors ensure that national engineering accreditation (ABET) requirements are met by advisees.

Overview of Curricular Requirements

The curriculum for the dual major requires 158 hours for graduation, of which 128 hours are specified for the major in Agricultural and Biological Engineering from the College of Engineering. Curriculum requirements specific to the dual major are organized as follows.

Completion of degree requirements for Agricultural and Biological Engineering major	128
Communication	
CMN 101 Public Speaking	
Biological Sciences Coursework ¹	3-4
Agricultural Sciences Coursework ²	15
Open Electives ³	
Total hours required to receive a B.S. in Agricultural and Biological Engineering and a B.S. in Agricultural and Biological Engineering Sciences	158

- ¹ In addition to the Biological and Natural Science Elective hours required for the Agricultural Engineering Concentration (6 hours) and the Biological Engineering Concentration (6 hours), a further 4 hours of biological sciences must be completed from biology, entomology, microbiology, plant biology, physiology, or zoology to make up a **total of 10 hours**. These hours can be selected from the Biological and Natural Science Elective lists for the two concentrations. Other courses with strong biological science content may be approved by the department.
- ² Fifteen hours of agricultural sciences with courses from at least two subject areas other than agricultural and Biological Engineering and Technical Systems Management, and approval of advisers are required.
- ³ Sufficient open electives selected to total minimum curriculum requirement of 158 hours. All requirements of the combined curriculum must be completed to satisfy the requirement of both degrees.

Major in Technical Systems Management

For the Degree of Bachelor of Science in Technical Systems Management

This major in Technical Systems Management is designed to prepare students as problem solvers for systems involving the application, management, and/or marketing of agricultural engineering technologies. Students are instructed in engineering and business principles in preparation as technically competent business persons for professional careers as entrepreneurs, marketing representatives, or plant managers working with service organizations, manufacturers, corporate farms, retail dealers, power suppliers, contractors, or management companies from production through processing and distribution.

Students can specialize in Construction Systems Management; Environmental Systems Management; Mechanization, Marketing, and Technology Management Systems; Production Systems; or Renewable Energy Systems.

Prescribed Courses including Campus General Education

Composition I and Speech

Select one of the following:	6-7
RHET 105 & CMN 101	Writing and Research and Public Speaking (or equivalent (see college Composition I requirement))
CMN 111 & CMN 112	Oral & Written Comm I and Oral & Written Comm II

Advanced Composition

Select from campus approved list.	3-4
-----------------------------------	-----

Cultural Studies

Two courses; one Western culture and one non-Western/US minority culture course.	6
--	---

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

MATH 234	Calculus for Business I (or equivalent)	4
----------	---	---

Quantitative Reasoning II

Select one of the following:	3-4
ACE 261	Applied Statistical Methods
CPSC 241	Intro to Applied Statistics
ECON 202	Economic Statistics I
MATH 161	Statistics
PSYC 235	Intro to Statistics
SOC 280	Intro to Social Statistics
STAT 100	Statistics

Natural Sciences and Technology

CHEM 102 & CHEM 103	General Chemistry I and General Chemistry Lab I	4
PHYS 101	College Physics: Mech & Heat	5
Select one of the following:		4-5
PHYS 102	College Physics: E&M & Modern	
CHEM 104 & CHEM 105	General Chemistry II and General Chemistry Lab II	

Biological sciences (see campus approved list)	3-5
--	-----

Humanities and the Arts

Select from campus approved list.	6
-----------------------------------	---

Social and Behavioral Sciences

ACE 100	Agr Cons and Resource Econ	4
ECON 103	Macroeconomic Principles	3
Social and behavioral sciences. Select from campus approved list.		3-4

ACES Prescribed

ACES 101	Contemporary Issues in ACES	2
----------	-----------------------------	---

TSM Required

ACE 161	Microcomputer Applications (or equivalent)	3
ACCY 200	Fundamentals of Accounting	3
or ACCY 201	Accounting and Accountancy I	
CPSC 112	Introduction to Crop Sciences	4
NRES 201	Introductory Soils	4
TSM 100	Technical Systems in Agr	3
TSM 430	Project Management	2

TSM elective courses. A total of 18 hours selected from the following courses. A minimum of six hours must be selected from TSM 295 or TSM 396, or at the 300- or 400-level. 18

TSM 199	Undergraduate Open Seminar	
TSM 232	Materials and Construction Sys	
TSM 233	Metallurgy & Welding Process	
TSM 234	Wiring, Motors and Control Sys	
TSM 262	Off-Road Equipment Management	
TSM 295	Undergrad Research or Thesis	
TSM 352	Land and Water Mgt Systems	
TSM 363	Fluid Power Systems	
TSM 371	Residential Housing Design	
TSM 372	Environ Control & HVAC Systems	
TSM 381	Grain Drying & Storage Systems	
TSM 396	UG Honors Research or Thesis	
TSM 435	Elec Computer Ctrl Sys	
TSM 464	Engine and Tractor Power	
TSM 465	Chemical Applications Systems	
TSM 496	Independent Study	
TSM 499	Seminar	

Specialization Electives

Select 15 hours from the following: 15

ACE 210	Environmental Economics	
ACE 222	Agricultural Marketing	
ACE 231	Food and Agribusiness Mgt	
ACE 232	Management of Farm Enterprises	
ACE 310	Natural Resource Economics	
ACE 403	Agricultural Law	
ACE 406	Environmental Law	
ACE 428	Commodity Futures and Options	
ACE 448	Rural Real Estate Appraisal	
ACE 456	Agr and Food Policies	
ANSC 467	Applied Animal Ecology	
BADM 300	The Legal Environment of Bus	
BADM 301	Summary of Business Law	
BADM 310	Mgmt and Organizational Beh	
BADM 311	Individual Behavior in Orgs	
BADM 320	Principles of Marketing	
BADM 322	Marketing Research	
BADM 374	Management Decision Models	
BADM 375	Business Process Management	
BADM 376	Enterprise Proc Integr & Dynm	
BADM 445	Small Business Consulting	
BADM 446	Entrepreneurship Sm Bus Form	

BTW 271	Persuasive Writing	
CEE 330	Environmental Engineering	
CPSC 226	Introduction to Weed Science	
CPSC 414	Forage Crops and Pasture Eco	
CPSC 418	Crop Growth and Management	
ENVS 336	Tomorrow's Environment	
FIN 221	Corporate Finance	
NRES 419	Env and Plant Ecosystems	
NRES 474	Soil and Water Conservation	
NRES 488	Soil Fertility and Fertilizers	
Total Hours		126

Minor in Agricultural Safety and Health

Note: This minor has prerequisites of a minimum of 30 hours with a 2.5 GPA.

TSM 421	Ag Safety-Injury Prevention	3
TSM 422	Ag Health-Illnesses Prevention	3
TSM 425	Managing Ag Safety Risk	3
A minimum of three credit hours is required from the following courses:		3
TSM 293	Off-Campus Internship	
TSM 295	Undergrad Research or Thesis	
TSM 496	Independent Study	
A minimum of six credit hours selected from:		6
CHLH 101	Introduction to Public Health	
CHLH 244	Health Statistics	
CHLH 274	Introduction to Epidemiology	
CHLH 304	Foundations of Health Behavior	
CHLH 469	Environmental Health	
CHLH 474	Principles of Epidemiology	
CHLH 540	Health Behavior: Theory	
FSHN 480	Basic Toxicology	
HDFS 105	Intro to Human Development	
KIN 262	Motor Develop, Growth & Form	
PSYC 100	Intro Psych	
PSYC 103	Intro Experimental Psych	
PSYC 358	Human Factors	
PSYC 456	Human Performance and Cognition in Context	
Total Hours		18

Minor in Technical Systems Management

Note: This minor has prerequisites of a minimum of 60 hours with a 2.5 GPA; completion of MATH 234 or equivalent; PHYS 101 or equivalent; CHEM 102 and CHEM 103 or equivalent; and PHYS 102 or CHEM 104 and CHEM 105 or equivalent.

TSM 100	Technical Systems in Agr	3
Fifteen Hours, at least six of which must be at the 400 level, selected from:		15
TSM 232	Materials and Construction Sys	
TSM 233	Metallurgy & Welding Process	
TSM 234	Wiring, Motors and Control Sys	
TSM 262	Off-Road Equipment Management	
TSM 352	Land and Water Mgt Systems	
TSM 363	Fluid Power Systems	
TSM 371	Residential Housing Design	
TSM 372	Environ Control & HVAC Systems	
TSM 381	Grain Drying & Storage Systems	
TSM 435	Elec Computer Ctrl Sys	
TSM 464	Engine and Tractor Power	
TSM 465	Chemical Applications Systems	
TSM 496	Independent Study	
Total Hours		18

Agricultural and Consumer Economics

Paul Ellinger

332 Mumford Hall, 1301 West Gregory Drive, Urbana, (217) 333-1810

ace.illinois.edu

The Department of Agricultural and Consumer Economics (ACE) has roots that reach back over 75 years at the University of Illinois at Urbana-Champaign, a world-wide reputation for its academic excellence, and a forward-looking vision for excellence in teaching, research, and outreach related to important economic and social challenges. Visit the ACE faculty (<http://ace.illinois.edu/content/faculty>) websites to learn more about each faculty member's interests, publications, and current projects. Sample highlights include:

- Publications in high impact journals such as *Science*, *PNAS*, the *American Journal of Agricultural Economics*, the *Journal of Environmental Economics and Management*, *Food Policy* and *World Development*
- Steady funding through competitive research grants from sources like the NSF, USDA, DOD, and EPA
- Editor of the *AJAE* and Associate Editors of other top journals
- Fellows of the Agricultural and Applied Economics Association
- Elected leadership positions in professional organizations (Agricultural and Applied Economics Association, Association of Environmental and Resource Economists)

Our graduate program is highly ranked nationally, and received a rating of "Excellent" on the tier-1 research university campus of UIUC. We have three department seminars in which students can see and present work in progress, strong core coursework, and professional development through the second-year research paper requirement and end-of-program job-market seminar. Our graduate students have excellent placement both in and out of academia.

Our thriving undergraduate program has over 600 students. We offer concentrations in subjects like agribusiness, accounting, finance in agribusiness, consumer economics and finance, environmental economics, farm management, financial planning, policy and law, and international trade and development. Our hallmarks are: experiential learning outside the classroom; research opportunities in classes and through independent studies; and excellent placements both in employment and in graduate and law schools.

Synergies between the undergraduate and graduate programs give grad students opportunities for professional development in instruction, and undergrad students opportunities to learn about career options from grad-student role models.

Required Concentration	15-27
-------------------------------	-------

Concentration prescribed courses. See specific requirements for each concentration listed below.

Total Hours	126-129
-------------	---------

Approved Concentrations:

- Agri-Accounting (p. 30)
- Agribusiness Markets and Management (p. 30)
- Finance in Agribusiness (p. 31)
- Consumer Economics and Finance (p. 30)
- Environmental Economics and Policy (p. 31)
- Farm Management (p. 31)
- Financial Planning (p. 32)
- Policy, International Trade and Development (p. 32)
- Public Policy and Law (p. 32)

¹ Requirement must be satisfied by end of first year.

² Students pursuing Agricultural Accounting or Finance in Agribusiness must select ECON 202 and ECON 203.

³ Students are encouraged to complete this requirement prior to the seventh semester.

- Minor in Food and Agribusiness Management (p. 34)
- Minor in Environmental Economics and Law (p. 34)

- Minor in International Development Economics (p. 35)

Agri-Accounting Concentration

Students in Agri-Accounting complete a comprehensive program that enables them to apply accounting principles in production, processing, or retailing sectors in agribusiness industries. Graduates find professional opportunities as consultants and managerial accountants.

Required for the Agri-Accounting Concentration in Addition to Department Requirements

ACCY 202	Accounting and Accountancy II	3
ACCY 301	Atg Measurement & Disclosure	3
ACCY 302	Decision Making for Atg	3
ACCY 303	Atg Institutions and Reg	3
ACE 360	Spreadsheet Models & Applic	2
ACE 444	Finan Serv & Invest Plan	3
ACE 447	Case Stud Agr Accy & Fin Plan	3
FIN 221	Corporate Finance	3
Total Hours		23

Agribusiness Markets and Management Concentration

Students in Agribusiness Markets and Management obtain management skills; strategy development and implementation; and an awareness of the interaction among agricultural technology, supply, distribution, processing, and marketing firms in the business environment. Graduates are prepared for entry-level management, sales and marketing, and technical analyst positions, and are sought by firms involved in the production, marketing, sales, and financing of farm inputs, agricultural commodities, and food and other retail products.

Required for the Agribusiness, Markets and Management Concentration in Addition to Department Requirements

ACE 222	Agricultural Marketing	3
ACE 231	Food and Agribusiness Mgt	3
ACCY 202	Accounting and Accountancy II	3
Select three of the following:		9
ACE 427	Commodity Price Analysis	
ACE 428	Commodity Futures and Options	
ACE 430	Food Marketing	
ACE 431	Agri-food Strategic Management	
ACE 435	Global Agribusiness Management	
Total Hours		18

Consumer Economics and Finance Concentration

Students in Consumer Economics and Finance develop knowledge and skills to help consumers with everyday problems. Coursework in consumer economics, personal finance, and economics gives students a broad-based background and an understanding of the role of consumers in the marketplace. Students can choose an emphasis in consumer economics, family economics, or financial planning and counseling, which leads to career opportunities with government and public agencies, marketing and sales firms, and financial institutions.

Required for the Consumer Economics and Finance Concentration in Addition to Department Requirements

ACE 240	Personal Financial Planning	3
ACE 270	Consumer Economics	3
ACE 474	Econ of Consumption	3
ACE 476	Family Economics	3
Select two of the following:		6
ACE 445	Intermediate Personal Fin Plan	
ACE 455	Intl Trade in Food and Agr	
ACE 456	Agr and Food Policies	
ACE 471	Consumer Economic Policy	
ECON 440	Economics of Labor Markets	

ECON 482	Health Economics	
FIN 221	Corporate Finance	
Total Hours		18

Environmental Economics and Policy

Students in Environmental Economics and Policy study environmental and resource management issues at the local, state, national, and international levels. Graduates are prepared for positions in governmental, environmental, and resource management agencies; interest groups; and the environmental area of private firms. Course concentrations include law, policy, management, administration, quantitative methods, and sociology, as well as economics.

Required for the Environmental and Natural Resource Management Concentration in Addition to Department Requirements

ACE 210	Environmental Economics	3
ACE 310	Natural Resource Economics	3
ACE 406	Environmental Law	3
ACE 411	Environment and Development	3
Select one of the following:		3
GEOG 379	Intro to GIS Systems	
NRES 454	GIS in Natural Resource Mgmt	
UP 418	GIS for Planners	
Total Hours		15

Farm Management Concentration

Students in Farm Management study the principles of economics, finance, risk and the decision-making process - all central to the successful management of a farm enterprise. Students develop skills to combine and manage land, labor, and capital resources for a competitive return. Also, students may learn how to appraise farmland and other assets. Farm (and other asset) appraisal is a growing part of professional farm management and can be pursued as a profession in itself.

Required for the Farm Management Concentration in Addition to Department Requirements

ACE 222	Agricultural Marketing	3
ACE 232	Management of Farm Enterprises	3-4
ACE 345	Finan Decision Indiv Sm Bus	3
ACE 360	Spreadsheet Models & Applic	2
ACE 432	Farm Management	3
ACE 444	Finan Serv & Invest Plan	3
ACE 448	Rural Real Estate Appraisal	3
Total Hours		20-21

Finance in Agribusiness Concentration

Students in Finance in Agribusiness study finance as used in agribusiness, farming, financial institutions, and more broadly, in the financial services industry. In addition to positions as loan officers in banks and other lending institutions, recent graduates are working in trust and other banking operations, investments and securities firms, rural appraisals, financial management, financial planning, insurance, real estate, and related fields.

Required for the Finance in Agribusiness Concentration in Addition to Department Requirements

ACE 345	Finan Decision Indiv Sm Bus	3
ACE 360	Spreadsheet Models & Applic	2
ACE 444	Finan Serv & Invest Plan	3
ACE 446	Modeling App's Finan Plan	2
ACCY 202	Accounting and Accountancy II	3
FIN 221	Corporate Finance	3
Select two of the following:		6
ACE 428	Commodity Futures and Options	
ACE 447	Case Stud Agr Accy & Fin Plan	

ACE 449	Retirement & Benefit Planning	
FIN 300	Financial Markets ¹	
Total Hours		22

¹ Registration may be restricted by the department offering the course; access cannot be assured.

Financial Planning Concentration

Students in the Financial Planning concentration study finance and economics as they apply to individuals, households, and small businesses in the course of accumulating and using financial resource. Students are introduced to issues of credit management, insurance and other risk management strategies, saving and investing, retirement planning, and estate planning. Students also study the financial marketplace as it relates to the needs of households and small businesses.

Required for the Financial Planning Concentration in Addition to Department Requirements

FIN 230	Introduction to Insurance	3
ACE 240	Personal Financial Planning	3
ACE 345	Finan Decision Indiv Sm Bus	3
ACE 346	Tax Policy and Finan Planning	3
ACE 440	Finan Plan for Professionals	3
ACE 444	Finan Serv & Invest Plan	3
ACE 449	Retirement & Benefit Planning	3

Select one of the following:

ACE 445	Intermediate Personal Fin Plan	
ACE 446	Modeling App's Finan Plan	
ACE 447	Case Stud Agr Accy & Fin Plan	
ACE 476	Family Economics	

Total Hours 24

Policy, International Trade and Development Concentration

Students in Policy, International Trade, and Development enjoy a broad exposure to policy, international trade, and agricultural development from an economics perspective. The concentration provides a global and societal perspective ideally suited for exploring studies in administration, government, policy analysis, social processes, and international economics. Graduates are prepared for positions in firms with international business; in federal or state government agencies dealing with policy, trade, or development; in trade organizations; and in public interest groups.

Required for the Policy, International Trade and Development Concentration in Addition to Department Requirements

ACE 251	The World Food Economy	3
ACE 411	Environment and Development	3
or ACE 451	Agriculture in Intl Dev	
ACE 455	Intl Trade in Food and Agr	3
ACE 456	Agr and Food Policies	3

Select one of the following: 3

ACE 454	Econ Dev of Tropical Africa	
ECON 452	The Latin American Economies	

Total Hours 15

Public Policy and Law Concentration

Students in Public Policy and Law become expert in the economics of public policy in general and in its application to specific areas of interest. This concentration will expose students to the legal and institutional structures in which policies are developed, the analysis of the economics impacts of policies, and special circumstances of public policy and law pertaining to the environment, consumers, the agricultural sector, international relations, and other.

Required for the Public Policy and Law Concentration in Addition to Department Requirements

PS 220	Intro to Public Policy	3
--------	------------------------	---

ECON 411	Public Sector Economics	3
Select one of the following:		3
ACE 210	Environmental Economics	
ACE 251	The World Food Economy	
ACE 255	Econ of US Rural Poverty & Dev	
ACE 270	Consumer Economics	
Select one of the following:		3
ACE 403	Agricultural Law	
ACE 406	Environmental Law	
ECON 484	Law and Economics	
Select three of the following: (excluding courses taken to meet above "choose one" requirement)		9
ACE 306	Food Law	
ACE 310	Natural Resource Economics	
ACE 403	Agricultural Law	
ACE 406	Environmental Law	
ACE 411	Environment and Development	
ACE 451	Agriculture in Intl Dev	
ACE 454	Econ Dev of Tropical Africa	
ACE 455	Intl Trade in Food and Agr	
ACE 456	Agr and Food Policies	
ACE 471	Consumer Economic Policy	
ACE 474	Econ of Consumption	
ACE 476	Family Economics	
Total Hours		21

Minor in Environmental Economics and Law

The minor in Environmental Economics and Law is designed to provide students with basic skills in economic and legal analysis, and to teach them how to apply those tools to environmental problems. Students will emerge from this minor with in-depth knowledge about issues related to environmental protection and natural resource management and possibly sustainable development or land-use planning. There are no prerequisites for this minor.

Required for the Minor in International Development Economics

ACE 210	Environmental Economics	3
ACE 310	Natural Resource Economics	3
Select one of the following:		3-4
ACE 100	Agr Cons and Resource Econ	
ECON 102	Microeconomic Principles	
Select two of the following:		6
ACE 306	Food Law	
ACE 403	Agricultural Law	
ACE 406	Environmental Law	
BADM 300	The Legal Environment of Bus	
UP 311	Local Planning, Gov't and Law	
Select one of the following:		3
ACE 411	Environment and Development	
CEE 434	Environmental Systems I	
ECON 414	Urban Economics	
ECON 484	Law and Economics	
Total Hours		18-19

A minimum of 18 hours must be completed for this minor. Courses in the minor cannot be completed Credit/No Credit.

Enrollment in the Environmental Economics and Law minor is not available to students enrolled in the Environmental Economics and Policy concentration of the Department of ACE. Enrollment is also not available to those enrolled in the Human Dimensions of the Environment concentration of the major in Natural Resources and Environmental Sciences if enrolled in that concentration was prior to January, 2013.

Minor in Food and Agribusiness Management

The Food and Agribusiness Management minor is designed for students to deepen their knowledge of the economics and management of agribusinesses as a complement to studies and practices in their major field. Courses will address food, biofuels, biotechnology, agriculture, the environment, and management within the global agribusiness system.

Required for the Minor in Food and Agribusiness Management

ACE 100	Agr Cons and Resource Econ	3-4
or ECON 102	Microeconomic Principles	
ACE 222	Agricultural Marketing	3
ACE 231	Food and Agribusiness Mgt	3
Select at least three hours from:		3
ACE 210	Environmental Economics	
ACE 251	The World Food Economy	
ACE 306	Food Law	
ACE 345	Finan Decision Indiv Sm Bus	
ACE 360	Spreadsheet Models & Applic	
Select two of the following:		6-7
ACE 427	Commodity Price Analysis	
ACE 428	Commodity Futures and Options	
ACE 430	Food Marketing	
ACE 431	Agri-food Strategic Management	
ACE 435	Global Agribusiness Management	
ACE 436	Intl Business Immersion	

ACE 444	Finan Serv & Invest Plan	
Total Hours:		18-20

A minimum of 18 hours must be completed for this minor. Courses in the minor cannot be completed Credit/No Credit.

Enrollment in the Food and Agribusiness Minor is not available to students enrolled in the Agribusiness Markets and Management concentration of the Department of ACE, but students in other concentrations in ACE may be admitted to the minor. The 300- and 400-level courses may have additional prerequisites not included in requirements for the minor.

Minor in International Development Economics

Required for the Minor in International Development Economics

ACE 100 or ECON 102	Agr Cons and Resource Econ Microeconomic Principles	3-4
ACE 251	The World Food Economy	3
Select one of the following:		3
ACE 222	Agricultural Marketing	
ACE 254	Economic Systems in Africa	
ACE 255	Econ of US Rural Poverty & Dev	
ACE 270	Consumer Economics	
Select two of the following:		6
ACE 411	Environment and Development	
ACE 436	Intl Business Immersion	
ACE 451	Agriculture in Intl Dev	
ACE 452	The Latin American Economies	
ACE 454	Econ Dev of Tropical Africa	
ACE 455	Intl Trade in Food and Agr	
At least 12 hours taken from the preceding two categories		3
Total Hours		19

Some of these courses have additional non-ACE prerequisites. A semester-long study abroad experience in an emerging market or development economy (i.e. countries not part of the OECD) will be accepted in lieu of one of these courses.

The minor should consist of at least 19 hours of course work. At least 6 hours of the minor must be advanced (300 or 400) level courses.

Courses in the minor cannot be completed Credit/No-Credit.

Minor advising information available from:

Animal Sciences

Steven C. Loerch

116 Animal Sciences Laboratory, 1207 West Gregory, Urbana, (217) 244-1681

ansci.illinois.edu

Welcome to the Department of Animal Sciences, an academic family that includes more than 6,000 alumni, 500 undergraduate students, and more than 100 graduate students. We are proud of our legacy, and we are dedicated to enhancing the quality of life for our students and stakeholders through excellence in teaching, research and outreach programs.

Why Animal Sciences?

Students in Animal Sciences combine their interests in biology and animals in a learning environment that extends beyond the classroom. The Department of Animal Sciences offers our students opportunities to conduct undergraduate research, gain hands-on experience working in our laboratories and farms, participate in internships, and become active in a number of student organizations. For instance, our students work with beef cattle and poultry in state-of-the-art research facilities, serve internships in animal shelters and zoos, and conduct discovery research in cutting-edge

programs in immunology and reproductive biology. We provide opportunities for virtually every area of interest and our students become skilled in applying their knowledge to address real-world problems.

The work of the Department of Animal Sciences is important. Our research, teaching, and Extension programs address subjects such as bioenergy, the environment, food production, animal health, and animal behavior. We study production efficiency, profitability, and well-being of dairy and beef cattle, pigs, and poultry to enhance the supply of food for a growing world population. Our programs in companion animal biology and humane education create information for pet owners and help us understand the value of positive relationships between humans and animals. Fundamental research in physiology, nutrition, and behavior solve animal sciences problems and have significant impact on improving human health.

Our Commitment

We have a diverse and nationally respected faculty who solve problems of real importance to society and who are deeply committed to providing the best educational experiences to our students. We care about the success of our students and we provide a high-quality education that will equip them to identify and solve the challenges of the future.

The learning opportunities in the Department of Animal Sciences and the University of Illinois are without limit. Come see for yourself why the Department of Animal Sciences is held in high regard in the nation and throughout the world.

For the Degree of Bachelor of Science with a Major in Animal Sciences

Students pursuing this major select one of three concentrations:

- Companion and Equine Science Concentration (p. 36)
- Science, Pre-Veterinary and Medical Concentration (p. 39)
- Technology and Management Concentration (p. 41)

Minor in Animal Sciences

The minor in Animal Sciences is designed to provide students with a basic understanding and knowledge of a discipline subject matter area of their choice. Subject matter areas include animal production and management, nutrition, genetics, animal behavior, immunology, meat science/muscle biology, microbiology, reproductive physiology, and molecular biology. Courses in the minor cannot be completed Credit/No Credit.

Courses Required

ANSC 100	Intro to Animal Sciences	4
ANSC 101	Contemporary Animal Issues	3
Select two of the following:		6-7
ANSC 223	Animal Nutrition	
ANSC 224	Animal Reproduction and Growth	
ANSC 221	Cells, Metabolism and Genetics	
ANSC 222	Anatomy and Physiology	

Courses Required

Minimum two additional 300- or 400-level ANSC courses. These courses must be distinct from the student's major or an additional minor. ANSC 398 and ANSC 499 do not count toward the minor.

Total Hours 20

Companion and Equine Science Concentration

The companion animal and equine science concentration is designed for students intending to pursue a career in those industries generally not associated with traditional meat animal or dairy production. Students will take courses that prepare them for careers in specialized fields of animal care, animal health and animal well-being associated with zoos, kennels, research laboratories, and the racing industry.

Prescribed Courses including Campus General Education

Composition I and Speech

RHET 105	Writing and Research (or equivalent) (see college Composition I requirement)	4
CMN 101	Public Speaking	3

Advanced Composition

Select from campus approved list. 3-4

Cultural Studies

One Western culture and one non-Western U.S. minority culture course 6

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

Select one of the following: 4-5

MATH 220	Calculus
MATH 221	Calculus I
MATH 234	Calculus for Business I

Quantitative Reasoning II

Select one of the following: 3-4

ACE 261	Applied Statistical Methods
CPSC 241	Intro to Applied Statistics
ECON 202	Economic Statistics I
MATH 161	Statistics
PSYC 235	Intro to Statistics
STAT 100	Statistics
SOC 280	Intro to Social Statistics

Natural Sciences and Technology

CHEM 102 & CHEM 103	General Chemistry I and General Chemistry Lab I	4
CHEM 104 & CHEM 105	General Chemistry II and General Chemistry Lab II	4
MCB 100 & MCB 101	Introductory Microbiology and Intro Microbiology Laboratory	5

Humanities and the Arts

Courses selected from campus approved list 6

Social Sciences

ECON 102	Microeconomic Principles	3
or ACE 100	Agr Cons and Resource Econ	

Additional social or behavioral science course; cannot be an economics course. 3-4

ACES Required

ACES 101	Contemporary Issues in ACES	2
----------	-----------------------------	---

Animal Sciences Required

ANSC 100	Intro to Animal Sciences	4
ANSC 101	Contemporary Animal Issues	3
ANSC 103	Working With Farm Animals	2
ANSC 221	Cells, Metabolism and Genetics	3
ANSC 222	Anatomy and Physiology	3
ANSC 223	Animal Nutrition	3
ANSC 224	Animal Reproduction and Growth	4
ANSC 298	Undergraduate Seminar	1
ANSC 398	UG Experiential Learning	1
ANSC 498	Integrating Animal Sciences	2

Companion Animal and Equine Science Concentration Required

Select three of the following: 9

ANSC 206	Horse Management
ANSC 250	Companion Animals in Society
ANSC 306	Equine Science
ANSC 307	Companion Animal Management
ANSC 407	Animal Shelter Management
ANSC 422	Companion Animal Nutrition
ANSC 467	Applied Animal Ecology

Select one of the following:

3

ANSC 201	Principles of Dairy Production
ANSC 204	Intro Dairy Cattle Evaluation
ANSC 205	World Animal Resources
ANSC 209	Meat Animal Carcass Eval
ANSC 211	Breeding Animal Evaluation
ANSC 219	Meat Technology
ANSC 305	Human Animal Interactions
ANSC 310	Meat Selection and Grading
ANSC 312	Advanced Livestock Evaluation
ANSC 313	Horse Appraisal
ANSC 314	Adv Dairy Cattle Evaluation
ANSC 322	Livestock Feeds and Feeding
ANSC 370	Companion Animal Policy
ANSC 400	Dairy Herd Management
ANSC 401	Beef Production
ANSC 402	Sheep Production
ANSC 403	Pork Production
ANSC 404	Poultry Science
ANSC 405	Advanced Dairy Management
ANSC 409	Meat Science
ANSC 435	Milk Quality and Udder Health
ANSC 437	Adv Reproductive Management
ANSC 471	ANSC Leaders & Entrepreneurs

Select two of the following:

6

ANSC 331	Biology of Reproduction
ANSC 350	Cellular Metabolism in Animals
ANSC 363	Behavior of Domestic Animals
ANSC 366	Animal Behavior
ANSC 406	Zoo Animal Conservation Sci
ANSC 420	Ruminant Nutrition
ANSC 421	Minerals and Vitamins
ANSC 431	Advanced Reproductive Biology
ANSC 438	Lactation Biology
ANSC 440	Applied Statistical Methods I
ANSC 441	Human Genetics
ANSC 444	Applied Animal Genetics
ANSC 445	Statistical Methods
ANSC 446	Population Genetics
ANSC 448	Math Modeling in Life Sciences
ANSC 449	Biological Modeling
ANSC 450	Comparative Immunobiology
ANSC 451	Microbes and the Anim Indust
ANSC 452	Animal Growth and Development
ANSC 453	Stem Cell Biology
ANSC 509	Muscle Biology
ANSC 510	Science of Animal Well-Being
ANSC 520	Protein and Energy Nutrition
ANSC 521	Regulation of Metabolism
ANSC 522	Advanced Ruminant Nutrition
ANSC 523	Techniques in Animal Nutrition

ANSC 524	Nonruminant Nutrition Concepts
ANSC 525	Topics in Nutrition Research
ANSC 533	Repro Physiology Lab Methods
ANSC 541	Regression Analysis
ANSC 542	Applied Bioinformatics
ANSC 543	Bioinformatics
ANSC 545	Statistical Genomics
ANSC 554	Immunobiological Methods
ANSC 561	Animal Stress Physiology

Additional elective courses must be completed to yield at least 126 total Hours for graduation. 28-35

Total Hours 126

Science, Pre-Veterinary and Medical Concentration

The science and pre-veterinary medical concentration is specifically designed for students interested in graduate school, professional training, or technical positions after the undergraduate degree. It is intended to satisfy most entrance requirements to post-graduate programs and emphasizes basic science courses. The concentration enables a student to complete all of the pre-veterinary science requirements while working towards a B.S. degree.

Prescribed Courses including Campus General Education

Composition I and Speech

RHET 105	Writing and Research (or equivalent (see college Composition I requirement))	4
CMN 101	Public Speaking	3

Advanced Composition

Select from campus approved list. 3-4

Cultural Studies

One Western culture and one non-Western U.S. minority culture course 6

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

Select one of the following: 4-5

MATH 220	Calculus
MATH 221	Calculus I
MATH 234	Calculus for Business I

Quantitative Reasoning II

Select one of the following: 3-4

Total Hours 126

Technology and Management Concentration

The Technology and Management Concentration is designed for students intending to pursue a career in animal care and management or one of the associated food production industries. It emphasizes the scientific disciplines and the application of technology involved in animal production and animal products, as well as providing the opportunity to enhance a student's practical knowledge through business courses.

Prescribed Courses including Campus General Education

Composition I and Speech

RHET 105	Writing and Research (or equivalent (see college Composition I requirement))	4

Crop Sciences

Germán A. Bollero

AW-101 Turner Hall, 1102 South Goodwin, Urbana, (217) 333-3420

www.cropsci.illinois.edu

Plant your future in the Department of Crop Sciences at the University of Illinois. Join our efforts to advance science to meet the needs of a growing world population. From plant breeding and molecular biology to sustainable food and fuel production systems, our internationally recognized faculty are prepared to educate the future leaders of our industry to use the latest advancements in science and technology to improve food and fuel production.

Our department offers students opportunities to succeed and find their niche. When our students graduate, they often have more than one lucrative job opportunity waiting. The demand for our students is high and the future looks even more promising for well-trained scientists as societal demands change. For example, by 2020, estimates say 1,430 new graduates will be needed with a master's degree or Ph.D. in plant breeding alone.

Check out our undergraduate curriculum options in plant biotechnology and molecular biology, plant protection, agroecology, crop agribusiness, biological sciences, crops, sustainable landscapes and specialty crops. We also offer advanced degree programs tailored to your specific interests that will prepare you for enriching careers with a spectrum of public and private organizations in a global agricultural industry.

In order to reach our mission, we are developing and delivering educational and research programs that foster the creation and adoption of agricultural plant production systems that are profitable, environmentally sound, socially responsible and sustainable.

We are developing well educated, highly skilled and creative individuals with the potential to be national and international leaders in their field. If you are looking for a challenging, exciting career that will make a difference, I am confident our department can meet your needs.

Minor in Crop and Soil Management

The Crop and Soil Management minor is designed for students who desire a significant background in crop and soil systems to support study and practice of their major field. Selection of additional courses beyond the core will depend on the student's major and interests. Enrollment in the Crop and Soil Management minor is not available to students enrolled in the Crop Sciences major. Courses in the minor cannot be taken Credit/No Credit.

Crop and Soil Management Minor Required Courses

CPSC 112	Introduction to Crop Sciences	4
CPSC 418	Crop Growth and Management	3
NRES 201	Introductory Soils	4
NRES 488	Soil Fertility and Fertilizers	3
Select one of the following:		3-4
CPSC 116	The Global Food Production Web	
CPSC 226	Introduction to Weed Science	
CPSC 261	Biotechnology in Agriculture	
CPSC 270	Applied Entomology	
CPSC 352	Plant Genetics	
CPSC 414	Forage Crops and Pasture Eco	
CPSC 437	Principles of Agroecology	
CPSC 453	Principles of Plant Breeding	
PLPA 200	Plants, Pathogens, and People	
PLPA 204	Introductory Plant Pathology	
Select one of the following:		3-4
CPSC 116	The Global Food Production Web	
CPSC 226	Introduction to Weed Science	
CPSC 261	Biotechnology in Agriculture	
CPSC 270	Applied Entomology	
CPSC 352	Plant Genetics	
CPSC 414	Forage Crops and Pasture Eco	
CPSC 437	Principles of Agroecology	

CPSC 453	Principles of Plant Breeding	
PLPA 200	Plants, Pathogens, and People	
PLPA 204	Introductory Plant Pathology	
NRES 438	Soil Nutrient Cycling	
NRES 471	Pedology	
NRES 473	Soil Testing Practicum	
NRES 474	Soil and Water Conservation	
NRES 475	Environmental Microbiology	
NRES 487	Soil Chemistry	
Total Hours		20-22

Minor in Horticulture

The Horticulture minor is designed for students who desire a significant background in horticulture to support study and practice of their major field. Selection of additional courses beyond the core will depend on the student's major and interests. Enrollment in the Horticulture minor is not available to students enrolled in the Horticulture major. Courses in the minor cannot be taken Credit/No Credit. At least 6 hours of the minor must be advanced (300 or 400) level courses that are distinct from classes meeting requirements in the student's major.

Horticulture Minor Required Courses

Select one of the following:		3
HORT 100	Introduction to Horticulture	
HORT 105	Vegetable Gardening	
HORT 106	Home Horticulture	
HORT 240	Plant Propagation	3
Select four or five of the following:		12-15
HORT 215	Grasses in Managed Settings	
HORT 246	Floral Design I	
HORT 255	Multifunctional Landscapes	
HORT 261	Biotechnology in Agriculture	
HORT 301	Woody Landscape Plants I	
HORT 316	Landscaping with Native Plants	
HORT 341	Greenhouse Mgmt and Production	
HORT 343	Herbaceous Plants I	
HORT 344	Herbaceous Plants II	
HORT 355	Landscape Graphics & Design	
HORT 361	Small Fruits and Viticulture	
HORT 362	Tree Fruit Production	
HORT 363	Postharvest Handling Hort Crop	
HORT 421	Horticultural Physiology	
HORT 441	Floral & Nursery Crops Productn	
HORT 442	Plant Nutrition	
Total Hours		18-21

Agroecology Concentration

The Agroecology Concentration addresses ecologically based management of cropping systems, stewardship of the environment, and sustainable food production systems. The intersection between crop plants and their environment is emphasized in this concentration. Graduates of the Agroecology concentration are prepared for careers in integrated plant health management, government regulatory and environmental agencies or for entrance into graduate or professional school.

Biological Sciences Concentration

The biological sciences concentration is designed for students who plan to enter a graduate study program or who want professional positions that require more science than is included in the other concentrations. Students follow a first-year program of General Education courses similar to students in other Crop Sciences concentrations. Programs for the second, third, and fourth years are planned in consultation with the student's faculty advisor, in the area of biological sciences. Students and advisors are encouraged to consult individual graduate schools for the specific entrance requirements. Although flexibility in individual course selection is a characteristic of this concentration, graduation requirements are established by selection of elective courses.

--------------------	-----

Approved Concentrations:

- Agroecology Concentration (p. 46)
- Biological Sciences Concentration (p. 47)
- Crop Agribusiness Concentration (p. 49)
- Crops Concentration (p. 50)
- Integrated Pest Management Concentration (p. 52)
- Plant Biotechnology and Molecular Biology Concentration (p. 53)

Crops Concentration

The crops concentration is designed for students with an interest in agronomic crop plants. Students study the diversity of crop plants-how they grow and how they are grown. This concentration prepares students for careers in crop production and marketing, cropping systems management, plant breeding, and seed merchandising, or for entrance into graduate school.

NRES 489	Physics of Plant Environments	
Total ACES prescribed and elective courses must total 35 hours, of which 20 hours must be completed in residence.		35
Total Hours		126

Integrated Pest Management Concentration

The integrated pest management concentration provides a broad selection of courses in crops, soils, plant diseases, insects and weeds, and the physical sciences. Students learn how to protect plants from the effects of diseases, insects, and weeds. This concentration is designed to prepare students for careers in crop consulting, integrated pest management, and agribusiness management and merchandising, or for entrance into a graduate program.

PLPA 401	Plant Pathogenic Fungi	
PLPA 402	Phytoparasitic Nematodes	
PLPA 404	Plant Virology	
PLPA 407	Diseases of Field Crops	
TSM 465	Chemical Applications Systems	

Total ACES prescribed and elective courses must total 40 hours, of which 20 must be completed in residence.

40

Plant Biotechnology and Molecular Biology Concentration

The plant biotechnology and molecular biology concentration provides a curriculum that prepares students for careers in biotechnology or for entrance into graduate or professional school. The basic sciences are emphasized, including a strong foundation in biology and genetics. Students are encouraged to participate in undergraduate independent study in a molecular biology laboratory. For those who wish to pursue graduate work later, adequate preparation may be obtained by suitable choices of electives within the framework of this concentration.

Natural Sciences and Technology

CHEM 102 & CHEM 103	General Chemistry I and General Chemistry Lab I	4
CHEM 104 & CHEM 105	General Chemistry II and General Chemistry Lab II	4
IB 150	Organismal & Evolutionary Biol	4

Plant Biotechnology and Molecular Biology Concentration Required

CHEM 232	Elementary Organic Chemistry I	3 OR 4
CHEM 233	Elementary Organic Chem Lab I	2
CPSC 112	Introduction to Crop Sciences	4
CPSC 261	Biotechnology in Agriculture	3
CPSC 265	Genetic Engineering Lab	3
CPSC 352	Plant Genetics	4
CPSC 484	Plant Physiology	3
CPSC 498	Crop Sci Professional Developmt	1
Select two of the following:		6-8
CPSC 226	Introduction to Weed Science	
CPSC 270	Applied Entomology	
PLPA 204	Introductory Plant Pathology	
Select two of the following:		6-8
CPSC 418	Crop Growth and Management	
CPSC 452	Evol Genetics and Genomics	
CPSC 453	Principles of Plant Breeding	
CPSC 466	Genomics for Plant Improvement	
Select one of the following:		3-4
ANSC 100	Intro to Animal Sciences	
FSHN 101	Intro Food Science & Nutrition	
HORT 100	Introduction to Horticulture	
NRES 102	Introduction to NRES	
TSM 100	Technical Systems in Agr	
Select one of the following:		3-4
MCB 450	Introductory Biochemistry	
MCB 421	Microbial Genetics	
MCB 430	Molecular Microbiology	
Three courses/groups selected from:		10-15
IB 103	Introduction to Plant Biology	
IB 104	Animal Biology	

MCB 100 & MCB 101	Introductory Microbiology and Intro Microbiology Laboratory
MCB 150 & MCB 151	Molec & Cellular Basis of Life and Molec & Cellular Laboratory
MCB 300 & MCB 301	Microbiology and Experimental Microbiology

Total ACES prescribed and elective courses must total 30 hours, of which 15 must be completed in residence.

30

Horticulture

For the Degree of Bachelor of Science in Horticulture

Prescribed Courses including Campus General Education

Composition I and Speech

RHET 105	Writing and Research (or equivalent (see College Composition I requirement))	4
CMN 101	Public Speaking	3

Advanced Composition

See campus approved list.		3
---------------------------	--	---

Cultural Studies

Select one course from Western culture and one from non-Western/U.S. minority culture from campus approved list.		6
--	--	---

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

Select one of the following:		3-5
------------------------------	--	-----

MATH 124	Finite Mathematics	
MATH 220	Calculus	
MATH 234	Calculus for Business I	

Quantitative Reasoning II

CPSC 241	Intro to Applied Statistics	3
----------	-----------------------------	---

Natural Sciences and Technology

CHEM 102 & CHEM 103	General Chemistry I and General Chemistry Lab I	4
CHEM 104 & CHEM 105	General Chemistry II and General Chemistry Lab II	4
IB 103	Introduction to Plant Biology	4

Humanities and the Arts

Select from campus approved list.		6
-----------------------------------	--	---

Social and Behavioral Sciences

ACE 100 or ECON 102	Agr Cons and Resource Econ Microeconomic Principles	4
Soc. & Behavioral Sci. course selected from campus approved list. Preferred: NRES 287 - Environment and Society		3

ACES Required

ACES 101	Contemporary Issues in ACES	2
----------	-----------------------------	---

Plant Sciences Required

CPSC 226	Introduction to Weed Science	3
CPSC 270	Applied Entomology	3
CPSC 498	Crop Sci Professional Developmt	1
NRES 201	Introductory Soils	4
PLPA 204	Introductory Plant Pathology	3

Horticulture Required

HORT 100	Introduction to Horticulture	3
HORT 240	Plant Propagation	3
HORT 293 or HORT 294	Professional Internship Resident Internship	1-4
HORT 341	Greenhouse Mgmt and Production	4

Select one of the following:		3-4
------------------------------	--	-----

HORT 421	Horticultural Physiology	
HORT 466	Growth and Dev of Hort Crops	
IB 420	Plant Physiology	

Business Required

Select one of the following:	3
ACCY 200	Fundamentals of Accounting
ACE 231	Food and Agribusiness Mgt
BADM 310	Mgmt and Organizational Beh
ACE 222	Agricultural Marketing
BTW 250	Principles Bus Comm

Required Concentration

Concentration prescribed courses. See specific requirements for each concentration listed below.

Approved Concentrations:

Specialty Crops (p. 56)

Sustainable Landscapes (p. 56)

Specialty Crops Concentration

This concentration prepares students for careers in horticultural production, marketing, management, and use of horticultural crops, including flowers, food crops, ornamentals and turfgrass; for careers in teaching and/or research in horticulture; or for careers in businesses providing services related to horticultural industries.

Specialty Crops Concentration Required

CPSC 352	Plant Genetics	4
Select one of the following:		2-4

HORT 363	Postharvest Handling Hort Crop	
HORT 442	Plant Nutrition	
HORT 482	Plant Tissue Culture	
NRES 488	Soil Fertility and Fertilizers	
CHEM 232	Elementary Organic Chemistry I	3 OR 4
or CPSC 382	Organic Chem of Biol Processes	

Specialty Crops Concentration Electives

Select 15 hours from the following:		15
HORT 205	Local Food Networks	
HORT 246	Floral Design I	
HORT 361	Small Fruits and Viticulture	
HORT 362	Tree Fruit Production	
HORT 363	Postharvest Handling Hort Crop	
HORT 441	Floral & Nursery Crops Productn	
HORT 447	Horticultural Plant Breeding	
HORT 453	Principles of Plant Breeding	
HORT 464	International Hort Products	

Sustainable Landscapes Concentration

Students in the Sustainable Landscapes concentration study horticulture with a strong emphasis on the physical and biological sciences. Students will develop basic landscape design and plant identification skills, as well as an understanding of approaches to the design, installation and management of urban and suburban landscapes in a sustainable manner. Courses focus on plant materials, environmental systems, sustainable design, and landscape construction and maintenance.

Sustainable Landscapes Concentration Required

HORT 255	Multifunctional Landscapes	3
HORT 301	Woody Landscape Plants I	4
HORT 355	Landscape Graphics & Design	3
HORT 456	Sustainable Landscape Design	4-5

Select three of the following:	9-12
--------------------------------	------

HORT 215	Grasses in Managed Settings
HORT 316	Landscaping with Native Plants
HORT 343	Herbaceous Plants I
HORT 344	Herbaceous Plants II
Select one of the following:	
CPSC 336	Tomorrow's Environment
CPSC 431	Plants and Global Change
CPSC 437	Principles of Agroecology
NRES 219	Principles of Ecosystem Mgmt
NRES 420	Restoration Ecology
NRES 465	Landscape Ecology

3-4

Food Science and Human Nutrition

Sharon Nickols-Richardson

260 Bevier Hall, 905 South Goodwin, Urbana, (217) 244-4498

www.fshn.illinois.edu

The Department of Food Science and Human Nutrition (FSHN) at the University of Illinois at Urbana-Champaign is dedicated to implementing education, research, and outreach programs designed to provide a safe, nutritious, and affordable food supply that enhances human health. To this end, students and faculty work collectively toward learning, discovering, and disseminating new knowledge and in applying novel technologies to achieve the departmental mission. The basic human need for high quality food for optimal health and wellness drives the core of student training within the FSHN Department.

Undergraduate concentrations leading to the B.S. degree include Dietetics, Food Science, Hospitality Management, and Human Nutrition. Career opportunities for graduates of our program are excellent and include position titles including nutritionists, dietitians, food technologists, product research and development and food systems management. Graduate students may pursue M.S. and Ph.D. degrees, focusing on original research in the general concentrations of Food Science or Human Nutrition. The FSHN Department also offers a non-thesis Professional Science Master's degree that includes foundational courses within the department along with business and marketing courses. The University of Illinois Online Food Science Master's Degree Program is a popular option for individuals working full-time and who desire a non-thesis M.S. degree in Food Science. Advanced degrees lead to accelerated careers in industry, government, and academia.

Departmental faculty expertise includes:

- * Food microbiology, safety, and nutritional value;
- * Food materials science;
- * Diets and foods for disease prevention, including obesity, cancer and other metabolic conditions;
- * Infant, childhood, and community nutrition;
- * Food processing;
- * Value-added biotransformation; and
- * Gut health and the microbiome.

The FSHN Department values diversity in people, cultures, learning, and science. Collaboration with experts in engineering, biomedical sciences, cellular and molecular biology, and multiple disciplines within the field of agricultural, consumer, and environmental sciences (ACES) is important and routine for students and faculty to promote health, wellness, and sustainable human and economic development.

For the Degree of Bachelor of Science in Food Science and Human Nutrition

Prescribed Courses including Campus General Education

Composition I and Speech

Select one of the following: 6-7

RHET 105 & CMN 101	Writing and Research and Public Speaking (or equivalent) (see college Composition I requirement)
CMN 111 & CMN 112	Oral & Written Comm I and Oral & Written Comm II

Advanced Composition

Select one course from campus approved list of Advanced Composition courses. 3-4

Cultural Studies

Select one course from Western culture and one from non-Western/U.S. minority culture from campus approved list. 6

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

Select one of the following: ¹ 4-5

MATH 220	Calculus
MATH 221	Calculus I
MATH 234	Calculus for Business I

Quantitative Reasoning II

Select one of the following:

3-4

ACE 261	Applied Statistical Methods
CPSC 241	Intro to Applied Statistics
ECON 202	Economic Statistics I
MATH 161	Statistics
PSYC 235	Intro to Statistics
STAT 100	Statistics

Natural Sciences and Technology

MCB 101	Intro Microbiology Laboratory	2

Humanities and the Arts

Six hours for Dietetics, Hospitality Management, and Food Science Concentrations; nine hours for Human Nutrition and Food Industry & Business Concentrations. Select from campus approved list.

6-9

Social and Behavioral SciencesSelect from campus approved list and/or see individual concentration.²

9

ACES Prescribed Course

ACES 101	Contemporary Issues in ACES	2
----------	-----------------------------	---

Required Concentration

Concentration prescribed courses. See specific requirements for each concentration listed below.

Total Hours

126

Approved concentrations:

- Food Science Concentration (p. 61)
- Food Industry and Business Concentration (p. 60) (Admission suspended Fall, 2012)
- Dietetics Concentration (p. 59)
- Human Nutrition Concentration (p. 63)
- Hospitality Management Concentration (p. 62)

¹ Students in the Food Science Concentration must select from MATH 220 or MATH 221.² Six hours for Food Science concentration.

- Minor in Food Science (p. 64)
- Minor in Nutrition (p. 64)

Dietetics Concentration

The Dietetics Concentration meets the requirements set by the Accreditation Council on Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND) and qualifies students for competitive dietetic internships. Upon completion of a postgraduate internship, students selecting this concentration may take the examination to become Registered Dietitians. Students choosing this concentration who do not complete an internship will be prepared for entry-level supervisory positions in food service facilities and in the food and pharmaceutical industries. A minimum of 126 hours of credit is required for graduation.

CHLH 304	Foundations of Health Behavior	

Food Industry and Business Concentration

The Food Industry and Business concentration is designed for students interested in integrating science, technology, business, and communications with the goal of pursuing professional and management careers in food and food-related industries. The program comprises science, food science, nutrition, business, and communications, and is supplemented by a 12-credit-hour specialization in a recommended area, such as food quality and safety, nutrition, business, or communications. Special emphasis is placed on areas of concern to consumers and to the food industry, such as food safety, sensory evaluation, and nutrition. The total number of hours required for graduation is 126.

Note: This Concentration is in phase-down. Admission is suspended as of Fall, 2012.

Other Natural Sciences and Technology Required Courses

CHEM 232	Elementary Organic Chemistry I	3 OR 4

FSHN 332	Science of Food Systems	
FSHN 398	Undergraduate Seminar	
FSHN 465	Principles of Food Technology	
FSHN 466	Food Product Development	
FSHN 471	Food & Industrial Microbiology	

Additional Concentration Courses

A minimum of 12 hours from courses, approved by the advisor, in specialty area outside Food Science and Human Nutrition. At least six of the hours must be in 300- or 400-level courses. The list of courses agreed upon by the student and advisor must be signed and submitted to ACES Academic Programs (128 Mumford Hall) at least one semester prior to graduation. These courses cannot be used to fill other requirements.

12

Food Science Concentration

The Food Science concentration exposes students to all components of food production: harvesting and raw-product handling, food-processing procedures and techniques, packaging, and food storage. Students selecting this concentration are prepared for careers in many areas of the food industry. A minimum of 130 hours of credit is required for graduation.

Other Natural Sciences and Technology Required Courses

CHEM 232	Elementary Organic Chemistry I	3 OR 4
CHEM 233	Elementary Organic Chem Lab I	2

ANSC 350 or MCB 450	Cellular Metabolism in Animals Introductory Biochemistry	3

Hospitality Management Concentration

The Hospitality Management concentration prescribes courses that meet the professional needs of the hospitality industry and career goals of students entering the major. The concentration is designed for students interested in integrating the basic principles of business and hospitality management with the goal of pursuing professional and management careers in hospitality-related industries. The program comprises 35 hours of hospitality-related course work, including food science; food management; nutrition; sanitation; purchasing; and the management of institutional, commercial, and fine dining facilities. This concentration is unique compared to other hospitality management programs offered at other institutions because it is science-based. The total number of hours required for graduation is 126.

Social and Behavioral Sciences

PSYC 100	Intro Psych	4
ACE 100 or ECON 102	Agr Cons and Resource Econ Microeconomic Principles	3-4
SOC 100	Introduction to Sociology	4

FSHN 332	Science of Food Systems	3
FSHN 340	Food Production and Service	4
FSHN 345	Hospitality Purchasing	3
FSHN 349	Food Service Sanitation	1
FSHN 293	Off Campus Internship	2-4
FSHN 442	HM Skills and Applications	3
FSHN 443	Management of Fine Dining	4

Human Nutrition Concentration

This program of study provides the background for students who plan to pursue careers in nutrition and related health sciences. This concentration focuses on the field of human nutrition and reflects the growing need to prepare individuals for careers in health and nutrition. For students who expect to pursue advanced degrees in nutritional sciences or professional degrees in medicine, dentistry or law, the human nutrition concentration may be chosen. The concentration emphasizes a strong science background and allows students to obtain a strong human nutrition preparation that is not available elsewhere on campus. For those interested in practicing nutrition or nutrition counseling, please see Dietetics. The total number of hours required for graduation is 126.

Other Natural Science and Technology Required

CHEM 232	Elementary Organic Chemistry I	3 OR 4
CHEM 233	Elementary Organic Chem Lab I	2
MCB 244 & MCB 245	Human Anatomy & Physiology I and Human Anat & Physiol Lab I	5
MCB 246 & MCB 247	Human Anatomy & Physiology II and Human Anat & Physiol Lab II	5
MCB 450	Introductory Biochemistry	3

Human Nutrition Required

ACE 161	Microcomputer Applications	3
FSHN 101	Intro Food Science & Nutrition	3
FSHN 220	Principles of Nutrition	4
FSHN 420	Nutritional Aspects of Disease	3
FSHN 426	Biochemical Nutrition I	3
FSHN 427	Biochemical Nutrition II	3

Select two of the following:		6
------------------------------	--	---

FSHN 302	Sensory Evaluation of Foods	
FSHN 322	Nutrition and the Life Cycle	
FSHN 329	Communication in Nutrition	
FSHN 332	Science of Food Systems	
FSHN 344	Business Etiquette	
FSHN 345	Hospitality Purchasing	
FSHN 349	Food Service Sanitation	
FSHN 414	Food Chemistry	
FSHN 418	Food Analysis	
FSHN 421	Pediatric Clinical Nutrition	
FSHN 425	Food Marketing	
FSHN 428	Community Nutrition	
FSHN 429	Nutrition Assessment & Therapy	
FSHN 440	Applied Statistical Methods I	
FSHN 460	Food Processing Engineering	
FSHN 461	Food Processing I	

A minimum of two science courses, approved by the advisor. Courses cannot be used to fulfill other requirements.

6

Minor in Food Science

The minor in Food Science is designed to broaden the student's knowledge of science and in particular food chemistry, food microbiology, and food engineering. The Food Science minor is also suitable for students who intend to pursue careers in engineering, microbiology, chemistry, scientific journalism, hospitality management, or science secondary education.

Courses required for minor in food science

FSHN 101	Intro Food Science & Nutrition	3
FSHN 414	Food Chemistry	3
Select one of the following:		3-7
FSHN 465	Principles of Food Technology	
FSHN 461 & FSHN 462	Food Processing I and Food Processing II ¹	
FSHN 471	Food & Industrial Microbiology	3
Select one of the following:		3-6
FSHN 232	Science of Food Preparation	
FSHN 260	Raw Materials for Processing	
FSHN 302	Sensory Evaluation of Foods	
FSHN 416	Food Chemistry Laboratory	
FSHN 418	Food Analysis	
FSHN 460	Food Processing Engineering	
FSHN 466	Food Product Development	
ANSC 350	Cellular Metabolism in Animals	
MCB 450	Introductory Biochemistry	
ABE 483	Engrg Properties of Food Matls	
Total Hours Required		18

¹ For a FS minor with an emphasis in food processing it is recommended that students select the FSHN 461 and FSHN 462 option. However, FSHN 461 and FSHN 462 have prerequisites that not every student seeking a minor may choose to meet. Note: Students cannot take both FSHN 461 and FSHN 462 and FSHN 465.

Minor in Nutrition

The minor in Nutrition is designed to broaden the student's knowledge of the biological sciences, with a particular emphasis on the science of nutrition. The field of nutrition is interdisciplinary. A minor in nutrition would benefit those students who intend to pursue careers in the food or health and fitness industries, or those planning to enter the medical, dental, or veterinary professions.

Required Courses for Minor in Nutrition

FSHN 220	Principles of Nutrition	4
FSHN 420	Nutritional Aspects of Disease	3
FSHN 426	Biochemical Nutrition I	3
FSHN 427	Biochemical Nutrition II	3
Select two of the following:		6
FSHN 322	Nutrition and the Life Cycle	
FSHN 332	Science of Food Systems	
FSHN 421	Pediatric Clinical Nutrition	
FSHN 428	Community Nutrition	
FSHN 429	Nutrition Assessment & Therapy	
ANSC 420	Ruminant Nutrition	
Total Hours		19

Human and Community Development

Susan Koerner

222 Bevier Hall

905 South Goodwin Avenue

Urbana, IL 61801, (217) 333-3790

<http://hcd.illinois.edu>

The Department of Human and Community Development (HCD) at the University of Illinois at Urbana-Champaign engages in teaching, research, and outreach to improve the lives of children, youth, and adults in the contexts of families, communities, and societies. The department creates an environment where these efforts are enriched by a multicultural perspective. HCD faculty recognize the diversity of cultures and classes in American society, and this perspective prepares students to address contemporary social issues.

Teaching: Our faculty regularly earn campus and national awards for outstanding teaching. Our teaching assistants who provide support to students outside of the classroom and in small discussion sections routinely are rated as among the best TAs on campus. In recent years, Drs. Jennifer Hardesty (http://hcd.illinois.edu/people/faculty/hardesty_jennifer/profile.html) and Ramona Oswald (http://hcd.illinois.edu/people/faculty/oswald_ramona_f/profile.html) earned national awards for teaching excellence. Lyndal Khaw (http://hcd.illinois.edu/people/graduates/khaw_lyndal/profile.html), a graduate student, earned a campus award for teaching.

Study Abroad: There are many opportunities (http://hcd.illinois.edu/student_information/studyabroad.html) for our students to study abroad. We sponsor two short programs in South Africa and Brazil where our students get experience with learning the culture and understanding the needs of children and families in poverty. Currently, about 30% of our students have participated in study abroad sometime during their four years, and more are participating every year.

Undergraduate Research Experience: About 50% of our undergraduate students go on to graduate school. During their undergraduate program, they have many opportunities to work with graduate students and faculty on important scientific questions about children and families. Close to 50% of our undergraduate students participate in at least one research opportunity.

Undergraduate Program: Our program in Human Development and Family Studies prepares students for careers working with children, adolescents, and families. Students have the opportunity to work with children, families, and professionals in the Child Development Laboratory (<http://cdl.illinois.edu>), the Child Care Resource Service (<http://ccrs.illinois.edu>), the Family Resiliency Center (<http://familyresiliency.illinois.edu>), The Autism Program (<http://go.illinois.edu/tap>), and numerous social service, child assistance, and family social service agencies. This hands-on experience complements classroom instruction.

Graduate Program: This program (http://hcd.illinois.edu/student_information/current_programs.html) prepares students for careers in higher education, social service administration, and public policy settings. Our students are involved in significant research activities and have the opportunity to participate in outreach work that translates research to practice. We have advanced research facilities for studying children in our Child Development Laboratory. We have a unique family observation research facility at the Family Resiliency Center that allows for intricate study of family interactions in a home-like atmosphere. There is support for students in terms of teaching assistantships, research assistantships, and fellowships. Our students complete their programs with many awards, publications, and other important achievements.

Research: Our faculty are among the top scientists studying children and families in the world. They focus on significant societal issues. (<http://hcd.illinois.edu/research>) Our work could be described as “science with a social conscience.” Faculty are interested in the most challenging basic scientific issues, but they are always asking how this information can be applied or how they can make a difference.

Preparation of Advanced Methods in Unique Laboratory Facilities: Faculty and students are engaged in developing and mastering the most sophisticated quantitative and qualitative methods available to social and behavioral scientists and to practicing these skills in state-of-the-art laboratories.

Collaborative and Collegial Interactions: Professor Isabel Bevier, a pioneering scientist in 1900, noted that the wide-open Illinois prairie provided “no boundaries,” and this characterized the faculty’s intellectual orientation as well. Our faculty work across disciplines, programs, and methodologies, and they work with colleagues across settings, departments, and institutions.

Faculty with Major Scientific Leadership Roles: Our faculty are not only excellent researchers and scholars, but they are also leaders in the scientific community. They are recognized by their peers for awards and hold elective office. They are invited to give lectures at major national meetings and at universities across the world. They serve as editors of the major journals in the field.

Outreach and Extension: Our faculty are not content just to find out more about children and families; they want to improve their lives. We have a long tradition of creating unique educational resources and programs for helping families. For the past fifteen years, our faculty have been especially interested in creating web-based educational resources. Dr. Aaron Ebata has been at the forefront of educating parents online with the latest version being Parenting 24/7 (<http://parenting247.org>). Parents who are interested in managing work and life issues more effectively can gain information from Intentional Harmony (<http://worklife.illinois.edu>).

In addition to these online educational programs, our Department was one of the pioneers in providing information and resources to parents about child care. From the humble beginnings of a telephone and desk in the hallway staffed by a part-time person, the Child Care Resource Service (<http://ccrs.illinois.edu>) today is one of the national leaders in innovative methods of providing resource and referral services to families.

Similarly, The Autism Program (<http://go.illinois.edu/tap>) provides information, consultation, and training for families who have children with autism, as well as for professionals who serve these families.

Another long-time feature of the department is working with Family Life Extension Educators (http://hcd.illinois.edu/outreach/family_life_extension.html) across Illinois who are adept at providing community-based educational programs to fit the specialized needs of family members. These educators have developed unique skills for reaching underserved rural and urban families who often would not have the opportunity to learn about children and families.

The Human Development and Family Studies program prepares students for graduate/professional education or employment in areas such as child care services, family life education, social work, counseling, human services, marriage and family therapy, medicine and allied health fields, pediatric services in hospitals, law, human resources, and business activities related to children and families. Students select course work according to their interests in human development, such as infancy, early childhood or adolescence, or family studies, such as the marital relationship, parent-child interaction, family change or conflict and conflict management in the family. Basic courses in these areas are linked to practical experiences in educational and community settings, and most courses emphasize issues related to cultural diversity and gender. Students select one of two concentrations within this major: Child and Adolescent Development or Family Studies.

For the Degree of Bachelor of Science with a Major in Human Development and Family Studies

Prescribed Courses including Campus General Education

Composition I and Speech

Select one of the following:

6-7

RHET 105 & CMN 101	Writing and Research and Public Speaking (or equivalent) (see college Composition I requirement)
CMN 111 & CMN 112	Oral & Written Comm I and Oral & Written Comm II

Advanced Composition

Select from campus approved list.

3-4

Foreign Language

Coursework at or above the third level is required for graduation.

Cultural Studies

Select one course from Western culture and one from non-Western/U.S. minority culture from campus approved list

6

Quantitative Reasoning I

Select one of the following:

3-5

MATH 124	Finite Mathematics
MATH 220	Calculus
MATH 221	Calculus I
MATH 234	Calculus for Business I

Quantitative Reasoning II

Select one of the following:

3-4

ACE 261	Applied Statistical Methods
CPSC 241	Intro to Applied Statistics
ECON 202	Economic Statistics I
MATH 161	Statistics
PSYC 235	Intro to Statistics
SOC 280	Intro to Social Statistics
STAT 100	Statistics

Natural Sciences and Technology

ANTH 143 Biology of Human Behavior

3

Life or Physical Science course. Select from campus approved list.

3-5

Humanities and the Arts

Select from campus approved list.

6

Social and Behavioral Sciences

PSYC 100	Intro Psych	4
SOC 100	Introduction to Sociology	4

Select one of the following: 3-4

ACE 100	Agr Cons and Resource Econ	
ECON 102	Microeconomic Principles	
ECON 103	Macroeconomic Principles	

ACES Required

ACES 101	Contemporary Issues in ACES	2
----------	-----------------------------	---

Human Development and Family Studies Required

ACE 161	Microcomputer Applications	3
FSHN 120	Contemporary Nutrition	3
HDFS 105	Intro to Human Development	3
HDFS 290	Intro to Research Methods	4
HDFS 120	Intro to Family Studies	3
HDFS 220	Families in Global Perspective	3

Select one of the following: 3

HDFS 208	Child Fam with Special Needs	
HDFS 321	Asian Families in America	
HDFS 340	Gender, Relationships & Society	
HDFS 341	Asian American Youth	
HDFS 379	HDFS Study Abroad Experience	
HDFS 422	US Latina and Latino Families	

ACES courses selected from outside HDFS (minimum 6 hours) 6

Required Concentration 24

Concentration prescribed courses. See specific requirements for each concentration listed below.

Additional courses must be completed to yield a total of 126 hours for graduation. 20

Total Hours 126

Approved Concentrations:

- Child and Adolescent Development Concentration (p. 67)
- Family Studies Concentration (p. 68)

Child and Adolescent Development Concentration

The Child and Adolescent Development concentration emphasizes the influence of families, peer groups, schools and communities on the well-being of children and adolescents. Graduates with this concentration are qualified to provide a wide range of services and lead programs for children and their families. Career opportunities include early childhood education, parent education, developmental therapy, Child Life specialty, adoption case work and day-care administration. Graduates also may choose to pursue graduate education in a variety of fields, including human development research, education, psychology, social work, law, medicine, and business.

Child and Adolescent Development Concentration Required

HDFS 301	Infancy & Early Childhood	4
HDFS 305	Middle Childhood	3
HDFS 401	Socialization and Development	4
HDFS 405	Adolescent Development	3

Select one of the following: 3-5

HDFS 206	Early Childhood Curriculum Dev	
HDFS 294	Research Internship	
HDFS 406	Child Dev Class Supervision	
HDFS 450	Practicum in HDFS	
HDFS 494	Applied Research Methods	

Select one of the following: 3-5

HDFS 420	Family Diversity in the U.S.	
HDFS 425	Critical Family Transitions	
HDFS 426	Family Conflict Management	
HDFS 421/HIST 471		
HDFS 427	Family Adaptation & Resilience	
Total Hours		20-24

Family Studies Concentration

Students in the Family Studies concentration focus on how families operate, develop and change in response to the challenges of modern life. Students learn to appreciate the diversity of family life by studying different cultures and how families learn to manage conflict. Graduates with this concentration are qualified to provide many services to couples and families. Career opportunities include family life educator, human resource specialist, caseworker or family service coordinator. Graduates also may choose to pursue graduate education in a variety of fields, including family studies, marriage and family therapy, social work, education, sociology, psychology, law, medicine, or business.

Family Studies Concentration Required

HDFS 425	Critical Family Transitions	4
Select one of the following:		3-4
HDFS 301	Infancy & Early Childhood	
HDFS 305	Middle Childhood	
HDFS 401	Socialization and Development	
HDFS 405	Adolescent Development	
Select two of the following:		3
HDFS 225	Close Relationships	
HDFS 420	Family Diversity in the U.S.	
HDFS 421/HIST 471		
HDFS 426	Family Conflict Management	
HDFS 427	Family Adaptation & Resilience	
Select one of the following:		3-4
HDFS 206	Early Childhood Curriculum Dev	
HDFS 294	Research Internship	
HDFS 450	Practicum in HDFS	
HDFS 494	Applied Research Methods	
Total Hours		13-15

Natural Resources and Environmental Sciences

<http://www.nres.illinois.edu>

nres-ssc@illinois.edu

NRES provides outstanding undergraduate and graduate educational opportunities. Many alumni of our B.S. program have gone on to complete graduate and professional degrees. Our graduates work in environmental science and natural resource management positions in government, corporations, consulting firms, and non-governmental organizations. NRES also offers traditional Master of Science, online Master of Science, and Doctor of Philosophy degrees. Our graduate students gain employment with research universities, government agencies, national and international non-governmental organizations, and business enterprises.

All NRES educational and research programs center on science, applied ecology, and conservation in a variety of aquatic, terrestrial and human dominated ecosystems. Within that framework, our faculty, staff, and students study a wide variety of ecological systems with emphases on soil, water, people and social systems, forests, plants, animals, and microbes. Much of our research focuses on natural and social processes, such as habitat fragmentation, regulation, dispersal, disturbance, invasion, bioactivity, and decision-making. We research and work in locations locally, across the United States, and around the world.

Designed for students interested in careers leading the conservation, protection, and management of natural and environmental resources or in pursuing advanced education in one of its many disciplinary areas, the NRES baccalaureate provides a science-based, application-oriented education. The NRES major is unique in its integration of a comprehensive physical, life, and social sciences background with coursework providing the management, decision-making, and analytical knowledge and skills required to solve the world's most pressing problems.

Students in the NRES major begin their studies by taking a set of core courses that provides the background for more focused substantive study at the upper level. The NRES core introduces students to the range of physical, life, and social science content most relevant to their future professions and equips them with tools essential for the discovery, analysis, and application of knowledge important for successful environmental management. NRES students then build upon the core by completing one of four upper-level Concentrations. Courses in the Concentrations involve focused attention to the theories, data, and analytical tools of a particular set of natural resource and environmental science areas, helping students develop the necessary understanding of the complexities underlying resources management. All students in the major are required to complete a combination of field courses and at least one project-oriented capstone course.

All the Concentrations prepare students for graduate study as well as for multiple career paths throughout the public and private sectors. Because of its unique orientation toward integrative application of disciplinary knowledge, the NRES major prepares students for a wide range of careers involving the conservation, protection, and management of natural resources. Many occur within business or government agencies that provide services related to environmental and natural resource management. Other careers are found within social, professional, and advocacy institutions that focus on human impacts and environmental sustainability. The major also prepares students for teaching, research, or other professional activities.

Graduates from the NRES major go on to pursue careers in the direction of environmental education centers; ecological management and restoration; enforcement of laws and regulations; environmental advocacy; environmental consulting; forest and environmental economics; land use analysis and management; law; local, state, and federal government; management of parks, forests and rangelands; plant physiology; policy development and implementation; resource planning and policy analysis; social and environmental impact analysis; soil conservation, science, and testing; technical sales; watershed management; and wildlife conservation and management.

For the Degree of Bachelor of Science in Natural Resources and Environmental Sciences

Prescribed Courses including Campus General Education

Composition I and Speech

Select one of the following:

6-7

RHET 105 & CMN 101	Writing and Research and Public Speaking (or equivalent) (see College Composition I requirement)
CMN 111 & CMN 112	Oral & Written Comm I and Oral & Written Comm II

Advanced Composition

Select from campus approved list

3-4

Cultural Studies

Select one course from Western culture and one from non-Western/U.S. minority culture from campus approved list.

6

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

Select one of the following:

4-5

MATH 220	Calculus
MATH 221	Calculus I
MATH 234	Calculus for Business I

Quantitative Reasoning II

Required Concentration

Concentration prescribed courses. See specific requirements for each concentration listed below.

22-32

Total Hours

130

Approved Concentrations:

- Fish and Wildlife Conservation Concentration (p. 71)
- Global Change and Landscape Dynamics (p. 71)
- Human Dimensions of the Environment Concentration (p. 72)
- Resource Conservation and Restoration Ecology Concentration (p. 73)
- Minor in Natural Resource Conservation (p. 75)
- Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences (p. 75)

Fish and Wildlife Conservation Concentration

The Fish and Wildlife Conservation concentration is designed for the student interested in the fundamental properties of natural resource systems with emphasis on the ecology, biology, conservation, and management of fish and wildlife resources.

Fish and Wildlife Conservation Concentration Required

NRES 407	Wildlife Population Ecology	4
NRES 409	Fishery Ecol and Conservation	4
NRES 421 or NRES 440	Quantitative Methods in NRES Applied Statistical Methods I	3-4

Organismal Biology

Select one of the following:		4
NRES 368	Vertebrate Natural History	
NRES 461	Ornithology	
IB 462	Mammalogy	
IB 463	Ichthyology	
IB 464	Herpetology	

Specialization course

Select one of the following:		3-4
NRES 419	Env and Plant Ecosystems	
NRES 420	Restoration Ecology	
NRES 429	Aquatic Ecosystem Conservation	
NRES 465	Landscape Ecology	
IB 329	Animal Behavior	
IB 451	Conservation Biology	

Plant Classification/Identification

Select one of the following:		3-5
NRES 415	Native Plant ID and Floristics	
IB 335	Systematics of Plants	

Global Change & Landscape Dynamics

The Global Change and Landscape Dynamics Concentration explores the patterns and processes interlinking biological species with landscape components in order to promote the sustainability and ecological integrity of terrestrial ecosystems at local, regional, and sub-continental geographic scales. This concentration is especially relevant for students interested in invasion biology; biological rarity; wildlife disease epidemiology; energy, nutrient, and organism exchanges; the distribution of land cover and land use; and other elements affecting the earth's ecology.

Global Change & Landscape Dynamics Concentration Required

NRES 419	Env and Plant Ecosystems	3
NRES 465	Landscape Ecology	3
NRES 421 or NRES 440	Quantitative Methods in NRES Applied Statistical Methods I	3-4

Ecology

Select one of the following:		3-4
NRES 420	Restoration Ecology	

NRES 431	Plants and Global Change
NRES 462	Ecosystem Ecology
IB 361	Ecology and Human Health
UP 405	Watershed Ecology and Planning
UP 406	Urban Ecology

Geospatial Techniques

Select one of the following: 2-4

NRES 455	Adv GIS for Nat Res Planning
NRES 460	Anal & Interp Aerial Photo
NRES 477	Introduction to Remote Sensing
GEOG 412	Geospatial Tech & Society
UP 316	Planning Analysis

Planning & Policy

Select one of the following: 3-4

NRES 325	Natural Resource Policy Mgmt
NRES 310	Natural Resource Economics
NRES 424	US Environ, Justic & Policy
NRES 425	Natural Resources Law & Policy
NRES 426	Renewable Energy Policy
NRES 439	Env and Sustainable Dev
NRES 446	Sustainable Planning Seminar
ACE 406	Environmental Law

Environmental Quality

Select one of the following: 3-4

NRES 351	Environmental Chemistry
NRES 403	Watersheds and Water Quality
NRES 438	Soil Nutrient Cycling
NRES 474	Soil and Water Conservation
NRES 475	Environmental Microbiology
ATMS 449	Biogeochemical Cycles
ESE 320	Water Planet, Water Crisis
GEOL 380	Environmental Geology

Human Dimensions of the Environment Concentration

The Human Dimensions of the Environment Concentration emphasizes the social scientific interpretations of human-environment interactions at multiple levels as well as on applied policy and management implications. It is intended for students interested in the study of environmental sociology and psychology, land use planning, environmental management and policy, natural resource allocation, social impacts, resource economics, and environmental law. The Human Dimensions of the Environment Concentration requires advanced coursework in natural resource economics, environmental psychology, communications, social impact assessment, environmental policy, and environmental law.

Human Dimension Concentration Required

NRES 310	Natural Resource Economics	3
or ACE 210	Environmental Economics	
NRES 325	Natural Resource Policy Mgmt	3
or NRES 425	Natural Resources Law & Policy	
NRES 340	Environ Social Sci Res Meth	3

Analytical Methods

Select one of the following: 3-4

NRES 421	Quantitative Methods in NRES
NRES 440	Applied Statistical Methods I
SOC 485	Intermediate Social Statistics

Social Science Planning and Policy

Select two of the following:

6-8

NRES 310	Natural Resource Economics (if not taken as one of the HDC required classes)
NRES 325	Natural Resource Policy Mgmt (if not taken as one of the HDC required classes)
NRES 424	US Environ, Justic & Policy
NRES 425	Natural Resources Law & Policy (if not taken as one of the HDC required classes)
NRES 426	Renewable Energy Policy
NRES 430	Comm in Env Social Movements
NRES 472	Environmental Psychology
ACE 210	Environmental Economics (if not taken as one of the HDC required classes)
ACE 406	Environmental Law
SOC 447	Environmental Sociology

Conservation/Environmental Science/Ecology

Select one of the following:

3-4

NRES 401	Watershed Hydrology
NRES 407	Wildlife Population Ecology
NRES 409	Fishery Ecol and Conservation
NRES 415	Native Plant ID and Floristics
NRES 420	Restoration Ecology
NRES 429	Aquatic Ecosystem Conservation
NRES 439	Env and Sustainable Dev
NRES 474	Soil and Water Conservation

Resource Conservation and Restoration Ecology

The Resource Conservation and Restoration Ecology Concentration emphasizes the ecology, biology, and management of aquatic, soil, forest, and wildlife resources. It is designed for students interested in the fundamental properties and practices underlying the restoration and management of soil, watershed, wetland, forest, and grassland ecosystems. Through lectures, labs and field exercise, students study biosphere relationships in natural resource systems. The Resource Conservation and Restoration Ecology concentration includes coursework in the areas of restoration ecology, soil science, environmental biology, aquatic ecosystem management, tree and plant physiology, and advanced ecology.

Resource Conservation & Restoration Ecology Concentration Required

NRES 419	Env and Plant Ecosystems	3
NRES 420	Restoration Ecology	4
NRES 421 or NRES 440	Quantitative Methods in NRES Applied Statistical Methods I	3-4

Watershed Science

Select one of the following:

3-4

NRES 401	Watershed Hydrology
NRES 403	Watersheds and Water Quality
NRES 406	Fluvial Geomorphology
NRES 429	Aquatic Ecosystem Conservation
NRES 490	Surface Water System Chemistry

Plant Classification/Identification

NRES 415 or IB 335	Native Plant ID and Floristics Systematics of Plants	4
-----------------------	---	---

Soil and Environmental Science

Select one of the following:

3

NRES 351	Environmental Chemistry
NRES 471	Pedology
NRES 474	Soil and Water Conservation
NRES 475	Environmental Microbiology
NRES 487	Soil Chemistry
NRES 488	Soil Fertility and Fertilizers

NRES 489	Physics of Plant Environments	
Ecology		
Select one of the following:		3-4
NRES 438	Soil Nutrient Cycling	
NRES 452	Community Ecology	
NRES 462	Ecosystem Ecology	
NRES 465	Landscape Ecology	
CPSC 437	Principles of Agroecology	
IB 439	Biogeography	

Minor in Natural Resource Conservation

The Natural Resource Conservation minor offers an integrated approach to managing natural resources from a sustainability perspective. This minor addresses the diverse biological, physical, social, economic, and political aspects of natural resources and stewardship. Ultimately, this curriculum offers students interested in the conservation of natural resources a challenging and rewarding experience while simultaneously preparing them for future careers requiring a fundamental and strong background in the management and conservation of natural resources.

A minimum of 18 hours are required for this minor, of which at least 6 credit hours must be 400-level. Courses taken to fulfill the minor may not be counted toward the major in Natural Resources and Environmental Sciences.

Required Courses for a Minor in Natural Resource Conservation

NRES 102	Introduction to NRES	3
or NRES 100	Fundamentals of Env Sci	
NRES 287	Environment and Society	3

General Electives

Minimum of 12 credit hours, at least 6 of which must be 400-level, selected from: 12

NRES 108	Env Sc & Nat Resource Careers
NRES 109	Global Environmental Issues
NRES 201	Introductory Soils
ACE/NRES 210	Environmental Economics
NRES 219	Principles of Ecosystem Mgmt
ACE/NRES 310	Natural Resource Economics

Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences

The Spatial and Quantitative Methods in Natural Resources and Environmental Sciences minor is ideal for students in NRES and allied fields seeking preparation for careers requiring skills in geographic information systems, statistics, research design, and/or mathematical modeling. This minor is

open to students in all majors and is especially relevant for those pursuing a major related to natural resource and environmental issues who want to distinguish themselves with more advanced analytical skills.

In order to be eligible to declare this minor, a student must have successfully completed the Quantitative Reasoning I and Quantitative Reasoning II requirements. The minor requires the completion of an additional 18 hours of coursework selected from the following list. Students must earn credit for at least three hours in each of the three categories. Courses taken to fulfill the minor may not be counted towards the NRES major, but may count towards majors in other fields.

Required Courses for a Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences

Statistics & Research Design

Select one of the following: 3-4

NRES 421	Quantitative Methods in NRES
CPSC 440	Applied Statistical Methods I
NRES 445	Statistical Methods
SOC 485	Intermediate Social Statistics
STAT 200	Statistical Analysis

Mathematical Modeling

Select one of the following: 3-4

NRES 422	Earth Systems Modeling
NRES 427	Modeling Natural Resources
ANSC 448	Math Modeling in Life Sciences
GEOG 468	Biological Modeling

Spatial Analysis

Select one of the following: 3-5

NRES 454	GIS in Natural Resource Mgmt
NRES 455	Adv GIS for Nat Res Planning
NRES 465	Landscape Ecology
GEOG 478	Techniques of Remote Sensing
GEOG 479	Advanced Topics in GIS
GEOG 489	Programming for GIS

Minimum hours required for the minor 18

Agricultural Education

Major in Agricultural Leadership and Science Education

For the Degree of Bachelor of Science with a Major in Agricultural Leadership and Science Education

This curriculum prepares students for positions requiring expertise in formal and non-formal education. Examples include teaching agriculture in the public schools; cooperative extension work; training and program development; and other education-related positions in agricultural and environmental agencies and businesses.

A minimum of 126 hours is required for graduation. Students pursuing this major select from two concentrations: agricultural leadership education or agricultural science education. Students completing the agricultural science education concentration will be eligible for Illinois teacher certification in agricultural education, and will have instruction in key pedagogical areas as well as agriculture. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (<http://www.cote.illinois.edu/>).

For the Degree of Bachelor of Science with a Major in Agricultural Leadership and Science Education

- Agricultural Leadership Education Concentration (p. 78)
- Agricultural Science Education Concentration (p. 78)

Prescribed Courses including Campus General Education

Agricultural Science Education Concentration

The Agricultural Science Education concentration prepares students to teach agricultural science, agribusiness, agricultural mechanics and horticulture in Illinois high schools. State of Illinois certification requirements include a minimum of 2,000 hours of employment experience in agriculture. Teacher certification students must maintain a 2.5 GPA or above to remain in good standing. Review procedures are provided by the Council on Teacher Education.

¹ Via enrollment in AGED 250, students are concurrently enrolled in EDPR 203.

Food and Environmental Systems Minor

The Minor in Food and Environmental Systems is designed primarily for students who are enrolled in the Agricultural Communications Major which is jointly administered by the College of ACES and the College of Media. The eighteen hours of coursework in this minor provide a significant background in consumer sciences, agricultural management and production, and environmental and natural resources to support the study and practice of Agricultural Communications. Selection of additional courses beyond the core will depend on the student's major and interests.

Enrollment in ACES 101, FSHN 101, and NRES 100, four hours from selected 100- and 200-level courses, and six hours of 300- and 400-level courses as listed below is required for all students completing this minor. Courses in the minor cannot be taken Credit/No Credit.

This minor is administratively based in ACES Academic Programs. Student advising will take place in this unit.

Required Courses for the Food and Environmental Systems Minor

ACES 101	Contemporary Issues in ACES	2
FSHN 101	Intro Food Science & Nutrition	3
NRES 100	Fundamentals of Env Sci	3
Select a minimum of four hours from the following:		4
ANSC 100	Intro to Animal Sciences	
ANSC 101	Contemporary Animal Issues	
ANSC 109	Meat Pricing and Preparation	
ANSC 110	Life With Animals and Biotech	
ACE 100	Agr Cons and Resource Econ

International Minor in ACES

This minor will help students prepare for life and work in a global society and will provide the international skills employers expect of our graduates. While it is the intent of this minor to encourage students to spend time abroad and to develop proficiency in a foreign language, neither is required.

Students enrolled in this minor will be able to draw on resources outside the college as well as select from courses offered by the seven departments in the College of ACES. At least 12 of the total 21 credit hours required for this minor must be College of ACES courses. At least 6 credit hours ACES or non-ACES must come from 400-level courses. Courses in the minor cannot be completed Credit/No Credit.

This minor is administratively based in ACES Academic Programs. Student advising will take place in this unit.

Required Courses for the ACES International Minor

Global Study in the Social Science Disciplines

Minimum of 3 hours, maximum of 9 hours selected from: 3-9

ACE 251	The World Food Economy
ACE 411	Environment and Development
ACE 435	Global Agribusiness Management
ACE 451	Agriculture in Intl Dev
ACE 455	Intl Trade in Food and Agr
AGCM 320	Public Information Campaigns
ANTH 260	World Ethnography
ANTH 262	Women's Lives
BADM 380	International Business
BADM 381	Multinational Management
BADM 382	International Marketing
ECON 420	International Economics
ECON 450	Development Economics
EPS 426	Comparative Education
FIN 451	Intl Financial Markets
GEOG 110	Geography of Intl Conflicts
GEOG 204	Cities of the World
GEOG 210	Contemp Social & Env Problems
GEOG 410	Geography of Dev and Underdev
HDFS 220	Families in Global Perspective
HIST 258	20thC World to Midcentury
HIST 259	20thC World from Midcentury
NRES 287	Environment and Society
PS 241	Comp Politics in Dev Nations
PS 280	Intro to Intl Relations
PS 382	Intl Political Economy
PS 389	International Communications
RLST 110	World Religions
UP 423	Intro International Planning

Global Study in the Natural Science Disciplines

Minimum of 3 hours, maximum of 9 hours, selected from: 3-9

ANSC 205	World Animal Resources
ATMS 140	Climate and Global Change
CPSC 116	The Global Food Production Web
CPSC 431	Plants and Global Change
HORT 464	International Hort Products
NRES 109	Global Environmental Issues
PLPA 200	Plants, Pathogens, and People
TSM 311	Humanity in the Food Web

Regional Specialization

The following four approaches/options can be used (separately or in combinations) to complete this portion of the minor. 3-9

Academic credit earned through study or supervised activities outside the U.S. through:

ACES 293	International Internship
ACES 298	International Experience
ACES 299	ACES Study Abroad

Completion of one or more of the following courses offered by the Department of Agricultural and Consumer Economics

ACE 254	Economic Systems in Africa
ACE 452	The Latin American Economies

ACE 454 Econ Dev of Tropical Africa

Completion of courses that are approved by Area Studies Programs (see minor advisor)

Center for African Studies

Center for East Asian and Pacific Studies

Center for Latin American and Caribbean Studies

Program in South Asian and Middle Eastern Studies

European Union Center

Foreign language courses that exceed College of ACES graduation requirements.

Total Hours

21

Leadership Studies Minor

www.leadershipstudies.illinois.edu

The Minor in Leadership Studies provides instruction in leadership theories and their applications and is open to all undergraduate students who have a minimum 2.0 GPA. The minor requires a total of seventeen or eighteen semester hours: nine hours of required foundational courses, five to six hours of elective context courses, and three hours in a capstone course.

Requirements

AGED 260	Intro to Leadership Studies	3
AGED 380	Leadership in Groups and Teams	3
PSYC 455	Organizational Psych	2-4
Electives from a list of leadership context courses ¹		5-6
AGED 480	Collaborative Leadership	3

Students should bring the Statement of Intent to Pursue a Campus-Approved Minor form (<http://provost.illinois.edu/programs/advising/intent.pdf>) to ACES Academic Programs, 128 Mumford Hall.

¹ For more information about this minor and to view the elective course list visit www.leadershipstudies.illinois.edu or contact the Program Coordinator, Lisa Burgoon, at burgoon@illinois.edu.

Applied Health Sciences, College of

Tanya Gallagher, Dean

Ryan Gower, Associate Dean for Undergraduate Academic Affairs

112A Huff Hall

1206 S. Fourth Street

Champaign, IL 61820, (217) 333-2131, (217) 333-0404

<http://www.ahs.uiuc.edu>

The programs in the College of Applied Health Sciences provide students with a holistic understanding of health and human behavior. Drawing on the expertise of our faculty and industry partners, we equip students to design, develop and implement initiatives that enhance health and well-being.

Students with an interest in health professions, administration, education and advocacy or public policy can find a program of study that will match their interest in the College of Applied Health Sciences.

As America's approach to health and wellness changes, health care is no longer limited to the traditional practice of doctors and nurses. As a result, the growth market lies in areas related to prevention, quality of life, health planning, and therapeutic intervention. As society struggles with these issues, the College and its graduates will continue to play an important role in shaping the future. A degree from the College of Applied Health Studies allows graduates to pursue a wide array of scientific and professional careers.

Students in the College of Applied Health Sciences enjoy many advantages: high quality degree programs, small classes, an emphasis on student-faculty interaction, active research programs, the opportunity to participate in professional student organizations, the availability of internships, and the largest separate college library in our field.

Along with the relationships they establish with faculty, students work closely with an academic adviser. The College of Applied Health Sciences requires students to meet with advisers to develop a relationship that will guide their studies and experiences while on campus. A solid network of student services available at the University of Illinois enhances the advising experience.

Programs of Study

The bachelor of science degree is offered in five academic areas: **Community Health, Interdisciplinary Health Sciences, Kinesiology, Recreation, Sport and Tourism, and Speech and Hearing Science.**

- Advising services are available to assist with career information and the development of appropriate courses of study.
- Honors programs are available for outstanding students at the college and campus level.
- Internship experiences are required with most departmental curricula. Quality placements are available throughout the United States and around the world in specific degree programs.
- Study abroad programs are available around the world.
- Students have access to the nation's third largest academic library, including an excellent college library, reference service, inter library loan system, and term-paper counseling system.

Community Health Program

Health care is among the most rapidly evolving industries in the United States today. People in all settings are concerned about maintaining access to effective health care and the costs of securing it. An aging population places greater demand upon health care providers. To address these issues, hospitals and clinics have reorganized, consolidated, and introduced educational components designed to teach patients how to manage their personal health concerns. At the same time, business and industry leaders have invested millions of dollars in new health programs for their employees. Federal and state governments are evaluating ways to make health care more effective and less costly.

Recognized as one of the leaders in the United States with its strong emphasis on research and excellence in scholarship, the Community Health Program prepares students for careers in the rapidly changing world of health and rehabilitative services. It is an exciting time in health care with emerging behavioral and environmental health concerns that challenge the field for new theories, policies, and technological innovations. The department's programs place special emphasis on the community context in which health care is delivered. Students can become involved in a variety of research projects related to issues such as bioethics, cancer epidemiology, disability studies, cultural aspects of health and disability, information technologies in health education, and health policy.

The Community Health Program offers students the opportunity to focus their studies in Health Planning and Administration, Health Education or Rehabilitation Studies. In addition to the core of community health courses, course work is completed in areas related to business, health behavior, marketing, and promotion. The degree is culminated with a fieldwork experience in setting appropriate to the area of concentration. **Graduates are equally prepared for jobs in progressive careers such as health education, policy, planning, and administration or for graduate study in areas such as medicine, nursing, and physical therapy.**

Interdisciplinary Health Sciences Program

Based on the premise that human health is too complex to be addressed within a single discipline, the Interdisciplinary Health Sciences (i-Health) degree program integrates knowledge from a variety of social and behavioral fields, such as psychology and sociology, as well as the applied health sciences. While the core curriculum provides students with a solid understanding of human health, students may build a customized program addressing their specific interests within three concentration areas; Health and Aging, Health Behavior Change, and Health Diversity.

Students in this program are equipped to assume leadership roles in a variety of health-related careers, as well as professional and graduate degree programs. **Graduates have pursued careers in pharmaceutical sales, health education, corporate wellness and patient/client relations. Graduates are also fully prepared to pursue graduate school in a variety of professional or biomedical programs such as law, medicine, physical and occupational therapy, nursing, or public health.**

Kinesiology Program

The Kinesiology Program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses on exercise stress, movement efficiency, and fitness; the social, cultural, and psychological aspects of participation in physical activity and sport; coordination, control and skill of physical activity; physical growth, development, and body form throughout the life span; the effects of therapeutic techniques of kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

The curriculum combines a comprehensive liberal arts and sciences education with in-depth study in a particular area of interest. The program of study provides knowledge and understanding essential for human movement and sport careers in either public or private agencies. The hours required for graduation include prescribed courses for all students as well as requirements determined by the various areas of emphasis selected by the student. Teaching and research emphasize hands-on learning through the use of technology and modern laboratory equipment. **Graduates find employment in a variety of fields including teaching, corporate fitness, coaching, and athletic training. Many students continue their education and become physical therapists, physicians, exercise physiologists, and sport psychologists.**

Recreation, Sport and Tourism

The Department of Recreation, Sport and Tourism is internationally renowned for its excellence, low student-faculty ratio, ethnic and cultural diversity, and an extensive alumni network. In short, studying recreation, sport and tourism at the University of Illinois is an ideal way to prepare for a future of leadership in the world's most vigorous and exhilarating industry.

The curriculum in Recreation, Sport and Tourism prepares students to design, manage, and deliver services to a variety of populations and provides a firm foundation from which students may pursue graduate studies. A broad general education is emphasized and complemented with a core of professional courses which touch topics such as leadership, marketing, administration and human resource management. Beyond a strong core integrating leisure theory, management, and research, the program allows students to focus their studies in Recreation Management, Sport Management or Tourism Management. **Recreation, sport and tourism offer outstanding career prospects because they are each facets of one of the world's fastest growing industries. Graduates have enjoyed successful careers in amateur and professional sport organizations, public and commercial recreation organizations, resorts, and conference and convention centers.**

Speech and Hearing Science

Research has shown that communication is a key element in resolving the major problems of our society; improving communication for all people is an overall goal of study in speech and hearing science. In the Department of Speech and Hearing Science, students learn about human interpersonal communication. Through studies in speech-language pathology and audiology, they focus on the prevention, diagnosis, and treatment of hearing, speech, and language disorders in people of all ages.

This major also equips students with strong oral and written communication skills and necessary tools to enter today's job market. **Graduates hold positions in school systems, hospitals, medical practices, and clinics. They also work in government agencies, research laboratories, and various businesses. A baccalaureate degree in speech and hearing science also prepares students to enter a graduate program in speech-language pathology or audiology or other areas including psychology, special education, business, medicine, and dentistry.**

Requirements for Admission

College Preparatory Subjects	Semesters of Course Work Required	Semesters of Course Work Recommended
English	8	8
Mathematics	6	6
One foreign language ¹	4	8
Laboratory science (not general science)	4	
Social studies	4	4
Flexible academic units: Two courses from any of the five subject categories. Approved art, music, or vocational education courses may be included.	4	
Total	30	

¹ At least 6 semesters of the same foreign language should be taken to meet the graduation requirement.

Special Programs

Honors at Graduation

Graduation from the College of Applied Health Sciences with any honors designation requires that a student must have attained at the University of Illinois at Urbana-Champaign a specific minimum cumulative grade point average based on a minimum of 55 semester hours in residence.

- Bronze Tablet (see Graduation with Honors section)
- Dean's List (see Graduation with Honors section)
- Highest Honors: 3.75 to 4.0
- High Honors: 3.5 to 3.74
- Honors: 3.25 to 3.49

Edmund James Scholars

The James Scholar Program is a University-wide honors program established to encourage undergraduate research and independent study and to foster scholarly endeavors. For further information see the Edmund J. James Undergraduate Honors Programs.

Kinesiology and Community Health

Head: Wojtek Chodzko-Zajko

Department Office: 127 Huff Hall, 1206 South Fourth, Champaign, (217) 333-2307

The Kinesiology (p. 90) curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student's area of concentration within Kinesiology.

The Community Health (p. 87) Program at the University of Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education and Promotion, Health Planning and Administration, and Rehabilitation Studies. All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (p. 618). The requirements are explained in more detail on the MPH program website: <http://www.mph.illinois.edu/Program/>.

For the Degree of Bachelor of Science in Community Health

Requirements Including General Education

The Community Health Program requires certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

Communication Arts

Composition I and an approved speech performance course; or CMN 111 and CMN 112	6-7

Kinesiology

Wojciech Chodzko-Zajko

117 Freer Hall, 906 South Goodwin, Urbana, (217) 244-0823

www.kch.illinois.edu

The Kinesiology curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student's area of concentration within Kinesiology.

Students who desire certification as a physical education teacher can satisfy the necessary subject matter requirements by appropriate selection of courses within the several categories of the curriculum. Students seeking such certification should ask the undergraduate academic adviser about admission criteria for the teacher certification program in physical education. For teacher certification requirements applicable to all curricula, see the Council on Teacher Education section. Further information on careers in Kinesiology is available from the Academic Advising Office, Department of Kinesiology and Community Health, University of Illinois at Urbana-Champaign, 155 Freer Hall, 906 South Goodwin Avenue, Urbana, IL, 61801, (217) 333-1083 (217) 333-2461.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. The requirements are explained in more detail on the MPH program website: <http://www.mph.illinois.edu/Program/>.

For the Degree of Bachelor of Science in Kinesiology Requirements Including General Education

The Kinesiology Program requires that General Education requirements must be selected from the Campus General Education course list. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list. Specifically required General Education courses are listed below.

¹ Students pursuing teacher certification must complete PSYC 100 or PSYC 103 in addition to KIN 262.

² Courses in cultural studies may be completed through other categories where appropriate.

³ Fulfills University General Education Requirements

Kinesiology Program Guided Electives

Elective Kinesiology Courses

All courses must be at the 200, 300, or 400 level. One course must be completed in each of the three areas (exercise physiology and athletic training; cultural, pedagogical and interpretive studies; and biobehavioral kinesiology). At least six or more hours must be at the 400 level (at least 12 hours).

Correlate Area Studies

Students select a standardized correlate that will prepare them for further education toward their career goals (at least 18 hours).

Summary of Degree Requirements

General Education and supporting coursework	49
Kinesiology and Community Health Department Core	6
Kinesiology Core	24
Elective Kinesiology courses	12
Correlate Area	18
Free electives	19
Total Hours	128

Requirements for Teacher Certification

Application to the Teacher Certification curriculum is made at the end of the sophomore year. Admission depends on meeting minimum grade point average requirements. In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, and content area grade point averages of 2.5 (A=4.0), and a professional education grade point average of 3.0. Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages. In addition, candidates must receive a B- or higher in KIN 360, KIN 361, KIN 362, KIN 363, KIN 364, and KIN 460, and meet professional standards of scholarship, ethics, and responsibility as evaluated by the Physical Education Area of Specialization Committee. In addition, students must complete all degree required courses with a grade of C or higher.

In addition to the General Education requirements for all Kinesiology undergraduates, the teacher certification requirements for students in all curricula, and the Kinesiology core requirements, students pursuing certification to teach physical education (K-12) must include the following courses in the elective kinesiology, correlate area studies, and free electives areas:

Required Electives and Correlate Area Studies

KIN 360	Adapted Physical Education	3
KIN 361	Curriculum in Grades K-6	3
KIN 362	Curriculum in Grades 7-12	3
KIN 363	Instructional Strategies in PE	3
KIN 364	Exper in the Common School	3

KIN 401	Measure & Eval in Kinesiology	3
KIN 460	Technology & Pedagogical KINES	3
KIN 260	Teaching Activities I	3
KIN 261	Teaching Activities II	2
CI 473	Literacy in Content Areas	1
EPS 201	Foundations of Education	3
EPSY 201	Educational Psychology	3
EDPR 438	Ed Prac in Special Fields	8
EDPR 442	Ed Prac in Secondary Ed	8

Students may not enroll for professional education courses from the Elective Kinesiology area until they have passed the Illinois Certification Testing System Test of Basic Skills and have applied to the Teacher Education K-12 program.

Recreation, Sport and Tourism

Laurence Chalip, Department Head

104 Huff Hall, 1206 South Fourth Street, Champaign, (217) 333-4410

www.rst.illinois.edu

The Department of Recreation, Sport and Tourism originated at the University of Illinois in 1940. Today, this program continues to rank nationally among the top three in the field, and takes pride in producing a large number of exceptional professionals in the field. The Department of Recreation, Sport and Tourism offers a bachelor of science degree with three areas of concentration: recreation management, sport management, and tourism management. The curriculum prepares students to design, manage, and deliver leisure services to a variety of populations in diverse settings and provides a firm foundation from which students may pursue graduate studies. A broad general education is emphasized and complemented with a core of professional courses. Beyond a strong core integrating leisure theory, management, and research, the program allows students to focus on a major market segment within the leisure and recreation field by choosing an area of concentration. A total of 128 hours is needed for graduation. For further information, contact the Department of Recreation, Sport and Tourism, 104 Huff Hall, 1206 S. Fourth Street, Champaign, IL 61820, (217) 333-4410.

Internship Program

All students in the Department of Recreation, Sport and Tourism must satisfactorily complete the Internship Program prior to graduation. The program is designed to augment formal classroom instruction with active experiential learning under the guidance of a university and an agency-based supervisor.

The program consists of two courses and a pre-internship field experience. The pre-internship program requires students to accumulate a minimum of 300 Hours of practical work experience in leisure service settings. It is strongly recommended that students begin acquiring field experiences as early in their academic career as possible. Students register for RST 480 in the first semester of their senior year. During this semester, students make final arrangements for completing RST 484, the Recreation, Sport and Tourism Practicum the following semester.

The practicum is taken after the student satisfactorily completes all course work including RST 480, and fulfills the pre-internship field experience. RST 484 is taken in agencies that are approved by the department and contracted for this program. Since a limited number of assignments for practica are available in the campus area, most students look forward to the opportunity of an off-campus assignment. Students have been placed across the United States and even abroad.

For the Degree of Bachelor of Science in Recreation, Sport and Tourism

Requirements Including General Education

The Campus Senate, the faculty General Education Board, and the colleges and departments are working to implement enhanced General Education requirements. Some changes in requirements are expected. Thus, new students should confirm their General Education requirements by consulting college and departmental offices, handbooks, or advisors. The Department of Recreation, Sport and Tourism also requires that certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list.

Communication Arts

Composition I and an approved speech performance course; or CMN 111 and 112	6-7

128 Total Hours required for graduation

Speech and Hearing Science

Karen Kirk, Department Head

901 South Sixth Street, Champaign, (217) 333-2230

shs.illinois.edu

The undergraduate curriculum in Speech and Hearing Science provides a broad background in the biological, behavioral, linguistic, and social foundations of human communication and communication disorders. The major prepares students to pursue a career or graduate education in many fields related to human communication and healthy communication practices. The degree requires at least 128 hours. The program has four concentrations: Audiology, Speech-Language Pathology, Neuroscience of Communication, and Cultural-Linguistic Diversity. Each of the four concentrations can be combined with pre-certification requirements from the American Speech-Language-Hearing Association for undergraduates wanting to pursue a career as either a speech-language pathologist or audiologist. The American Sign Language sequence of courses is available to students across all four concentrations.

A concentration must be declared prior to the senior year. Students are advised to consult Undergraduate Advising (<http://www.shs.illinois.edu/programs/advising.htm>) on a regular basis to ensure they are meeting all requirements.

For an overview of the program and career opportunities, download the brochure (<http://www.shs.uiuc.edu/pdf/careers-SHS.pdf>). For further information, contact the Department of Speech and Hearing Science (<http://www.shs.uiuc.edu>), 220 Speech and Hearing Building, 901 S. Sixth Street, Champaign, IL 61820, (217) 333-2230.

For the Degree of Bachelor of Science in Speech and Hearing Science

General Education

Students are advised to select their General Education course requirements from the University's approved list of courses (www.courses.illinois.edu/cis/) and to work in close consultation with their academic advisor to ensure graduation requirements are addressed.

Communication Skills

Composition I			
RHET 105	Writing and Research		4-6
or CMN 111	Oral & Written Comm I		
& CMN 112	and Oral & Written Comm II		
Advanced Composition			3

One course in Advanced Writing/Composition II from approved list ¹

Quantitative Reasoning I

One course from the approved Gen. Ed. list ²

Quantitative Reasoning II

One course from the approved list required. ³

Humanities and the Arts

Minimum of two courses from approved list required

Social and Behavioral Sciences

Minimum of two courses from approved list required

Natural Sciences and Technology

Two classes or six hours from the university approved Gen. Ed. list required. ⁴

Cultural Studies

One course from Western cultures approved campus list

One course from U.S. Minority Cultures or Non-Western Cultures approved campus list

Foreign Language

May be satisfied if had three years of one non-English language in high school or completed the equivalent of three semesters of college level foreign language (through the intermediate level).

Total Hours 37-51

¹ must be taken at U of I

² A course in general statistics will address the BS degree requirement; however, those planning to pursue a graduate degree in communication science and disorders are advised to consider taking additional math (calculus may be required by some programs).

- ³ SHS 240 Introduction to Sound and Hearing Science (required core class in SHS) will satisfy this requirement.
- ⁴ While not specifically required for the BS degree, students planning to pursue the Speech-Language Pathology or Audiology concentrations and eventual graduate studies in these areas, are advised to take one course in Life Science (a biological science is suggested) and one course in Physical Science (a course in Physics or Chemistry is recommended) to satisfy eventual ASHA certification requirements.

Speech and Hearing Science Professional Core Requirements

All students must complete a series of SHS core classes regardless of their area of concentration. Students are advised to work with the undergraduate academic advisor to ensure courses are taken in proper sequential order. One area of concentration (Speech-Language Pathology, Audiology, Neuroscience of Communication, or Cultural-Linguistic Diversity) must be declared prior to the senior year.

SHS 170	Intro Hum Comm Sys & Disorders ¹	3
SHS 191	Freshmen Seminar	1
SHS 200	General Phonetics ²	3
SHS 240	Intro Sound & Hearing Science ^{3, 4}	3
SHS 300	Anat & Physiol Spch Mechanism ⁵	4
SHS 301	General Speech Science ^{6, 7}	4
SHS 320	Development of Spoken Language ⁸	3
SHS 450	Intro Audiol & Hear Disorders ⁹	4
Total Hours		25

- ¹ Quantitative Reasoning II Course.
- ² Same as LING 300.
- ³ Same as LING 303. Should be taken after SHS 300.

Areas of Concentration (24-30 Hours)

- Audiology (p. 97)
- Cultural-Linguistic Diversity (p. 97)
- Neuroscience of Communication (p. 97)
- Speech-Language Pathology (p. 97)

Electives

All students are encouraged to take electives in and outside the department that will count towards the 128 required hours for graduation (the total number of electives students may take may vary with each individual). Students are encouraged to select electives that will complement their areas of interest and future goals. Areas listed below are only a sampling of possibilities; they are not to be considered as requirements and students are not limited to these choices. All students are responsible for addressing course pre-requisites and course availability may vary.

Anthropology (ANTH), Communications (CMN), Kinesiology and Community Health (KIN, CHLH), Educational Organization and Leadership (EOL), Curriculum & Instruction (CI), Educational Policy Studies (EPS), Educational Psychology (EPSY), English (ENGL), English as a Second Language (ESL), Gender and Women's Studies (GWS), Human Development and Family Studies (HDFS), Library and Information Science (LIS), Linguistics (LING), Psychology (PSYC), Recreation, Sport, & Tourism (RST), Rehabilitation Counseling (REHB), Special Education (SPED), Sociology (SOC), Social Work (SOCW). Additional areas to explore may include: courses in a foreign language beyond the completion of the University's requirement, as well as additional courses in science, such as Biology (IB, MCB), Physics (PHYS), microcomputer applications (e.g. ACE), and courses in cultural studies.

Summary of Degree Requirements

General Education	37-51
Speech and Hearing Science Core	25
Area of Concentration (and Correlate, if required by concentration)	24-30
Electives	22-42
Total Hours	128

Speech and Hearing Science Minor

The undergraduate Speech and Hearing Science Minor is designed for students who seek a basic familiarity with the physical, behavioral, biological, and social aspects of human communication. The minor is tailored to each student's individual needs, thus accommodating students from different disciplines across the campus. There are no prerequisites for this minor. For more information contact Kathi Ritten, Academic Advisor, at ritten@illinois.edu.

SHS 170	Intro Hum Comm Sys & Disorders	3
Select two of the following:		6-7
SHS 222	Lang&Culture Deaf Communities	
SHS 240	Intro Sound & Hearing Science	
SHS 300	Anat & Physiol Spch Mechanism	
SHS 320	Development of Spoken Language	
SHS 352	Hearing Health and Society	
Eight to Nine additional hours of speech and hearing science courses chosen from the following list:		8-9
SHS 120	Child, Comm, & Lang Ability	
SHS 171	Evolution of Human Comm	
SHS 200	General Phonetics	
SHS 270	Comm Disability in the Media	
SHS 271	Communication and Aging	
SHS 301	General Speech Science	
SHS 375	Comm Partners & Health	
SHS 410	Stuttering: Theory & Practice	
SHS 411	Intro to Voice Disorders	
SHS 427	Language and the Brain	
SHS 450	Intro Audiol & Hear Disorders	
SHS 451	Aural Rehab Children to Adults	
SHS 470	Neural Bases Spch Lang	
SHS 473	Augmentative & Alt Comm	
Total Hours		17-19

Note: Students must take at least six credits hours of speech and hearing science courses at the 300 or 400 levels from this approved list.

Concentration in Cultural-Linguistic Diversity

The **Cultural-Linguistic Diversity** concentration is designed to examine ways that individual communication differences, including disorders, interface with sociocultural systems, institutions, and practices. Students will take courses in theory and research methods to explore ways in which sociolinguistic differences shape child development, socialization, and identity. This concentration is intended to help provide students with knowledge related to cultural-linguistic differences (race, ethnicity, socio-economic status, neurodiversity) that is needed to serve an increasingly global society concerned with human rights and responsibilities. Such expertise is expected to enhance multiple career paths in education, law, business, and health-related fields. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

Concentration in Neuroscience of Communication

The **Neuroscience of Communication** concentration provides and interdisciplinary understanding of the neurological systems that underlie human communication. Students will study the biological basis of communication in order to understand brain-behavior correlates of typical and disordered speech, language, and hearing function. In addition, students will benefit from faculty research that utilizes innovative technologies to study the structure and function of the sensory-motor systems that underlie human communication abilities. This concentration is intended to help prepare students for health and science-related careers, including medicine and neuroscience. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

Concentrations in Audiology and Speech Language Pathology

The **concentrations in either Speech-Language Pathology or Audiology** provide explicit background in the theoretical and clinical areas necessary for graduate study. Students will learn foundational knowledge for understanding human speech, language, swallowing, hearing, and balance processes, with a particular eye toward the implications of differences and disruptions in the communication systems associated with disorders. Although students

across any of the concentrations can pursue the graduate study and pre-certification requirements associated with becoming an audiologist or speech-language pathologist, these two concentrations are the most closely connected to practical application with opportunities for clinical observation and community engagement.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association's web site: <http://www.asha.org>.

The Neuroscience of Communication

The **Neuroscience of Communication** concentration provides an interdisciplinary understanding of the neurological systems that underlie human communication. Students will study the biological basis of communication in order to understand brain-behavior correlates of typical and disordered speech, language, and hearing function. In addition, students will benefit from faculty research that utilizes innovative technologies to study the structure and function of the sensory-motor systems that underlie human communication abilities. This concentration is intended to help prepare students for health and science-related careers, including medicine and neuroscience. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

Interdisciplinary Health Sciences

William Stewart

110 Huff Hall, 1206 South Fourth Street, Champaign, (217) 333-2131

For the Degree of Bachelor of Science in Interdisciplinary Health Sciences

The undergraduate degree program in Health is interdisciplinary in nature, and focused on applied health and societal issues that cut across a range of traditional fields. The program of study includes a set of core courses that builds an interdisciplinary foundation in the study of health, and provides a basic knowledge of health-related issues. The degree program also includes a set of three concentrations, of which a student must complete at least one, that emphasize some of the foremost issues facing society: health and aging; health behavior change; and health diversity. Finally, the degree program includes a capstone experience with several options for completion, e.g., an internship, faculty-guided research experience. The program of study addresses a major need across the nation and world for graduates prepared to enter a range of biomedical and health-related careers and/or to pursue graduate study in fields relevant to health, wellness, and the biomedical sciences. For questions regarding iHealth contact Julie Bobitt, Academic Advisor, at jbobbitt@illinois.edu.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (p. 618). The requirements are explained in more detail on the MPH program website: <http://www.mph.illinois.edu/Program/>.

Requirements Including General Education

The curriculum requires certain existing courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

Interdisciplinary Minor in Aging

The Interdisciplinary Minor in Aging provides students with the opportunity to study aging as it relates to health, communication, development and activity. The minor is offered through the Departments of Kinesiology and Community Health, Recreation, Sport and Tourism, Psychology and Sociology; the Department of Human and Community Development; and the School of Social Work. LAS psychology and sociology students interested in the minor should consult with their major department's undergraduate studies director. All other interested students should consult their departmental academic advisor. Minors should be declared by filling out the intent to pursue a minor form which can be found at <http://provost.illinois.edu/programs/advising/intent.pdf> and turning the form into Julie Bobitt, Interdisciplinary Health Advisor, in 226 Huff Hall or contact Julie via email at jbobbitt@illinois.edu.

Business, College of

Office of Undergraduate Affairs
1055 Business Instructional Facility
515 East Gregory Drive
Champaign, IL 61820, (217) 333-2740
<http://www.business.illinois.edu>

undergrads@business.illinois.edu

The purpose of the College of Business is to provide an educational experience that will help students develop their potential for leadership and service in business, government, teaching, and research. The undergraduate curricula provide a study of the basic aspects of business and preparation for careers in fields such as accounting, business management, banking, insurance, and marketing.

The curricula, leading to the Bachelor of Science degrees in the various degree programs in business, are based on 124 hours of college work. Students are required to elect courses in other colleges of the University, including mathematics, rhetoric, humanities and the arts, speech, and natural and behavioral sciences, and to secure as liberal an education as possible to avoid the narrowing effects of overspecialization.

The College of Business offers graduate and professional programs in business areas. Detailed information on graduate programs may be obtained from the Graduate College or visit our web site (<https://business.illinois.edu>).

Departments and Curricula

Undergraduate instruction in the College of Business is organized under the Departments of Accountancy, Business Administration, and Finance. Each of these departments offers courses that provide one or more curricula that a student may elect. These curricula lead to Bachelor of Science degrees in the various fields of study in the college and are designed to encourage each student to fully realize his or her intellectual promise. There can be changes to curricular requirements and new course offerings. For the most current information, visit our advisors in 1055 Business Instructional Facility and our web site (<http://www.business.uiuc.edu/undergrad>).

Requirements

Admission

Applicants must meet general University requirements as well as those specified by the College of Business.

Students transferring from other institutions must have met the requirements specified by the college. See our web site (<http://www.business.uiuc.edu>) and the Illinois Office of Undergraduate Admissions (<http://admissions.illinois.edu>) for further information.

Mathematics Placement Test

The ALEKS Math Placement Exam is used to place the students in the appropriate math course. The results of the test are used to place students in MATH 012 or to exempt them from college algebra and allow them to enroll in the first course of one of the mathematics sequences required for graduation (see below).

Graduation

Students in the College of Business who meet the University's requirements with reference to registration, residence, and fees and who maintain satisfactory scholastic records in the college are awarded degrees appropriate to their curricula.

Each candidate for a degree must have a 2.0 (A = 4.0) grade point average or above for all courses counted toward graduation, a 2.0 grade point average or above for all courses taken at this University, a 2.0 grade point average or above for all courses taken in the major or field of concentration, and a 2.0 grade point average or above for courses taken in the major or field of concentration at this University.

Students are responsible for meeting the requirements for graduation. Therefore, students should familiarize themselves with the requirements listed in this catalog and other information in the Office of Undergraduate Affairs, 1055 Business Instructional Facility, and should refer to them each time they plan their programs. The College of Business requires that undergraduate degrees be completed in nine semesters or less. If you need assistance with course planning, consult the Office of Undergraduate Affairs.

Mathematics Requirement

Any one of the sequences described below meets the College of Business requirement. The most appropriate mathematics sequence depends on the student's background, interest, motivation, and objectives. Background can be evaluated in terms of mathematics courses already completed and the student's score on the ALEKS Math Placement Exam. Interest, motivation, and objectives must be determined by the student. The three sequences open to the student are:

- MATH 220/MATH 221 Calculus I and MATH 231 Calculus II. This sequence is appropriate for those students with a good background in mathematics but who have not had analytic geometry. Students who believe they may want to take upper-level courses in mathematics should take this sequence.
- MATH 125 Elementary Linear Algebra and MATH 234 Calculus for Business I. This sequence provides a good background in linear algebra and calculus. It is difficult to take upper-level courses in mathematics after this sequence.
- MATH 220/MATH 221 Calculus I and MATH 125 Elementary Linear Algebra. This is an alternative to the previous sequence. It is particularly suitable for those with AP credit in calculus who do not plan to take upper-level mathematics courses.

Residency

Students must earn no fewer than 60 semester hours of University of Illinois Urbana-Champaign coursework applicable to their degree-including at least 21 credit hours of advanced coursework.

Special Programs

Honors At Graduation

Honors, designated on diplomas, are awarded to superior students as follows: for graduation with honors, a minimum grade point average of 3.5 (A = 4.0) in all courses accepted toward the student's degree; for graduation with high honors, a minimum grade point average of 3.75 in all courses accepted toward the degree; and for graduation with highest honors, a minimum grade point average of 3.90 in all courses accepted toward the degree. To qualify for graduation honors, transfer students' University of Illinois at Urbana-Champaign and total cumulative grade point averages both must qualify.

Curricula

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. A required course that is failed must be repeated the next semester.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 002 or MATH 012. Once the math requirement is completed, lower level math courses cannot be taken for credit. For military and naval science courses, only credit at the 300 level and above may be counted toward the degree.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

University Composition Requirements

Composition I: Principles of Composition ¹	4-7
Advanced Composition	3

General Education Requirements

A minimum of six courses is required, as follows:	24
Humanities & the Arts: Literature & the Arts (1-2 courses) ⁴	
Humanities & the Arts: Historical & Philosophical Perspectives (1-2 courses) ⁴	
Natural Sciences & Technology: Physical Sciences (0-2 courses) ⁵	
Natural Sciences & Technology: Life Sciences (0-2 courses) ⁵	
Behavioral Sciences (1 course)	
Cultural Studies: Non-Western/U.S. Minorities Cultures (1 course)	
Cultural Studies: Western/Comparative Cultures (1 course)	

Non-Primary Language Requirement

Completion of the fourth semester or equivalent of a non-primary language is required. Completion of four years of a single language in high school satisfies this requirement. A student may also meet this requirement by completing two non-primary languages to the third level.

Business Core Requirements

ACCY 201 & ACCY 202	Accounting and Accountancy I and Accounting and Accountancy II	6
BADM 300	The Legal Environment of Bus	3
BADM 310	Mgmt and Organizational Beh ²	3
BADM 320	Principles of Marketing	3
BADM 449	Business Policy and Strategy	3
CS 105	Intro Computing: Non-Tech	3
ECON 102 & ECON 103	Microeconomic Principles and Macroeconomic Principles	6
ECON 202 & ECON 203	Economic Statistics I and Economic Statistics II	6
ECON 302	Inter Microeconomic Theory	3
FIN 221	Corporate Finance	3
MATH 125 & MATH 234	Elementary Linear Algebra and Calculus for Business I ³	7
CMN 101	Public Speaking	3
Total Hours		49
Courses to yield this total		15-38
Elective course work		0-32
Minimum total hours for the degree		124

- ¹ For a list of the specific courses that meet this requirement, see the college Office of Undergraduate Affairs in 1055 Business Instructional Facility or see the Course Explorer for a list of approved general education courses.
- ² This course includes limited voluntary participation as a subject in experiments.
- ³ MATH 220/MATH 221 and MATH 231, or MATH 220/MATH 221 and MATH 125 may be substituted for MATH 125 and MATH 234. (See college mathematics requirement above.)
- ⁴ Three courses in the Humanities & the Arts area are required and students must complete at least one course in the Literature & the Arts and Historical & Perspectives subcategories. At least one of the courses must be a 200 or higher level course.
- ⁵ Two courses in the Natural Sciences & Technology area are required. It is strongly recommended that students complete one course in the Physical Sciences and Life Sciences subcategories.

Accountancy

Jon Davis

360 Wohlers Hall, 1206 South Sixth, Champaign, (217) 333-0857

www.business.illinois.edu/accountancy

For the Degree of Bachelor of Science in Accountancy

Organizations are a nexus of contracts, implicit and explicit, among resource owners who contract with each other to the benefit of all. In most complex organizations, these contracts specify who has the knowledge, and thus the rights, to make decisions about the use and control of the contracted resources. The effectiveness and efficiency of decisions regarding initiation, execution, and monitoring of organizations' contracts depend on the quantity and quality of information available. The accountant assists in the development, accumulation, evaluation, and dissemination of the information necessary for contracting parties to make effective and efficient contracting decisions. Organizations, in turn, contract with various segments of society such as labor unions, capital markets, regulatory agencies, and governments. The accountant assists in the development, accumulation, evaluation, and dissemination of the information necessary for ensuring that organizations comply with the terms of their social contracts.

Study in accountancy is designed to prepare individuals for entry into the accountancy professions independent of subsequent specialization. This preparation includes knowledge of the activities of organizations, businesses, and accounting practices; intellectual, interpersonal, and communication skills; and personal capabilities and professional attitudes. Specializations in accountancy include such fields as financial accounting, management accounting, accounting information systems, taxation, and auditing. Specialization in an accounting field requires additional graduate education and practical experience.

In addition to the accountancy major requirements, students in accountancy must meet the University General Education requirements and the College of Business core requirements (for more detail, see the College of Business undergraduate section (p. 103)).

Minimum requirements in the major for the Bachelor of Science Degree in Accountancy are:

ACCY 301	Atg Measurement & Disclosure	3
ACCY 302	Decision Making for Atg	3
ACCY 303	Atg Institutions and Reg	3
ACCY 304	Accounting Control Systems	3
ACCY 312	Principles of Taxation	3
ACCY 405	Assurance and Attestation	3
or ACCY 415	Auditing Stds and Practice	
Select one of the following:		3
ACCY 410	Advanced Financial Reporting	
ACCY 451	Advanced Income Tax Problems	
Total Hours		21

Accountancy courses (both required and elective) to be applied toward the 124-hour requirement for the Bachelor of Science Degree in Accountancy may not be taken on a credit/no-credit basis. In addition, a limit of 33 hours of accountancy courses (including ACCY 201 and ACCY 202) may be counted toward the 124 total hour requirement.

Business Administration

Aric Rindfleisch

350 Wohlers Hall, 1206 South Sixth Street, Champaign, (217) 333-4240

www.business.illinois.edu/ba

The Department of Business Administration offers five Undergraduate Majors: Business Process Management, Information Systems and Information Technology, Management, Marketing and Supply Chain Management. All majors require completion of 27 credit hours in the major area. In addition to the Business Administration Major Requirements, Business Administration students must meet the University's General Education Requirements and the College of Business' Core Courses Requirement (for more detail, see the College of Business Undergraduate section (p. 103)).

Double Majors Within the Department of Business Administration

Only College of Business students with a declared Business Administration major may pursue a second Business Administration major.

Students may earn up to two Business Administration majors.

Business Administration Majors:

- Business Process Management
- Information Systems and Information Technology
- Management (Entrepreneurship, General Management and International Business Concentrations)
- Marketing
- Supply Chain Management

Each Business Administration major requires 9 courses. Students desiring to earn a second Business Administration major must fulfill the course requirements for both majors.

Some BADM courses will fulfill requirements of both majors, but a second Business Administration major will add 2 to 5 additional BADM courses during a student's junior and senior years since each Business Administration major requires unique advanced coursework.

Students may earn only one Management Major Concentration.

- Business Process Management (p. 108)
- Information Systems and Information Technology (p. 109)
- Management (p. 109)
- Marketing (p. 111)
- Supply Chain Management (p. 111)

Major in Business Process Management

For the Degree of Bachelor of Science in Business Process Management

The Business Process Management major develops concepts and skills for crafting innovative ways to deliver a firm's goods and services. It focuses upon the productive management of capital and human and information resources and upon the process of value creation. The coursework devotes particular attention to the definition of business goals and the design of management policies and procedures for achieving those goals. Students majoring in Business Process Management typically will seek careers as operations or strategy consultants, supply chain analysts, quality management professionals, manufacturing or service operations managers, project managers, or leaders within other mission-critical functions of an organization.

Requirements for the majors are:

BADM 350	IT for Networked Organizations	3
BADM 374	Management Decision Models (Prerequisite: ECON 203)	3
BADM 375	Business Process Management	3
BADM 377	Project Management	3
BADM 378	Logistics Management	3
BADM 379	Business Process Improvement	3
Select three of the following:		9-10
BADM 311	Individual Behavior in Orgs (Prerequisite: BADM 310) ¹	

BADM 312	Org Design and Environment (Prerequisite: BADM 310) ¹
BADM 329	New Product Development (Prerequisite: BADM 320) ¹
BADM 353	Info Sys Analysis and Design (Prerequisite: BADM 352) ¹
BADM 445	Small Business Consulting ¹
BADM 453	Decision Support Systems (Prerequisite: BADM 350) ¹

Total Hours

27

¹ One of these three course requirements may be satisfied by an appropriate internship, approved in advance by the Head of the Department of Business Administration or designee.

Major in Information Systems and Information Technology

For the Degree of Bachelor of Science in Information Systems and Information Technology

The Information Systems and Information Technology major provides students the skills necessary to understand and manage information, information technology development, systems analysis, e-business management and electronic commerce.

BADM 350	IT for Networked Organizations	3
BADM 352	Database Design and Management	3
BADM 353	Info Sys Analysis and Design (Prerequisite: BADM 352)	3
Select two of the following:		6
BADM 351	E-Business Management (Prerequisite: BADM 350)	
BADM 355	Enterprise Software Management (Prerequisite: BADM 350)	
BADM 453	Decision Support Systems (Prerequisite: BADM 350)	
BADM 458	IT Governance (Prerequisite: BADM 350)	
Select four of the following:		12-14
BADM 311	Individual Behavior in Orgs (Prerequisite: BADM 310)	
BADM 312	Org Design and Environment (Prerequisite: BADM 310)	
BADM 322	Marketing Research (Prerequisite: BADM 320 and ECON 202)	
BADM 324	Purchasing and Supply Mgmt (Prerequisite: Credit or concurrent enrollment in BADM 320)	
BADM 374	Management Decision Models (Prerequisite: ECON 203)	
BADM 375	Business Process Management	
BADM 377	Project Management	
BADM 379	Business Process Improvement	
BADM 380	International Business	
BADM 445	Small Business Consulting	
BADM 446	Entrepreneurship Sm Bus Form	
Total Hours		27

Major in Management

For the Degree of Bachelor of Science in Management

The Management major is designed to prepare students to be leaders and innovators in analyzing and solving managerial problems that every organization faces in its day-to-day operations. To be effective, managers must be able to design organizations that can compete in complex and volatile business environments and to execute their strategies within these organizations. Effective managers also must be ethical leaders and competent decision-makers who formulate goals and long-term plans, build effective teams, and motivate their employees. Students majoring in Management have the option to select one concentration either in Entrepreneurship, General Management or International Business, depending on their career objectives.

The Entrepreneurship concentration studies how business opportunities are identified and exploited to create wealth. This concentration is intended for students who are interested in new venture creation. Some graduates will work within existing organizations while others will create new organizations. The International Business concentration is designed to provide students with the sound understanding of how International Business principles and the

managerial issues faced by multinational companies. Students who select the International Business concentration will focus on political, cultural, and institutional differences among nations by taking courses offered across the university.

Management Major-Entrepreneurship Concentration

PSYC 201	Intro to Social Psych (Prerequisite: PSYC 100 or PSYC 103)	3
BADM 311	Individual Behavior in Orgs (Prerequisite: BADM 310)	3
BADM 350	IT for Networked Organizations	3
BADM 374	Management Decision Models (Prerequisite: ECON 203)	3
BADM 375	Business Process Management	3
BADM 445	Small Business Consulting	4
BADM 446	Entrepreneurship Sm Bus Form	4
FIN 423	Financing Emerging Businesses (Prerequisite: Consent of the Department of Finance)	3
Select one of the following:		3-4
BADM 312	Org Design and Environment (Prerequisite: BADM 310)	
BADM 403	Principles of Business Law	
BADM 447	Legal Strat for Entrepre Firm	
Total Hours		27

Management Major-General Management Concentration

PSYC 201	Intro to Social Psych (Prerequisite: PSYC 100 or PSYC 103)	3
BADM 311	Individual Behavior in Orgs (Prerequisite: BADM 310)	3
BADM 312	Org Design and Environment (Prerequisite: BADM 310)	3
BADM 313	Human Resource Management (Prerequisite: BADM 310)	3
BADM 350	IT for Networked Organizations	3
BADM 374	Management Decision Models (Prerequisite: ECON 203)	3
BADM 375	Business Process Management	3
Select two of the following:		6-8
BADM 329	New Product Development (Prerequisite: BADM 320)	
BADM 353	Info Sys Analysis and Design (Prerequisite: BADM 352)	
BADM 377	Project Management	
BADM 378	Logistics Management	
BADM 380	International Business	
BADM 403	Principles of Business Law	
BADM 446	Entrepreneurship Sm Bus Form	
Total Hours		27

Management Major-International Business Concentration

PSYC 201	Intro to Social Psych (Prerequisite: PSYC 100 or PSYC 103)	3
BADM 350	IT for Networked Organizations	3
BADM 374	Management Decision Models (Prerequisite: ECON 203)	3
BADM 375	Business Process Management	3
BADM 380	International Business	3
BADM 381	Multinational Management	3
BADM 382	International Marketing (Prerequisite: BADM 320)	3
General International Elective		
Choose one course from an approved list of courses relating to international trade, international economics or international finance.		3
Area Specific Elective		
Choose one course from an approved list of courses relating to 1) the European Union or other customs union or 2) the economy, politics, or sociology of a specific country or region.		3
Total Hours		27

View the General International Elective course list. (<http://www.business.illinois.edu/ba/programs/ugrad/mgmt/intl/electives-1.html>) View the Area Specific Elective course list. (<http://www.business.illinois.edu/ba/programs/ugrad/mgmt/intl/electives-2.html>) The elective course lists will be reviewed periodically and new courses may be added. A student also may substitute a course not on the lists by obtaining consent in advance from the Department of Business Administration Head or designee.

Major in Marketing

For the Degree of Bachelor of Science in Marketing

The Marketing major studies those business activities directly related to the process of placing meaningful assortments of goods and services in the hands of the consumer. The Marketing Student is concerned with the efficient performance of marketing activities and with their effective coordination with the other operations of the firm.

BADM 322	Marketing Research (Prerequisite: BADM 320 and ECON 202)	3
BADM 325	Consumer Behavior (Prerequisite: BADM320)	3
BADM 350	IT for Networked Organizations	3
BADM 375	Business Process Management	3
BADM 420	Advanced Marketing Management (Prerequisite: BADM 320)	3
Select four of the following (which must include at least two Marketing courses - marked with *):		12-13
BADM 321	Principles of Retailing (Prerequisite: BADM 320) *	
BADM 323	Marketing Communications (Prerequisite: BADM 320) *	
BADM 324	Purchasing and Supply Mgmt (Prerequisite: Credit or concurrent enrollment in BADM 320) *	
BADM 326	Pricing Policies (Prerequisite: BADM 320) *	
BADM 327	Marketing to Business and Govt (Prerequisite: BADM 320) *	
BADM 328	Business-to-Business Selling *	
BADM 329	New Product Development (Prerequisite: BADM 320) *	
BADM 382	International Marketing (Prerequisite: BADM 320) *	
PSYC 201	Intro to Social Psych (Prerequisite: PSYC 100 or PSYC 103)	
BADM 311	Individual Behavior in Orgs (Prerequisite: BADM 310)	
BADM 312	Org Design and Environment (Prerequisite: BADM 310)	
BADM 374	Management Decision Models (Prerequisite: ECON 203)	
BADM 378	Logistics Management	
BADM 403	Principles of Business Law	
Total Hours		27

Major in Supply Chain Management

For the Degree of Bachelor of Science in Supply Chain Management

The Supply Chain Management major studies the movement of materials from their procurement as raw material, parts or components through the manufacturing or processing sector to the marketing and distribution of end products for industrial or commercial users. The Supply Chain Management Program is open only to qualified students based upon application and personal interview. For more information, contact the Director of Supply Chain Management Program.

Students are required to complete an internship to graduate with this major.

BADM 324	Purchasing and Supply Mgmt (Prerequisite: Credit or current enrollment in BADM 320)	3
BADM 327	Marketing to Business and Govt (Prerequisite: BADM 320)	3
BADM 335	Supply Chain Management Basics	3
BADM 336	Modeling the Supply Chain (Prerequisite: BADM 335) ¹	3
BADM 337	Practicum in Supply Chain Mgt	3
BADM 350	IT for Networked Organizations	3
BADM 375	Business Process Management	3
BADM 378	Logistics Management	3

Select one of the following:

3

BADM 322	Marketing Research (Prerequisite: BADM 320 and ECON 202)
BADM 328	Business-to-Business Selling
BADM 352	Database Design and Management
BADM 374	Management Decision Models (Prerequisite: ECON 203)
BADM 377	Project Management
BADM 379	Business Process Improvement

Total Hours

27

¹ *Internship must be completed prior to taking this course and a report on the internship must be submitted.*

Finance

Louis Chan

340 Wholers Hall

1206 S. Sixth Street

Champaign, IL 61820, (217) 244-2239, (217) 333-3102

<http://www.business.illinois.edu/finance>

For the Degree of Bachelor of Science in Finance

The field of finance is primarily concerned with the acquisition and management of funds by business firms, governments, and individuals. A business seeks financial advice when considering the purchase of new equipment, the expansion of present facilities, or the raising of additional funds. Determining the value of financial and real assets and derivatives is a key activity in finance.

As the study of finance is designed to provide the student with both the theoretical background and the analytical tools required to make effective judgments in finance, many students select careers in business financial management, commercial and investment banking, investments, government finance, insurance, and real estate.

In addition to the finance major requirements, students in finance must meet the University General Education requirements and the College of Business core requirements (for more detail, see the College of Business undergraduate section (p. 103)). Minimum requirements in the major for the Bachelor of Science degree in Finance are:

FIN 300	Financial Markets (Prerequisite: FIN 221 Corporate Finance)	3
FIN 321	Advanced Corporate Finance (Prerequisite: FIN 300 Financial Markets)	3
Three additional full-semester, 3-hour 400-level Finance courses except FIN 494 or FIN 495 (Senior Research) and FIN 490 (Special Topics).		9
Select one of the following (Major elective):		3-4
ACCY 301	Atg Measurement & Disclosure (Prerequisite: ACCY 202)	
ACCY 302	Decision Making for Atg (Prerequisite: ACCY 202)	
ACE 428	Commodity Futures and Options	
BADM 374	Management Decision Models (Prerequisite: ECON 202 or consent of instructor)	
Economics: any 300- or 400-level course excluding ECON 302		
GEOG 483	Urban Geography	
Mathematics or statistics: any course above the minimum mathematics or statistics requirement of the college with the exception of MATH 225.		
Other courses as recommended by the Department of Finance faculty and approved by the Department of Finance chairperson.		

Advising Notes

- Courses taken to fulfill major requirements may not be taken on a credit-no credit basis.
- It is recommended that Finance majors take additional accounting. ACCY 201 and ACCY 202 are required in the business core. Many employers look favorably upon additional accounting courses. For those interested in financial reporting, we suggest ACCY 301 and ACCY 303. For those interested in managerial control and decision making, we would recommend ACCY 301 and ACCY 302, followed by ACCY 304, possibly followed by ACCY 312.
- Extensive Advising information can be found online <http://www.business.illinois.edu/finance/bsc.aspx>

Minor in Business for Non-Business Majors

Contact busminor@business.illinois.edu to address concerns and questions.

The Business Minor Program is designed for students earning degrees in colleges other than the College of Business. The Business Minor provides course work through which Non-Business students can obtain skills and learn tools used in business. Business Minor students will learn the theories, techniques and concepts of accounting, marketing, management and finance. The Business Minor provides a background that will be useful for Non-Business students who wish to pursue a business career. The Business Minor is not available to College of Business students and Technology and Management Minor students. The Business Minor is not to be considered as preparation for transfer into the College of Business to earn a business degree.

Admission into the Business Minor Program is very competitive and is based upon both the prerequisite course GPA and the overall/total cumulative GPA of the pool of applicants. All six Business Minor courses must be taken for a letter grade. Grade exceptions will be made only for prerequisite courses that are fulfilled by AP credits. Students are admitted by application into the Business Minor Program. Applications are accepted in 350 Wohlers Hall January 1st - 31st.

Admission Requirements:

1. Applicants must complete at least 45 credits by the end of the fall semester to become eligible for admission from the January application period.
2. Applicants must complete all 4 of the prerequisite courses by the end of the fall semester to become eligible for admission from the January application period. Please refer to the Business Minor Program's website (<http://go.illinois.edu/busminor>) for additional admission and academic information as well as the approved campus substitute prerequisite courses.

Prerequisite Courses Requirement

CS 105	Intro Computing: Non-Tech	3
ECON 102	Microeconomic Principles	3
MATH 234	Calculus for Business I	4
STAT 100	Statistics	3

All applicants must have academic good standing (2.00 cumulative GPA or higher). In addition, a cumulative 2.00 GPA is required from the four prerequisite courses. Application is made by submitting the Statement of Intent to Pursue a Campus-Approved Minor (<http://provost.illinois.edu/programs/advising/intent.pdf>) form in 350 Wohlers Hall. Applications will be reviewed by the College of Business in February and all applicants will be notified of a decision by mid-February. Planning to pursue the Business Minor does not offer special registration privileges.

Only those students officially admitted into the Business Minor Program by the College of Business may earn the Business Minor.

Admitted students should enroll in the summer session Business Minor courses to better ensure their completion of the Business Minor before their graduations.

Core Courses Requirement

ACCY 200	Fundamentals of Accounting (Enrollment is restricted to approved minor students.)	3
BADM 310	Mgmt and Organizational Beh	3
BADM 320	Principles of Marketing	3
FIN 221	Corporate Finance (Prerequisites: ACCY 200 (Enrollment only in the Spring Semester))	3

Note: ACCY 200, BADM 310, BADM 320, FIN 221 and the two elective courses must be earned from the Urbana-Champaign campus. No exceptions will be made for study abroad and transfer courses to fulfill the minor's course requirements.

Elective Courses Requirement

Students must select at least two of the following elective courses to fulfill the minor's course requirements.

BADM 300	The Legal Environment of Bus	3
BADM 340	Ethical Dilemmas of Business	3
BADM 350	IT for Networked Organizations	3
BADM 375	Business Process Management	3
BADM 380	International Business	3
BADM 395	Senior Research II (Only the Negotiations (N) section)	1-4

Technology and Management

218 Wohlers Hall, 1206 South Sixth Street, Champaign, (217) 244-5752, (217) 265-6304 (fax)

<http://www.techmgmt.illinois.edu/>

E-mail: tech-mgmt@illinois.edu

Successful management of technology-driven businesses today requires that employees work effectively in interdisciplinary teams. Team-based project management requires that each member of the team contribute not only in his or her own area of expertise but in other aspects of the project as well. The better equipped a new employee is to reach this level of competency quickly, the more valuable will be his or her contributions. Moreover, an employee having such competency will be better prepared to assume positions of increased responsibility and challenge.

Through the Minor in Technology and Management, undergraduate students in the College of Business along with students from the College of Engineering are enabled to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross discipline. The course of study leading to a minor in technology and management for students in the College of Business is outlined below.

MSE 101	Materials in Today's World	3
TAM 201	Mechanics for Technol & Mgmt	3
ECE 317	ECE Technology & Management	3
BADM/TMGT 367	Mgmt of Innov and Technology	3
BADM/TMGT 366	Product Design and Development	3
BADM/TMGT 460	Business Process Modeling	3
BADM/TMGT 461	Tech, Eng, & Mgt Final Project	4

Throughout the program, emphasis is placed on an interdisciplinary team approach to the development of comprehensive solutions to real-world problems. In many cases the problems are provided by industry sponsors who, along with business and engineering faculty advisors, provide assistance and guidance to student teams.

Students who wish to pursue this minor must apply for admission to the Technology and Management Program in the spring semester preceding their sophomore or junior year. Enrollment in the minor is limited and admission is usually competitive. Students who wish to apply must provide a letter of interest, a transcript of grades, and a statement of career goals to the Director: John F. Clarke, tech-mgmt@illinois.edu, 218 Wohlers Hall. Direct general inquiries to the program administrator, (217) 244-5752 or e-mail tech-grmt@illinois.edu (tech-mgmt@illinois.edu)

Education, College of

120 Education Building
1310 South Sixth Street
Champaign, IL 61820, (217) 333-2800
<http://education.illinois.edu>

The College of Education at the University of Illinois at Urbana-Champaign offers undergraduate degree programs in the majors of Early Childhood Education, Elementary Education, Special Education and a minor in Secondary Education, all of which include teaching licensure. The College of Education also offers a non-licensure undergraduate degree in the major of Learning and Education Studies.

A distinguishing hallmark of the College of Education is the commitment to diversity. Faculty members engage in research, teaching, and service activities developed to ensure that all children, including those who are racially, ethnically, linguistically, and economically different as well as people with different abilities and disabilities, are provided with educational opportunities.

Students who satisfactorily complete the degree program in Elementary Education are eligible for the University's recommendation for Illinois licensure (grades kindergarten through nine)¹. The Early Childhood Education degree program prepares students for recommendation for Illinois Early Childhood licensure (birth through grade three). The program also incorporates course work leading to an Early Childhood Special Education approval. The teacher education minor in Secondary Education is a component of the teaching option within the following majors in the College of Liberal Arts and Sciences: Biology, Chemistry, English, Geology, History, Mathematics, and Physics. Students who satisfactorily complete an LAS degree in one of these areas and the teacher education minor in secondary education are eligible for the University's recommendation for Illinois licensure in grades six through twelve². For additional information regarding Liberal Arts and Sciences requirements, see the College of Liberal Arts and Sciences (p. 281).

The Special Education major offers an undergraduate field-based professional preparation program designed to prepare teacher candidates to work with individuals with varying disabilities including: learning disabilities, social or emotional disorders, cognitive disabilities, physical disabilities and other health impairments, autism and traumatic brain injury. Candidates who successfully complete the degree program are eligible for the University's recommendation for Illinois licensure to teach students with disabilities from ages 5 through 21 in a range of settings.

The Learning and Education Studies degree program is a **non-licensure major** with concentrations in Applied Learning Science, Educational Equality and Cultural Understanding, and Workplace Training and Development. The curriculum prepares students for a broad range of positions requiring expertise informal and non-formal learning and education. Examples include training and program development, international schools, and other education-related positions in agencies, business, and government.

Requirements

Admission

Freshmen can be admitted to the Learning and Education Studies major or the Pre-Early Childhood, Pre-Elementary Education, Pre-Special Education curriculum.

Admission to the College of Education at any level (off campus and on-campus applicants) is competitive. Freshmen must complete the University's minimum high school subject pattern described in the undergraduate admissions section elsewhere in this catalog. In addition, freshman applications are evaluated for admission based on ACT/SAT scores and the high school percentile rank achieved at the conclusion of the junior year in high school.

Admission is based on the following criteria: competitive overall and institutional grade point average (on-campus applicants), cumulative grade point average with a minimum of 2.5 (applicants from other institutions), and grades earned in the course work of the intended curriculum.

Graduation

Undergraduate students in the College of Education must meet the University requirements for graduation. For those in a major leading to licensure, the requirements of the Council on Teacher Education for certification must also be met. Students in all curricula must meet the course and academic credit requirements of their curricula with satisfactory scholastic averages. Student teaching is required of all undergraduates in a licensure major and must be completed through the University of Illinois at Urbana-Champaign.

Students in need of additional information concerning regulations and degree requirements of the College of Education should consult their academic advisers or the Assistant Dean for Academic Affairs in the College of Education, University of Illinois at Urbana-Champaign, 142 Education Building, 1310 South Sixth Street, Champaign, IL 61820.

For additional requirements pertaining to licensure, please refer to the Council on Teacher Education (<http://illinois.dev6.leapfrog.com/2012/fall/programs/undergrad/cte.html>).

General Education

In order to meet the University's current requirements in general education, each candidate for a degree from the College of Education must complete the campus general education requirements and the Language other than English through the third semester college course. In most teacher education curricula, specific coursework within the general education areas must be taken. Also, in most teacher education curricula, additional credit in the general education areas is required. For more information on required general education coursework, contact a College of Education academic adviser. Students must select their courses for general education from the campus general education course list.

Special Programs

Honors at Graduation

Eligibility for graduation with honors is established after all grades are recorded following a student's final semester. A student who achieves the required scholastic average in all work presented for graduation (excluding credit for courses not included in the computation of the grade point average) may be recommended for honors as follows: honors, minimum cumulative grade point average of 3.75; high honors, minimum cumulative grade point average of 3.85; highest honors, minimum cumulative grade point average of 3.90.

Edmund J. James Scholars

The James Scholar program is a University-wide honors program established to encourage undergraduate research and independent study and to foster scholarly endeavors. As a James Scholar, students are entitled to certain academic privileges, including priority assignment of registration time, access to the "stacks" in the library, and official recognition on the University of Illinois transcript.

Entering freshmen in the top 15% of the College's admitted applicant pool based on their ACT/SAT score and High School rank/GPA are invited to participate in the James Scholar Program. Transfer and continuing students must have achieved at least a 3.5 cumulative and University of Illinois grade point average to participate.

Students are certified as James Scholars by the college on a yearly basis. To qualify for this certification, the student must successfully complete a James Scholar project/requirement in the fall and spring semester and maintain a 3.5 University of Illinois and cumulative grade point average. Details are available on the college website.

- ¹ For students graduating after September 1, 2017, the Elementary Education program will prepare students to teach grades 1-6.
- ² For students graduating after January 31, 2018, the Secondary Education program will prepare students to teach grades 9-12.

Curriculum and Instruction

Fouad Abd El Khalick

311 Education Building, 1310 South Sixth, Champaign, (217) 244-8286

The Department of Curriculum and Instruction offers degree programs in elementary education and early childhood education and provides the supporting course work for the teacher education minor in secondary education. Students who satisfactorily complete the degree program in elementary education are eligible for the University's recommendation for Illinois certification (grades kindergarten through nine). The early childhood education degree program prepares students for recommendation for Illinois early childhood certification (birth through grade three). The program also incorporates course work leading to an early childhood special education approval. Only students who have earned at least 60 semester hours are considered for admission to the elementary or early childhood curricula. The teacher education minor in secondary education is a component of the teaching option within the following Sciences and Letters majors in the College of Liberal Arts and Sciences: biology, chemistry, English, geology, history, mathematics, and physics. Students who satisfactorily complete an LAS degree in one of these areas and the teacher education minor in secondary education are eligible for the University's recommendation for Illinois certification in grades six through twelve. For additional information regarding Liberal Arts and Sciences requirements, see the College of Liberal Arts and Sciences (p. 281). Additional information regarding the teacher education minor in secondary education may be found at the end of the College of Education's section.

Early Childhood Education

<http://education.illinois.edu/ci>

Department: Curriculum and Instruction

Head of Department: Fouad Abd El Khalick

311 Education Building, 1310 South Sixth, Champaign, (217) 244-8286

For the Degree of Bachelor of Science in Early Childhood Education Curriculum Preparatory to Early Childhood School Teaching

This program focuses on preparing teachers for preschool, kindergarten, and the early primary grades (one through three) of the elementary school. Graduates of the program can qualify for a professional educator license in Early Childhood Education with Early Childhood Special Education approval. There are seven prerequisite courses that must be completed prior to admission into the Early Childhood Education program. See information on prerequisites (http://education.illinois.edu/programs/ug_prereq.html). A minimum of 129 semester hours of credit, excluding basic military science, is necessary for graduation.

Illinois law and Council on Teacher Education policy require that all candidates for admission to a teacher preparation program pass the Illinois Licensure Testing System Test of Academic Proficiency (TAP) (<http://www.icts.nesinc.com>) prior to admission. The Illinois State Board of Education has determined the ACT Plus Writing/SAT scores can be used in lieu of a passing score on the Test of Academic Proficiency (formerly known as the Illinois Test of Basic Skills). See information on the details (<http://education.illinois.edu/students/prospective-students/ACT>). (<http://education.illinois.edu/students/prospective-students/ACT>)

Students who are admitted to Early Childhood for the fall of their junior year may be able to complete the requirements for the bachelor's degree in four years, depending on the number of general education and area of concentration courses left to complete. Consult the Early Childhood adviser or the certification officer for additional information.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Grades in courses of C- or lower may not be used for State of Illinois licensure, endorsements, or approvals. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (<http://www.cote.illinois.edu>).

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Assistant Dean for Academic Affairs: Kathy Ryan
Admissions Information: saao@education.illinois.edu

120 Education Building, 1310 South Sixth, Champaign, (217) 333-2800

For the Degree of Bachelor of Science in Learning and Education Studies, coming in Fall 2015

This curriculum prepares individuals for positions requiring expertise in formal and non-formal learning and educational settings that do NOT require licensure (becoming a licensed teacher). Students interested in becoming a licensed teacher should consider the licensure program in the majors of Elementary Education, Early Childhood Education, or Special Education.

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the following concentrations: 1) Applied Learning Science; 2) Educational Equality and Cultural Understanding; and 3) Workplace Training and Development.

HRD 415	Diversity in the Workplace

Concentration²

Students must complete 24 credit hours within one of the following three areas of concentration: 1) Applied Learning Science, 2) Educational Equality and Cultural Understanding, or 3) Workplace Training and Development 24

Electives

Electives (including minor, if taken) 16-34

Total Hours 120

Total minimum hours include general education, language other than English, concentration and core credits.

¹ General Education Requirement. Courses must be selected from the Campus General Education Approved Course List.

² Area of Concentration and Core Requirement courses found on the General Education Approved Course List may also be credited toward the General Education requirements.

Applied Learning Science (AppLeS) Concentration

The undergraduate non-licensure concentration in Applied Learning Science (AppLeS) will provide a thorough grounding in the learning sciences through an innovative program that includes courses in learning, language understanding, quantitative reasoning and statistics, designing learning environments, and human performance. The program culminates in a capstone course in which the student works on a research project under the direction of one or more faculty members. Graduating students will have a solid preparation for graduate study in this emerging area of scholarship (such as the new Learning Science and Engineering Professional MS Program at Carnegie-Mellon University), as well as in education, psychology, business, law, and other more traditional areas of study. In addition, through their coursework and research experience, international and domestic students will be prepared for a wide range of current (and future) jobs that require expertise in design, analysis, and evaluation of learning environments, as teachers, policy makers, analysts, and professionals in government, healthcare, business, and nonprofit organizations.

Students in the AppLeS concentration will:

- Explore theories, phenomena, and methods in the learning sciences (i.e., the biological, cognitive, dispositional, and sociocultural underpinnings of learning).
- Identify general principles of learning, their contextual variations, and how they can be applied in the classroom, at work and home, and diverse settings of daily life.
- Acquire flexible learning and problem solving skills that can be broadly applied in diverse contexts, including research, quantitative reasoning, communication, and collaborative problem solving.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Communication, Computer Science, Informatics, Linguistics, Mathematics or Statistics.

The following courses are required as of Fall 2015 for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

EPSY 403	Res Methods in Learning Scienc	3
EPSY 398	Thesis	3
EPSY 490	Developments in Educ Psyc	3
PSYC 357	Intro Cognitive Science	3
EPSY 407	Adult Learning and Development	3
Choose one from the following:		3
EPSY 402	Sociocultural Infl on Learning	
EPSY 404	Adjustment in School Settings	

HRD 490	Issues and Developments in HRD	
Choose one from the following:		3
EPSY 408	Learn and Human Dev wi Ed Tech	
HRD 472	Learning Technologies	
PSYC 456	Human Performance and Cognition in Context	
Choose one from the following:		3
EPSY 486	Principles of Measurement	
SOC 485	Intermediate Social Statistics	
Total Hours		24

Educational Equality and Cultural Understanding Concentration

This undergraduate non-licensure concentration will prepare students to better understand the role of education in enabling equality and cultural understanding in domestic and international perspectives. Focusing on equality, diversity, and cultural understanding will give students a unique perspective on the historical place of education in both challenging inequities and helping to justify social divisions. Understanding how education as an institution operates to perpetuate social and economic stratification will give students a perspective on the challenges of creating a more equitable distribution of education. Classes will cover a wide range of disciplinary approaches, including history, social science, educational policy analysis, and theory. Students will understand the contemporary and historical barriers to the distribution of education and examine recent human rights-based demands for extending education to people of all social classes, regions, ethnicity, language groups, and genders.

Knowing how equity, social justice, and cultural understanding are enabled through education requires an in-depth understanding of domestic and international contexts. Introductory courses will cover basic definitions of educational justice and educational equality, survey international minorities in the United States or minorities in other countries in relationship to education, and explore political, economic, and social contexts for education.

Intermediary classes will invite students to apply their basic understanding of such processes to more local and detailed contexts, like shifts in the U.S. that have extended public schooling and higher education opportunities to historically marginalized populations such as people of color, immigrants, women and citizens from low socioeconomic status. Advanced classes will introduce students to the theoretical approaches to studying social justice and difference, including Critical Race Theory, transnational and global theory, and globalized critical pedagogy.

These courses will be designed to appeal to international and domestic students seeking employment in both the United States and international educational settings, including teaching English as a second language. In addition, understanding the role of education in fostering the expansion of universal human rights will enable students interested in international business and NGOs to explore the problems and potentials of policies intent on improving conditions in the United States and abroad. As all areas of study and trade are increasingly situated in transnational networks, the concentration in Educational Equality and Cultural Understanding provides a firm grounding on key issues of rights, obligations, and new institutions that help maintain commitments for educational equity and justice under these new circumstances.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: English as a Second Language, African-American Studies, Asian American Studies, Global Studies, Latina/Latino Studies, South Asian Studies, Gender and Women's Studies, or LGBT/Queer Studies.

The following courses are required as of Fall 2015 for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

Choose three from the following:		9
EPS 399	Education and Social Justice	
EPS 400	History of American Education	
EPS 405	Historical & Social Barriers	
EPS 411	School and Society	
Choose two from the following Cultural Understanding area:		6
EPS 402	Asian American Education	
EPS 422	Race, Ed Pol, and Soc Science	
EPS 426	Comparative Education	
Choose two from the following Educational Equality area:		6
EPS 412	Critical Thinking for Teachers	
EPS 420	Sociology of Education	
EPS 423	Politics of Education	
Elective class from GWS, LLS, AAS, AFRO, AIS, or GLBL		3
Total Hours		24

Workplace Training and Development Concentration

Workplace Training and Development is a non-licensure undergraduate concentration. The concentration will provide international and domestic students with the broad sets of knowledge and skills necessary to develop, deliver, and evaluate training and development programs across workplace settings, such as businesses and industries, two-year post-secondary schools, or community and government agencies. In addition, it will serve a growing demand for graduates who have an interest in helping adults learn about and seek to improve organizational performance. The demand comes from a range of business sectors, specifically health care, manufacturing, and logistics.

Students in this concentration will receive an overview of the human resource development field and specifically focus on the training and development aspects of the field. Students will acquire the knowledge and practical skills, in such areas as job and task analysis, training program design, and training program coordination. Students will also be introduced to learning management systems, which most organizations now use to track the learning progress of their employees. An internship will be a required component of the concentration.

The concentration appeals to the following potential students:

- Individuals who wish to combine the study of organizations and learning in their academic studies;
- Individuals who currently work in a technical role, such as a lab tech or nurse in health care, and who want to become more involved in training others about their occupation;
- Individuals with an associates degree who work as information technology specialists and who are asked to develop and deliver training for others;
- Individuals who wish to work in the business and industry outreach departments of community colleges;
- Individuals who serve or wish to serve as instructors in post-secondary technical education schools;
- Individuals who wish to serve as a staff member in the human resource development department of an organization; and
- Individuals who wish to prepare for future graduate study in human resource development.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Business, Leadership, Communication, Technology and Management or Global Labor Studies.

The following courses are required as of Fall 2015 for this concentration. Changes/additions to this list can be obtained from the College office. Approvals for substitution must be submitted by petition to the College office for approval by the Assistant Dean for Academic Affairs.

HRD 401	Training in Business/Industry	3
HRD 402	Business Principles for HRD	3
HRD 411	Training System Design	3
HRD 412	Instructional Techniques	3
HRD 414	Facilitation Skills	3
HRD 415	Diversity in the Workplace	3
HRD 440	Work Analysis	3
HRD 472	Learning Technologies	3
Total Hours		24

Teacher Education Minor in Secondary School Teaching

College of Education

Assistant Dean for Academic Affairs: Kathy Ryan

120 Education Building, 1310 South Sixth, Champaign, (217) 333-2800

Liberal Arts and Sciences

Academic Adviser: Lori Davis

Admissions Information: las-teach@illinois.edu (las-teach@illinois.edu?subject=Question%20about%20the%20Teaching%20Education%20Minor%20in%20Secondary%20School%20Teaching)

2002 Lincoln Hall, 702 S. Wright Street, Urbana

This minor is a component of the teaching option within the following Science and Letters majors: biology, chemistry, English, geology, history, mathematics, and physics. Enrollment is limited to candidates in these options. For admission to the teaching option within those majors, see the College of Liberal Arts and Sciences. (<http://www.las.illinois.edu/students/programs/majors>)

Transfer into the teaching option within a major can be made only by students who have received approval to complete the minor in education. Approval for admission to the minor in education is gained by successful application to the Department of Curriculum and Instruction in the College of Education, upon recommendation by the joint Education/LAS content area admissions committees. Illinois law and Council on Teacher Education policy require that all candidates for admission to a teacher preparation program pass the Illinois Certification Testing System Test of Academic Proficiency prior to admission.

Prerequisites for the minor: Students must pass the Illinois Certification Testing System Test of Academic Proficiency; be in good academic standing; have a minimum UIUC and cumulative GPA of 2.5; and successfully complete EPSY 201 and EPS 201 or EPS 202. Additionally, each major stipulates other prerequisite courses that must be completed before admission to the teaching option. Interested students should see the academic advisers in the major or the LAS Director of Secondary Education Programs for information on prerequisite courses.

Most students will be able to complete all the prerequisite courses for transfer into the teaching option of their major by the spring of their sophomore year; those students may be able to complete the requirements for the bachelor's degree in LAS, as well as the minor in education and all other requirements for teacher licensure in four years. Students who establish eligibility to transfer into the teaching option of their major in the spring of their junior year will need five years to satisfy the requirements for teacher licensure.

In order to be recommended for licensure, candidates are required to maintain UIUC, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Grades in courses of C- or lower may not be used for State of Illinois Licensure, Endorsements, or Approvals. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages.

Professional Education Required Courses

CI 335	Content Area App of Educ Tech	1
CI 401	Intro Tchg in a Diverse Societ	3
CI 402	Tchg Diverse Middle Grade Stu	3
CI 403	Tchg Diverse High School Stu	3
CI 404	Tchg and Assessing Sec Sch Stu	4
CI 473	Literacy in Content Areas	1
EOL 440	Prof Issues for Teachers	1-3
EPS 201/202	Foundations of Education	3-4
EPSY 201	Educational Psychology	3
EPSY 430	Early Adolescent Development	2-4
EPSY 485	Assessing Student Performance	2
SPED 205	Introduction to Special Needs	1
SPED 405	Gen Educator's Role in SPED	2-3
EDPR 442	Ed Prac in Secondary Ed	2-8
Total Hours		37-38

Engineering, College of

Office of Undergraduate Programs
 206 Engineering Hall
 1308 West Green Street
 Urbana, IL 61801, (217) 333-2280
<http://engineering.illinois.edu>

The College of Engineering prepares men and women for professional careers in engineering and related positions in industry, commerce, education, and government. Graduates at the bachelors level are prepared to begin the practice of engineering or to continue their formal education at a graduate school of their choice. The curricula provide a comprehensive education emphasizing analysis and problem solving and an exposure to open-ended problems and design methods. The courses are taught in a manner that fosters teamwork, communication skills, and individual professionalism, including ethics and environmental awareness. The classroom experiences, along with outside activities, prepare students for lifetimes of continued learning and leadership. Thus, the engineering programs enable graduates to make significant contributions in their chosen fields while at the same time recognizing their responsibilities to society.

Curricula

- Aerospace Engineering (p. 150)
- Agricultural and Biological Engineering (p. 154)
- Bioengineering (p. 162)
- Chemical Engineering (see Chemical Engineering (p. 298) in College of LAS)
- Civil Engineering (p. 167)
- Computer Engineering (p. 176)
- Computer Science (p. 172)
- Electrical Engineering (p. 176)
- Engineering Mechanics (p. 197)
- Engineering Physics (p. 221)
- General Engineering (p. 186)
- Industrial Engineering (p. 192)
- Materials Science and Engineering (p. 197)
- Mechanical Engineering (p. 204)
- Nuclear, Plasma and Radiological Engineering (p. 215)

Mission

The University of Illinois at Urbana-Champaign was founded in 1867 as a state-supported, land-grant institution with a threefold mission of teaching, research, and public service. Based on that foundation, the mission of the College of Engineering is to meet the needs of the state and nation through excellence in education, research, and public service. The goals are to instill in students the attitudes, values, vision, and training that will prepare them for lifetimes of continued learning and leadership in engineering and other fields; to generate new knowledge for the benefit of society; and to provide special services when there are needs that the college is uniquely qualified to meet.

Vision

The vision of the College of Engineering is to be a distinguished institution, providing knowledge that focuses on the creation and management of systems and resources. This knowledge is to be shared by motivating and educating qualified students to master the most important components of science and engineering at all levels. The students are also to have an appreciation for human and ethical values and to master the skills of oral and written communication. The value of this combined knowledge is measured by its connection to effective products, processes, and services that address the needs of society.

Educational Objectives

The College of Engineering prepares men and women for professional careers in engineering and related positions in industry, commerce, education, and government. Graduates at the bachelor's level are prepared to begin the practice of engineering or to continue their formal education at a graduate school of their choice. Based on the mission and vision statement of the college, each engineering program has developed educational objectives which are broad statements that describe what graduates are expected to attain within a few years of graduation. In general, all the programs provide students with a comprehensive education that includes in-depth instruction in their chosen fields of study. The programs are designed to emphasize analysis and problem solving and to provide exposure to open-ended problems and design methods. The courses are taught in a manner that fosters teamwork, communication skills, and individual professionalism, including ethics and environmental awareness. The classroom experiences, along with outside

activities, prepare students for lifetimes of continued learning and leadership. Thus, the engineering programs enable graduates to make significant contributions in their chosen fields while at the same time recognizing their responsibilities to society.

Outcomes and Assessment

To accomplish the educational objectives and to fulfill current engineering accreditation criteria, all engineering programs provide the knowledge, experience, and opportunities necessary for students to demonstrate their attainment of the following outcomes:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

An assessment system for continuous measurement, evaluation, and improvement is in place in each academic department. In addition, the college collects college-wide data and provides coordination and assistance to the departments for the overall process.

Professional Component

Each engineering program also contains a professional component, as required for accreditation, that is consistent with the objectives of the program and the institution. The professional component includes:

- one year of a combination of college-level mathematics and basic sciences (some with experimental experience) appropriate to the discipline. Basic sciences are defined as biological, chemical, and physical sciences.
- one and one-half years of engineering topics, consisting of engineering sciences and engineering design appropriate to the student's field of study.
- a general education component that complements the technical content of the program and is consistent with the objectives of the program and the institution.

Students in engineering programs are prepared for engineering practice through a curriculum culminating in a major design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints.

The paragraphs below further describe these elements of the programs and expected student outcomes and experiences.

Breadth of Programs

The college provides training in the mathematical and physical sciences and their application to a broad spectrum of technological and social requirements of society. The engineering programs, although widely varied and specialized, are built on a general foundation of scientific theory applicable to many different fields. Work in the classroom and laboratory is brought into sharper focus by practical problems that the student solves by methods similar to those of practicing engineers. Engineering design experience is introduced early in the programs, is integrated throughout, and culminates in a major design project team-work experience in the senior year.

Although each student pursues a program chosen to meet individual career goals, all students take certain courses. Basic courses in mathematics, chemistry, physics, rhetoric, and computer science are required in the first two years. The scientific and technical portion of the majors provides the rudimentary development of technical skills, the modern engineering tools and methods for solving problems in practice, the design of experiments and associated data analysis, an understanding of values and cost, an understanding of the ethical characteristics of the engineering profession and practice, a sensitivity to the socially related technical problems that confront health and safety, and the ability and emphasis for maintaining professional competence through lifelong learning. Although the programs are progressively specialized in the third and fourth years, each student is required to take some courses outside his or her chosen field.

Non-technical courses are included in each program; they may be required or elective. Many non-technical courses satisfy the broad objectives of the humanities and social sciences requirements of the engineering programs, enabling strong, effective communications, making the student keenly aware of the urgent contemporary problems of society, and developing a deeper appreciation of human cultural achievements in a global context. The humanities and social sciences courses are usually drawn from the liberal arts and sciences, economics, and approved courses in fine and applied

arts. A student who desires a broader cultural background may wish to consider a combined engineering-liberal arts and sciences program (http://illinois.dev6.leapfrog.com/migration/Undergraduate/ENGINEER-%20undergrad/about_engin.html#combined).

Illinois Engineering Freshman Experience (iEFX) and the Illinois Foundry for Innovation in Engineering Education (iFoundry)

The Illinois Engineering First-Year Experience (<http://iefx.engineering.illinois.edu>) is an interdisciplinary program for all first-year engineering students. Students' aspirations are respected, supported, and fostered within program initiatives that lay a solid foundation for your collegiate career.

You have the opportunity to begin your experience by participating in Summer Scholars, a program centered on helping you transition to Illinois and increase your academic performance for the first-year. You attend the eight-week Summer Session II and take the IEFX Projects course and another class of your choice.

For the fall semester, all first-year students attend Launch, your official welcome event to Engineering at Illinois, the Saturday before classes begin. You will meet faculty, staff, and other students at this popular party event that helps you build community and get a strong start.

Your experience continues with ENG 100, a fall-semester orientation course where you will learn important skills and information regarding engineering and the University, and you connect with a peer mentor that is trained and eager to assist you for academic success. You are also encouraged to enroll in one or more of the IEFX Electives. These courses offer variety to and enhancement of the first year.

Along with the opportunities mentioned previously there are other events and sub-programs in IEFX that build community and helps students establish a strong sense of engineering identity.

For further information regarding iEFX, visit the iEFX Web site (<http://iefx.engineering.illinois.edu>), contact the iEFX Office (201 Engineering Hall, iefx@engineering.illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

iEFX was originally conceived and piloted by the Illinois Foundry for Innovation in Engineering Education (<http://ifoundry.illinois.edu>) (iFoundry) in Fall 2009. iFoundry is a pilot curriculum incubator initiative in the College of Engineering designed to foster curriculum innovation, deepen student engagement, and expand the breadth of students' professional skill development. iFoundry rigorously analyzes the philosophical and organizational foundations of engineering education, in order to enhance the educational opportunities and student experience at Illinois. As a pilot incubator program, iFoundry is engaged in developing and launching new courses that may appeal to students who wish to modify their program. iFoundry can also assist students who are seeking to modify their program with course substitutions or who are seeking to shape their humanities and social sciences requirements into coherent themes that will enrich their engineering education.

iFoundry collaborates closely with departmental and College leadership, cross-campus partners, and the Associate Dean of Undergraduate Programs to develop and pilot innovative programs. iFoundry partners with leading engineering institutions in the United States and abroad to create cutting edge courses and innovative programs, most notably with the Franklin W. Olin College of Engineering (<http://www.olin.edu>).

For further information regarding iFoundry, visit the iFoundry Web site (<http://ifoundry.illinois.edu>), contact the iFoundry Office (201 Engineering Hall, 217-244-3824, ifoundry@illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Engineering Career Services

The College of Engineering is committed to your success as a student and beyond. Our Engineering Career Services (ECS) office offers support, guidance, and resources to help you with every step of your job search. Whether you are interested in gaining practical experience through a co-op position or an internship, or entering the professional world upon your graduation, ECS provides a variety of services from career planning to offer evaluation and negotiation. We encourage you to take advantage of these services both as a student and as an alum of the College.

ECS provides comprehensive services and programs designed to enable students to identify, facilitate, and negotiate successful career opportunities. ECS offers an online job system that employers use to communicate with students by posting job opportunities and promoting on-campus recruiting activities.

ECS services include:

- Workshops and seminars
- Career counseling
- Resume and cover letter reviews
- Mock interviews
- Career fairs and on-campus recruiting events
- Internship, co-op, and full-time job postings
- Company databases and contact information
- Offer evaluation and negotiation
- Presentations for classes and student organizations

- Personal consultation appointments

To take advantage of these services and many more, students simply need to register with the Engineering Career Services office (3270 Digital Computer Lab, 217-333-1960, ecs@engr.illinois.edu), or visit the Engineering Career Services Web site. (<https://wiki.engr.illinois.edu/display/coeecs/Home>)

Departments and Programs

The engineering degree programs offered at Illinois awarding Bachelor of Science degrees are listed in the table below. The programs accredited by an accreditation commission ABET (<http://www.abet.org>) and the year in which first accredited are indicated. The Computer Science program is accredited by the Computing Accreditation Commission (CAC); all others are accredited by the Engineering Accreditation Commission (EAC).

Department	Engineering B.S. Degree Programs and First Year Accredited	
Aerospace Engineering	Aerospace Engineering ¹	1950
Agricultural and Biological Engineering (ACES)	Agricultural and Biological Engineering ²	1950
Bioengineering	Bioengineering	3
Chemical and Biomolecular Engineering (LAS)	Chemical Engineering ⁴	1936
Civil and Environmental Engineering	Civil Engineering	1936
Computer Science ⁵	Computer Science	2002
Electrical and Computer Engineering	Computer Engineering	1978
	Electrical Engineering	1936
Industrial and Enterprise Systems Engineering	General Engineering	1936
	Industrial Engineering	1960
Materials Science and Engineering	Materials Science and Engineering	1996
Mechanical Science and Engineering	Engineering Mechanics	1960
	Mechanical Engineering	1936
Nuclear, Plasma, and Radiological Engineering	Nuclear, Plasma, and Radiological Engineering ⁶	1978
Physics ⁷	Engineering Physics	--

¹ Accredited program name was Aeronautical and Astronautical Engineering until August, 2004.

² The program in agricultural and biological engineering in the Department of Agricultural and Biological Engineering is administered jointly by the College of Agricultural, Consumer, and Environmental Sciences and the College of Engineering with the degree granted by the College of Engineering. It succeeds a program named Agricultural Engineering until August 2008 that was first accredited in 1950.

³ A new program (2005), was reviewed in fall 2013. The final accreditation action by the Engineering Accreditation Commission of ABET (www.abet.org) (<http://www.abet.org>) will be known by early Fall 2014.

⁴ The program in chemical engineering is administered by the Department of Chemical and Biomolecular Engineering in the College of Liberal Arts and Sciences with the degree granted by the College of Liberal Arts and Sciences.

⁵ The Department of Computer Science also sponsors two majors administered by the College of Liberal Arts and Sciences: a Mathematics and Computer Science Major and a Statistics and Computer Science Major.

⁶ Accredited program name was Nuclear Engineering until August 2008.

⁷ The Department of Physics also offers a B.S. degree program in Physics and a Physics Major in the Science and Letters Curriculum, both administered by the College of Liberal Arts and Sciences.

Admission to Programs in the College of Engineering

Entering Freshman Admissions

Students seeking admission to the College of Engineering who are current high school students, recent high school graduates, or who have earned fewer than 12 semester hours of credit at other collegiate institutions are classified as new freshmen and must meet the entrance requirements to the College of Engineering (http://admissions.illinois.edu/apply/requirements_freshman.html) that are specified for new freshmen. Students are admitted to the college on a best-qualified basis as determined by a number of factors. These include ACT and SAT scores, high school percentile rank, high school grades, high school class selections, extracurricular activities, awards, and essays by the applicant.

Placement in chemistry, mathematics, rhetoric, and foreign languages is required and is based upon ACT and SAT scores, ALEKS (http://cte.illinois.edu/testing/placprof/freshmen/aleks_plac.html) math assessment results, or specific placement tests. Proficiency exams in many subjects, including chemistry, mathematics, and physics, are administered shortly after the fall semester begins. A student with advanced placement (AP or IB) credit

in mathematics, chemistry, or physics will receive credit toward graduation and will be placed in advanced course work consistent with academic preparation.

All of the engineering curricula are built around a common core of courses. In addition all students in engineering curricula have 18 hours of social sciences and humanities electives and at least 6 hours of free electives; those choices are generally not prescribed by the curriculum. These common elements allow a student to transfer from one curriculum to another early in their college career with minimal loss of credit.

The following table gives an indication of the common elements in the early stages of the engineering curricula. There are math, chemistry, physics, and rhetoric courses required in all curricula. There are also several courses that are common to many curricula. When a course substitution applies (e.g., MATH 286 for MATH 285, or MATH 415 for MATH 225) the most flexible option is to take the more demanding course as it meets the requirements of the less demanding course (and generally provides a stronger education in that subject).

Subject	Core Courses Common to All Engineering Curricula	Core Courses Common to Many Engineering Curricula
Math	MATH 221 ¹ , MATH 231, MATH 241, MATH 285 ²	MATH 225, MATH 415 ³
Physics	PHYS 211, PHYS 212	PHYS 213, PHYS 214
Chemistry	CHEM 102, CHEM 103	CHEM 104, CHEM 105
Composition	RHET 105 ⁴	
Other Foundational Courses		GE 101, ME 170, ECE 110, CS 101

¹ Students with no background in calculus should take MATH 220 instead of MATH 221. Four of the five credit hours of MATH 220 apply to the degree requirements.

² MATH 286 is required in some curricula and is an acceptable substitute for MATH 285 in all curricula

³ MATH 415 is an acceptable substitute for MATH 225 in all curricula that require MATH 225. Note that MATH 415 can be used in the Mathematics Minor whereas MATH 225 cannot.

⁴ CMN 111 + CMN 112 are acceptable substitutes for RHET 105 in all curricula for those who qualify to take those courses.

Transferring into Engineering from Other Institutions

The College of Engineering admits qualified transfer students from both community and four-year colleges and has worked closely with many of these schools in Illinois to implement coordinated engineering programs.

Students may complete courses at other accredited institutions and transfer to Illinois with little or no loss of credit, provided that they follow the proper program. A suggested list of courses that should be completed before transferring may be viewed at the College of Engineering Transfer Web site (http://engr.illinois.edu/students/prospective/transfer_admission.php).

Students may transfer to the college for the fall, spring, or summer session. Both the overall grade point average (GPA) of all transferable courses and the separate GPA of the technical courses (mathematics, physics, chemistry) must meet or exceed the competitive cutoffs. Transfer students are normally required to have also completed the basic mathematics (through calculus), physics, chemistry, and English (rhetoric and composition). Transfer students starting their studies in the fall semester are allowed to advance enroll during the preceding summer. Students are informed of this opportunity after they are admitted.

For more information, view the Office of Admissions Transfer Web site, (http://admissions.illinois.edu/apply/requirements_transfer.html) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Transferring into Engineering from Other Colleges on Our Campus

Any student in good standing in a college outside Engineering is eligible to seek transfer into a curriculum offered by the College of Engineering. The likelihood of success of such an intercollege transfer (ICT) petition depends upon the qualifications of the student, primarily as evidenced by performance in U of I courses. A student with a B average and with demonstrated success (primarily A's and B's) in Math, Physics, and Chemistry may be a good candidate for transfer.

Approval of an ICT petition will depend upon the quality of the petitioner's academic record, the strength of the ICT petition essay, and availability of space in the target curriculum. Each case will be considered individually on its own merits. The student must see a dean in the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall, to initiate the process of transferring into the College of Engineering.

For more ICT information, view the College of Engineering Transfer Web site (<http://wiki.engr.illinois.edu/pages/viewpage.action?pageId=30803845>) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Changing Curricula within Engineering

Students enrolled in the College of Engineering may petition for transfer to another department within the college prior to advanced enrollment and the beginning of a new term. A petition form for interdepartmental transfer (IDT) is available in 206 Engineering Hall, at your department's Chief

Advisors office, or you may click here (<https://wiki.engr.illinois.edu/download/attachments/30803845/Inter-DepartmentalTransfer%281.23.06%29.pdf?version=1&modificationDate=1272922325920>) and print one yourself. The IDT petition consists of three comment sections to be completed by you, your current department, and prospective department before submitting the petition to 206 Engineering Hall for review and approval.

Approval of an IDT petition will depend upon the reasons given by the petitioner for wanting to transfer, the comments of current and prospective departments, and availability of space in the target curriculum. Each case will be considered individually on its own merits.

For more IDT information visit the college's transfer policy Web site (<http://wiki.engr.illinois.edu/pages/viewpage.action?pageId=30803845>) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Special Degree Programs

Combined Engineering-Liberal Arts and Sciences Program

A dual degree program of study permits a student to earn a Bachelor of Science degree in a field of engineering from the College of Engineering and a Bachelor of Arts or a Bachelor of Science degree from the College of Liberal Arts and Sciences at the Urbana-Champaign campus.

This program affords the student the opportunity to prepare for a career of an interdisciplinary nature. A student who desires a broader background than can be provided in the four-year engineering programs can develop a combined program that includes a synergistic scientific education or an enhanced cultural education in addition to an engineering specialty. Each student must file an approved program with the College of Engineering's Office of the Associate Dean for Undergraduate Programs and with the College of Liberal Arts and Sciences Academic Affairs Office.

Advisors in both colleges assist in planning a program of study to meet the needs and requirements for both degrees. Most combinations of engineering and liberal arts programs may be completed in ten semesters if the student does not have deficiencies in the entrance requirements of either college.

Most engineering programs can be combined with one of a variety of liberal arts and sciences majors, including science, languages, social sciences, humanities, speech communication, and philosophy. This combined program operates under the following conditions:

- Students entering the program must meet admission requirements for both colleges. Students planning completion of the two degrees in 8 semesters are recommended to submit the application in the fifth term of enrollment but no later than the first week of classes in the seventh term. Students planning completion in 10 semesters are recommended to submit the application in the seventh term of enrollment but no later than the first week of classes of the eighth term.
- Beginning with students who matriculated in Fall 2005, an Illinois GPA of 3.25 (or above for certain programs) will be required at the time of application for a second degree.
- Students must complete all of the requirements specified for the additional LAS degree as well as at least an additional 30 hours over and above those required for the first degree. The candidate must also complete 12 distinct advanced hours in the LAS major that are not used in meeting the requirements for any other degree program.
- All second degree candidates in LAS must be enrolled in the College of Liberal Arts and Sciences for a minimum of two semesters. Also, campus regulations on second degrees require at least 30 additional semester hours of Illinois credit that is not counted for the other degree.
- A student who starts in the program and decides to transfer from it is subject to the existing graduation requirements of the college of his or her choice.
- The degrees of Bachelor of Science in engineering and Bachelor of Arts or Bachelor of Science in liberal arts and sciences may be awarded simultaneously. If not, a student must complete the LAS degree first, having fulfilled the two-semester residency requirement in LAS, and transfer back to the College of Engineering to complete the other degree.
- Participants must satisfy the College of Liberal Arts and Sciences foreign language graduation requirement.
- Students electing advanced Reserve Officers' Training Corps and Naval ROTC programs are required to meet these commitments in addition to the combined program as outlined.
- Students with 75 or more hours of transfer credit are not advised to enter this program because they cannot ordinarily complete it in five years.
- Students transferring from other colleges and universities must plan to complete at least one year in the College of Liberal Arts and Sciences at Urbana-Champaign and one year in the College of Engineering at Urbana-Champaign to satisfy residency requirements if both degrees are to be granted here.

For further information about this program, students should contact the Office of the Associate Dean in either the College of Engineering or the College of Liberal Arts and Sciences at the Urbana-Champaign campus.

Dual-Degree Programs within the College of Engineering

Students enrolled in any department of the College of Engineering may pursue a second engineering degree if the following requirements are fulfilled:

- Students seeking a second engineering degree must apply for the program no later than the first week of classes of the term they intend to graduate with the first degree. The two engineering degrees may be awarded simultaneously or consecutively. All candidates for engineering degrees are accorded a maximum of 10 semesters of Illinois enrollment to complete their degrees. Students must petition to request an extension beyond this limit, which must be approved by the Associate Dean for Undergraduate Programs in the College of Engineering.

- The Department offering the curriculum for the second degree must approve the double-degree request. The criteria for approval are the same as the ones applied for transfer into that curriculum.
- Campus regulations on second degrees require at least 30 additional semester hours of Illinois credit that is not counted for the other degree. The candidate must also complete at least 12 distinct advanced hours in the second degree that are not used in meeting the requirements for the first degree program.

Advanced students with multidisciplinary ambitions may also consider pursuing a graduate master's degree as an alternative to a second undergraduate engineering degree, particularly if interested in research. Students should seek the advice of advisors and faculty members in the specific departments of interest to gather information on graduate programs and on available research opportunities.

Program Modification

A student can seek to modify his or her program of studies using course substitutions by submitting a Curriculum Modification form to the Office of the Associate Dean for Undergraduate Programs in the College of Engineering, 206 Engineering Hall (note that the forms can be obtained there too). The student should seek an endorsement of the change from his or her academic advisor and the Chief Advisor of the department responsible for the student's program. The Associate Dean for Undergraduate Programs is responsible for approving all curriculum modifications. No program modification is automatically granted, and each request must come through the formal process. Once approved the student is notified by return copy of the form and the program change is entered in the graduation audit.

Custom Degree Program

Some program changes do not fit the direct course substitution mode anticipated by a Program Modification. In such a case a student may seek permission to vary the program requirements of one of the standard Engineering degree programs by written petition to the Associate Dean for Undergraduate Programs. There is no standard form for this transaction. A student should submit a letter proposal outlining the nature of the request and the justification. The special program must be approved by the Associate Dean for Undergraduate Programs in the College of Engineering, who will consult with the head of the department in which the student is registered.

Affiliations with Other Liberal Arts Colleges

Through a program of affiliation between the College of Engineering and a number of liberal arts colleges, a student may enroll in a five-year program, earn a bachelor's degree from one of these colleges, and at the same time earn a bachelor's degree in engineering from Illinois. In general, students spend the first three years at the liberal arts college and the final two years at Illinois. At the time of transfer, students must meet competitive transfer admission requirements and must meet certain residency requirements to participate in this program.

The five-year program encourages a student to develop a broad understanding of the social sciences and humanities while striving for excellence in technical studies. These affiliations have the added benefit of allowing students to take core engineering studies (including mathematics, physics, and chemistry) at liberal arts schools. Students interested in this dual degree program should meet with advisors from both schools to develop an individual plan of study.

Colleges affiliated with the College of Engineering are:

- Augustana College, Rock Island, Illinois
- De Paul University, Chicago, Illinois
- Eastern Illinois University, Charleston, Illinois
- Elmhurst College, Elmhurst, Illinois
- Greenville College, Greenville, Illinois
- Illinois Benedictine College, Lisle, Illinois
- Illinois College, Jacksonville, Illinois
- Illinois State University, Normal, Illinois
- Illinois Wesleyan University, Bloomington, Illinois
- Knox College, Galesburg, Illinois
- Lewis University, Romeoville, Illinois
- Loyola University of Chicago, Chicago, Illinois
- North Central College, Naperville, Illinois
- Olivet Nazarene College, Kankakee, Illinois
- Western Illinois University, Macomb, Illinois
- Wheaton College, Wheaton, Illinois

For more information, view the Office of Admissions Transfer Web site (http://admissions.illinois.edu/apply/requirements_transfer.html).

Special Off-Campus Programs

Experiential Learning Programs

Co-ops and internships (summer and semester) provide students with a competitive advantage when seeking full-time career opportunities in industry. These Experiential Learning Programs not only enable students to gain up to a full year of professional work experience while paying for their education, but also offer the opportunity to explore engineering-related fields in-depth, to apply what you learn in the classroom to a real situation, and to provide insight into some of the nation's leading companies.

As a Co-op, a student alternates terms of work with terms of school, working at least two semesters and one summer with the same company. Students that participate in a Co-op opportunity graduate with one year of professional work experience increasing their marketability throughout the recruiting process. Semester Interns work for a period of 4-7 months with one company (a spring or fall semester may be combined with a summer). Many students also participate in summer internships, working for one company during a summer (2-3 months). Students may complete multiple internships, and all internships and co-ops are paid employment positions.

Students find these Experiential Learning Programs valuable and rewarding for a number of reasons:

- They are able to explore opportunities within a specific field.
- They gain industry experience prior to graduation.
- They improve their overall communication and team skills.
- Time spent with an employer inspires their performance in their course work and expands their classroom experiences.
- The practical experience helps them to identify if they have really chosen the right field of interest for them and offers numerous alternative ideas.
- They earn money that can be applied to college expenses.

ECS also offers a job shadow program, which takes place each year during winter break. The Job Shadow Program is a one day program for freshmen and sophomores interested in spending time with an engineer to better understand what it means to work in a specific industry or company. This program provides students with an opportunity for a brief yet valuable introduction to the daily demands of an engineer during the course of a day. Each student is matched with an engineer in the student's field of interest and spends time at the engineer's firm. This unique interactive experience will give participants a better idea of how the professional world "feels" in their chosen field of study.

For more information regarding Experiential Learning Programs visit the Engineering Career Services Web site (<https://wiki.engr.illinois.edu/display/coeecs/Home>), contact Engineering Career Services (3270 Digital Computer Lab, 217-333-1960, ecs@engineering.illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Study Abroad Programs

Engineering students at Illinois are presented with very attractive opportunities to study overseas as part of their university experience. Students may spend a summer, semester, or even an entire academic year abroad. Credits earned during this time may be transferred to Illinois to satisfy curricular requirements. Additionally, a student may even elect to pursue an International Minor in Engineering (http://illinois.dev6.leefrog.com/migration/Undergraduate/ENGINEER-%20Undergrad/about_engin.html#intl_minor) that is focused on the country or region of the student's choice.

A variety of study abroad and international work programs are available to provide students an international experience. Currently, International Programs in Engineering (IPENG) has programs at universities in Argentina, Belgium, Brazil, Chile, China, Denmark, France, Germany, Italy, Japan, Jordan, Russia, S. Korea, Vietnam, and West Indies, and more are continually being developed in these and other countries. IPENG's membership in the International Association for the Exchange of Students for Technical Experience (IAESTE) and Global Engineering Education Exchange (GE3) consortia provides additional overseas locations and fellowships for study abroad. Students can also participate through the main campus programs in several other countries. For information on these programs visit the International Programs in Engineering Web site (<http://wiki.engr.illinois.edu/display/ugadvice/International+Opportunities>) or the Study Abroad Office Web site (<http://studyabroad.illinois.edu>) or contact the Engineering Study Abroad Office (210 Engineering Hall, ipeng@illinois.edu)

To help new students gain an understanding of the importance of an international experience during their academic career at Illinois, the College of Engineering offers a freshman course, ENG 191—International Dimensions of Engrg. This course provides an overview of global changes along with industrial perspectives to help prepare graduates for foreign placement as professionals. The course will also provide insights on how engineering students may build course work and experiences into their undergraduate programs that will prepare them for overseas involvement.

An overseas academic experience can begin as early as the summer after the first year at Illinois. An academic semester or year exchange program provides an even greater depth to the undergraduate experience and will greatly enhance a resume when a student begins their professional job search.

The personal and academic advantages gained by participating in the program are numerous and reflect many financial incentives. These advantages can include: IPENG help with roundtrip airfare for all engineering students who study or work abroad on approved programs and a reduced on campus tuition charge when studying. The result is that Illinois provides the opportunity to earn credit overseas at only a fraction of the cost of studying on campus.

The College of Engineering also offers scholarships for Study Abroad participants. The College of Engineering believes in this opportunity so firmly that much has been done to make this as affordable as possible for students. In addition to help with roundtrip airfare and tuition incentives, newly admitted

students are offered an opportunity to apply for the International Engineering Scholarship. This scholarship provides a one-time payment of \$2,500 during the Study Abroad program. Additional scholarships are also provided to students upon acceptance to a study abroad program.

For more information about study abroad, visit the International Programs in Engineering Web site (<http://engineering.illinois.edu/international>) or contact IPENG (210 Engineering Hall, 217-244-0054, ipeng@illinois.edu).

Other International Opportunities

The International Association for the Exchange of Students for Technical Experience (IAESTE) is a private, nonprofit organization that enables students of engineering, architecture, and the sciences to obtain on-the-job training in foreign countries. Any student, undergraduate or graduate, who is enrolled in good standing at Illinois and who has completed at least the sophomore year of study may apply. Generally, the maintenance allowance is adequate to cover living expenses while in training but does not cover transportation costs. Further information about these opportunities may be obtained from the IPENG office or the IPENG Web site. (<http://wiki.engr.illinois.edu/display/ugadvise/International+Opportunities>)

Engineers Without Borders (EWB) Illinois works with disadvantaged communities to improve their quality of life through implementation of environmentally and economically sustainable engineering projects, while developing international responsible engineering students. Current international projects include biofuel electricity generation, charge controller circuit design, and wood-stove emissions control. Furthermore, EWB-Illinois holds local events to create awareness on campus of international development and environmental issues. EWB-Illinois is open to all majors and, indeed, is always in need of dedicated people from all fields. For more information, visit the Engineers Without Borders Web site (<http://ewb-uiuc.org>).

Advanced ROTC Training

A student in the College of Engineering may elect to participate in the Reserve Officers' Training Corps Program and earn a commission in the U.S. Army Reserve, Air Force Reserve, or Naval Reserve. A commission is awarded simultaneously with the awarding of the bachelor of science degree in an engineering field. Participation in these programs is limited to students who apply to and are selected by the army, air force, and navy units at Illinois. Monthly stipends are paid to those selected for advanced military training.

These programs require from one to three summer camps or cruises and the earning of specified numbers of credits in advanced military courses. Credits earned appear in all academic averages computed by the College of Engineering. Basic military courses do not count toward graduation. A maximum of 6 hours of upper-level military science courses may be used as free electives. A student should plan on taking nine semesters to obtain both a bachelor's degree in engineering and a commission in the ROTC program. For further information, write directly to the professor of military science, aerospace studies, or naval science.

Technical Grade Point Average Requirements

Technical grade point average (TGPA) requirements for graduation and advanced-level course registration apply to students enrolled in certain College of Engineering curricula. These rules apply in addition to the Illinois campus-wide drop and probation rules. The table below summarizes the TGPA rules applicable.

Note: TGPA rules for the General Engineering and Industrial Engineering curricula shown in the table below are under review and subject to change. Click here (<http://wiki.engr.illinois.edu/display/ugadvise/Technical+GPA+Requirements>) for the most current information,

Curriculum	Technical Grade Point Average (TGPA) Requirements for Graduation	Technical Grade Point Average (TGPA) requirements for Advanced-Level Course Registration	
	Must earn a GPA of 2.00 (unless otherwise noted) in the following technical subset of courses:	Must earn a GPA of 2.25 (unless otherwise noted) in:	In order to register for:

Math courses

Include any course offered by the Mathematics department under the MATH rubric and by the Statistics department under the STAT rubric

Engineering (Eng) courses

Means any course offered by a unit of the College of Engineering (i.e., under the rubrics AE, ABE, BIOE, CEE, ...)

Science courses

Means any course in the basic sciences (physics, chemistry, biology, etc.)

Required

Means that the course is called out by name in the curriculum (i.e., not an elective)

Engineering Honors Programs (<http://wiki.engr.illinois.edu/display/ugadvise/Honors>)

Honors at Graduation

Honors awarded at graduation to superior students are designated on the diploma as honors, high honors, or highest honors. A student receives honors with a cumulative Illinois grade point average of at least 3.50, and high honors with at least a 3.80 grade point average at graduation. Highest honors may be awarded to any student eligible for high honors upon recommendation of his or her department. The criteria used by departments in selecting individuals for highest honors recognition include outstanding performance in course work and in supplementary activities of an academic or professional nature. Ordinarily, such a citation requires completion of an undergraduate thesis or a special project of superior quality.

Tau Beta Pi

Tau Beta Pi is a national engineering honor society that recognizes students, alumni, and engineers for outstanding academic achievements and exemplary character. The Alpha chapter at Illinois was founded in 1897 and is the fifth oldest chapter. In addition to gaining scholastic recognition, members participate in a range of activities that serve the chapter, the College of Engineering, and the community. The scholastic requirement for membership in Tau Beta Pi is that juniors must be in the upper one-eighth of their graduating class and seniors must be in the upper one-fifth of their graduating class.

Edmund J. James Scholars

The honors program in engineering is part of the Illinois James Scholar program, which was established to recognize and develop the talents of academically outstanding students. Engineering students in this program are known as "James Scholars in Engineering." Each is assigned to an honors advisor and receives special consideration in the selection of courses to meet specific needs.

New freshmen in the College of Engineering are automatically accepted into the James Scholar program if an ACT composite score of 33 or higher (or an equivalent SAT score) is obtained. Continuation in the program or joining as an upperclass student requires a minimum 3.30 GPA (3.50 for students

in electrical engineering and computer engineering) and the development and approval of an honors contract, which is a coherent plan of special academic work. For more information about the James Scholar Program, visit the college's James Scholar Web site (<http://jamesscholar.cen.uiuc.edu>) or contact the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Good standing in the James Scholar program at graduation requires completion of the honors contract.

Dean's List

The names of undergraduates who have achieved a grade point average in the top 20 percent of their college class for a given semester will be included on a list prepared for the dean of the college. This list is publicized on campus and is sent to news agencies throughout the state.

To be eligible for Dean's List recognition, students must successfully complete 14 academic semester hours letter grade. Credits earned during the semester through proficiency, CLEP, and advanced placement examinations are not counted.

General Education Requirements

The campus General Education requirements fall into several categories. Those in Composition I, Natural Sciences and Technology, and Quantitative Reasoning are met by courses required in engineering curricula. Beginning with the class that entered in fall 2000, students must complete a third-level college language course. Most students satisfy this requirement by completing three years of high school instruction in a single language.

The campus General Education requirements in social and behavioral sciences and in humanities and the arts can be met while satisfying the College of Engineering's liberal education course work requirements (see below). Proper choices will assure that these courses also satisfy the campus requirements in the areas of Western and non-Western cultures. Many of these courses satisfy the campus Advanced Composition requirement, which assures that students have the advanced writing skills expected of all college graduates.

Students may obtain credit from different academic sources, i.e., residential instruction, advanced placement (AP or IB) tests, and transfer credits. All course work taken to satisfy campus general education requirements must be taken for grade.

For more information about General Education course work requirements, consult the campus' General Education Web site.

Elective Course Work

Liberal Education Electives

The College of Engineering requires eighteen hours of liberal education course work. The courses are normally chosen to also satisfy the campus General Education requirements consisting of six hours of social and behavioral sciences (S&BS) and six hours of humanities and arts (H&A) course work. All twelve hours of these hours must be taken for grade. The remaining six hours of liberal education course work may include more approved General Education S&BS or H&A credit, foreign language credit beyond the basic requirement, and liberal education courses from a list approved by the College (<https://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Course+List>).

Credit for this course work may come from different academic sources, i.e., residential instruction, advanced placement (AP or IB) tests, and transfer credits.

For more information about College of Engineering liberal education course work requirements, consult the college's Liberal Education Web site (<https://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>).

Technical Electives

All technical elective courses must be selected in accordance with departmental requirements. Technical electives generally include 300- and 400-level courses in engineering, mathematics, and the natural sciences.

Free Electives

These unrestricted electives are selected at the prerogative of the student with certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>). Every curriculum administered by the College of Engineering has at least six free elective hours. This course credit insures the required number of credit hours for the degree is earned.

Credit-No Credit Option

The credit-no credit grade option is available for students who want to explore areas of academic interest that they might otherwise avoid for fear of poor grades. All students considering this option are cautioned that many graduate and professional schools consider applicants whose transcripts bear a significant number of non-grade symbols less favorably than those whose transcripts contain none or very few. Required courses in the College of Engineering may not be taken on this basis. For more details, consult the College of Engineering advising Web site (<http://engineering.illinois.edu/Advising/rules.php>).

Combined B.S.-M.S. Engineering Degree Programs

Computer Science

The five-year B.S.-M.S. program in Computer Science combines two degrees: a B.S. in Computer Science with an M.S. (with thesis) in Computer Science. Current Illinois Computer Science students enrolled in the College of Engineering with junior standing who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-year B.S.-M.S. degree program have been successfully completed.

Course Requirements

B.S. Component (120 hours plus three 400-level courses for 9-12 graduate hours):

- Same required courses as the traditional B.S. degree with the minimum hours required – not counting technical electives taken for graduate credit (see below) – reduced from 128 to 120.
- Course work shared by the B.S. and M.S. components must include three courses and at most 12 credit hours of 400-level CS courses required for the B.S. which also count towards the Breadth Requirement course work of the M.S. component, all of which must be taken for graduate credit. (Students must take the graduate section of the courses if offered and are strongly encouraged to take the 4-hour section if available). The CS Graduate academic advisor will assist students in mapping out this course work.
- Illinois undergraduate student minimum residence requirement satisfied
- Overall grade point average (GPA) of 3.00 maintained through completion of B.S. component of the program.

M.S. Component (minimum 16 additional credit hours plus 4 hours of CS 599):

- Identical to the traditional M.S. program with the Breadth Requirement course work satisfied while still classified as undergraduate (though held to the standards of a graduate student). A total of 32 credit hours (including the shared course work) are required.
- Satisfy Illinois' graduate student minimum residence requirement.
- Overall GPA of 3.00 must be maintained through completion of M.S. component of the program.

Admission

For deadlines and procedures, consult the department Web site (<http://www.cs.illinois.edu/undergraduate/bsmsadmission.php>). Current Illinois Computer Science students who are in their junior year (normally at least 90+ credit hours, including those in progress, and at least one year of undergraduate course work remaining) with an overall GPA of at least 3.50 may apply for provisional admission to the program. The 5-year program is highly competitive. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program, to remain in the program.
- may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component.
- must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (in the Breadth Requirement courses), and satisfy all B.S. requirements to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component (including grades of B- or better in the Breadth Requirement), and an overall GPA of at least 3.00 in all graduate course work, students:

- will be officially admitted into the Graduate College.
- will be issued letters of admission from the Office of Admissions and Records and the Computer Science Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- may apply or be considered for graduate research or teaching assistantships, tuition waivers, as well as fellowships and scholarships available to graduate students.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs and the Assistant Director of CS Graduate Programs. Students who do not complete all 5-year B.S.- M.S. degree program requirements may upon request have all graduate hours earned, including the Breadth Requirement course work converted to undergraduate hours and applied toward a traditional B.S. in Computer Science degree. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree

requirements of whichever version of the B.S. curriculum is appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

Continued Graduate Study

Students in the program are eligible to apply for the Ph.D. program in Computer Science near completion of the M.S. component. If admitted, the combined degree will count as Stage 1 of the Ph.D. program, as if the student is admitted with a master's degree.

Students are strongly advised to seek faculty counsel about the 5-year program to be sure they understand the pros and cons of pursuing a master's degree via the 5-year program. If their intention is to ultimately pursue a Ph.D., then it may be preferable to avoid the rapid pace of the 5-year program and instead invest time in research as an undergraduate. For admission to competitive Ph.D. programs, the expectation of publications and extensive research experience is higher for M.S. graduates. Therefore, as an alternative to the 5-year program, many top students may prefer to conduct research, possibly leading to a B.S. thesis, as a way to improve their admissions chances into top Ph.D. programs.

Computer Science

The five-year B.S.-M.C.S. program in Computer Science combines two degrees: a B.S. in Computer Science with an M.C.S. (non-thesis) in Computer Science. Current Illinois Computer Science students enrolled in the College of Engineering who are in their junior year (normally at least 90 credit hours, including those in progress, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-year B.S.-M.C.S. degree program have been successfully completed.

Course Requirements

B.S. Component (120 hours plus three 400-level courses for 9-12 graduate hours):

- Same required courses as the traditional B.S. degree with the minimum hours required – not counting technical electives taken for graduate credit (see below) – reduced from 128 to 120.
- Coursework shared by the B.S. and M.C.S. components must include three courses and at most 12 credit hours of 400-level CS courses required for the B.S. which also count towards the Breadth coursework requirement of the M.C.S. component, all which must be taken for graduate credit. (Students must take the graduate section of the courses if offered and are strongly encouraged to take the 4-hour section if available). The CS Graduate academic advisor will assist students in mapping out this coursework.
- Illinois undergraduate student minimum residence requirement satisfied.
- Overall grade point average (GPA) of 3.0 maintained through completion of B.S. component of the program.

M.C.S. Component (minimum 24 additional credit hours):

- Identical to the traditional M.C.S. program but with the majority of the Breadth Requirement satisfied while still classified as undergraduate (though held to the standards of a graduate student). A total of 36 hours (including the shared coursework) are required.
- Satisfy Illinois' graduate student minimum residence requirement.
- Overall GPA of 3.00 must be maintained through completion of M.C.S. component of the program.

Admission

For deadlines and procedures, consult the department Web site (<http://www.cs.illinois.edu/undergraduate/bsmsadmission.php>). Current Illinois Computer Science students who are in their junior year (normally at least 90 credit hours, including those in progress, and at least one year of undergraduate coursework remaining) with an overall GPA of at least 3.0 and a technical GPA 3.0 may apply for provisional admission to the program. The 5-year program is highly competitive.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.0 through completion of the B.S. component of the degree to remain in the program.
- may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, if they have no more than 10 hours left in their B.S. component.
- must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (in the Breadth Requirement courses), and satisfy all B.S. requirements to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component (including grades of B- or better in the Breadth Requirement coursework), and an overall GPA of at least 3.00 in all graduate coursework, students:

- must apply and be officially admitted into the Graduate College.
- will be issued letters of admission from the Office of Admissions and Records and the Computer Science Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs and the Assistant Director of CS Graduate Programs. Students who do not complete all 5-year B.S.- M.C.S. degree program requirements may upon request have all graduate hours earned, including the Breadth Requirement coursework, converted to undergraduate hours and applied toward a traditional B.S. degree in Computer Science. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree requirements of whichever version of the B.S. curriculum is appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

Industrial Engineering

The Department offers a combined Bachelor of Science and Master of Science program in Industrial Engineering. This program allows students who wish to earn both degrees to become involved in graduate course work and thesis research during their fourth year of study. It also offers the possibility to earn both degrees on an accelerated schedule. The educational objectives of the combined program are the same as for the individual degrees.

Course Requirements

The combined program requires 120 hours of undergraduate credit and 32 hours of graduate credit. This compares to 128 hours of undergraduate credit and 32 hours of graduate credit when the B.S. and M.S. degrees are earned separately. The undergraduate requirements are identical to the four-year B.S. program shown above, except that the following requirements are waived:

- one IE technical elective — 3 hours
- Free electives — 5 hours

In addition, independent study project courses may not be used as IE or technical electives in the B.S. portion of the combined program.

In the M.S. portion of the program, 32 hours of credit and a thesis are required. There must be at least 24 hours of formal graded course work at the 400 level or greater, eight of which must be at the 500 level, and four of the eight must be in the major field. A Master's thesis, for which at least four and no more than eight hours of IE 599 credit is required. Students must also register for the graduate seminar course (IE 590) every semester following formal admission into the graduate portion of the program.

A student in the combined program must spend at least two academic years in residence, full time in the combined degree program, and at least one of these years must be with graduate status. Students must maintain a graduate GPA of 3.00 in order to remain in the combined program.

The B.S. and M.S. degrees are granted simultaneously at the end of the program.

Admission

Formal admission to the combined program normally occurs late in the junior year or early in the senior year. Undergraduate students in IE may apply for formal admission to the combined program with the following provisions:

- Students must have a minimum Illinois GPA of 3.60 or higher, and have earned 96 credit hours towards the B.S.I.E. requirements at the time they are invited to apply.
- A special B.S.-M.S. application is provided to the student with the invitation. This application along with supporting documents must be submitted to the ISE Graduate Programs Office, Room 111 Transportation Building. There are two annual application deadlines: September 15 and January 15.
- GRE scores are not required for admission to the program. However, students are strongly encouraged to take the GRE in their senior year in order, for example, to be eligible for national fellowship competitions.
- Students in the combined program will be recommended by the department for admission to the Graduate College after they complete the 120 hours required for the B.S. portion of the combined program.
- The department will pay the application fee for these students.
- Each student is required to identify a graduate advisor and file a graduate course plan in the semester the student is granted formal admission to the graduate portion of the program.
- Once the student is admitted into the B.S.-M.S. program, the Director of Graduate Programs will act as the student's advisor until a permanent advisor is found.

Withdrawal

Students may withdraw from the program at any time by notifying the Undergraduate Programs Office. Students who do not meet the Graduate College and departmental requirements for admission to the graduate program at the time they complete the 120-hour B.S. portion of the combined program will be required to leave the program.

Students who withdraw from the program for any reason may continue in the regular four-year B.S. degree program, which currently requires 128 hours, provided they meet the normal GPA requirements of that program. Students who withdraw from the combined program after they have taken courses for graduate credit may petition to have those credits counted toward their undergraduate program requirements.

Continued Graduate Study

Students who complete the combined program may petition to continue in graduate school for a Ph.D. These students will hold the same status (post M.S.) as students entering the Ph.D. program with an M.S. degree, and will be required to take the department's qualifying examination no later than the second calendar semester after graduation from the combined program.

Materials Engineering

The five-year B.S.-M.Eng. program in Materials Science and Engineering combines two degrees: a B.S. in Materials Science and Engineering (MatSE) with an M.Eng in Materials Engineering. Current Illinois MatSE students enrolled in the College of Engineering, who maintain appropriate academic performance, are eligible to apply for this program. The program is designed to enhance the students experience in the engineering aspects of materials, broaden their knowledge beyond that possible in the standard 4-year curriculum and obtain a foundation in business, technology management, and/or entrepreneurship. Two semesters (or equivalent, a minimum of 30 weeks) of industrial co-op or internship are required; a research thesis is not required. In addition the students are expected to complete, during the combined program, at least 10 hours of courses in the areas of business, technology management and/or entrepreneurship from an approved list (available from the department). Students admitted to the program will receive both degrees once all requirements for the 5-year B.S.-M.Eng. degree program have been successfully completed but will be permitted to participate in the B.S. graduation ceremonies with their class if they have completed the equivalent number of credit hours. Once graduate student status is achieved, students in the program would be eligible for a teaching assistantship in MatSE (only).

Deadline: Completed application and reference letters must be returned to the MatSE Office, 201 MSEB, 2 months before the end of the Fall semester of the students Junior year. The application and letter of reference forms for the B.S.-M.Eng. Program are available from the MatSE department office.

Admission to the Program

Current Illinois MatSE students with Junior standing and with an overall grade point average (GPA) of at least 3.00 (A = 4.00) may apply for provisional admission to the program. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program, in order to remain in the program
- may register for graduate courses and earn graduate hour credits, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component
- must earn at least 120 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, with grades of B or better in the advanced area coursework, and an overall GPA of at least 3.00 in all graduate coursework, students:

- will be officially admitted into the Graduate College
- will be issued letters of admission from the Office of Admissions and Records and the MatSE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester
- may apply or be considered for graduate teaching assistantships and tuition waivers, as well as fellowships and scholarships (in MatSE only) available to graduate students in MatSE.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Students in the program are not eligible to continue in the Ph.D. program in MatSE. Students wishing to pursue a Ph.D. must apply separately for admission to that program.

Course Requirements

B.S. Component (120 hours)¹

- Same required courses as the traditional B.S. degree with minimum hours reduced to 120 hours
- The reduction of 8 credit hours includes:
 - 5 hours of free electives.
 - 3 hours of the area specialty course in a different area (the latter becomes part of M.Eng. program requirements)
- At least one semester (or 2 summers) devoted to an industrial internship or co-op.²
- It is strongly suggested that the student take 2 courses in some aspect of business, economics, environmental studies, labor and industrial relations, technology entrepreneurship or technology and management as the elective component of their Liberal Education requirements. Partial or complete fulfillment of the Technology and Management or Business minor or the Technology Commercialization Certificate is recommended for those admitted by application if available hours permit. The students are expected to complete, during the combined program, at least 10 hours of courses

in the areas of business, technology management and/or entrepreneurship from an approved list (available from the department), with additional hours recommended. It is noted that since receipt of the B.S. degree is delayed until the requirements for the M. Eng are completed, the student has the opportunity to complete the undergraduate minors while taking the M. Eng requirements.

- Overall GPA of 3.00 maintained through completion of B.S. component of the program and minimum residency requirements satisfied.

M.Eng. Component (minimum 36 additional hours of coursework)

- 36 hours course work, including at least 19 graduate hours of MatSE courses with 12 hours credit overall in 500-level courses. The course work shall include MSE 585 (two semesters or equivalent, 30 weeks total, of industrial internships or co-ops; one of the semesters can be during the B.S. program)², 6 hours of 400- or 500-level area specialty courses in the student's area, 3 hours of 400- or 500- level MSE courses from a different area, 2 hours of MSE 595, and 2 hours of MSE 529 or MSE 559. Ten hours of courses in one or more of the areas of business or technology management, and entrepreneurship are required to be included in the overall program. Completion of the requirements for the various Certificates granted by the Technology Entrepreneur Center is recommended
- MSE 492; credit does not count toward degree.

Withdrawal

Students who do not complete all of the 5-year B.S.-M.Eng. degree program requirements may request, by petition to the Graduate College after obtaining approval by their advisor, the department, and the Associate Dean for Undergraduate Programs in the College of Engineering, to have graduate hours earned converted to undergraduate hours and applied toward a traditional B.S. degree in MatSE. Students reverting to the traditional B.S. degree program must satisfy all degree requirements, including completion of the required "area specialty course(s) in a different area" and the stated credit hour requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

- ¹ *The B.S. degree from the B.S.-M.Eng. Program is not ABET accredited, but would be if the student withdrew from the M.Eng. component and completed the requirements of the traditional B.S. program or if the student completed all of the requirements of the standard B.S. degree (8 additional hours, as specified).*
- ² *Students find internship companies and positions with the help of the departmental and College Placement offices. The MSE 585 internship requires approval by the departmental Director of Graduate Studies to insure that it matches the student's individual career objectives and meets the learning goals of the program. Students taking an internship as part of their undergraduate B.S. program should also check with the Director of Graduate Studies; his/her approval is required if the student is already accepted in the combined B.S./M. Eng. Program. Students will be expected to present an oral report on their internship in either MSE 529 or MSE 559, as appropriate, the semester following completion of the internship.*

Materials Science and Engineering

The five-year B.S.-M.S. program in Materials Science and Engineering combines two degrees: a B.S. in MatSE with an M.S. (with thesis) in MatSE. Current Illinois MatSE students enrolled in the College of Engineering who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-Year B.S.-M.S. degree program have been successfully completed but will be permitted to participate in the Graduation Ceremonies with their class if they have completed 128 hours.

Deadline: Completed application and reference letters must be returned to the MatSE Office, 201 MSEB, two months before the end of the Fall semester of the student's Junior year. Application and letter of reference forms for the B.S.-M.S. Program are available from the MatSE department office.

Admission to the Program

Current Illinois MatSE students with Junior standing with an overall grade point average (GPA) of at least 3.50 may apply for provisional admission to the program. The 5-year program is highly competitive. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.50 through completion of the B.S. component of the program, in order to remain in the program.
- may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component.
- must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit in advanced level area courses, and satisfy all B.S. requirements to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component, with grades of B or better in the advanced area course work, and an overall GPA of at least 3.00 in all graduate course work, students:

- will be officially admitted into the Graduate College
- will be issued letters of admission from the Office of Admissions and Records and the MatSE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- may apply or be considered for graduate research or teaching assistantships, and tuition waivers, as well as fellowships and scholarships available to graduate students.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Students in the program are eligible to apply for the Ph.D. program in MatSE near completion of the M.S. component. If admitted, the combined degree will count as Stage 1 of the Ph.D. program, as if the student is admitted with a master's degree.

Course Requirements ¹

B.S. component (120 hours including 3 advanced (graduate level) area courses for at least 9 hours):

- Same required courses as the traditional B.S. degree with minimum hours reduced to 120 hours; except MSE 395² is dropped (i.e., 1 hour)
- Two of the required remaining four area specialty courses are to be taken at the graduate level (i.e., the students will be held to the course and grading requirements of a graduate student). The third advanced level course can be either in the specialty area or in another specialty area.
- The reduction of 8 credit hours includes:
 - 5 hours of free electives.
 - 3 hours of the area specialty course in a different area (becomes part of M.S. program requirements) for all concentrations.
- Senior thesis is to be taken in lieu of MSE 395² and one area specialty course (5 hours total recommended, with 1 hour being the remaining hour of free elective).
- An overall GPA of 3.50 must be maintained through completion of B.S. component of the program and minimum residency requirements satisfied.

M.S. component (minimum 24 additional hours of course work plus 8 hours of MSE 599):

- Same overall requirements as for traditional M.S. with thesis.
- At least one 400-500 level course (for the B.S. or M.S.) will be a MatSE area specialty course from a different area.
- Complete a M.S. thesis according to MatSE department requirements; research for the senior thesis will often serve as a beginning for the M.S. thesis but the student may change thesis advisors.

Withdrawal

Students that do not complete all of the 5-year B.S.-M.S. degree program requirements may request, by petition to the Graduate College with approval of their advisor, the department, and the Associate Dean for Undergraduate Programs of the College of Engineering, to have graduate hours earned, including the three advanced area courses, converted to undergraduate hours and applied toward a traditional B.S. in MatSE degree. Students reverting back to the traditional B.S. in MatSE degree program must earn a minimum of 128 hours and satisfy all traditional degree requirements, including MSE 395² and the area specialty course(s) in a different area, to receive the B.S. degree in MatSE. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

¹ The B.S. degree from the B.S.-M.S. Program is not ABET accredited.

² At present, students in their fourth or fifth year considering withdrawing from the M.S. portion of the program should register for MSE 395 in the Spring semester; the resulting B.S. degree would then be ABET accredited. It is anticipated that, in the near future, senior thesis will be accepted by ABET as an appropriate "design experience;" when approved, and if accepted in terms of satisfying the objectives of MSE 395 by the MSE 395 instructor, it can be used for the MSE 395 design project.

Mechanical Engineering

The department offers a combined Bachelor of Science and Master of Science program. This program allows students who wish to earn both degrees to become involved in graduate course work and thesis research during their fourth year of study. It also offers the possibility to earn both degrees on an accelerated schedule. The educational objectives of the combined program are the same as for the individual degrees.

Course Requirements

The combined program requires 120 hours of undergraduate credit and 32 hours of graduate credit. This compares with 128 hours of undergraduate credit and 32 hours of graduate credit when the B.S. and M.S. degrees are earned separately. The undergraduate requirements are identical to the four-year B.S. program, except that the following requirements are waived:

- one MechSE elective — 3 hours
- one Technical elective — 3 hours
- Free electives — 2 hours

In addition, independent study project courses may not be used as MechSE or technical electives in the B.S. portion of the combined program.

The M.S. portion of the program requires completion of 32 hours of credit. This consists of a minimum of 24 hours of formal graded course work at the 400 level or above and eight hours of thesis research credit. Additionally, the formal graded course work must include eight hours at the 500 level and eight hours in the major area of study (ME) with a minimum of four of those hours at the 500 level. A Master's thesis is required, consisting of at least four and no more than eight hours of ME 599 credit. Students must also register for the graduate seminar course (ME 590) every semester following formal admission into the graduate portion of the program and complete MSE 492. The seminar and lab safety credits will not count toward the degree. The non-thesis option is not available to students in this combined program.

A student in the combined program must spend at least two academic years in residence, full time in the combined degree program, and at least one of these years must be with graduate status. Students must maintain a graduate GPA of 3.00 in order to remain in the combined program.

The B.S. and M.S. degrees are granted simultaneously at the end of the program.

Admission

Formal admission to the combined program normally occurs late in the junior year or early in the senior year and is by invitation only with the following provisions:

- Students must have a minimum Illinois GPA of 3.80 or higher, and have earned 96 credit hours toward the B.S.M.E. requirements at the time they are invited to apply (60 of these hours must have been earned at Illinois).
- A special B.S.-M.S. application is provided to the student with the invitation. This application along with supporting documents must be submitted to the ME Graduate Programs Office, Room 164 MEB. There are two annual application deadlines: October 15 and March 15.
- GRE scores are not required for admission to the program. However, students are strongly encouraged to take the GRE in their senior year in order, for example, to be eligible for national fellowship competitions.
- Students in the combined program will be recommended by the department for admission to the Graduate College after they complete the 120 hours required for the B.S. portion of the combined program.
- The department will pay the application fee (\$60 US, \$75 International) for these students.
- Each student is required to identify a graduate advisor and provide a tentative thesis topic at the time of application to the program.

Withdrawal

Students may withdraw from the program at any time by notifying the Undergraduate Programs Office. Students who do not meet the Graduate College and departmental requirements for admission to the graduate program at the time they complete the 120-hour B.S. portion of the combined program will be required to leave the program.

Students who withdraw from the program for any reason may continue in the regular four-year B.S. degree program, which currently requires 128 hours, provided they meet the normal GPA requirements of that program. Students who withdraw from the combined program after they have taken courses for graduate credit may petition to have those credits counted toward their undergraduate program requirements.

Continued Graduate Study

Students who complete the combined program may petition to continue in graduate school for a Ph.D. These students will hold the same status (post M.S.) as students entering the Ph.D. program with an M.S. degree, and will be required to take the department's qualifying examination no later than the second calendar semester after graduation from the combined program.

For the Degree of Bachelor of Science in Aerospace Engineering

The Aerospace Engineering curriculum provides a strong fundamental background in engineering, mathematics, and science, along with the ability to apply this fundamental knowledge to the analysis and design of future aircraft and spacecraft. It also prepares students for lifelong learning and the attainment of their career goals in the field of aerospace engineering and in a wide range of other areas. The concepts of system design are introduced early in the curriculum and culminate in the yearlong senior capstone design experience (AE 442, AE 443), in which students work in teams to respond to a design challenge from industry, government, or a professional engineering society. A total of 18 hours of technical and free electives allows the student to pursue an individualized program of study.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

AE 100	Intro to Aerospace Engineering ¹	2
ENG 100	Engineering Orientation ²	0
Total Hours		0

¹ This optional course may be used to help meet free elective requirements.

² External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
MATH 221	Calculus I ¹	4
MATH 225	Introductory Matrix Theory	2
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 285	Intro Differential Equations	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
Total Hours		30

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Aerospace Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of aerospace engineering.

AE 202	Aerospace Flight Mechanics	3
AE 311	Incompressible Flow	3

AE 312	Compressible Flow	3
AE 321	Mechs of Aerospace Structures	3
AE 323	Applied Aerospace Structures	3
AE 352	Aerospace Dynamical Systems	3
AE 353	Aerospace Control Systems	3
AE 370	Aerospace Numerical Methods	3
AE 433	Aerospace Propulsion	3
AE 442	Aerospace Systems Design I	3
AE 443	Aerospace Systems Design II	3
AE 460	Aerodynamics & Propulsion Lab	2
AE 461	Structures & Control Lab	2
AE 483	Aerospace Decision Algorithms	3
ECE 205	Elec & Electronic Circuits	3
ECE 206	Elec & Electronic Circuits Lab	1
IE 300	Analysis of Data ¹	3
ME 300	Thermodynamics	3
MSE 280	Engineering Materials	3
TAM 210	Introduction to Statics	2
TAM 212	Introductory Dynamics	3
Total Hours		58

¹ STAT 400 *may be substituted*.

Technical Electives

These courses stress the rigorous analysis and design principles practiced in the major subdisciplines of aerospace engineering.

Selected from the departmentally approved list of Technical Electives, satisfying these distribution requirements: ¹

Chosen from AE Technical Electives ¹	6
Chosen from AE Technical Electives or Non-AE Technical Electives ¹	6
Total Hours	12

¹ List of Technical Electives (<http://aerospace.illinois.edu/undergraduate-programs/current-students/tech-electives>).

Liberal Education

The liberal education courses (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education social & behavioral sciences list.	6
Electives from the campus General Education humanities & the arts list.	6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.	6
Total Hours	18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition (satisfied by completing the sequence AE 442 + AE 443 in the Aerospace Engineering Technical Core)		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvice/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. 6

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

First Year

First Semester		Hours
AE 100 ¹	Intro to Aerospace Engineering	2
ENG 100	Engineering Orientation	0
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
MATH 221 ²	Calculus I	4

AE 461	Structures & Control Lab	2
Technical electives ⁷		9
Semester Hours		14
Total Hours:		128

¹ Entering freshmen are expected to enroll in AE 100 in the fall of the first year. Section topics vary each term; consult the Class Schedule or departmental Web site for topics offered. This optional course may be used to help meet free elective requirements.

² MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

³ Liberal education electives (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

⁴ RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is a liberal education elective.

⁵ STAT 400 may be substituted.

⁶ Sequence satisfies the General Education Advanced Composition requirement.

⁷ Technical elective credits totaling twelve hours, selected from the departmentally approved list of Technical Electives (<http://aerospace.illinois.edu/undergraduate-programs/current-students/tech-electives>) , satisfying these distribution requirements: (i) six hours of AE Technical Electives; (ii) six hours of AE Technical Electives or Non-AE Technical Electives.

Agricultural and Biological Engineering

K. C. Ting

338 Agricultural Engineering Sciences Building, 1304 West Pennsylvania Avenue, Urbana, (217) 333-3570

<http://abe.illinois.edu>

The Department of Agricultural and Biological Engineering offers a four-year degree program in Agricultural and Biological Engineering through the College of Engineering that is described below.

The Department also offers a five-year dual degree program through both the College of Engineering and the College of ACES. Students who successfully complete this five-year academic program receive the Bachelor of Science in Agricultural and Biological Engineering degree from the College of Engineering as well as the Bachelor of Science in Agriculture degree with a major in Agricultural and Biological Engineering from the College of ACES. Both degree programs are joint between the College of Engineering and the College of ACES with students beginning as new freshmen in the College of ACES.

Curriculum in Agricultural and Biological Engineering

abe.illinois.edu/undergrad_programs

Fax: (217) 244-0323

E-mail: abe@illinois.edu

For the Degree of Bachelor of Science in Agricultural and Biological Engineering

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This ABET-accredited program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures.

Concentrations

The agricultural and biological engineering program provides two concentrations: Agricultural Engineering and Biological Engineering. Each concentration has specific areas of specialization related to career interest.

Agricultural Engineering Concentration

The B.S. Degree in Agricultural and Biological Engineering provides a concentration in Agricultural Engineering. This concentration includes the integration of physical and biological sciences as a foundation for engineering applications in agriculture, food systems, energy, natural resources, the environment, and related biological systems. Students pursuing this concentration are involved in the design of systems for renewable energy, off-road equipment, water quality, and the utilization and protection of soil and water resources. Important design constraints are economics, conservation of materials and energy, safety, and environmental quality. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Renewable energy Systems
- Off-Road Equipment Engineering
- Soil and Water Resources Engineering

Biological Engineering Concentration

The B.S. Degree in Agricultural and Biological Engineering also provides a concentration in Biological Engineering. This concentration integrates biology and engineering to provide solutions to problems related to living systems (plants, animals, and microorganisms). Engineered biological systems vary widely in scale. At the molecular level, nanometer-scale devices consist of a few biomolecules inside individual cells. At the other extreme, regionally-scaled complex ecosystems depend upon multiple species of interacting living organisms. Such systems are becoming increasingly important in areas such as bioenergy, bioprocessing, nanotechnology, biosensing, bio-informatics, and bioenvironment. Within this concentration, students are strongly encouraged to select a set of coherent courses that constitutes a specialization in their area of career interest either from the following list or a customized area chosen in consultation with an advisor:

- Bioenvironmental Engineering
- Ecological Engineering
- Food and Bioprocess Engineering
- Nanoscale Biological Engineering

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation. The curriculum is organized as follows.

Orientation and Professional Development

These courses introduce the opportunities and resources that your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ABE 100	Intro Agric & Biological Engrg ¹	1
ENG 100	Engineering Orientation ¹	0
Total Hours		1

¹ External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
MATH 221	Calculus I ¹	4
MATH 225	Introductory Matrix Theory	2
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 285	Intro Differential Equations	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
Total Hours		34

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Agricultural and Biological Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of agricultural and biological engineering and the background for the technical courses and electives in each student's concentration.

For Both Concentrations

ABE 141	ABE Principles: Biological	2
ABE 223	ABE Principles: Machine Syst	2
ABE 224	ABE Principles: Soil & Water	2
ABE 225	ABE Principles: Bioenvironment	2
ABE 226	ABE Principles: Bioprocessing	2
ABE 430	Project Management	2
ABE 469	Industry-Linked Design Project	4
CS 101	Intro Computing: Engrg & Sci	3
ECE 205	Elec & Electronic Circuits	3
GE 101	Engineering Graphics & Design	3
TAM 210	Introduction to Statics ¹	2
or TAM 211	Statics	
TAM 212	Introductory Dynamics	3
Total Hours		30

Subtotal for both concentrations. See additional technical core requirements below.

¹ The extra hour of credit for this course may be used to help meet free elective requirements.

For the Agricultural Engineering Concentration

Select one of the following:		3
CEE 202	Engineering Risk & Uncertainty	
IE 300	Analysis of Data	
ABE 440	Applied Statistical Methods I ¹	
STAT 400	Statistics and Probability I ¹	
ECE 206	Elec & Electronic Circuits Lab	1
ME 300	Thermodynamics	3
TAM 251	Introductory Solid Mechanics	3
Select one of the following:		4
TAM 335	Introductory Fluid Mechanics	
CHBE 421	Momentum and Heat Transfer	
ME 310	Fundamentals of Fluid Dynamics	
Total Hours		14
Total for the Agricultural Engineering Concentration		44
Total Hours		44

¹ The extra hour of credit for this course may be used to help meet free elective requirements.

For the Biological Engineering Concentration

ABE 341	Transport Processes in ABE	3
CHBE 321	Thermodynamics	4
CHEM 232	Elementary Organic Chemistry I ¹	3 OR 4
MCB 150	Molec & Cellular Basis of Life	4
Subtotal		14
Total Hours		44

Total for the Biological Engineering Concentration

¹ May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.

Technical Electives

This elective course work must be completed to fulfill each Concentration. The subjects build upon the agricultural and biological engineering technical core.

For the Agricultural Engineering Concentration

Biological and natural sciences electives chosen from a departmentally approved list of Biological and Natural Sciences Electives – Group A ¹	6
Technical electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives – Group A, and the remainder approved Other Technical Electives – Group A. ^{2,3}	15
Total Hours	21

¹ Biological and Natural Sciences Electives - Group A (<http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-BioNatSciElectives>)

² Agricultural and Biological Engineering Technical Electives - Group A (<http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-TechElectives>)

³ Other Technical Electives - Group A (<http://abe.illinois.edu/undergrad/ABE-Curriculum/AGE-TechElectives/#tag1>)

For the Biological Engineering Concentration

Biological and natural sciences electives chosen from a departmentally approved list of Biological and Natural Sciences Electives – Group B ¹	6
Technical electives chosen in consultation with an advisor. At least 8 hours must be Agricultural and Biological Engineering Technical Electives - Group B, and the remainder approved Other Technical Electives – Group B ^{2,3}	15
Total Hours	21

- ¹ *Biological and Natural Science Electives - Group B* (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-BioNatSciElectives>)
- ² *Agricultural and Biological Engineering Technical Electives - Group B* (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives>)
- ³ *Other Technical Electives - Group B* (<http://abe.illinois.edu/undergrad/ABE-Curriculum/BIOE-TechElectives/#tag1>)

Liberal Education

The liberal education courses (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

ECON 103	Macroeconomic Principles ¹	3
Electives from the campus General Education social & behavioral sciences list.		3
Electives from the campus General Education humanities & the arts list.		6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.		6
Total Hours		18

- ¹ *ECON 102 or ACE 100 may be substituted by petition.*

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition (satisfied by completing ABE 469 in the Agricultural and Biological Engineering Technical Core)		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. 6

- ⁸ *Satisfies the General Education Advanced Composition requirement.*
- ⁹ *May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.*

Bioengineering

Rashid Bashir

1270 Digital Computer Lab, 1304 West Springfield Avenue, (217) 333-1867

<http://bioengineering.illinois.edu>

For the Degree of Bachelor of Science in Bioengineering

Bioengineers use tools from biology, chemistry, physics and math to solve engineering problems that arise in biological systems related to biomaterials, biomechanics and prosthetics, tissue engineering, molecular modeling, imaging, bioinformatics, nanomedicine, synthetic biology, and drug delivery. The goal of research and education in bioengineering is to advance fundamental understanding of how human biological systems function, and to develop effective technology-based solutions to the wide spectrum of societal needs in human development and disease diagnosis, treatment, and prevention.

Bioengineering graduates work in such fields as healthcare, pharmaceuticals, medical devices, consumer products, hospitals and clinics, government regulatory agencies, patent law, academia, laboratory and research facilities, product and process development, quality and regulatory services, and operations and manufacturing.

The curriculum includes integration of principles of biology and engineering in coursework such as biomechanics, modeling of human physiology, bioinstrumentation, and cell and tissue engineering. The curriculum is project-based and has a strong emphasis on systems-thinking as an approach to large-scale bioengineering problems. During the first and second years, students take fundamental courses introducing them to bioengineering as a field and introducing clinically relevant projects as learning experiences. The program also features hands-on laboratory courses for real-world experience throughout the curriculum. The final two years allow students to focus on a particular track of Bioengineering for further study. A year-long senior capstone design course provides experience in applying engineering fundamentals to biological problems submitted by faculty, clinicians, and industrial firms.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's undergraduate advising Web site (<https://wiki.engr.illinois.edu/display/ugadvise/Technical+GPA+Requirements>).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

BIOE 120	Introduction to Bioengineering	1
ENG 100	Engineering Orientation	0
Total Hours		1

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
MATH 221	Calculus I ¹	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 285	Intro Differential Equations	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
Total Hours		30

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Bioengineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of bioengineering.

BIOE 201	Conservation Principles Bioeng	3
BIOE 202	Cell & Tissue Engineering Lab	2
BIOE 205	Signals & Systems in Bioengrg	3
BIOE 206	Cellular Bioengineering	3
BIOE 220	Bioenergetics	4
BIOE 301	Introductory Biomechanics	3
BIOE 302	Modeling Human Physiology	3
BIOE 303	Quantitative Physiology Lab	2
BIOE 310	Comp Tools Bio Data	3
BIOE 360	Transport & Flow in Bioengrg	3
BIOE 414	Biomedical Instrumentation	3
BIOE 415	Biomedical Instrumentation Lab	2
BIOE 420	Intro Bio Control Systems	3
BIOE 435	Senior Design I	2
BIOE 436	Senior Design II	2
BIOE 476	Tissue Engineering	3
CHEM 232	Elementary Organic Chemistry I ¹	3 OR 4
CS 101	Intro Computing: Engrg & Sci	3
MCB 150	Molec & Cellular Basis of Life	4
Total Hours		54

¹ May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.

Track Electives

Students must complete 15 hours of study which show coherence, focus, and purpose within a bioengineering context. Students may choose from among the following pre-approved tracks:

- Biomechanics
- Cell and Tissue Engineering
- Computational and Systems Biology
- Imaging and Sensing
- Therapeutics Engineering

Alternately a student may devise a special track and set of courses which must be approved by the Bioengineering Department. In either case, overage hours in required courses may be counted toward the 15-hour minimum.

Track electives selected from a departmentally approved list of track elective courses. ¹ 15

¹ List of track elective courses. (<http://bioengineering.illinois.edu/undergraduate-programs/track-electives>)

Liberal Education

The liberal education courses (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education social & behavioral sciences list.	6
Electives from the campus General Education humanities & the arts list.	6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.	6
Total Hours	18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition. May be satisfied by completing a course in either the liberal education or free elective categories which has the Advanced Composition designation.		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. 6

¹ College of Engineering advising Web site. (<https://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>)

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

First Year

First Semester		Hours
BIOE 120	Introduction to Bioengineering	1

Semester Hours		14
Total Hours:		128

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

² RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is MCB 150.

³ Liberal education electives (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

- ⁴ *May be taken for 4 credit hours; the extra hour may be used to help meet free elective requirements.*
- ⁵ *To be selected from a departmentally approved list of track elective courses (<http://bioengineering.illinois.edu/undergraduate-programs/track-electives>) if a pre-approved track is chosen. Alternately a student may devise a special track which must be approved by the Bioengineering Department.*

Civil and Environmental Engineering

Amr S. Elnashai

1114 Newmark Civil Engineering Laboratory, 205 North Mathews Avenue, Urbana, (217) 333-8038

<http://cee.illinois.edu>

For the Degree of Bachelor of Science in Civil Engineering

Civil engineering is a profession that applies the basic principles of science in conjunction with mathematical and computational tools to solve problems associated with developing and sustaining civilized life on our planet. Civil engineering works are generally one-of-a-kind projects; they are often grand in scale; and they usually require cooperation among professionals of many different disciplines. The completion of a civil engineering project involves the solution of technical problems in which uncertainty of information and myriad non-technical factors often play a significant role. Some of the most common examples of civil engineering works include bridges, buildings, dams, airports, highways, tunnels, and water distribution systems. Civil engineers are concerned with flood control, landslides, air and water pollution, and the design of facilities to withstand earthquakes and other natural hazards, in addition to protecting our environment for a sustainable future.

The civil engineering program comprises seven main areas (construction engineering and management, construction materials engineering, environmental engineering, geotechnical engineering, environmental hydrology and hydraulics, structural engineering, and transportation engineering) and three cross-cutting programs (sustainable and resilient infrastructure systems; energy, water, and environmental sustainability; and societal risk management). Although each area has its own special body of knowledge and engineering tools, they all rely on the same fundamental core principles. Civil engineering projects often draw expertise from many of these areas and programs.

CEE's Program Education Objectives are to educate CEE students to:

1. Successfully enter the civil and environmental engineering profession as practicing engineers and consultants with prominent companies and organizations in diverse areas that include structural, transportation, geotechnical, materials, environmental, and hydrologic engineering; construction management; or other related or emerging fields.
2. Pursue graduate education and research at major research universities in civil and environmental engineering, and related fields.
3. Pursue professional licensure.
4. Advance to leadership positions in the profession.
5. Engage in continued learning through professional development.
6. Participate in and contribute to professional societies and community services.

Program Review and Approval

To qualify for the degree of Bachelor of Science in Civil Engineering, each student's academic program plan must be reviewed by a standing committee of the faculty (the Program Review Committee) and approved by the Associate Head of Civil and Environmental Engineering in charge of undergraduate programs. This review and approval process ensures that individual programs satisfy the educational objectives and all of the requirements of the civil engineering program, that those programs do not abuse the substantial degree of flexibility that is present in the curriculum, and that the career interests of each student are cultivated and served.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

CEE 195	About Civil Engineering	1
CEE 495	Professional Practice	0
ENG 100	Engineering Orientation ¹	0
Total Hours		1

¹ External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
MATH 221	Calculus I ¹	4
MATH 225	Introductory Matrix Theory	2
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 285	Intro Differential Equations	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
Total Hours		34

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Civil Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of civil engineering.

CEE 201	Systems Engrg & Economics	3
CEE 202	Engineering Risk & Uncertainty	3
CS 101	Intro Computing: Engrg & Sci	3
GE 101	Engineering Graphics & Design	3
TAM 211	Statics	3
TAM 212	Introductory Dynamics	3
TAM 251	Introductory Solid Mechanics	3
TAM 335	Introductory Fluid Mechanics	4
Total Hours		25

Mathematics and Science Elective

This elective allows the student either to gain additional depth or breadth in mathematics or science essential to specialization in one of the branches of civil engineering. The specific choice of a course in this category is made through the submission of the Plan of Study, which is subject to approval by the faculty Program Review Committee.

Mathematics and science elective, selected in accord with recommendations for the chosen primary field in civil engineering as outlined in the Civil Engineering Undergraduate Handbook. ¹ 3

¹ Civil Engineering Undergraduate Handbook (<http://cee.illinois.edu/handbooks>).

Civil Engineering Technical Electives

This course work is designed to give each student a broad background in the areas of civil engineering through the core courses and to allow each student to develop a focused program through advanced technical electives in chosen primary and secondary fields. There are seven areas of study which include:

- Construction Engineering and Management
- Construction Materials Engineering
- Environmental Engineering
- Environmental Hydrology and Hydraulic Engineering
- Geotechnical Engineering
- Structural Engineering
- Transportation Engineering

In addition to the areas of study, three cross-cutting programs can be chosen by students. They include:

- Sustainable and Resilient Infrastructure Systems
- Energy-Water-Environment - Sustainability
- Societal Risk Management

The fundamental principles of civil engineering design and the behavior of civil engineering systems are emphasized throughout the course work. The specific choices of courses in this category are made through the submission of the Plan of Study, which is subject to approval by the faculty Program Review Committee.

Civil engineering technical courses, selected as follows, to at least include: 34

Civil Engineering Core Courses

The courses that are required and recommended for the primary and secondary fields are listed in the Civil Engineering Undergraduate Handbook. Select at least 5 courses from the following list: ¹ 15-16

CEE 300	Behavior of Materials	4
CEE 310	Transportation Engineering	3
CEE 320	Construction Engineering	3
CEE 330	Environmental Engineering	3
CEE 350	Water Resources Engineering	3
CEE 360	Structural Engineering	3
CEE 380	Geotechnical Engineering	3

Primary Field Advanced Technical Electives. Select courses from approved lists for appropriate programs of study within the seven areas or three cross-cutting programs of civil engineering. Design experience is distributed in 200-level, 300-level, and 400-level CEE courses including integrated design courses. Course lists can be found in the Civil Engineering Undergraduate Handbook. ¹ 12-13

Secondary Field Advanced Technical Electives. Select courses from approved lists to complement the primary area and add breadth to the program of study. Course lists can be found in the Civil Engineering Undergraduate Handbook. ¹ 6

¹ Civil Engineering Undergraduate Handbook (<http://cee.illinois.edu/handbooks>).

Liberal Education

The liberal education courses (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

ECON 102	Microeconomic Principles (Recommended)	3
or ECON 103	Macroeconomic Principles	
Electives from the campus General Education social & behavioral sciences list.		3
Electives from the campus General Education humanities & the arts list.		6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.		6
Total Hours		18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
BTW 261	Principles Tech Comm (satisfies the Advanced Composition requirement)	3
Total Hours		7

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.

6

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Total Hours:

127-129

- ¹ Offered in the fall semester only and should be taken no later than the first or second semester of enrollment in Civil Engineering.
- ² RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is GE 101.
- ³ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
- ⁴ Liberal education electives (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
- ⁵ Civil engineering technical courses are defined as core courses and advanced technical electives and must total 34 hours of credit. Five courses and a minimum of fifteen hours must be core courses as outlined in the Civil Engineering Undergraduate Handbook. (<http://cee.illinois.edu/handbooks>) Advanced technical electives are selected to correspond with chosen primary and secondary areas of emphasis in civil engineering as outlined in the Civil Engineering Undergraduate Handbook. (<http://cee.illinois.edu/handbooks>) A minimum of twelve and six hours must be taken for the primary and secondary areas, respectively.
- ⁶ The mathematics and engineering science elective is selected in accord with recommendations for the chosen primary area of emphasis in civil engineering as outlined in the Civil Engineering Undergraduate Handbook (<http://cee.illinois.edu/handbooks>).

Computer Science

<http://cs.illinois.edu>

Head of Department: Rob A. Rutenbar

Department Office: 2232 Siebel Center, 201 N. Goodwin Avenue, Urbana, (217) 333-3373

For the Degree of Bachelor of Science in Computer Science

The computer science curriculum provides both a broad and deep knowledge of the theory, design, and application of computer systems, with an emphasis on software systems. Because computing is ubiquitous, application areas involve virtually any field imaginable - from developing gene sequencing algorithms via techniques in computational biology, to designing user interfaces for mobile applications; from designing methods for high frequency trading, to creating computer generated graphics and special effects in the gaming industry; and from creating embedded real time systems to be deployed in medical devices, to analyzing social data from internet communication patterns. During the first two years the curriculum provides a strong foundation in mathematics, science, and computation. Advanced coursework in areas of the student's choosing follows in the second two years, which include either a senior thesis or a senior project. Graduates may go on to graduate study or leading positions in industry.

A combined B.S.-M.S. Computer Science degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 130).

A Software Engineering Certificate (<https://wiki.engr.illinois.edu/display/undergradProg/Degree+Requirements/#DegreeRequirements-softengcert>) is also available to all students in the computer science curriculum interested in a career in software engineering. It provides the depth and breadth necessary for satisfying possible future software engineering accreditation requirements.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

A technical grade point average requirement for graduation applies to students in this curriculum. This rule is summarized at the College of Engineering's undergraduate advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Technical+GPA+Requirements>).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

CS 100	Freshman Orientation ^{1,2}	1
CS 210	Ethical & Professional Issues	2
ENG 100	Engineering Orientation ²	0
Total Hours		3

¹ This optional course is highly recommended and may be used to help meet free elective requirements.

² External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
MATH 221	Calculus I ¹	4
MATH 231	Calculus II	3

PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2

or PHYS 214

Univ Physics: Quantum Physics

Total Hours

28

- ¹ *MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.*

Computer Science Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of computer science.

CS 125	Intro to Computer Science	4
CS 173	Discrete Structures	3
CS 225	Data Structures	4
CS 233	Computer Architecture	4
CS 241	System Programming	4
CS 242	Programming Studio	3
CS 373	Theory of Computation	3
MATH 461	Probability Theory ¹	3
or STAT 400	Statistics and Probability I	
Total Hours		28

- ¹ *The extra hour of credit for this course may be used to help meet free elective requirements.*

Technical Track Option Electives

These courses stress the rigorous analysis and design principles practiced in several major subdisciplines of computer science. Students must choose to specialize in one of the following technical tracks:

- Computer Science (<https://wiki.engr.illinois.edu/display/undergradProg/CS+Track+Requirements>)
- Computational Science and Engineering (<https://wiki.engr.illinois.edu/display/undergradProg/CSE+Track+Requirements>)
- Mathematics (<https://wiki.engr.illinois.edu/display/undergradProg/Math+Track+Requirements>)

In the Computational Science and Engineering track, a scientific specialization must be selected from a departmentally approved list (<https://wiki.engr.illinois.edu/display/undergradProg/CSE+Track+Requirements>). Since specializations are subject to change, please consult the department Web site (<https://wiki.engr.illinois.edu/display/undergradProg/Degree+Requirements/#DegreeRequirements-bseng>) for the most current information.

Technical track electives to be chosen from departmentally approved lists for the Technical Track Option choices presented above.

24-27

Liberal Education

The liberal education courses (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education social & behavioral sciences list.	6
Electives from the campus General Education humanities & the arts list.	6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.	6
Total Hours	18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition. May be satisfied by completing one of the following: CS 499; the sequence CS 427 + CS 429; the sequence CS 492 + CS 493; or a course taken in either the liberal education or free elective categories which has the Advanced Composition designation		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. (19 if a 27 credit-hour Technical Track is chosen; 22 if a 24 credit-hour Technical Track is chosen.) ¹

¹ College of Engineering advising Web site. (<https://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>)

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Computer Engineering

For the Degree of Bachelor of Science in Computer Engineering

Computer Engineering at Illinois focuses on the development of vital computing technologies, ranging from chips to computers to networks to programming tools to key algorithms for building exciting applications. Fundamentally, Computer Engineering addresses the problem of building scalable, trustworthy computing systems, and the faculty's interests span a broad spectrum of issues pertinent to this theme. Computer has taken the lead in revolutionizing many science and engineering disciplines with parallel computing, from chips to clouds to planet-scale critical infrastructures, and has defined new standards of security, privacy, and dependability for systems ranging from small circuits to the electric power grids of many nations. Students need a broad and sound set of mathematical and computing skills, and are well-served by a flexible curriculum that enables them to pursue topics of interest among the many subdisciplines in computing.

The computer engineering core curriculum focuses on fundamental computer engineering knowledge: circuits, systems, electromagnetics, computer systems, electronics for information processing and communication, and computer science. The rich set of ECE elective courses permits students to concentrate in any sub-discipline of computer engineering including: computer systems; electronic circuits; networks; engineering applications; software, languages, and theory; and algorithms and mathematical tools.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's undergraduate advising Web site (<https://wiki.engr.illinois.edu/display/ugadvise/Technical+GPA+Requirements>).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
MATH 221	Calculus I ¹	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 286	Intro to Differential Eq Plus	4
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
PHYS 214	Univ Physics: Quantum Physics	2
Total Hours		31

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Computer Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of computer engineering.

CS 173	Discrete Structures ¹	3
CS 225	Data Structures	4

CS 374 when approved		3
ECE 110	Introduction to Electronics	1 TO 3
ECE 120	Introduction to Computing	4
ECE 210	Analog Signal Processing	4
ECE 220	Computer Systems & Programming	4
ECE 313	Probability with Engrg Applic ²	3
ECE 385	Digital Systems Laboratory	3
ECE 391	Computer Systems Engineering	4
Total Hours		35

¹ MATH 213 may be substituted.

² STAT 410 may be substituted.

Technical Electives

These courses stress the rigorous analysis and design principles practiced in the major subdisciplines of computer engineering.

28 hours to be selected from departmentally approved List of Technical Electives

One course from departmentally approved list of EE Foundations Courses

Three courses from departmentally approved list of Advanced Computing Electives

One of: ECE 411, ECE 445, or both ECE 496 AND ECE 499

¹ List of Technical Electives (<http://www.ece.illinois.edu/students/ugrad/curriculum/tech-electives-06.html>).

Liberal Education

The liberal education courses (<https://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education social & behavioral sciences list.	6
Electives from the campus General Education humanities & the arts list.	6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.	6
Total Hours	18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition. May be satisfied by completing ECE 496 and ECE 499 or a course within either the liberal education or free elective categories which has the Advanced Composition designation.		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<https://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. At least seven hours must be taken for a grade. 12

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

First Year

First Semester

		Hours
ENG 100	Engineering Orientation	0
MATH 221 ¹	Calculus I	4

Total Hours:		128

- ¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
- ² RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is a Liberal education elective.
- ³ Liberal education electives (<https://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
- ⁴ MATH 213 may be substituted.
- ⁵ One course must not be either ECE or CS. The remaining classes are ECE and CS electives. All are to be chosen from the departmentally approved List of Technical Electives (<http://www.ece.illinois.edu/students/ugrad/curriculum/tech-electives-06.html>).
- ⁶ STAT 410 may be substituted.

Electrical Engineering

For the Degree of Bachelor of Science in Electrical Engineering

Electrical engineering is a multifaceted discipline that over the last century has produced an astounding progression of technological innovations that have shaped virtually every aspect of modern life. Electrical engineers need a broad and solid foundation in mathematics and physics to support their education in the engineering principles of analysis, synthesis, design, implementation, and testing of the devices and systems that provide the bedrock of modern energy, communication, sensing, computing, medical, security, and defense infrastructures. Within each subdiscipline one can find application domains that strongly rely on hands-on experimental work or that are based on theoretical, mathematical and computational approaches. The multidisciplinary nature of the electrical engineering education addresses the growing demand for the innovation and design of sensing, communication, computing, and decision-making systems of increasing complexity in consumer, defense, and medical applications.

The curriculum starts with a core of fundamental courses on circuits, electromagnetics, solid-state electronics, and computer systems, leading to a comprehensive array of specialized courses and laboratories in all of the important areas of modern electrical engineering. These range from power and energy systems to electronic, opto-electronic, and photonic devices; integrated circuits; telecommunications and remote sensing; control systems; robotics; signal processing; and bio-medical instrumentation and sensing.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's undergraduate advising Web site (<https://wiki.engr.illinois.edu/display/ugadvise/Technical+GPA+Requirements>).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ENG 100	Engineering Orientation ¹	0
Total Hours		0

¹ External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
MATH 221	Calculus I ¹	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 286	Intro to Differential Eq Plus	4
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
PHYS 214	Univ Physics: Quantum Physics	2
Total Hours		31

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Electrical Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of electrical engineering.

ECE 110	Introduction to Electronics	1 TO 3
ECE 210	Analog Signal Processing	4

ECE 120	Introduction to Computing	4
ECE 313	Probability with Engrg Applic ¹	3
ECE 220	Computer Systems & Programming	4
ECE 329	Fields and Waves I	3
ECE 385	Digital Systems Laboratory	3
ECE 340	Semiconductor Electronics	3
ECE 445	Senior Design Project Lab	4
Total Hours		31

¹ STAT 410 may be substituted.

Technical Electives

This elective requirement gives each student freedom to define a technical course of study in electrical engineering of considerable breadth and focus. The Advanced Core ECE Electives are introductory to major subdisciplines of electrical engineering (<https://my.ece.illinois.edu/students/ugrad/subdisciplines.html>).

32 hours, selected from the departmentally approved List of Technical Electives ¹

Non-ECE courses ⁱ	6
Select three from the following list of Advanced Core ECE electives: ⁱⁱ	9-10
ECE 391 or CS 225	Computer Systems Engineering Data Structures
ECE 310	Digital Signal Processing
ECE 330	Power Ckts & Electromechanics
ECE 342	Electronic Circuits
ECE 350	Fields and Waves II
Select three ECE labs identified in the List of Technical Electives ^{1,iii}	3
ECE Courses ^{iv}	20

¹ List of Technical Electives (<http://www.ece.illinois.edu/students/ugrad/curriculum/tech-electives-06.html>).

^{i,ii} Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Liberal Education

The liberal education courses (<https://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education social & behavioral sciences list.	6
Electives from the campus General Education humanities & the arts list.	6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.	6
Total Hours	18

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition (satisfied by completing ECE 445 in the Electrical Engineering Technical Core). May be satisfied by completing a course in either the liberal education or free elective categories which has the Advanced Composition designation.		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<https://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors. At least seven hours must be taken for a grade.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. 12

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Total Hours:		128

- ¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
- ² Liberal education electives (<https://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
- ³ STAT 410 may be substituted
- ⁴ A minimum of 32 hours chosen from the departmentally approved list of Technical Electives (<http://www.ece.illinois.edu/students/ugrad/curriculum/tech-electives-06.html>). Of these, at least three courses are to be chosen from the ECE advanced core electives and three courses from the list of ECE laboratory electives; 20 hours must be ECE course work, six hours non-ECE course work, and the remaining hours may be chosen from the entire List.
- ⁵ Satisfies the General Education Advanced Composition requirement.

Industrial and Enterprise Systems Engineering

Undergraduate Program Office: 104 Transportation Building
Fax: (217) 244-5705

Part of a nationally top-ranked engineering college on a premier Big Ten university campus, the Department of Industrial & Enterprise Systems Engineering offers students a blend of intellectual challenge, excitement, and energy that is transformational—this is a campus where you can learn from a world-renowned faculty, study in the most technologically advanced engineering library in the nation, and contribute to research that has real impact. The University attracts the best students from across the country and around the world. You can choose from about 4,000 courses as well as a variety of sports, the arts, and student activities—you'll never lack amazing things to do.

You can explore your personal interests and goals in more than 50 professional and honor engineering societies, or the more than 1,000 other organizations across campus. These student-run groups offer opportunities to develop leadership skills, test technical competence, and serve society through volunteer projects.

Many students choose a study-abroad experience to gain a better understanding of other cultures, while also developing skills that make them more marketable in the global workplace. The Office of International Programs in Engineering coordinates travel and fellowships to countries all over the world. Engineering at Illinois is the only U.S. institution to offer an international minor in engineering as part of a regular degree program.

- Major in Industrial Engineering (p. 192)

General Engineering

For the Degree of Bachelor of Science in General Engineering

General Engineering is a comprehensive, interdisciplinary program emphasizing real-world problem solving through a unique orientation toward partnerships with industry. It brings together basic sciences, engineering sciences, and engineering design. The curriculum offers flexibility through the Secondary Field Option, while providing a broad background in mechanics and structures, control systems, and decision making that support a systems approach to engineering.

General Engineers understand how to apply business fundamentals to promote utilization of new technology, engage in entrepreneurship, and succeed in engineering and nonengineering careers. The curriculum emphasizes the integration of engineering and business principles, preparing students to apply both functions to bring a product from invention to market.

Design experience and project management are emphasized and integrated across the core with a focus on establishing critical problem-solving skills applied across disciplines, strong communication skills, and the ability to work effectively and get results in a team environment.

The capstone experience for General Engineering undergraduates is the Senior Project Course. Students work collaboratively with industry and a team of faculty members on a real-world problem during their final semester. The results are documented in a final written report and a formal presentation at the end of the semester to the company so that the student recommendations may be implemented.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Note: Technical grade point average requirements for graduation and advanced-level course registration are being considered for this curriculum. If added, these rules will be summarized at the College of Engineering's undergraduate advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Technical+GPA+Requirements>).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ENG 100	Engineering Orientation ¹	0
GE 100	Introduction to ISE ¹	0
GE 390	General Engineering Seminar	0
Total Hours		0

¹ External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
MATH 221	Calculus I ¹	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 285	Intro Differential Equations	3
MATH 415	Applied Linear Algebra	3 OR 4
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
Total Hours		31

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

General Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of general engineering.

CS 101	Intro Computing: Engrg & Sci	3
ECE 110	Introduction to Electronics	1 TO 3
ECE 211	Analog Circuits & Systems	2
GE 101	Engineering Graphics & Design	3
GE 261	Business Side of Engineering	1

TAM 335	Introductory Fluid Mechanics	4
Total Hours		50

Secondary Field Option Electives

These courses enable the student to tailor the studies to one's interests and career goals in both technical and nontechnical areas.

Secondary field option electives selected from departmentally approved lists or by petition to the department. See the Secondary Field Options section below. 12

Technical Electives

The design elective augments a student's knowledge in one or more subdisciplines of mechanics and structures, control systems, and decision making that support a systems approach to engineering. The engineering science elective extends the knowledge of that area.

Design elective selected from the departmentally approved list of Design Electives.	3
Engineering science elective selected from the departmentally approved list of Engineering Science Electives.	3
Total Hours	6

Liberal Education

The liberal education courses (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

ECON 102	Microeconomic Principles	3
or ECON 103	Macroeconomic Principles	
Electives from the campus General Education social & behavioral sciences list.		3
Electives from the campus General Education humanities & the arts list.		6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.		6
Total Hours		18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition (satisfied by completing the combination GE 494 + GE 495 in the General Engineering Technical Core)		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. 7

Secondary Field Options

Secondary field options are of two types: preapproved and customized. Preapproved secondary fields have designated titles and a specified list of courses, from which several may be selected. Approval for the substitution of a course for one on the specified list may be requested via a petition form submitted to the department. Customized secondary fields may be created to achieve goals in areas not provided by preapproved fields. To do this, a suitable title and all the courses must be petitioned for acceptance by the department. Petition approval is based on the merit of the secondary field and the coherence of the courses within it relative to the student's goals.

Pursuit of campus minors, dual degrees, and James Scholar contracts may be integrated with customized secondary field options. Courses taken may be applied to minors, dual degrees, or contracts as well as secondary field options.

Preapproved Secondary Fields

Preapproved secondary fields are listed below. Approved courses for each are specified at the department's secondary field Web site (<http://ise.illinois.edu/sites/default/files/documents/GE%20SFO%20preapproved%20March%2015,%202012-online.pdf>). The following course substitutions may be used interchangeably to comply with prerequisites of specified courses in some of the secondary fields:

- CEE 202, IE 300, STAT 400
- CEE 201, IE 310
- MSE 406, CEE 300
- ECE 486, GE 320, ME 340

Students may petition to the department for inclusion of a course in the secondary fields listed below. The most likely classes to be accepted are nonpermanent and experimental offerings relevant to the various fields. A current list of these may be found at the department's secondary field Web site (<http://ise.illinois.edu/sites/default/files/documents/GE%20SFO%20preapproved%20March%2015,%202012-online.pdf>).

- Automotive Engineering
- Bioengineering¹
- Business Systems Integration and Consulting
- Civil Engineering Structures
- Communications and Computer Systems
- Computer-Aided Design and Manufacturing (CAD/CAM)
- Computer Science¹
- Construction
- Control Systems
- Engineering Administration
- Engineering Marketing
- Environmental Quality
- Manufacturing Engineering¹
- Nondestructive Testing and Evaluation
- Operations Research
- Quality Control

- Rehabilitation Engineering
- Robotics
- Theoretical and Applied Mechanics

¹ Students fulfilling the corresponding Campus Minor may simultaneously complete the requirements of this General Engineering secondary field option.

Customized Secondary Fields

Customized secondary fields differ from preapproved ones in that no sets of specified courses to choose from have been predefined. For all customized secondary field options, a course list must be constructed and submitted for approval by the department.

The following list contains examples of over sixty titles of customized secondary field options which have been approved. The complete list may be found at the department's secondary field Web site (<http://ise.illinois.edu/sites/default/files/Secondary%20Field%20Guide%202012.pdf>). Additional titles beyond those listed may be proposed.

- A foreign language (several)
- An engineering discipline (several)
- Biology
- Business
- Chemistry
- Economics
- Finance
- International Studies
- Mathematics
- Military Science
- Pre-Law
- Pre-Med
- Religious Studies
- Renewable Energy

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Industrial Engineering

For the Degree of Bachelor of Science in Industrial Engineering

Industrial engineering is a discipline that encompasses the analysis, development, improvement, implementation, and evaluation of integrated systems and their components, including materials, information, energy, people, money, time, equipment, and associated processes. Industrial engineering draws upon a variety of disciplines, from mathematics to psychology, from communications to computer science, and from production management to process control. Industrial engineers design efficient, productive systems in a wide range of business, industrial, and governmental settings.

The technical portion of the industrial engineering curriculum is designed as a sequence of increasingly specialized experiences. The entering student's first year is spent mastering the basics of science: math, chemistry, and physics. Second-year students begin to take fundamental engineering courses such as statics, dynamics, statistics, and strength of materials. Third-year students take a core of industrial engineering courses and begin their chosen area of specialization in one of five tracks, including: Operations Research; Quality Engineering; Supply Chain, Manufacturing, and Logistics; Economics and Finance; and Industrial Engineering Fundamentals. During their senior year, students broaden and deepen their knowledge with additional technical elective courses. Finally, all students participate in the practice of engineering through the capstone senior design course in which they work in teams to solve problems submitted by industry partnering companies, and present their solutions in reports and presentations supported by complete economic analyses. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout all four years of the curriculum.

A combined B.S.-M.S. Industrial Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (http://provost.illinois.edu/ProgramsOfStudy/2012/fall/programs/undergrad/engin/about_engin.html#indust_bsms).

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's undergraduate advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Technical+GPA+Requirements>).

Note: the TGPA rules for this curriculum are under review and if changed, will be reflected at the Web site indicated.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ENG 100	Engineering Orientation ¹	0
GE 100	Introduction to ISE ¹	0
GE 390	General Engineering Seminar	0
Total Hours		0

¹ External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
MATH 221	Calculus I ¹	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 285	Intro Differential Equations	3
MATH 415	Applied Linear Algebra	3 OR 4
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
Total Hours		31

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Industrial Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of industrial engineering.

CS 101	Intro Computing: Engrg & Sci	3
ECE 110	Introduction to Electronics	1 TO 3
GE 101	Engineering Graphics & Design	3
GE 261	Business Side of Engineering	1
GE 494	Senior Engineering Project I	3
GE 495	Senior Engineering Project II	2
IE 300	Analysis of Data	3
IE 310	Operations Research	3
IE 311	Operations Research Lab	1
IE 410	Stochastic Processes & Applic	3
IE 413	Simulation	3
IE 430	Economic Found of Quality Syst	3
ME 330	Engineering Materials	4
TAM 211	Statics	3
TAM 212	Introductory Dynamics	3
TAM 251	Introductory Solid Mechanics	3
Total Hours		44

Track Option Electives

These courses enable the student to tailor his or her studies to one's interests and career goals in the major subdisciplines of industrial engineering.

Track option electives. Courses selected from departmentally approved lists of Track Option Electives or by petition to the department. The current Track options include: 12

Industrial Engineering Fundamentals (IEF)

Operations Research (OR)

Quality Engineering (QE)

Supply Chain, Manufacturing and Logistics (SC&L)

Economics and Finance (E&F)

Technical Electives

These courses augment and strengthen the rigorous analysis and design principles practiced in the major subdisciplines of industrial engineering.

Computer science elective selected from the departmentally approved list of Computer Science Electives. 3

IE technical electives selected from the departmentally approved list of IE Technical Electives. 3

Engineering Science technical elective chosen from the departmentally approved list of Engineering Science Electives. 3

Total Hours 12

Liberal Education

The liberal education courses (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

ECON 102 Microeconomic Principles 3

or ECON 103 Macroeconomic Principles

Electives from the campus General Education social & behavioral sciences list. 3

Electives from the campus General Education humanities & the arts list. 6

Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.	6
Total Hours	18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition (satisfied by completing the combination GE 494 + GE 495 in the Industrial Engineering Technical Core)		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. 7

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

First Year

First Semester		Hours
CHEM 102	General Chemistry I	3

<http://matse.illinois.edu>

Curriculum in Materials Science and Engineering (<http://mse.illinois.edu>)

For the Degree of Bachelor of Science in Materials Science and Engineering

Materials science and engineering is the basis for all engineering. Improvements in the quality of life require knowledge of the processing and properties of current materials and the design, development and application of new materials. The Materials Science and Engineering (MatSE) curriculum provides an understanding of the underlying principles of synthesis and processing of materials and of the interrelationships between structure, properties, and processing. Students learn how to create advanced materials and systems required, e.g., for flexible electronic displays and photonics that will change communications technologies, for site specific drug delivery, for self-healing materials, for enabling the transition to a hydrogen-based economy, and for more efficient photovoltaics and nuclear systems for energy production. The curriculum uses concepts from both basic physics and chemistry and provides a detailed knowledge of what makes the materials we use every day behave as they do.

Students in the first two years take courses in general areas of science and engineering as well as courses introducing the concepts in MatSE. In the third year, students study the common, central issues related to MatSE. Seniors focus on application areas of MatSE (e.g., biomaterials, ceramics, metals, polymers, and electronic materials), which provide them with the detailed knowledge to be immediately useful to corporations or to provide an introduction to graduate study.

A combined B.S.-M.S. Materials Science and Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 130).

Areas of Concentration

The MatSE program provides five standard areas of concentration as well as the option to design a custom concentration of interest to the student. Students are encouraged to take technical electives outside of the department in related disciplines of interest to them and of relevance to their career goals. The five standard areas of concentration are:

- **Biomaterials:** A relatively new focus area teaching the science and engineering of materials for use in biological applications, particularly in the human body. This concentration is based on basic and intermediate chemistry along with basic and intermediate biology concepts, with relatively less use of physics topics. This focus area includes a subset of the standard junior year courses and requires additional chemistry and biology in the junior year.
- **Ceramics:** Studies the science and engineering of ceramic materials, including alloy design, composites, synthesis, and processing methods. This concentration makes significant use of concepts from both basic physics and basic chemistry.
- **Electronic Materials:** Describes the design and engineering of materials primarily for the microelectronics industries. Topics span the ceramics, metals, and polymers areas. Concepts from basic and intermediate physics are used along with basic chemistry.
- **Metals:** Introduces the design and processing of metals and alloys to achieve desired properties. This concentration primarily uses concepts from basic and intermediate physics with relatively less emphasis on chemical concepts.
- **Polymers:** Teaches the methods for molecular design to achieve desired properties in polymer molecules and polymer blends as well as processing methods. This concentration primarily uses concepts from basic and intermediate chemistry with relatively less emphasis on physics concepts.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ENG 100	Engineering Orientation ¹	0
MSE 183	Freshman Materials Laboratory ^{1,2}	1
Total Hours		0

¹ External transfer students take ENG 300 instead.

² This optional course is highly recommended and may be used to help meet free elective requirements.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
MATH 221	Calculus I ¹	4
MATH 225	Introductory Matrix Theory	2
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 285	Intro Differential Equations	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 214	Univ Physics: Quantum Physics	2
Total Hours		34

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Materials Science and Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of materials science and engineering.

For All Concentrations

CS 101	Intro Computing: Engrg & Sci	3
ECE 205	Elec & Electronic Circuits	3
IE 300	Analysis of Data ¹	3
or STAT 400	Statistics and Probability I	
MSE 182	Introduction to MatSE	2
MSE 201	Phases and Phase Relations	3
MSE 206	Mechanics for MatSE	4
MSE 307	Materials Laboratory I	3
MSE 308	Materials Laboratory II	3
MSE 395	Materials Design	2
MSE 401	Thermodynamics of Materials	4
MSE 402	Kinetic Processes in Materials	3
MSE 406	Thermal-Mech Behavior of Matls	3
Total Hours		36

¹ The replacement of IE 300 with STAT 400 is not allowed for students in the Biomaterials Concentration unless one of their area or technical electives is deemed by ABET to be an engineering course. The extra hour of credit for this course may be used to help meet free elective requirements.

For the Concentration in Biomaterials

CHEM 232	Elementary Organic Chemistry I	3 OR 4
MCB 150	Molec & Cellular Basis of Life	4
MCB 450	Introductory Biochemistry	3
MCB 252	Cells, Tissues & Development	3
Subtotal		13
Total for the Concentration in Biomaterials		49

For the Concentrations in Ceramics, Electronic Materials, Metals, and Polymers

MSE 304	Electronic Properties of Matls	3
MSE 405	Microstructure Determination	3
Subtotal		6
Total for the Concentrations in Ceramics, Electronic Materials, Metals, and Polymers		42

Technical Electives

These courses stress the rigorous analysis and design principles practiced in the major subdisciplines of materials science and engineering embodied in the MatSE concentrations.

For the Concentration in Biomaterials

Area specialty courses selected from the list of area specialty courses established by the department. ¹	11
Area specialty courses from a different area; both must be from the same area.	6
Total Hours	17

¹ Area specialty courses (<http://provost.illinois.edu/ProgramsOfStudy/2014/fall/programs/undergrad/engin/matse.html#area>).

For the Concentrations in Ceramics, Electronic Materials, Metals, and Polymers

Area specialty courses selected from the list of area specialty courses established by the department. ¹	15
Area specialty course from a different area.	3
Technical electives selected from the list of approved technical electives established by the department. ²	6
Total Hours	24

¹ Area specialty courses (<http://provost.illinois.edu/ProgramsOfStudy/2014/fall/programs/undergrad/engin/matse.html#area>).

² List of approved technical electives (<http://www.matse.illinois.edu/electives.html>).

Liberal Education

The liberal education courses (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education social & behavioral sciences list.	6
Electives from the campus General Education humanities & the arts list.	6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.	6
Total Hours	18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition (satisfied by completing the sequence MSE 307 + MSE 308 in the Materials Science and Engineering Technical Core)		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree.¹

6

¹ College of Engineering advising Web site (<https://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>)

Area Specialty Courses

The courses listed below have been approved by the department to satisfy the 11-15 credit hour requirements in each of the five areas of technical concentration.

Biomaterials Concentration

MSE 470	Design and Use of Biomaterials	3
MSE 472	Biomaterials Laboratory	3
Two area technical electives ¹		5

Ceramics Concentration

MSE 420	Ceramic Materials & Properties	3
MSE 421	Ceramic Processing	3
MSE 422	Electrical Ceramics	3
MSE 423	Ceramic Processing Laboratory	3
Area technical elective ¹		3

Electronic Materials Concentration

ECE 340	Semiconductor Electronics	3
MSE 460	Electronic Materials I	3
MSE 461	Electronic Materials II	3
MSE 462	Electronic Materials Lab	3
Area technical elective ¹		3

Metals Concentration

MSE 440	Mechanical Behavior of Metals	3
MSE 441	Metals Processing	3
MSE 442	Metals Laboratory	3
MSE 443	Design of Engineering Alloys	3
Area technical elective ¹		3

Polymers Concentration

MSE 450	Polymer Science & Engineering	3
MSE 452	Polymer Laboratory	3
MSE 453	Plastics Engineering	3
Two area technical electives ¹		6

¹ Selected from the departmental list of approved area technical electives (http://matse.illinois.edu/academics/undergrad/concentration.html#area_techelect) for areas of concentration.

Summary of Topics Courses for Standard Areas of Concentration

Each area of concentration requires at least one course covering each of the topics processing, design, and characterization (senior lab). For the five standard areas of concentration in the MatSE curriculum outlined above, the relevant courses are categorized in the following table.

Area of Concentration	Processing	Design	Characterization (Senior Lab)
Biomaterials	MSE 470*	MSE 470*	MSE 472
Ceramics	MSE 421	MSE 422	MSE 423
Electronic Materials	MSE 460	MSE 461	MSE 462
Metals	MSE 441	MSE 443	MSE 442
Polymers	MSE 453*	MSE 453*	MSE 452

* same course counts as both topics

Customized Concentration

Students wishing to pursue an area of concentration other than the ones described above should consult with the chief advisor of the MatSE department. A Customized Concentration (e.g., composites, bio-based materials, materials for renewable energy or sustainability, etc) must include a total of 24 credit hours: 15 hours of appropriate "area specialty courses"; 3 hours from a different specialty area; and 6 hours of electives selected from the list of approved technical electives (<http://matse.illinois.edu/academics/undergrad/technical.html>) established by the department. In the 15 hours of "area specialty courses" there must be a course identified for each of the topic categories in the table immediately above. The other courses may be suitable electives pertaining to the area of study. Customized Concentrations require the approval of the department and will be identified only as Customized Concentration on the transcript.

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. The first two years of the Suggested Sequence is the same for all MatSE students. The third and fourth years vary with the Area of Concentration chosen. Refer to the appropriate third and fourth year sequence.

- ¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
- ² RHET 105 may be taken in the first or second semester as authorized. The alternative is a social sciences or humanities elective.
- ³ Liberal education electives (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/ comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
- ⁴ This course is highly recommended for freshmen, who may use it to help meet free elective requirements.
- ⁵ Satisfies the General Education Advanced Composition requirement.
- ⁶ The replacement of IE 300 with STAT 400 is not allowed for students in the Biomaterials Concentration unless one of their area or technical electives is deemed by ABET to be an engineering course. The extra hour of credit for this course may be used to help meet free elective requirements.
- ⁷ To be selected from list of area specialty course (<http://matse.illinois.edu/academics/undergrad/concentration.html>) established by the department to provide an acceptable level of study in the student's chosen area of concentration.
- ⁸ During fourth year, strongly recommended is incorporation of one or more of an internship, co-op position, and a research project during summers or an academic semester, or both. For students who intend to continue in graduate school, recommended additionally is the undertaking of a research project (Senior Thesis) in the senior year. The project may take the place of 4-6 hours of free, technical, or area specialty electives.
- ⁹ Selected from the departmental list of approved technical electives (<http://matse.illinois.edu/academics/undergrad/technical.html>).

For the Degree of Bachelor of Science in Engineering Mechanics

Engineering mechanics is the discipline devoted to the solution of mechanics problems through integrated application of mathematical, scientific, and engineering principles. Special emphasis is placed on the physical principles underlying modern engineering design.

The program derives its strength from rigorous treatments of statics, dynamics, solid mechanics, fluid mechanics, and mechanics of materials. These topics form the basis of all the mechanical sciences and have wide applicability in modern engineering. Students in engineering mechanics also develop a strong background in mathematics, physics, and chemistry, while specializing in one of several secondary fields within mechanics, such as experimental mechanics.

Special emphasis is placed on advanced dynamics, continuum mechanics, and the rapidly emerging field of computational mechanics. Laboratory experiments in fluid mechanics and mechanics of materials complement an integrated design sequence, starting in the freshman year, which culminates in a team-based design project in one of the professional engineering disciplines, such as aerospace, civil, or mechanical engineering. Students also have the opportunity for independent, creative work in a one-on-one or small group environment under the supervision of a faculty member.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's undergraduate advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Technical+GPA+Requirements>).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ENG 100	Engineering Orientation ¹	0
TAM 195	Mechanics in the Modern World	1
Total Hours		1

¹ External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
MATH 221	Calculus I ¹	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 415	Applied Linear Algebra	3 OR 4
MATH 441	Differential Equations	3
MATH 442	Intro Partial Diff Equations	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2

PHYS 214	Univ Physics: Quantum Physics	2
Total Hours		40

- ¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Engineering Mechanics Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of engineering mechanics.

CS 101	Intro Computing: Engrg & Sci	3
ECE 205	Elec & Electronic Circuits	3
GE 101	Engineering Graphics & Design	3
ME 300	Thermodynamics	3
TAM 211	Statics	3
TAM 212	Introductory Dynamics	3
TAM 251	Introductory Solid Mechanics	3
TAM 252	Solid Mechanics Design	1
TAM 302	Engineering Design Principles	3
TAM 324	Behavior of Materials	4
TAM 335	Introductory Fluid Mechanics	4
TAM 412	Intermediate Dynamics	4
TAM 445	Continuum Mechanics	4
TAM 470	Computational Mechanics	3
Total Hours		44

Secondary Field Option Electives

This component of the curriculum enables the student to specialize further by electing a secondary field, a coherent group of technical courses in mechanics and closely related subjects. The current secondary fields are:

- Biomechanics
- Computational Mechanics
- Engineering Science and Applied Mathematics
- Experimental Mechanics
- Fluid Mechanics
- Mechanics of Materials
- Solid Mechanics

Each secondary field generally specifies two required courses and two additional courses from a list of approved elective courses. For each of the secondary fields, the required and approved elective courses specified for them are indicated on the Engineering Mechanics secondary field Web page (<http://mechanical.illinois.edu/undergraduate/engineering-mechanics/em-secondary-fields>). To add flexibility to the program and to accommodate particular interests, the student may petition to substitute appropriate courses, including 500-level courses if the student has the adequate preparation, for any of the secondary field elective courses. Without petition, a student may select any one course listed as required in one of the secondary field options to satisfy elective course credits in a chosen secondary field.

Secondary field electives selected from departmentally approved courses for Secondary Field Options.

12

Senior Design Elective

The engineering capstone design course allows the student to apply the knowledge and skills they have learned to a team-oriented design project.

Capstone design course selected from a departmentally approved list of engineering capstone design courses and approved by the departmental design sequence coordinator.

3

Total Hours

3

Liberal Education

The liberal education courses (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education social & behavioral sciences list.	6
Electives from the campus General Education humanities & the arts list.	6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.	6
Total Hours	18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition (satisfied by completing TAM 324 in the Engineering Mechanics Technical Core)		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. 6

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

Bachelor of Science in Mechanical Engineering

mechse.illinois.edu

Undergraduate Program Office: 154 Mechanical Engineering Building
 Fax: (217) 244-6534
 E-mail: mechse-ug-advise@illinois.edu (mechse-undergrad@illinois.edu)

For the Degree of Bachelor of Science in Mechanical Engineering

Mechanical engineering may be the most diverse of the engineering fields, embracing many subfields and affecting all aspects of our lives. Mechanical engineers work on new machines, products, and processes that hold the promise of better lives for all of us. They are concerned with both technological and economic aspects in the design, development, and use of their products. Today, one of the challenges is to design efficient, low-cost machines and processes that use the fewest possible natural resources to improve the lives of people throughout the world.

The technical portion of the mechanical engineering curriculum is designed as a sequence of increasingly specialized experiences. The entering student's first year is spent mastering the basics of science: math, chemistry, and physics. Building on this base, in the second year students begin to take fundamental engineering courses such as statics, dynamics, basic circuits and electronics, thermodynamics, and strength of materials. By the third year, students are taking specialized mechanical engineering courses in the subfields of fluid mechanics, heat transfer, dynamic systems and controls, materials, mechanical design, and manufacturing. Finally, during the senior year, students have the opportunity to both broaden and deepen their knowledge of the field through technical elective courses. At the end of the curriculum, students take the capstone senior design course in which the knowledge and skills they have learned are applied to projects submitted to the department by industrial firms or by faculty members. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout the curriculum from the first year to the last year.

A combined B.S.-M.S. Mechanical Engineering degree program is available. Its admission and course requirements are described in the College of Engineering program information section (p. 130).

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

Technical grade point average requirements for graduation and advanced-level course registration apply to students in this curriculum. These rules are summarized at the College of Engineering's undergraduate advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Technical+GPA+Requirements>).

Nuclear, Plasma, and Radiological Engineering

James F. Stubbins

216 Talbot Laboratory, 104 South Wright, Urbana, (217) 333-2295, (217) 333-2906

npres.illinois.edu

Curriculum in Nuclear, Plasma, and Radiological Engineering (<http://npres.illinois.edu>)

E-mail: nuclear@illinois.edu

For the Degree of Bachelor of Science in Nuclear, Plasma, and Radiological Engineering

Nuclear, plasma, and radiological engineering is a branch of engineering that is concerned with the development and use of nuclear energy and radiation sources for a wide variety of applications in energy production, in materials processing and science, and for biomedical and industrial uses. Areas of interest include the continued safe and reliable application of fission reactors as central electric power plant thermal sources; plasma processing applications and the longer term development of fusion reactors for electric power generation; and the use of radiation sources in such areas as materials, biological systems, medical treatment, radiation instrumentation, environmental systems, and activation analysis.

The first two years of the curriculum provide a strong foundation in basic sciences (physics, mathematics, and chemistry), engineering sciences (analytical mechanics and thermodynamics), an introduction to digital computer use, and introduction to nuclear energy systems. Most technical concentration takes place in the third and fourth years of the curriculum according to the educational and career interest of the students. The curriculum provides three professional concentration areas: power, safety and the environment; plasma and fusion science and engineering; and radiological, medical, and instrumentation applications. Each concentration area allows flexibility in developing advanced technical expertise but also requires depth of understanding in the area. The third path meets pre-med requirements and facilitates the minor in bioengineering. To complete this concentration area, students should take certain chemistry and biology courses in the first two years of the curriculum.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as follows.

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ENG 100	Engineering Orientation ¹	0
NPRES 100	Orientation to NPRES	1
Total Hours		1

¹ External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

TAM 212	Introductory Dynamics ²	3
Total Hours		46

¹ Students may elect to take CS 125 in place of CS 101, and TAM 211 in place of TAM 210. The extra hour will be applied toward the Professional Concentration Area electives.

² Students in the Plasma and Fusion Science Engineering Professional Concentration Area may elect to take PHYS 325 in place of TAM 212. Further, students in this concentration may elect to take both PHYS 325 and PHYS 326 in place of TAM 210 and TAM 212. The extra hour from PHYS 325 and PHYS 326 will be applied toward the Professional Concentration Area electives.

Professional Concentration Area Electives

The NPRE Professional Concentration Area requirement is fulfilled by taking certain required technical and some elective technical courses stressing the rigorous analysis and design principles practiced in one of the three professional concentration areas: Power, Safety, and the Environment; Plasma and Fusion Science Engineering; or Radiological, Medical, and Instrumentation Applications.

Professional Concentration Area electives. See the Professional Concentration Areas section below.

Total Hours		18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition. May be satisfied by completing a course in either the liberal education or free elective categories which has the Advanced Composition designation. Alternately, NPRE 481 should be considered, which may also be applied to the Professional Concentration elective hours.		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvice/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. 6

Professional Concentration Areas

Students are expected to develop a solid background in one of the various subfields within a Professional Concentration Area which are defined below.

Power, Safety, and the Environment

TAM 335	Introductory Fluid Mechanics	4
or ME 310	Fundamentals of Fluid Dynamics	
NPRE 421	Plasma and Fusion Science	3
NPRE 432	Nuclear Engrg Materials Lab	2
Technical electives broken down as follows:		16
A minimum of 6 hours of departmentally approved NPRE Electives.		
Technical electives selected from departmentally approved Power, Safety, and the Environment elective course work in one of the following subfields: Thermal Sciences; Power and Control Systems; Solid, Fluid and Continuum Mechanics; Computational Sciences and Engineering; Environmental Engineering and Science. The student's academic advisor must approve the chosen course set to insure that a strong program is achieved.		
Total Hours		25

Plasma and Fusion Science and Engineering

TAM 335	Introductory Fluid Mechanics	4
or ME 310	Fundamentals of Fluid Dynamics	
NPRE 421	Plasma and Fusion Science	3
NPRE 423	Plasma Laboratory	2
NPRE 429	Plasma Engineering	3
Technical electives selected from departmentally approved Plasma and Fusion Science and Engineering elective course work in one of the following subfields: Physical Science, Electrical Engineering, or Electronic Materials. The student's academic advisor must approve the chosen course set to insure that a strong program is achieved. ¹		13
Total Hours		25

¹ Plasma and Fusion Science and Engineering elective course work.

Radiological, Medical and Instrumentation Applications

NPRE 435	Imaging w/Ionizing Radiation	3
MCB 403	Cell & Membrane Physiology Lab	2
or NPRE 444	Nuclear Analytical Methods Lab	
Technical electives selected from departmentally approved Radiological, Medical and Instrumentation Applications elective course work in one of the following subfields: Biomolecular Engineering, Biomedical Engineering. The student's academic advisor must approve the chosen course set to insure that a strong program is achieved. ¹		20
Total Hours		25

¹ Radiological, Medical and Instrumentation Applications elective course work

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

First Year

First Semester

		Hours
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
ENG 100	Engineering Orientation	0
MATH 221 ¹	Calculus I	4
NPRE 100	Orientation to NPRE	1
RHET 105 (or Free elective) ²	Writing and Research	4-3
Liberal education elective ³		3

Semester Hours

16-15

Second Semester

CS 101 ⁴	Intro Computing: Engrg & Sci	3
MATH 231	Calculus II	3
PHYS 211	University Physics: Mechanics	4

Semester Hours		16
Second Semester		
NPRE 441	Radiation Protection	4
NPRE 458	Design in NPRE	4
Professional Concentration Area electives		6
Semester Hours		14
Total Hours:		128

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

² RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is a free elective.

³ Liberal education electives (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. ECON 102 or ECON 103 must be one of the social & behavioral sciences courses, recommended to be taken early. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

⁴ Students may elect to take CS 125 in place of CS 101, and TAM 211 in place of TAM 210. The extra hour will be applied toward the Professional Concentration Area electives.

⁵ Consideration should be given to NPRE 101 as a free elective in the spring semester of the freshman or sophomore year. Alternately, free elective hours provide a means to fulfill requirements for campus minors such as Bioengineering, Computer Science, International Minor in Engineering, Mathematics, or Physics, without excessive additional hours beyond the normal degree requirements.

- ⁶ *Students in the Plasma and Fusion Science Engineering Professional Concentration Area may elect to take PHYS 325 in place of TAM 212. Further, students in this concentration may elect to take both PHYS 325 and PHYS 326 in place of TAM 210 and TAM 212. The extra hour from PHYS 325 and PHYS 326 will be applied toward the Professional Concentration Area electives.*
- ⁷ *A student must fulfill the NPRE Professional Concentration Area requirement (<http://npre.illinois.edu/ugcurriculum.php>) by taking the required technical courses and technical elective courses in one of the three professional concentration areas: Power, Safety, and the Environment; Plasma and Fusion Science Engineering; or Radiological, Medical, and Instrumentation Applications.*
- ⁸ *Students in the Power, Safety, and the Environment and in the Plasma and Fusion Science Engineering Professional Concentration Areas must take a fluid mechanics course (TAM 335 or ME 310) and NPRE 421. Students in the Radiological, Medical, and Instrumentation Applications Professional Concentration Area must select courses in that Area instead.*

E-mail: undergrad-info@physics.illinois.edu

For the Degree of Bachelor of Science in Engineering Physics

The Engineering Physics curriculum is a flexible program that combines a firm foundation in physics and mathematics with the freedom to choose from a diverse range of technical options. The curriculum is designed to prepare students for a wide variety of technical and professional careers, including graduate study in physics or a closely allied field.

Overview of Curricular Requirements

The curriculum requires 128 hours for graduation and is organized as shown below.

A technical grade point average requirement for graduation applies to students in this curriculum. This rule is summarized at the College of Engineering's undergraduate advising Web site (<http://wiki.engr.illinois.edu/display/ugadvise/Technical+GPA+Requirements>).

Orientation and Professional Development

These courses introduce the opportunities and resources your college, department, and curriculum can offer you as you work to achieve your career goals. They also provide the skills to work effectively and successfully in the engineering profession.

ENG 100	Engineering Orientation ¹	0
PHYS 110	Physics Careers ¹	0
Total Hours		0

¹ External transfer students take ENG 300 instead.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
MATH 221	Calculus I ¹	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 285	Intro Differential Equations ²	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
PHYS 214	Univ Physics: Quantum Physics	2
Total Hours		30

¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

² MATH 285 may be replaced by MATH 441 followed by MATH 442.

Engineering Physics Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of engineering physics.

CS 101	Intro Computing: Engrg & Sci	3
PHYS 225	Relativity & Math Applications	2
PHYS 325	Classical Mechanics I	3
PHYS 435	Electromagnetic Fields I	3
PHYS 486	Quantum Physics I ^{1,2}	4
or PHYS 485	Atomic Phys & Quantum Theory	
Total Hours		15

¹ If PHYS 486 is chosen, take prerequisite MATH 415, which may be used to meet free elective requirements.

² If PHYS 485 is taken, an additional free elective hour or a surplus flexible physics core course hour offsets the one-hour credit differential.

Flexible Physics Core Electives

These courses complement the Engineering Physics Technical Core, extending the intellectual understanding of engineering physics.

Flexible physics core electives. Choose three courses from a departmentally approved list with at least one being a lab course, PHYS 401, PHYS 403, PHYS 404, or PHYS 406. The number of hours varies depending upon the courses chosen. ¹ 9-15

¹ Departmentally Approved List

Mathematics Elective

Mathematics elective, chosen from a departmentally approved list of Mathematics Electives. ¹ 3

¹ Approved list of Mathematics Electives

Technical/Professional Option Electives

Students may select from a list of preapproved options or design a custom option, subject to departmental approval. The current preapproved options, requiring 12-22 credit hours of course work, are:

- Professional Physics
- Astrophysics
- Bioengineering
- Biophysics
- Computational Physics
- Materials Science
- Optical Physics
- Physical Electronics

The course work is selected in consultation with the student's advisor to address an intellectually coherent body of knowledge.

Technical/professional option electives for the option selected, chosen from a departmentally approved list of Technical/Professional Option Electives (or a list designed for a departmentally approved custom option). The number of hours varies depending upon the option chosen. ¹ 12-27

¹ List of Technical/Professional Option Electives

Liberal Education

The liberal education courses (<http://wiki.engr.illinois.edu/display/ugadvise/Liberal+Education+Electives>) develop students' understanding of human culture and society, build skills of inquiry and critical thinking, and lay a foundation for civic engagement and lifelong learning.

Electives from the campus General Education social & behavioral sciences list.	6
Electives from the campus General Education humanities & the arts list.	6
Electives either from a list approved by the college, or from the campus General Education lists for social & behavioral sciences or humanities & the arts.	6
Total Hours	18

Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that

simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition. May be satisfied by completing a course with the Advanced Composition designation in either the social sciences and humanities or the free elective categories.		
Total Hours		4

Free Electives

These unrestricted electives, subject to certain exceptions as noted at the College of Engineering advising Web site (<http://wiki.engr.illinois.edu/display/ugadvice/Free+Electives>), give the student the opportunity to explore any intellectual area of unique interest. This freedom plays a critical role in helping students to define research specialties or to complete minors.

Free electives. Additional unrestricted course work, subject to certain exceptions as noted at the College of Engineering advising Web site, so that there are at least 128 credit hours earned toward the degree. The number of hours varies depending upon the total hours earned in both the Flexible Physics Core and the Technical/Professional Option and whether or not MATH 415 and PHYS 486 are taken in place of PHYS 485. 13-37

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken.

First Year

First Semester		Hours
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
ENG 100	Engineering Orientation	0
MATH 221 ^{1,2}	Calculus I	4

Technical/professional option electives ⁶		6
Semester Hours		15-16
Fourth Year		
First Semester		
Technical/professional option electives or Free electives ^{6,11}		10
Flexible physics core electives or Free electives ^{7,8}		6
Semester Hours		16
Second Semester		
Free electives		11-10
Technical/professional option electives or Free electives ^{6,11}		5
Semester Hours		16-15
Total Hours:		128

- ¹ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
- ² Students with proficiency or advanced placement (AP or IB) credit in MATH 221 are strongly encouraged to enroll in MATH 231 and PHYS 211 for the first semester.
- ³ RHET 105 may be taken in the first or second semester of the first year as authorized. The alternative is a social sciences or humanities elective.
- ⁴ Liberal education electives (<http://wiki.engr.illinois.edu/display/ugadvice/Liberal+Education+Electives>) must include 6 hours of social & behavioral sciences and 6 hours of humanities & the arts course work from the campus General Education lists. The remaining 6 hours may be selected from a list maintained by the college, or additional course work from the campus General Education lists for social & behavioral sciences or humanities & the arts. Students must also complete the campus cultural studies requirement by completing (i) one western/comparative culture(s) course and (ii) one non-western/U.S. minority culture(s) course from the General Education cultural studies lists. Most students select liberal education courses that simultaneously satisfy these cultural studies requirements. Courses from the western and non-western lists that fall into free electives or other categories may also be used satisfy the cultural studies requirements.
- ⁵ MATH 285 may be replaced by MATH 441 followed by MATH 442.
- ⁶ To be chosen from a departmentally approved list of Technical/Professional Option Electives (http://physics.illinois.edu/current/undergrad/ep_options.asp), in consultation with the student's advisor, for the option elected (or a list fashioned for a departmentally approved custom option). The number of credit hours varies 12-22 depending upon the option chosen.

- 7 *The flexible physics core requirement consists of three courses chosen from a departmentally approved list of Flexible Physics Core Electives with at least one of them being a lab course, PHYS 401, PHYS 403, PHYS 404, or PHYS 406. The number of credit hours varies 9-15 depending upon the courses chosen.*
- 8 *For courses chosen with more than 3 hours credit, the surplus hours may be used to meet free elective requirements.*
- 9 *To be chosen from a departmentally approved list of Mathematics Electives (<http://physics.illinois.edu/undergrad/math-options.asp>). Any course satisfying the Mathematics Elective cannot be used to satisfy any other requirement.*
- 10 *If PHYS 485 is taken, an additional free elective hour or a surplus flexible physics core course hour offsets the one-hour credit differential.*
- 11 *Taken if needed to complete a technical/professional option requiring more than 12 hours of credit.*

Minor in Bioengineering

<http://bioengineering.illinois.edu>

Bioengineering is a broad, interdisciplinary field that brings together engineering, biology, and medicine to create new techniques, devices, and understanding of living systems to improve the quality of human life. Its practice ranges from the fundamental study of the behavior of biological materials at the molecular level to the design of medical devices to help the disabled.

Any of the existing engineering programs can provide a good foundation for work in bioengineering. However, the engineering undergraduate needs additional education in the biologically oriented sciences to obtain a strong background for bioengineering. With such a background, the student should be able to progress rapidly on the graduate level in any branch of bioengineering. In industry, the graduate will be competent to handle engineering tasks related to biology.

Students may fulfill the requirements for a minor in bioengineering by completing the following course sequence. Engineering students who are proficient in biology may waive MCB 150 as a prerequisite for courses in this minor.

BIOE 120	Introduction to Bioengineering	1
BIOE 414	Biomedical Instrumentation	3
or CHBE 472	Techniques in Biomolecular Eng	
CHEM 232	Elementary Organic Chemistry I	3 OR
		4
MCB 244	Human Anatomy & Physiology I	3
MCB 246	Human Anatomy & Physiology II	3
or MCB 250	Molecular Genetics	
MCB 252	Cells, Tissues & Development	3
MCB 253	Exp Techniqs in Cellular Biol	2
Bioengineering Related Technical Elective ¹		3
Total Hours		21

¹ Courses to be selected from a list of departmentally approved list of 300- and 400-level Bioengineering Related Technical Electives (<http://bioengineering.illinois.edu/undergraduate-programs/undergraduate-minor/bioengineering-minor-engineering-students/#related%20courses>).

For more information regarding the Bioengineering minor, visit the Bioengineering minor Web site (<http://bioengineering.illinois.edu/undergraduate-programs/undergraduate-minor/bioengineering-minor-engineering-students>), contact the Bioengineering Department Office (1270 Digital Computer Laboratory, 217-333-1867, bioen@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Minor in Computer Science

This minor is offered by the Department of Computer Science for students seeking significant knowledge of digital computers without the more complete treatment of a major in computer science. This minor may be taken by any student except Computer Science and Computer Engineering majors.

The foundation upper-level courses in computer programming and software and in theory of computation are required. Three elective 200- and 300-level courses provide some specialization and depth and breadth of study. Specific requirements are listed below. Note that some courses have other prerequisites.

CS 125	Intro to Computer Science ¹	4
CS 173	Discrete Structures ¹	3
CS 225	Data Structures	4
Three courses, including at least one at the 400 level, chosen from a departmentally approved list. ²		9
Total Hours		20

¹ The following substitutions are routinely allowed: ECE 120 for CS 125; MATH 213 for CS 173.

² Departmentally approved list (<https://wiki.engr.illinois.edu/display/undergradProg/Degree+Requirements/#DegreeRequirements-csminor>).

Important note for LAS students: In LAS, at least two courses (6 hours) of any minor must meet the LAS advanced hours requirement. All 400-level CS courses meet this requirement, and CS 233 and CS 357 also satisfy it.

For more information regarding the CS minor, visit the CS minor Web site (<http://cs.illinois.edu/current-students/undergraduates/undergraduate-curriculum-requirements/#Minor>), contact the Computer Science Academic Office (1210 Siebel Center, 217-333-4427, undergrad@cs.illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Minor in Electrical and Computer Engineering

Electrical and computer engineering transforms our day-to-day lives through a multitude of innovative technologies and products. The ECE minor is intended to expose students from other disciplines to the unlimited opportunities for innovation in this exciting field, and to the methodologies and tools used by electrical and computer engineers for the exploration and design of new technologies and products. The minor is open to undergraduates outside the ECE Department. Computer Science majors cannot elect the Computer Engineering Option within the minor.

Circuits Requirement:

Select one of the following:	4
ECE 110	Introduction to Electronics
ECE 205 & ECE 206	Elec & Electronic Circuits and Elec & Electronic Circuits Lab

Programming Requirement:

Select one of the following (with no particular preference):	3-4
CS 101	Intro Computing: Engrg & Sci
CS 125	Intro to Computer Science
ECE 120	Introduction to Computing

A probability or statistics course chosen from an approved list. ¹ 3-4

Select one of the following options: 10-11

A. Electrical Engineering Option (10-11) ²	
Core requirement:	
ECE 210	Analog Signal Processing
Advanced Core Electives:	
Two ECE courses chosen from an approved list. ¹	
B. Computing Engineering Option (9-11) ²	
Core Requirement:	
ECE 220	Computer Systems & Programming
Advanced Core Electives:	
Two ECE courses chosen from an approved list. ¹	
Elective ECE Courses to achieve a minimum of 18 hours of ECE course work. ^{4,5}	0-5
Total Hours	27-36

¹ An approved list (<http://www.ece.illinois.edu/students/ugrad/ece-minor.html>).

² To complete the minor, both the Core and Advanced Core courses from Option "A" or "B," must be completed.

³ ECE 220 should be taken unless CS 231 credit already exists.

⁴ Completion of the minor requires a minimum of 18 hours ECE course work. No additional hours are needed in this category if all courses taken to satisfy the previous requirements are ECE courses.

⁵ Elective ECE courses (<http://www.ece.illinois.edu/students/ugrad/ece-minor.html>).

For more information regarding the Electrical and Computer Engineering minor, visit the Electrical and Computer Engineering minor Web site (<http://www.ece.illinois.edu/students/ugrad/ece-minor.html>), contact the Electrical and Computer Engineering Undergraduate Programs Office (156 Everitt Laboratory, 217-333-0716, ece-advisor@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

International Minor in Engineering

Many College of Engineering graduates will be involved in international activities during their professional careers. In anticipation of such involvement, the college offers an opportunity for students to complete an international minor as part of any engineering degree program. All international minor requirements must be satisfied before graduation. The requirements are:

- completion of all degree requirements in the student's selected engineering discipline;
- completion of foreign language studies in a language of the student's choice of geographical area (proficiency level will vary with the geographical area selected);
- completion of a minimum of 21 hours of cultural and language studies related to the geographical area of concentration; 9 hours must be other than language credit and include at least one 300- or 400-level course. These courses can be used as campus and college general education requirements. Courses taken on campus for the minor must be taken for grade;
- completion of a minimum six-week approved residence in the chosen country or geographic area, whether it be for work or study.

The student will be expected to select a specific geographical area for concentration, which will be identified in the designation of the minor; for example International Minor-Latin American studies. Course work selected for the minor must be approved by the International Programs in Engineering Office; a list of suggested courses is available.

International Programs in Engineering sponsors academic year, semester, and summer programs that include language and cultural courses and satisfy the residency requirement. With sufficient foreign language background before entering engineering, a student will normally be able to complete the degree and minor in four years. Those not having this background, or taking a year of study at a foreign institution, may take four and one-half to five years to complete their degrees.

For more information regarding the International Minor, visit the International Minor Web site (<http://www.engr.uiuc.edu/international/minor/minor.htm>), contact the Engineering Study Abroad Office (210 Engineering Hall, (217)-244-0054, ipeng@illinois.edu) or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Minor in Materials Science and Engineering

Materials are the basis for all engineering and also are the basis for much of the research in various areas of science. The Minor in Materials Science and Engineering is designed to give students in other areas of engineering and science both a broad view of all materials as well as several courses in a particular area of materials, knowledge that will be of value whether the student pursues a career in industry, government, or academia.

The courses, listed below, have been selected to give an undergraduate student both a strong background in all types of materials as well as more detailed knowledge of a particular area of materials (e.g., ceramics, metals, polymers, electronic materials or biomaterials)

The following six courses are required:

Core Course Work

MSE 280	Engineering Materials	3
MSE 401	Thermodynamics of Materials ¹	4
One additional course chosen from an approved list. ²		3
Introductory Area course chosen from an approved list. ³		3
Senior lab source chosen from an approved list. ³		3
Advanced Area course chosen from one of several approved lists. ³		3
Total Hours		19

¹ Other thermodynamics courses may be substituted upon petition.

² Approved List (http://www.matse.illinois.edu/academics/matse_minor.html#core).

³ Approved List (http://www.matse.illinois.edu/academics/matse_minor.html#intro).

For more information regarding the Materials Science and Engineering minor, visit the Materials Science and Engineering minor Web site (http://matse.illinois.edu/academics/matse_minor.html), contact the MatSE Department Office (201 MSEB, 217-333-1441, matse@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Physics Minor

Physics and technology go hand in hand, with physics providing the foundation for a broad range of technical fields. This minor is intended to encourage you to expand your understanding of physics beyond the introductory level, to deepen your understanding of fundamental principles, and to enhance your ability to keep abreast of an ever-changing technological world. Depending on your choice of 300- and 400-level physics courses, a total of 21-25 hours is required.

PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4

PHYS 213	Univ Physics: Thermal Physics	2
or PHYS 214	Univ Physics: Quantum Physics	
PHYS 225	Relativity & Math Applications	2
PHYS 325	Classical Mechanics I	3
Any two PHYS courses at the 300 or 400 level except PHYS 419 and PHYS 420		6-10
Total Hours		21-25

For more information regarding the Physics minor, visit the Physics minor Web site, (<http://physics.illinois.edu/undergrad/minor.asp>) contact the Physics Undergraduate Programs Office (233 Loomis Laboratory of Physics, 217-333-4361, undergrad@physics.illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Polymer Science and Engineering Minor

Polymer science and engineering is a broad, interdisciplinary field that brings together various aspects of chemistry, physics, and engineering for the understanding, development, and application of the materials science of polymers. Many of the existing engineering programs provide a good foundation for work in polymer science and engineering. However, the undergraduate student needs additional courses specifically dealing with the science and engineering of large molecules. With such a background, the student should be able to progress rapidly in industry or at the graduate level. In addition to those students specifically desiring a career in polymers, this minor also can be valuable to students interested in the development, design, and application of materials in general.

The courses listed below have been selected specifically to give an undergraduate student a strong background in polymer science and engineering. A minimum of eight courses is required, including 3 Core courses, one course each in thermodynamics, mechanical properties, and chemistry and two additional polymer-related courses, as listed below. Several of these the student would normally take to satisfy the requirements of the basic degree. The student should consult the Department of Materials Science and Engineering when formulating a plan of course work.

The following courses are required. Credit hours will exceed 25 if a Thermodynamics course-pair option is chosen.

Core Course Work

MSE 450	Polymer Science & Engineering	3-4
or CHBE 456	Polymer Science & Engineering	
MSE 452	Polymer Laboratory	3
MSE 453	Plastics Engineering	3
Thermodynamics: one course (or a course pair) chosen from an approved list ¹		3-8
TAM 251	Introductory Solid Mechanics (Mechanical Properties)	3
CHEM 236	Fundamental Organic Chem I (Chemistry)	4
Polymer-Related Course Work: two courses chosen from an approved list. ²		6
Total Hours		25-30

¹ *Thermodynamics approved list*

² *Polymer approved list*

For more information regarding the Polymer Science and Engineering minor, visit the Materials Science and Engineering minor Web site (<http://matse.illinois.edu/academics/minor.html>), contact the MatSE Department Office (201 MSEB, (217)-333-1441, matse@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Minor in Technology and Management

Successful management of technology-driven businesses today requires that employees work effectively in interdisciplinary teams. Team-based project management requires that each member of the team contribute not only in his or her own area of expertise but in other aspects of the project as well. The better equipped a new employee is to reach this level of competency quickly, the more valuable will be his or her contributions. Moreover, an employee having such competency will be better prepared to assume positions of increased responsibility and challenge.

The Hoeft Technology & Management Program offers a minor in Technology & Management to undergraduate students in the College of Business and the College of Engineering. Students in the Colleges of ACES and LAS may also be eligible based on their major. The minor is designed to prepare students for success in a wide variety of careers. Today more than ever employers have high expectations of undergraduate hires; the T&M Program provides a comprehensive experience to ready graduates for early career success.

Students in the minor are able to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross-discipline education. The course of study leading to a minor in technology and management is comprised of the following:

Required Courses Taken by Engineering Students Only (in order taken)

BADM 365	New Product Marketing	3
ACCY 200	Fundamentals of Accounting	3
FIN 221	Corporate Finance	3

Required Courses Taken by Business Students Only (in order taken)

MSE 101	Materials in Today's World	3
ECE 317	ECE Technology & Management	3
TAM 201	Mechanics for Technol & Mgmt	3

Required Courses Taken by Engineering and Business Students Together (in order taken)

TMGT 367	Mgmt of Innov and Technology	3
TMGT 366	Product Design and Development	3
TMGT 460	Business Process Modeling	3
TMGT 461	Tech, Eng, & Mgt Final Project	2

Throughout the minor, emphasis is placed on an interdisciplinary team approach to the development of comprehensive solutions to real-world problems. In many cases, the problems are provided by industry sponsors who, along with business and engineering faculty advisors, provide assistance and guidance to student teams.

The T&M Program is sponsored by leading companies in a variety of industries; these companies provide strategic guidance, access to senior executives, real world business problems, and internship and employment opportunities. The current T&M Corporate Affiliates include Abbott, BP, Boeing, Bosch, John Deere, Motorola, and Wal-Mart.

In addition to formal courses the T&M Program offers a comprehensive set of extracurricular activities to develop skills and provide valuable experiences to students. These include a leadership development program, career development workshops, business skills workshops (for example etiquette dinner, dress for success, and golf etiquette), and an international business trip.

The Hoeft Technology & Management Program aims to prepare graduates for successful careers in a variety of functions and industries. T&M students have pursued careers in a wide range of industries and fields.

Students who wish to pursue this minor must apply for admission to The Hoeft Technology & Management Program in the spring semester of their sophomore year. Enrollment in the minor is limited and admission is competitive. Applications are reviewed by the program staff and offers of admission are based on the student's academic record, extracurricular involvement, demonstrated leadership, and career goals.

For more information regarding the Technology & Management minor, visit the Technology & Management minor Web site (<http://www.techmgmt.uiuc.edu>), contact the Technology & Management Program Office (1055 Business Instructional Facility, (217)-244-5752, techmgmt@illinois.edu), or visit the Office of the Associate Dean for Undergraduate Programs, 206 Engineering Hall.

Fine and Applied Arts, College of

Edward Feser, Dean

Office of the Dean

110 Architecture Building

608 East Lorado Taft Drive

Champaign, IL 61820, (217) 333-1661

www.faa.illinois.edu

The College of Fine and Applied Arts prepares men and women for professional work in architecture, art and design, dance, landscape architecture, music, theatre, and urban and regional planning. Freshmen and transfer students may apply for admission. In each curriculum specific basic courses, professional courses, and general education requirements must be completed in order to qualify for the specific baccalaureate degree offered.

Graduate degrees are offered in all areas of study through the Graduate College.

The College of Fine and Applied Arts offers introductory courses designed to increase aesthetic appreciation and development, and to portray the role of the arts in civilization for all students who are attending the University of Illinois at Urbana-Champaign. Participation in the many bands, choruses, and orchestras on campus, as well as private instruction on most instruments and in voice, is available to students in all colleges by audition.

To serve the total academic community and all citizens in the state of Illinois, the college features the arts in exhibitions, concerts, lectures, performances, demonstrations, and conferences. Many outstanding professionals and works in these fields are brought to the University campus. All departments in the College of Fine and Applied Arts reserve the right to retain, exhibit, and reproduce the works submitted by students for credit in any course.

In addition to the teaching divisions, the College of Fine and Applied Arts includes the Krannert Center for the Performing Arts, the Krannert Art Museum and Kinkead Pavilion, Japan House, the Smart Energy Design Assistance Center, and the Visual Resources Center.

Special Facilities

Career Services Office

The Career Services Office (<http://careers.faa.uiuc.edu>) in the College of Fine and Applied Arts recognizes the unique career needs of students in the visual and performing arts. The office provides presentations and individual appointments to help students explore all of their options. The office also serves as a resource for concerned parents.

Krannert Art Museum and Kinkead Pavilion

Krannert Art Museum (<http://www.kam.uiuc.edu>) is an accredited general art museum with eight permanent galleries, four temporary exhibition galleries, and an open virtual-reality lab. Its outstanding permanent collection places it among the top tier of university art museums in the nation. But the space is used as more than an art museum by students at the University of Illinois. Here they can gather to hear improvised music played by international artists, watch films, and participate in an open mic hip-hop cafe. Come and experience a space that allows for simultaneous interplay between more than one artistic form.

Krannert Center for the Performing Arts

The Krannert Center for the Performing Arts (<http://www.krannertcenter.illinois.edu>) is a remarkable four-theatre performing arts complex with spaces for instruction, rehearsal, and performance in theatre, opera, dance, and music. The Foellinger Great Hall, seating 2,200, is designed for large-scale musical events. The Tryon Festival Theatre, with 1,000 seats, is for opera, dance, and other musical stage productions. The Colwell Playhouse seats 700 and is the home of the Department of Theatre. The Studio Theatre, seating 150, is for experimental productions. An outdoor amphitheater, rehearsal rooms, offices, dressing rooms, technical shops, and underground parking on two levels for 650 cars complete this monumental facility.

Japan House

The study of Japanese culture began at the University of Illinois in 1900, with the arrival of the first Japanese student. Throughout the last century, the University's role as a leader in Japanese studies began to take form. A major theme of Japan House (<http://japanhouse.art.uiuc.edu>) is peace. The focus of Japan House is its three tea rooms. The grounds also feature a Japanese tea garden, strolling garden, and Zen-style rock garden.

SEDAC – Smart Energy Design Assistance Center

The Smart Energy Design Assistance Center (<http://smartenergy.illinois.edu/about-us.html>) provides advice and analyses enabling private and public facilities in the State of Illinois to increase their economic viability through the efficient use of energy resources.

University Music Performance Organizations

The School of Music offers credit for all students enrolled in its many performance organizations. These organizations include ensembles in the nationally recognized Band Division: a Wind Symphony, two Symphonic Bands, three Concert Bands, Basketball Band, Brass Band, Clarinet Choir, and the world-famous Marching Illini. The Choral Division offers singers the opportunity to perform in the Oratorio Society, Black Chorus, Women's Chorus, University Chorus, Men's and Women's Glee Clubs, Concert Choir, and UI Chorale. The University Symphony and Illini Symphony, three jazz bands, gamelans and other ethnomusicology performance ensembles, and ensembles specializing in contemporary music, chamber music, and early music, among others, satisfy student interest both as performers and concertgoers.

A student in any college wishing to enroll in a performance organization should contact the Office of Academic Affairs, Room 3076 Music Building (phone: 217-244-2670) or the appropriate ensemble director to receive further information and arrange for an audition.

Visual Resources Center

The Visual Resources Center (<http://vrc.faa.illinois.edu>) facilitates access to images and other visual formats, provides instruction on using a variety of educational software, works with users on image related research projects, and provides consultation related to digitization best practices. The digital collection is available via ARTstor. 35mm and lantern slide collections are available during business hours.

Libraries

Students in the college have at their disposal outstanding library resources. In addition to the University Library, one of this country's great university collections, there are specialized libraries serving the needs of specific fields. The Ricker Library of Architecture and Art contains more than 49,000 books (with almost 50,000 additional publications in the same fields located in the main University Library), 33,000 photographs, and 9,400 clippings.

The City Planning and Landscape Architecture Library houses about 20,000 volumes of current interest, while more than 110,000 additional related volumes in the Funk Library.

The Music and Performing Arts Library, located in the Music Building, contains more than 765,000 items. These include introductory, instructive, research, and reference materials including books, editions of music, recordings, manuscripts, microfilm, and other materials.

library.illinois.edu

Departments, Schools, and Curricula

The College of Fine and Applied Arts consists of the Departments of Dance, Landscape Architecture, Theatre, and Urban and Regional Planning; the Schools of Architecture, Art and Design, and Music. The specific functions of each department or school and the undergraduate curricula are described on the following pages. Consult the Undergraduate Handbook available on the college website for specific academic policies and procedures for students and faculty in the college.

Special Programs

Study Abroad

International study can be a life transforming experience. The college provides the opportunity for students to obtain campus credit for foreign study and/or travel for a summer session, one semester, or an academic year. Students in FAA have a range of opportunities for study abroad. They can pick from programs developed specifically for students in their major (e.g., senior year abroad in Barcelona for Architecture students) or from the many programs available through the Study Abroad Office (<http://www.studyabroad.illinois.edu>) which serves the entire university population.

Prior to departure students are required to submit a study plan for review by their advisor and the college. Students with approved study plans retain their status as UI students and may continue their student health insurance while abroad. Participation in an approved UI program also counts as time in residence at the University.

The Study Abroad Office also provides information on financial aid specifically for study away from campus. The office is located in the International Studies Building, 910 S. Fifth St., Champaign, IL.

Graduation Honors

The College honors superior students honors at graduation. To be eligible, students must have completed a minimum of four semesters of work and 65 hours of credit in residence at the Urbana-Champaign campus. More information on specifics may be found on the College website.

Dean's List

Each semester students are recognized by the College for academic excellence through the Dean's List. Eligible students must successfully complete at least 14 academic hours, taken for a letter grade (A through F), and earn a grade-point average that places them in the top 20 percent (approximately) of the College. Students with grades that are excused or deferred are not considered for the Dean's List until letter grades have been submitted for those courses. The GPA level necessary to be placed on the Dean's List is revised annually and is posted on the College Web site.

James Scholar Honors Program

The James Scholars Program in the College of Fine and Applied Arts focuses on developing Socially Engaged Artists by offering a series of required courses that provide progressive experiences in community engagement. James Scholars have opportunities to develop research projects within the local communities, to apply for funding to support their research, and to participate in symposia presenting their research to the campus and the general public. Detailed information on admission and requirements are available on the College website.

Requirements

Admission

All incoming students hoping to enroll in the College of Fine and Applied Arts as undergraduates must first complete the application for admission available from the university's Office of Undergraduate Admissions. Several programs within the college (majors in Art, Dance, Music and Theatre) require a portfolio, audition and/or interview as part of the admissions process. All application materials must be received before an admission decision can be made.

Graduation

Students who meet the general University requirements with reference to registration, residence, scholarship, fees, and general education requirements, and who maintain the minimum grade-point average required in their degree program, receive degrees appropriate to the curriculum completed. Refer to the specific unit and curricular requirements listed in the following sections. In addition, students must complete the required senior courses in their major field of study in residence at the Urbana-Champaign campus.

General Education

The Campus Senate, the faculty General Education Board, and the colleges have developed campus wide common general education requirements. Students are advised that some general education requirements may be fulfilled by courses required in the major. All FAA curricula require students to meet the minimum campus general education requirements for graduation. Some programs require additional general education courses. See the individual programs of study for each curriculum.

Architecture, School of

Peter Mortensen, PhD

117 Temple Buell Hall, 611 Taft Drive, Champaign, (217) 333-1330, (G) (217) 244-4384 (U) (217) 333-7720

www.arch.illinois.edu

The mission of the School is to pursue architecture as a humanistic and professional discipline, which synthesizes art and science through intellectual rigor, aesthetic judgment, and technical understanding. The School achieves its mission through teaching, scholarship, creative work, research, and service, and commits itself to the highest ideals of the profession and culture of architecture.

The School's mission is based upon the conviction that architecture is first, reflective of the diverse, changing goals, values, and resources of society; and second, that architects have various and vital roles in interpreting and determining the status, values, conditions, and direction of society, its culture and quality of life.

Architectural education at Illinois is based upon the premise that to be an architect in today's complex and fast-changing, global society the architect must have knowledge in a variety of areas beyond the profession. Recognizing the diversity of roles that are now emerging in the profession, graduates should also have a well-developed focus in which they can initiate their career.

Degree Programs in Architecture

Contact: Lee W. Waldrep, Ph.D., Administrator for Undergraduate Student Services

School Office: 117 Architecture Building, Champaign, 333-7720, lwaldrep@illinois.edu

The School of Architecture offers a four-year preprofessional curriculum leading to the Bachelor of Science in Architectural Studies (BSAS) degree as well as a minor in Architectural Studies. The BS in Architectural Studies degree provides an undergraduate academic education in architecture that can serve as a foundation for advanced professional education. The undergraduate curriculum offers an appropriate balance of basic professional studies in architectural design, architectural history, practice and technology, structures, and studies in the arts and sciences.

The following statement is from the National Architectural Accrediting Board (NAAB):

"In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The University of Illinois at Urbana-Champaign, College of Fine and Applied Arts, School of Architecture offers the following NAAB-accredited degree programs:

Master of Architecture (Pre-professional undergraduate degrees + 62 graduate credits)

Master of Architecture (Undergraduate degree + 65 prerequisite credit hours + 54 graduate credits)

Next accreditation visit for all programs: 2015

The NAAB Conditions for Accreditation (including Student Performance Criteria) may be found on the NAAB Web site (<http://www.naab.org>).

Since 1967, the School of Architecture operates a full academic-year study abroad program in Barcelona, Spain, which is open to qualified students on a priority basis. Course offerings parallel those available to students on the Urbana-Champaign campus but stress the European context.

The School of Architecture occupies design studios, lecture rooms, and offices in the Architecture Building, Architecture Annex, and Temple Hoyne Buell Hall. The Ricker Library of Architecture and Art is located in the Architecture Building.

For the Degree of Bachelor of Science in Architectural Studies

In this curriculum, normal progress is imperative. A student failing to complete any required course more than one semester later than the time designated in the curriculum is prohibited from progressive registration in architectural courses until the deficiency is corrected. To continue at the sophomore level and beyond, a student must have a cumulative grade point average of 2.00 (A = 4.0) for all University course work attempted. For the Bachelor of Science in Architectural Studies degree, a total of 127 semester hours are required.

Total Hours:	127
1	See current University of Illinois General Education requirements. The General Education quantitative reasoning requirement I is satisfied by the required MATH 220 or MATH 221 course; the quantitative reasoning II requirement is satisfied by the MATH 231 or PHYS 101 course. Students considering a concentration in Building Structures or Structural Engineering should take MATH 231. The Advanced Composition requirement may be fulfilled by either a separate, approved Advanced Composition course or by an Advanced Composition course which also satisfies one of the general education distribution list requirements. If by the latter, electives would be taken to make up the credit deficiency. General Education foreign language requirement 0-12 hours: Students entering the University of Illinois as freshmen in fall 2000 or later need to complete the foreign language requirement in order to graduate. To satisfy this requirement, students must complete a third semester level college foreign language course. This requirement may also be satisfied by three years of the same foreign language in high school. Students entering the University of Illinois without three years of the same foreign language in high school must take a foreign language placement test to determine the courses in which to enroll.
2	The Composition I requirement may be fulfilled by any of the following courses or course sequences (placement is determined by examination): ESL 111 and ESL 112; RHET 100, RHET 101, and RHET 102; RHET 103 and RHET 104; RHET 105; or CMN 111 and CMN 112.
3	For information about electives, see the Undergraduate Handbook at the FAA website (http://www.faa.uiuc.edu). A maximum of nine hours may be taken as professional electives.
4	Architectural history: All students in the undergraduate program in architecture must fulfill the architectural history requirement: three courses in addition to ARCH 210. Select from: ARCH 222, ARCH 402, ARCH 403, ARCH 407, ARCH 409, Section B (Barcelona only), ARCH 410, ARCH 411, ARCH 412, ARCH 413, ARCH 414, ARCH 415, ARCH 416, ARCH 417, or ARCH 418.
5	The UP 101 requirement can be fulfilled by substituting one of the following approved courses: ARCH 418; GEOG 204, GEOG 210, and GEOG 483.

Minor in Architectural Studies

The minor in Architectural Studies allows non-architecture undergraduate students to gain an overview of architecture by taking a series of required courses in architecture. This is the only undergraduate minor offered by the School of Architecture.

Course Requirements

The architecture minor requires the successful completion of a minimum of 20 hours of architecture courses. Students entering the program with advanced credit for required courses must take courses from the Additional Courses list to attain the total hours needed for completion of the minor. All students in the minor must have at least 6 hours of 300- or 400-level courses.

Required Courses

ARCH 101	Introduction to Architecture	3
ARCH 271	Graphics for Architects	4
ARCH 210	Intro to the Hist of Arch	3
ARCH 231	Anatomy of Buildings	4

Additional Courses

Select one of the following:		3
ARCH 341	Environment Tech HVAC	
ARCH 342	Environment Tech Ltg & Acoust	
ARCH 351	Statics & Dynamics	
ARCH 352	Mech of Mat & Design Appl	
Select one of the following:		3
ARCH 222	Islamic Gardens & Architecture	
ARCH 402	Intro to Hist of Arch Theory	
ARCH 403	Spec Topics in Arch History	
ARCH 407	Rome: The Eternal City	
ARCH 410	Ancient Egyptian & Greek Arch	
ARCH 411	Ancient Roman Architecture	
ARCH 412	Medieval Architecture	
ARCH 413	Renaissance Architecture	
ARCH 414	Baroque & Rococo Arch	

ARCH 415	Neoclass & Nineteen Cent Arch
ARCH 416	Modern American Architecture
ARCH 417	Twentieth-Century Architecture
ARCH 418	Hist of the Urban Environment

Total Hours

20

Prerequisites

Students must comply with the prerequisite requirements of courses to be taken under this program. Some of these requirements may be satisfied while in the program.

Admission

Admission to the minor will be processed by the School of Architecture Office for Undergraduate Academic Affairs. Students may enter the Minor in Architectural Studies from freshman year until such time that allows the completion of the minor before graduating in their major area of study.

Advising

Advising of students in the minor will be conducted by the advising staff in the School of Architecture.

Certification of Successful Completion

The Associate Dean for Undergraduate Academic Affairs in the College of Fine and Applied Arts (FAA) will certify successful completion of the minor.

Students must declare their intentions and be admitted to the program to pursue the Minor in Architectural Studies.

Art and Design, School of

The School of Art and Design offers bachelor of fine arts degrees in art education, crafts, graphic design, new media, the history of art, industrial design, painting, photography, and sculpture. The first year or "foundation" year is a defined sequence of courses appropriate to all curricula. Specialization begins in the second year.

Courses in the history and appreciation of art and certain courses in studio work are open to students from other colleges of the University. A field of concentration in art history is also offered in the College of Liberal Arts and Sciences. The school occupies studios, computing labs, workshops, classrooms, and offices in several different University buildings.

A portfolio review is required both for admission to the foundation year and for placement in any art and design course beyond the foundation level. After completing the foundation year, students must apply for admission to one of the bachelor of fine arts (BFA) degree curricula.

- Art and Design - Foundation Year (p. 242)
- Art Crafts (p. 239)
- Art Education (p. 241)
- Art History (p. 243)
- Graphic Design (p. 244)
- Industrial Design (p. 245)
- New Media (p. 246)
- Painting (p. 247)
- Photography (p. 248)
- Sculpture (p. 249)
- Minor in Art + Design (p. 251)
- Minor in Community Based Art Education (p. 251)

Art Crafts

Nan Goggin

143 Art and Design Building, 408 East Peabody, Champaign, (217) 333-0855

www.art.illinois.edu

For the Degree of Bachelor of Fine Arts in Crafts

The curriculum in Crafts includes two areas of concentration: Ceramics and Metals. The BFA program focuses on the development of individual artistic and design capabilities, critical perceptions, and the mastery of comprehensive technical skills. The program emphasizes strengths in conceptual and material specialization. The curriculum supports professional training for the self-sustaining visual artist and provides the skills necessary for students to pursue an advanced degree in the arts. The curriculum in Crafts requires 122 credit hours.

Students in the School of Art and Design must complete the Campus General Education requirements. Some Art and Design courses will also apply toward the General Education requirements.

Art History

Select two of the following (all meet a general education requirement; credit will not be given for both ARTH 112 and ARTH 115):

ARTH 111	Ancient to Medieval Art	8
ARTH 112	Renaissance to Modern Art	
ARTH 113	Introduction to African Art	
ARTH 114	Introduction to East Asian Art	
ARTH 115	Art in a Global Context	

Advanced art history (200-level or above) 6

Total Hours 14

Art Foundation

ARTF 101	Contemporary Issues in Art	2
ARTF 102	Drawing I	6

For the Degree Bachelor of Fine Arts in Art Education

The curriculum in art education requires 130 credit hours and prepares students for positions as teachers of art in the public and private schools, grades kindergarten through twelve. The program places emphasis on theory, methods, materials, processes, and practice teaching in Illinois schools. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (<http://www.cote.illinois.edu/programs>).

Illinois law and Council on Teacher Education policy require that all candidates for a teacher education program pass the Illinois Certification Testing System test of Basic Skills prior to admission. In order to be recommended for certification, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area course GPA of 3.0, and professional education course GPA of 3.0 (A=4.0). Candidates should consult their art education advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Foundation Year for All Art and Design Curricula

The School of Art and Design offers bachelor of fine arts degrees in art education, crafts, graphic design, new media, the history of art, industrial design, painting, photography, and sculpture. The first year or "foundation" year is a defined sequence of courses appropriate to all curricula. Specialization begins in the second year.

Courses in the history and appreciation of art and certain courses in studio work are open to students from other colleges of the University. A field of concentration in art history is also offered in the College of Liberal Arts and Sciences. The school occupies studios, computing labs, workshops, classrooms, and offices in several different University buildings.

A portfolio review is required both for admission to the foundation year and for placement in any art and design course beyond the foundation level. After completing the foundation year, students must apply for admission to one of the bachelor of fine arts (BFA) degree curricula.

<http://www.art.illinois.edu>

For the Degree Bachelor of Fine Arts in Graphic Design

The curriculum in graphic design requires 122 credit hours and prepares the student for entrance into the professional practice of design visual communications. Studio work encompasses visual organization, typography, image making, sequential design, production techniques, and the process of communication planning. The first year of study provides a foundational base in understanding design through the study of design history, typography, semiotics, visual principles, and image making and meaning. The second year furthers these studies through experimentation and development of methodological approaches to design. The final year engages students in practical applications of design through client-based projects that explore information design, visual systems, publishing, and web and interactive design.

For the Degree of Bachelor of Fine Arts in New Media

The curriculum in New Media requires 122 credit hours. Students are trained in the production and critique of works for art or design that explore forms and technologies identified as new or emerging. Students receive instruction in technical execution, formal composition, historical precedents and theoretical framing. Advanced course work produces both assigned and self-directed projects that utilize time-based, interactive, physically networked and performative media, and address emerging practices in art and design.

Painting

Nan Goggin

143 Art and Design Building, 408 East Peabody, Champaign, (217) 333-0855

www.art.uiuc.edu (<http://www.art.uiuc.edu>)

For the Degree of Bachelor of Fine Arts in Painting

The curriculum in painting requires 122 credit hours and provides extensive training in preparation for professional practice as an artist.

The first year is devoted primarily to the study of design, composition, and the acquisition of both representational and abstract drawing skills. The second year concentrates on introducing the student to beginning painting skills and techniques with further studies in drawing and composition. The last two years are devoted to the development of individual creative expression in painting and other media.

When followed by a program leading to a degree of Master of Fine Arts in Painting, this curriculum is recommended as preparation for a career as an artist and as a teacher of painting and drawing and related subjects at the college level.

Minor in Art and Design

Nan Goggin

143 Art and Design Building, 408 East Peabody, Champaign, (217) 333-0855

www.art.illinois.edu

The Art and Design Minor provides students with the opportunity to integrate creative art and design practices with other academic or research pursuits. Students selecting the Art and Design Minor do not necessarily wish to pursue a career as a practicing artist or designer, but do want the chance to work creatively in the visual arts and design, and develop related skills. Students can choose to focus on one particular art form (e.g., photography) or a variety of different media (e.g., photography, typography, and ceramics).

Applicants for admission to the Minor in Art+Design should submit a personal essay explaining their interest in art and design to the Minor Advisor. A minimum cumulative GPA of 2.00 is required.

Course Requirements

Students must meet the following course requirements for a total of 18 hours.

Distribution of Courses

A minimum of 2 courses from the academic course menu below ¹

A minimum of 3 courses from the studio course menu

At least 1 additional course in either an academic or studio course

A minimum of six hours must be completed at the 300 or 400 level

Approved Academic Courses

Select 6-9 hours from the following:

6-9

ART 100 Understanding Visual Culture

Any ARTH 100-, 200-, 300-, or 400-Level Course

ARTE 260 Museums in Action

ARTE 480 Popular Visual Culture

ARTE 401 Teaching Seminar

Approved Studio Courses

See the Art and Design Minor Advisor for a list of approved studio courses.

9-12

Total Hours

18

¹ At least one of these courses must be chosen from the following: ARTH 111, ARTH 112, ARTH 113, ARTH 114, ARTH 115, or ART 100.

Minor in Community-Based Art Education

Nan Goggin

143 Art and Design Building, 408 East Peabody, Champaign, (217) 333-0855

www.art.uiuc.edu (<http://www.art.uiuc.edu>)

The Community-Based Art Education Minor is designed for students who seek to study the role of the visual arts in a variety of locations including cultural centers, museums, hospitals, nursing homes, adult day care centers, schools, recreation centers, and other community settings. In addition to the completion of the required art education foundation courses, students choose electives in art education, art history, design, and art studio. Throughout their course of study, students will engage Art Education as it meets the challenges of the 21st century, including emerging technologies, new social formations, and new forms of cultural expression.

This minor does not lead to Illinois State Board of Education K-12 certification to teach art.

Course Requirements

Students must meet the following course requirements for a total of 18 hours.

A minimum of six hours must be completed at the 300 or 400 level.

Dance, Department of

Jan Erkert

9071/2 W. Nevada Street

Urbana, IL 61801, (217) 333-1010

<http://www.dance.illinois.edu>

dance@illinois.edu

The Department of Dance, a unit in the College of Fine and Applied Arts, offers a small, personalized program within the context of a large university setting. The resident faculty of eleven full-time members is augmented by part-time faculty and artists-in-residence. The teaching staff includes ten graduate teaching assistants who teach dance in the general education program. Major enrollment numbers approximately 70 BFA candidates and 12 MFA candidates. The department is an accredited institutional member of the National Association of Schools of Dance.

Program focus at the graduate and undergraduate levels is on the professional preparation of performers, choreographers, and teachers with a breadth of understanding in the discipline. Two degree programs are offered: bachelor of fine arts and master of fine arts. The choreographic and performance emphasis is in contemporary dance; ballet is included as an integral component of training. Classes in yoga, jazz, tap, and world dance forms are offered in the major curriculum. The field of dance science is addressed through courses in Bartenieff movement fundamentals, Laban movement analysis, dance kinesiology, and the Alexander Technique. Additional courses are taught in dance for the camera, dance technology, and other topics of current import.

The performance component of the department is housed in the Krannert Center for the Performing Arts, utilizing the exceptional performing, production, and teaching resources of this world-class facility. Additional studio and classroom facilities and the faculty and administrative offices are housed in two adjacent buildings in close proximity to the Krannert Center. Four department concerts per year are produced in the theatres of the Krannert Center, including two concerts of student choreography. The resident lecture-demonstration company performs in community schools, and additional performing opportunities are provided in concerts presented in the dance studio/theatre, in operas and music performances, in University and community musicals, and in regional and national college dance festivals.

Bachelor of Fine Arts in Dance

Curriculum in Dance

For the Degree of Bachelor of Fine Arts in Dance

The BFA curriculum in dance is an intensive program of study for the dedicated student, offering coursework in the areas of technique, composition, and performance. The curriculum also includes requirements in production, improvisation, music theory and literature for dance, teaching, history, movement sciences, and repertory. Electives may be taken in additional ballet and modern classes, tap, jazz, improvisation, contact improvisation, global dance forms, yoga, Alexander Technique, partnering and Laban movement analysis, Labanotation, screendance, choreographer-composer workshop, dance technology, and independent study.

Program requirements include core daily technique classes consisting of three modern and two ballet classes per week each semester in residence, plus elective technique classes for a minimum of one additional credit hour per semester. A minimum of two courses in additional dance forms (jazz, tap, world dance, etc.) is required. Majors must achieve the advanced technical level in modern and the intermediate level in ballet for a minimum of two semesters prior to graduation. The improvisation/composition sequence consists of a minimum of 11 hours of studio courses culminating in the performance of a senior choreographic project. A minimum of 6 hours of credit is required in performance/repertory courses. The curriculum includes as much as 20 hours of credit in professional electives, which may be taken in professional dance courses and/or related arts and sciences.

Evaluation of majors is an ongoing process. Continued enrollment in the program is contingent upon satisfactory performance. A student is expected to maintain a minimum 2.75 grade point average in all professional course work and a 3.0 cumulative average in studio classes in order to remain in good standing in the department.

It is possible for transfer students to complete degree requirements in a three-year period contingent upon prior completion of general education requirements and the fulfillment of the advanced technique requirement for two semesters prior to graduation.

A total of 130 hours is required for this degree.

Students in the Department of Dance must complete the Campus General Education (http://go.illinois.edu/CourseExplorer_GenEd) requirements. Some courses required for the Dance degree will also apply toward the General Education requirements.

Technique (minimum number of hours):

The Department of Landscape Architecture offers a four-plus-year undergraduate curriculum, leading to the professional degree of Bachelor of Landscape Architecture as well as a minor in Landscape Studies. The degree is accredited by the Landscape Architecture Accreditation Board (LAAB).

The curriculum is a balanced program of technical, design, and general education courses that prepare the student with the necessary skills for entry-level professional practice in private offices or public agencies. Program requirements include design studio courses and classes in construction, plants, history, and design communication. Following the third year, students complete a professional internship to further advance their knowledge of built landscapes and the practice of landscape architecture. The curriculum also includes a minimum of 12 hours of credit in supporting electives that are taken in related art and science courses. A total of 124 semester hours of credit are required for graduation.

Bachelor of Landscape Architecture

A student must have and maintain a minimum 2.00 cumulative grade point average and a 2.50 technical GPA based on grades in the following courses:

LA 233	Foundation Design Studio	5
LA 234	Site Design Studio	5
LA 241	Landform Design & Construction	3
LA 250	Environmental Site Analysis	3
LA 280	Design Communications I	3
LA 281	Design Communications II	3
LA 314	History of World Landscapes	3

Transfer applicants must have completed 30 or more semester hours of undergraduate course work with an earned GPA of at least 2.5 (A = 4.0) including prerequisite credits in composition, physical geography, plant biology, and pre-calculus.

The department's administrative office, upper-level studios, faculty offices, and classrooms are located in Temple Hoyne Buell Hall. The sophomore studio is located in Mumford Hall.

¹ IB 102, IB 103, or IB 105 and GEOG 103/GEOL 100, GEOL 101, GEOL 103 fulfill the natural sciences and technology general education requirement for this curriculum.

- ² *General Education: See current University of Illinois General Education requirements. Foreign Language Requirement 0 - 12 hours: Students entering the University of Illinois as freshmen in fall 2000 or later need to complete the foreign language requirement in order to graduate. To satisfy this requirement, students must complete a third semester level college foreign language course. This requirement may also be satisfied by three years of the same foreign language in high school. Students entering the University of Illinois without three years of the same foreign language in high school must take a foreign language placement test to determine the courses in which to enroll.*
- ³ *Social/Cultural factors elective course options are LA 212, LA 215, LA 218, LA 220, LA 222, LA 242, LA 270, and LA 470.*
- ⁴ *A minimum of 12 credit hours of professionally related courses selected from the department's recommended list of supporting electives is required, with a minimum of three credit hours in each of the categories of history, communications, techniques, and environment.*

Landscape Studies Minor

The Minor in Landscape Studies enables students to gain considerable knowledge of the ecological, social, cultural and historical factors that have shaped landscapes of the western and non-western world. Students interested in integrative studies of the natural, cultural and built environment, and those concerned with landscape as context for art and design, will develop a comprehensive theoretical framework for work in their major field of study.

Course Requirements

A minimum of 17 credit hours from the following three categories is required for completion of the minor. A minimum of 6 hours at the 300-level is required.

Studies of the Professions Engaged in Landscape Inquiry

LA 101	Introduction to Landscape Arch	2
--------	--------------------------------	---

Studies of the Professions Engaged in Landscape Inquiry

Select a minimum of 6 hours from the following: 6

LA 212	Water and Society
LA 250	Environmental Site Analysis
LA 270	Behavioral Factors in Design
LA 370	Environmental Sustainability

Study of Historical and Cultural Landscapes

Select a minimum of 9 hours from the following: 9

LA 215	
LA 218	S Asian Cultural Landscapes
LA 220	Exploring African Cities
LA 222	Islamic Gardens & Architecture
LA 242	Nature and American Culture
LA 314	History of World Landscapes
LA 315	History of Modern Landscape Arch
LA 390	Independent Study
LA 427	Amer Vernacular Cultural Land
LA 470	Social/Cultural Design Issues

Students are permitted to substitute one course from category 3 for one of the courses in category 2 upon the approval of the Undergraduate Studies Coordinator in the Department of Landscape Architecture.

Admission

Students with a minimum GPA of 2.5 and completion of the campus Composition I requirement are eligible for admission. Students must declare their intentions and be admitted to the program by the Undergraduate Studies Coordinator in the Department of Landscape Architecture.

Prerequisites

Students must comply with any prerequisite requirements of courses to be taken under this program.

Advising

Advising of students in the minor will be conducted by the Undergraduate Studies Coordinator in the Department of Landscape Architecture.

Certification of Successful Completion

Completion of the Minor in Landscape Studies will be certified by the student's home college office.

Music, School of

Professor Jeffrey Magee

3053 Music Building, 1114 West Nevada, Urbana, (217) 244-2676

<http://www.music.illinois.edu/>

3030 Music Building

1114 West Nevada Street

Urbana, IL 61801

(217) 333-2620

The School of Music occupies the Music Building, Smith Memorial Hall, Harding Band Building, Music Annex, and space in both the Krannert Center for the Performing Arts and the Levis Center (Robert E. Brown Center for World Music). These facilities include faculty studios, classrooms, and practice and rehearsal rooms; experimental electronic music, computer music, digital piano, two computer-assisted music instruction laboratories, and jazz multimedia practice rooms; and musical instruments, audio equipment, and several auditoriums used for concert, recital, opera, and musical theatre performances. The Music Library is the home of one of the largest collections of music items in America.

The faculty and students of the school present more than 1,000 concerts, recitals, and stage performances throughout the year, both on and off campus. In addition, visiting artists and scholars from throughout the world present master classes and lectures that complement the concert and academic offerings provided on the Urbana-Champaign campus. The School of Music has been an accredited member of the National Association of Schools of Music since 1933.

The School offers two professional undergraduate degrees: the Bachelor of Music and the Bachelor of Music Education. Undergraduate students whose musical interests are in the broad historical, cultural, and theoretical aspects of music (rather than professional training) may want to investigate the Bachelor of Arts degree, also offered by the School of Music. Graduate degrees are offered in a variety of fields of study in music at the master's and doctoral levels.

Bands, choral ensembles, orchestras, jazz bands, new music ensembles, world music ensembles, opera theatre, and many other musical organizations are open by audition to music and non-music majors and members of the university and civic communities. Private lessons and courses in music history, theory, and music appreciation are open to all qualified students in the University. A minor in music for non-music majors is also available.

All applicants for admission to the School of Music must apply and be admitted to the University of Illinois, must audition successfully on their major performance instrument or in voice, and must take the Music Fundamentals Proficiency Exam. On-campus auditions are preferred, but taped auditions are acceptable under certain circumstances. In addition, applicants for music composition-theory and history of music majors must submit original scores or other pertinent writings to substantiate their ability to pursue work in these areas. Applicants in music education, composition-theory and music history must also complete an interview with faculty in those respective areas.

For complete information concerning audition schedules, special admission requirements, and curricula (including a minor in music), prospective students should visit the School's web site (<http://www.music.uiuc.edu>) or contact the Assistant Director for Enrollment Management and Student Services, School of Music, 1114 West Nevada Street, Urbana IL 61801, (217) 244-7899.

- Vocal Performance (p. 270)
- Jazz Performance (p. 264)
- Open Studies (p. 269)

Curricula

For the Degree of Bachelor of Music

This degree requires 130 semester hours of credit for graduation.

Public performance is an integral part of the training in applied music, and all students, when sufficiently prepared, are required to participate in student recitals.

All students pursuing this degree are required to successfully complete at least one course in conducting (normally MUS 242) and must demonstrate keyboard competency by examination at the outset of their matriculation, or by enrolling in MUS 172 and/or MUS 173; keyboard performance majors must demonstrate competency by successfully completing MUS 454.

Foreign language study may be required according to the major chosen, experience in or study of languages prior to matriculation, and/or the results of language placement tests at the University.

For a semester-by-semester sequential listing of classes a student might take during a four-year course of study, please go to the Handbook for Undergraduate Music Majors (<http://music.illinois.edu/resources/undergraduate-resources>) section of the School of Music Website.

Students majoring in music should meet with their adviser at least once per semester and consult the Undergraduate Music Major Handbook, available on the School of Music website (<http://www.music.illinois.edu>), for clarification and explanations concerning the Bachelor of Music majors.

Common Requirements for all Bachelor of Music Degrees

Students in the School of Music must complete the Campus General Education requirements. Some Music courses apply toward the General Education requirements.

Music Theory Core

MUS 101	Music Theory and Practice I	2
MUS 102	Music Theory and Practice II	2
MUS 201 & MUS 202	Music Theory and Practice III and Music Theory and Practice IV	4
MUS 107	Aural Skills I	2
MUS 108	Aural Skills II	2
MUS 207 & MUS 208	Aural Skills III and Aural Skills IV	3
Advanced music theory		6

Music History and Literature Core

MUS 110	Introd Art Mus: Intl Perspect	2
MUS 313 & MUS 314	The History of Music I and The History of Music II ¹	6
Advanced Music History		6

Required Music Courses

Ensembles ²		8
MUS 242	Elements of Conducting	2
MUS 172 & MUS 173	Grp Instr Pno for Mus Major I and Grp Instr Pno for Mus Maj II	4
Total Hours		49

¹ Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement).

² All students are required to enroll in at least one approved performance ensemble each semester in residence, with a maximum of 16 semester hours of such ensemble applicable to the Bachelor of Music degree. Jazz Performance majors must enroll in MUS 266.

For All Options:

Note: This major is undergoing revisions. For the most up-to-date information, please contact the Academic Affairs Office, 3076 Music Building, (217) 244-2670.

Note: Twelve hours of 400-level courses in music must be taken on the Urbana-Champaign campus.

A Major Plan of Study Form must be completed and submitted to the Academic Affairs Office (Music Building 3076) before the end of the fifth semester (60-75 hours). Please see your BA Music advisor for assistance in completing the form.

Options

In consultation with a Bachelor of Arts advisor in the School of Music, students may structure an option that includes music courses as well as non-music courses that focus on subject matter of special interest to the student. Such options as studies in a particular era of music history, ethnomusicology, music theory, music composition, or other possibilities exist. Specialized courses supporting option choices would normally be taken in the junior and senior years. For more information, contact the Academic Affairs Office, 3076 Music Building, (217) 244-2670.

Minor in Music

The School of Music offers non-music majors an exposure to music through courses in music history/literature, music theory, and performance studies (through applied lessons and ensemble). The music minor is intended for student musicians with previously established, substantive musical experiences - individuals who wish to expand upon already obtained musical skills and related study, and is not intended to be an introduction to music.

Admission to the Music Minor

Prospective music minors must apply for acceptance into the program, and must also audition for acceptance into the appropriate performance studies area and/or ensemble(s) as per normal procedures. For more information, please see <https://my.faa.illinois.edu/gradstat/login.asp>, or contact the Music Admissions Office (musicadmissions@illinois.edu) (in Music Building Room 3022) for general instructions on how to apply for the minor and secure an audition.

Course Requirements

The music minor requires the successful completion of 21 semester hours of courses in music according to the following distribution:

1. Five to six semester hours in music history or music literature courses, to be selected from MUS 110, MUS 130-MUS 134, MUS 313, MUS 314, or courses at the 400-level for which students meet the prerequisites (see 5);
2. Six semester hours in music theory courses to be selected from MUS 103 and MUS 104, or the equivalent (MUS 101, MUS 107 and either MUS 102 or MUS 108 – please note, however, that the student may not “mix and match”);
3. Four semester hours of applied music (a minimum of two semesters of study in the same instrument or in voice) to be selected from MUS 178-MUS 198 pending successful completion of an audition;
4. The five to six remaining hours may be selected from any of the areas included in 1-3, and may include up to three hours of a conducted music ensemble (to be selected from MUS 250, MUS 252, MUS 260-MUS 266, or MUS 268-MUS 272; not more than three semester hours of ensemble may count toward the minor);
5. At least six semester hours must derive from upper division or advanced music courses - for music minors, this includes MUS 313, MUS 314, or any 400-level music course;
6. Topics offered under MUS 199 or MUS 499 must be approved for credit toward the minor in advance by the music minor advisor.

Bachelor of Arts with a Major in Music

<http://www.music.uiuc.edu>

The Bachelor of Arts with a Major in Music is designed for students whose academic interests are broader than can be accommodated within the Bachelor of Music or Bachelor of Music Education. The BA in music, which incorporates a high degree of flexibility beyond the core of required courses, can prepare the way for graduate study in music theory, composition, or the various branches of musicology. Students must select an option with the assistance of an adviser and submit a major plan of study form. Students interested in the composition option must pass a portfolio review before acceptance into MUS 106. For information on composition portfolio requirements and other admission requirements, please contact the:

Music Admissions Office
School of Music: 1114 W. Nevada Street
Urbana, IL 61801
(217) 244-7899

E-mail: musicadmissions@illinois.edu

Minimum required major and supporting course work normally equates to 48-50 hours excluding keyboard skills requirement, and includes 37-41 hours in music courses and 29-31 hours in core courses.

Students who wish to study voice or an instrument for credit, in addition to satisfying the requirement of MUS 172 and MUS 173, are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music; credits earned in applied music beyond the keyboard requirement stated above are generally considered elective.

Minimum hours required for graduation: 120 hours

Students must complete the following core courses and one option.

Music Theory Core (BA)

MUS 101	Music Theory and Practice I	2
MUS 102	Music Theory and Practice II	2
MUS 201	Music Theory and Practice III	2
MUS 202	Music Theory and Practice IV	2

MUS 107	Aural Skills I	2
MUS 108	Aural Skills II	2
MUS 207	Aural Skills III	2
MUS 208	Aural Skills IV	1
Advanced music theory		3
Music History and Literature Core (BA)		
MUS 110	Introd Art Mus: Intl Perspect	2
MUS 313 & MUS 314	The History of Music I and The History of Music II ¹	6
Advanced music history		3
Performance Studies (BA)		
MUS 172 & MUS 173	Grp Instr Pno for Mus Major I and Grp Instr Pno for Mus Maj II	4
Total Hours		33

¹ Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

For All Options:

Note: This major is undergoing revisions. For the most up-to-date information, please contact the Academic Affairs Office, 3076 Music Building, (217) 244-2670.

Note: Twelve hours of 400-level courses in music must be taken on the Urbana-Champaign campus.

A Major Plan of Study Form must be completed and submitted to the Academic Affairs Office (Music Building 3076) before the end of the fifth semester (60-75 hours). Please see your BA Music advisor for assistance in completing the form.

Options

In consultation with a Bachelor of Arts advisor in the School of Music, students may structure an option that includes music courses as well as non-music courses that focus on subject matter of special interest to the student. Such options as studies in a particular era of music history, ethnomusicology, music theory, music composition, or other possibilities exist. Specialized courses supporting option choices would normally be taken in the junior and senior years. For more information, contact the Academic Affairs Office, 3076 Music Building, (217) 244-2670.

Instrumental Performance Major

<http://www.music.uiuc.edu>

Students may major in piano, organ, harpsichord, violin, viola, violoncello, double bass, harp, flute, oboe, clarinet, saxophone, bassoon, trumpet, horn, euphonium, baritone, trombone, tuba, or percussion.

A student enrolled in this major normally takes two applied subjects, one a major (24-32 semester hours in the same applied area) and the other a minor (8 semester hours in the same applied area). Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Instrumental Performance Major within the Bachelor of Music degree.

Music Theory Core

MUS 101	Music Theory and Practice I	2
MUS 102	Music Theory and Practice II	2
MUS 201 & MUS 202	Music Theory and Practice III and Music Theory and Practice IV	4
MUS 107	Aural Skills I	2
MUS 108	Aural Skills II	2
MUS 207 & MUS 208	Aural Skills III and Aural Skills IV	3
Advanced Music Theory		6

Music History and Literature Core

MUS 110	Introd Art Mus: Intl Perspect	2
---------	-------------------------------	---

MUS 313 & MUS 314	The History of Music I and The History of Music II ¹	6
Advanced Music History		6
Required Music Courses		
Ensembles ²		8
MUS 242	Elements of Conducting	2
MUS 172 & MUS 173	Grp Instr Pno for Mus Major I and Grp Instr Pno for Mus Maj II	4
Major applied music subject ^{1,2}		32
Minor applied music subject ³		8
MUS 317	Intro to Piano Literature ⁴	3
MUS 431 & MUS 432	Piano Pedagogy I and Piano Pedagogy II ⁴	4
Electives as needed to total 130 hours		

¹ Concurrent registration in MUS 250 is required for all students who register for any of MUS 183-MUS 186 and MUS 483-MUS 486.

² String majors will register for four semester hours of applied music in the first year; thereafter, string majors will register for three semester hours of applied music and one semester hour of MUS 267 in the second, third, and fourth years. Brass majors will register for three semesters hours of applied music and one semester hour of MUS 267 each semester for all four years.

³ Piano majors are required to complete only 6 hours of minor applied music.

⁴ For piano majors only. Other majors may choose four semester hours of electives.

Jazz Performance Major

<http://www.music.uiuc.edu>

Students majoring in jazz performance may do so with piano, double bass, saxophone/clarinet, trumpet, trombone, percussion, or guitar as the major instrument. Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Bachelor of Music degree in jazz performance. All students must successfully complete one semester of Conducting, MUS 242. All students in the jazz performance major must meet the current campus general education requirements found at www.courses.illinois.edu.

MUS 435 & MUS 499	Jazz Pedagogy I and Proseminar in Music ³	4
Electives as needed to total 130 hours		

¹ Of the eight semesters of applied music, two semesters (4 hours) must be in classical applied study.

² For students with no keyboard skills, MUS 172 and MUS 173 taken in the first year, followed by Jazz Keyboard I and II in the second year will satisfy the secondary applied instrument requirement. For students whose principal instrument is piano, a secondary instrument or jazz voice may be chosen as a substitute for MUS 172, MUS 173 and Jazz Keyboard I and II, in consultation with the advisor.

³ MUS 499 MB, Jazz Pedagogy II.

Music Composition-Theory Major

<http://www.music.uiuc.edu>

In this major, emphasis may be placed on music composition or on the theory of music. Necessary course adjustments require approval of the composition-theory division.

If the emphasis is on composition, the fourth-year student must present a satisfactory senior recital of original compositions. If the emphasis is on theory, an advanced project (MUS 299, Thesis, two semesters) approved by the composition-theory division is required in the fourth year.

Music Theory Core

MUS 101	Music Theory and Practice I	2
MUS 102	Music Theory and Practice II	2
MUS 201 & MUS 202	Music Theory and Practice III and Music Theory and Practice IV	4

Music Theory ³	8
French, German, or Italian ⁴	8
Electives as needed to total 130 hours	

- ¹ Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.
- ² All students are required to enroll in at least one approved performance ensemble each semester in residence, with a maximum of 16 semester hours of such ensemble applicable to the Bachelor of Music degree. Jazz performance majors must enroll in MUS 266.
- ³ The music theory electives for the third and fourth years are to be chosen from MUS 401, MUS 403, MUS 404 (may be repeated to a maximum of six semester hours), MUS 405, MUS 407, MUS 408 (may be repeated to a maximum of six semester hours in addition to MUS 408, sections D or E), MUS 409, MUS 445, and MUS 499 (may be repeated to a maximum of four semester hours; senior standing in music required). If the curricular emphasis is in music theory, the following will apply: juniors will substitute an additional three semester hours of MUS 408 for MUS 406; seniors will take MUS 299 (two semesters), MUS 401, MUS 405, and substitute an additional 400-level music history course for MUS 406.
- ⁴ Students who completed 2 years of French, German, or Italian in high school have met this requirement. Other languages may be chosen with permission of the composition-theory adviser. Completion of this requirement does not complete the General Education language requirement.

Music Education

Professor Jeffrey Magee

3053 Music Building, 1114 West Nevada, Urbana, (217) 333-2620

<http://www.music.illinois.edu>

For the Degree of Bachelor of Music Education

A minimum of 130 hours of credit is required for graduation. This curriculum prepares its graduates for teaching music in grades kindergarten through twelve. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (<http://music.illinois.edu/resources/undergraduate-resources>). Students complete a concentration in instrumental (band or strings), choral, or elementary-general music education. For more detailed information, see the music education advising Website at <http://music.illinois.edu/resources/undergraduate-resources>.

In order to be recommended for certification, candidates are required to maintain a UIUC cumulative grade-point average of 2.5, content area (music courses) gpa of 2.75, and professional education course gpa of 3.0 (A=4.0). Candidates should consult the music education handbook, their advisor, or the Council on Teacher Education for a listing of courses used to compute these grade-point averages.

Illinois state law and Council on Teacher Education policy require that all candidates for teacher education programs pass the Illinois Certification Test System Test of Academic Proficiency (TAP), or submit a composite ACT+Writing score of 22, or a composite SAT (mathematics and critical reading) score of 1030, before admission. All music education students must earn a grade of C or better in all music courses required for certification.

All students are required to enroll in at least one approved performance ensemble each semester in residence, except the semester when they student teach, and must demonstrate keyboard competency through a proficiency exam or by enrolling in MUS 172 and/or MUS 173.

⁶ String majors take MUS 352. All other instrumental majors take MUS 344.

Musicology Major

<http://www.music.uiuc.edu>

This major offers a broad cultural education that unites academic and musical training. It also provides preparation for the graduate study required for research and teaching in musicology or ethnomusicology.

Students must complete a fourth-level college foreign language course or its equivalent for graduation. French, German, or Italian are strongly encouraged.

The fourth-year student, working with an adviser, must complete a satisfactory thesis (MUS 299) as part of the requirements for the Music History Major Bachelor of Music Degree.

Music Theory Core

MUS 299	Thesis/Adv UG Honors in Music	1

Electives as needed to total 130 hours

¹ Completion of both MUS 313 and MUS 314 meets the general education Humanities and the Arts requirement.

² All students are required to enroll in at least one approved performance ensemble each semester in residence, with a maximum of 16 semester hours of such ensemble applicable to the Bachelor of Music degree. Jazz Performance majors must enroll MUS 266.

³ Students enroll in applied music in the same instrument or in voice each semester. It is strongly recommended that students in this major acquire a thorough practical knowledge of the piano beyond basic keyboard competency as part of the applied music study.

⁴ Students must complete the equivalent of a fourth-level college foreign language course or demonstrate fourth-level proficiency for graduation. French, German, or Italian are strongly encouraged.

⁵ May not be used to satisfy general education requirements.

Open Studies

Open Studies allows students to focus on diverse fields such as music of other cultures, piano pedagogy, or other areas not included in the majors above. Open Studies requires completion of the common requirements for all BMUS degrees and a minimum of 130 semester hours of credit for graduation.

Admission to Open Studies is initiated by petition to a committee of three faculty members, the open studies adviser, and the associate dean of the College of Fine and Applied Arts. Additional information may be obtained from the:

Music Admissions Office
School of Music: 1114 W. Nevada Street
Urbana, IL 61801

Email: musicadmissions@illinois.edu (musicadmissions@illinois.edu)

Vocal Performance Major

<http://www.music.uiuc.edu>

The primary applied subject in this major includes both private lessons in voice and classes in vocal diction.

At least eight semester hours each in the Italian, French, and German languages are required for the voice major. A student who has not completed at least two years of one of these languages in high school should begin study of languages during the first year. Whenever possible, vocal majors who do not have at least two years of high school study in Italian should take Italian in their first and second semesters. Completion of this requirement does not complete the campus general education language requirement, which is twelve semester hours.

Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Vocal Performance Major within the Bachelor of Music degree.

Theatre, Department of

Jeffrey Eric Jenkins

4-122 Krannert Center for the Performing Arts, 500 South Goodwin, Urbana, (217) 333-3538

<http://www.theatre.illinois.edu>

The curricular concentrations in the Department of Theatre provide intensive and extensive preparation for the rigorous demands of a professional career in the theatre. A strong commitment to work in the theatre and a realistic understanding of its intellectual, aesthetic, and physical demands are therefore necessary in students who enter the department.

Before acceptance into theatre, applicants must participate in auditions or interviews, which take place at the Krannert Center for the Performing Arts five or more weekends each year, and at selected regional locations (normally Chicago and New York). In these auditions, applicants who plan to pursue the concentration in acting should present a three-minute audition, comprising two contrasting works from dramatic literature. Applicants wishing to pursue one of the concentrations in design, technology, and management should present a portfolio of previous theatre work. Applicants who intend to pursue the theatre studies concentration should also bring evidence of their previous theatre work and a 500-word essay addressing the aspects of the theatre studies program that interest them most and why they want to pursue those aspects. Information on these auditions and interviews will be sent to applicants once they have applied to the University and their eligibility has been determined by the Office of Admissions and Records.

Concentrations in theatre are in Acting, Costume Design and Technology, Lighting Design, Scenic Design, Scenic Technology, Sound Design and Technology, Stage Management, and Theatre Studies. Students are initially accepted as theatre majors and then formally admitted to one of these concentrations after an evaluation by the faculty during the student's first or second year. The concentrations in acting and design, technology, and management are intended for students who, in the judgement of the faculty, are ready to concentrate in these specialties in an intensive undergraduate professional training curriculum. The theatre studies concentration is intended for students who plan to pursue advanced training in directing, dramaturgy, playwriting, arts management, social issues theatre, and theatre history and criticism.

As one of the resident producing organizations at the Krannert Center for the Performing Arts, the Department of Theatre produces six or seven fully mounted productions each academic year and three each summer. The theatres and workshops of the Krannert Center serve as laboratories for theatre students, who have the opportunity to learn and to work alongside an outstanding staff of resident theatre professionals and visiting artists, preparing performances in theatre, opera, and dance. In addition, the department sponsors a small experimental theatre space for student-written and student-directed productions.

All theatre majors must successfully complete production crew assignments at the Krannert Center under THEA 100-Practicum I. Acting and theatre studies students cast in Krannert Center productions or assigned to assist in Krannert Center productions must also take THEA 400-Practicum, II. Design, technology, and management students are required to work on Krannert Center productions as assigned for THEA 400-Practicum, II, credit. Students seeking credit for practical theatre work outside the Krannert Center must secure the approval and supervision of theatre faculty in the form of an Individual Project (THEA 391 or THEA 392) or as a Professional Internship (THEA 490) or Creative Project (THEA 595).

Curricula in Theatre

For the Degree of Bachelor of Fine Arts in Theatre

A minimum of 128 hours of credit is required for the degree.

¹ First year theatre foundations courses.

Acting Program

The acting program provides intensive training in a wide variety of performing media. In the first and second years, students take introductory courses in movement, voice, and acting. In their second year of study in the department, students must audition for acceptance into the studio in acting. In addition to successful completion of all classes in their first and second years, acceptance will be based on an evaluation of each student's potential for professional-caliber performance, commitment to theatre, and the necessary discipline for intensive study. Third- and fourth-year students meet in daily four-hour sessions, each of which includes sections in dynamics, voice and speech, movement, and acting. Semester-long acting sections include advanced scene study, musical theatre, Shakespeare, and acting for the camera. Students in the professional studio in acting must audition for department productions and perform as cast.

Division of Design, Technology, and Management

Students planning careers in costume design and construction, lighting design, scenic design, scenic technology, sound design and technology, and stage management are selected for the options in this division by a process of faculty evaluation at the end of their first year of study in the department. Criteria for acceptance and continuance in these options include satisfactory completion of all course work in the first and second years, potential for

professional-caliber work, commitment to theatre, and the necessary discipline for intensive study and practice. Students in these options are assigned to teams that design, mount, and manage more than fifteen productions annually in the Krannert Center for the Performing Arts.

Theatre Studies Program

The theatre studies program focuses on the practical application of theatre scholarship and explores theatrical production as a collaborative art form that is grounded in theory, criticism, history, research, and writing.

The theatre studies concentration is intended to lay the foundation for students planning to pursue professional careers in areas of theatre for which advanced training or specialization at the graduate level is normally required. These areas include, but are not limited to: directing, dramaturgy, playwriting, arts management, social issues theatre, and theatre history and criticism.

Emphasis is given to a comprehensive study of theatre practices of the past, material participation in theatre practices of the present, and the discovery and application of theatre practices for the future.

Total Hours		52

Minor in Theatre

The Minor in Theatre offers students a comprehensive overview of the study of theatre, including both academic (history and criticism) and production (acting, design and technology) courses. The purpose is to expose undergraduate students to the field by reinforcing the integrated nature of theatre as a scholarly and aesthetic pursuit. Students are required to take a core of required courses, totaling ten hours. They then take a minimum of ten hours of electives in two general areas (History/Criticism and Production/Performance) with at least one course from each area.

THEA 100	Practicum I	1
THEA 101	Introduction to Theatre Arts	3
THEA 208	Dramatic Analysis	3
THEA 262	Literature of Modern Theatre	3
Select at least one of the following:		4
THEA 360	History of Theatre I	
THEA 361	History of Theatre II	
Select at least three courses from the list of electives with a minimum of one course from History/Criticism and one from Production/Performance. At least one course must be 300 level or higher. A listing of electives is available in the Department of Theatre office.		6
Total Hours		20

Contact the Department of Theatre for admission information.

Urban and Regional Planning, Department of

Rob Olshansky

11 Temple Hoyne Buell Hall

611 East Lorado Taft Drive

Champaign, IL 61820, (217) 333-3890

<http://www.urban.illinois.edu>

BAUP Director: Alice Novak, Assistant Head

The Department of Urban and Regional Planning offers a program leading to the degree of Bachelor of Arts in Urban Planning. The aim of urban planning is to sustain and enhance the quality of life in cities and regions. Therefore, in addition to technical skills, students also acquire a broad liberal education that leads to an understanding of the natural and social environments, their problems, and their potential for enriching human life. The urban planning degree emphasizes skills in analysis, problem solving, and communication within complex urban and social contexts. As a result, undergraduate planning education leads to diverse professional careers or graduate study in urban planning or related professions, such as law, business, public policy or public administration. Continuation in the program requires the student to maintain a 2.00 grade point average. The degree is professionally accredited by the Planning Accreditation Board.

A transfer student must have completed 30 or more semester hours of acceptable undergraduate college work (including introductory courses in microeconomics, statistics, political science, and sociology; a sequence in English composition is desirable) with an earned grade point average of at least 2.75 (A = 4.0). Transfer applicants not meeting these requirements will be considered in special cases.

The Department also offers a minor in Urban Planning. The minor provides students with the opportunity to apply disciplinary knowledge from a variety of fields (such as economics, politics, environmental science, informatics, sociology, architecture, landscape architecture) toward understanding urban phenomena and planning for orderly, efficient, functional, environmentally friendly, and aesthetically pleasing urban development. The minor introduces students to a) cities as arenas with challenges such as housing affordability, population segregation, neighborhood disinvestment and decline, environmental pollution, and traffic congestion; and b) professional planning practice, which devises actions to address such issues and improve the quality of life in urban areas. Urban issues are explored on a range of scales from the neighborhood to the mega city.

The Department's administrative and faculty offices, classrooms, and computer laboratory space are located in Temple Hoyne Buell Hall. Students may go to Room 111 for information.

The Department of Urban and Regional Planning also offers a program of graduate studies leading to the Master of Urban Planning degree, joint degree programs with the Master of Architecture, Master of Landscape Architecture and the Juris Doctor degrees, and the Doctor of Philosophy in Regional Planning.

Curriculum in Urban and Regional Planning

For the Degree of Bachelor of Arts in Urban Planning

A minimum of 120 hours is required for this degree.

First and second years

Required General Education Courses

Current University of Illinois General Education requirements include courses in humanities, composition, social sciences, cultural studies, quantitative reasoning, and foreign language. See the General Education Web site (<http://www.courses.illinois.edu/gened>) for information on courses that meet these requirements.

The following Social and Behavioral Science General Education Courses are required by Urban Planning:

ECON 102	Microeconomic Principles	3
SOC 100	Introduction to Sociology	4
PS 101	Intro to US Gov & Pol	3

Urban Planning courses which fulfill the University General Education requirements are noted in the program listing below.

UP 101	Introduction to City Planning	3
UP 203	Cities: Planning & Urban Life	3
or UP 204	Chicago: Planning & Urban Life	
UP 205	Ecology and its Applications (Natural Science, Gen Ed)	3
UP 260	Social Inequality and Planning (Social Science, Gen Ed)	3

UP 116	Analytical Planning Methods (Quantitative Reasoning I, Gen Ed)	4
General Education and Open Electives ³		35
Total Hours		61

Transfer students must fulfill first and second year requirements

Third Year

First Semester		Hours
UP 312 (Advanced Communication for Planners Composition, General Ed)		4
General Elective or Open Elective ³		3
Planning-related Electives ²		9
Semester Hours		16
Second Semester		
UP 347 Junior Planning Workshop		6
Urban Planning Elective ¹		4
General Education or Open Elective ³		3
UP 316 (Quantitative Planning Analysis Reasoning II, Gen Ed)		3
Semester Hours		16

Fourth Year

First Semester		
Urban Planning Elective ¹		4
Senior Planning Workshop ⁴		4
General Education or Open Electives ³		4
Semester Hours		12
Second Semester		
UP 311 Local Planning, Gov't and Law		4
Planning-related Electives ²		6
Urban Planning Elective ¹		4
Semester Hours		14
Total Hours:		58

¹ A total of 12 hours of urban planning electives must be taken in Department of Urban and Regional Planning courses.

² Planning-related courses totaling 15 hours must be chosen from a list of campus courses maintained by the department. Urban Planning courses over the 12 hours of departmental electives automatically count as Planning-related Electives.

³ Open electives as needed to complete the total hours required. Excess department and planning elective courses may be applied toward this requirement.

⁴ UP 447, UP 455, UP 456, and UP 478 are regularly offered workshop classes. Occasionally additional workshop classes are offered.

Minor in Urban Planning

The Urban Planning Minor requires the successful completion of 20 credit hours of coursework, including four core courses and two electives. Six hours of coursework should be advanced courses (300-level or 400-level) and distinct from credit earned for the student's major or another minor. Two of the listed core courses (UP 205 and UP 260) also satisfy general education requirements.

Core courses:

UP 101	Introduction to City Planning	3
UP 203	Cities: Planning & Urban Life (prerequisite: UP 101)	3
or UP 204	Chicago: Planning & Urban Life	

UP 205	Ecology and its Applications	3
UP 260	Social Inequality and Planning	3

Electives: (8 credit hours). Electives may be chosen from any 100-, 200-, 300-, or 400- level courses offered by DURP.

Admission criteria: 2.75 GPA, as space is available. For admission criteria and process, see www.urban.illinois.edu or contact the BAUP Director, Alice Novak, at novak2@illinois.edu.

Minor in Art History

The minor in art history is designed for students who seek to study art history in depth as a compliment to their major area of study. The minor provides students with an education in art history that is balanced and diverse culturally, temporally, and geographically. It allows students to choose from a variety of introductory courses that cover a variety of regions, cultures, and periods.

Course Requirements

Students must meet the following course requirements for a total of 20 hours¹

Select two of the following (one of which must be ARTH 113 or ARTH 114):		8
ARTH 111	Ancient to Medieval Art	
ARTH 112	Renaissance to Modern Art	
ARTH 113	Introduction to African Art	
ARTH 114	Introduction to East Asian Art	
ARTH 115	Art in a Global Context	
ARTH 395	Junior Seminar in Art History	3
ARTH courses at the 200, 300, or 400 level		3
ARTH courses at the 300 or 400 level ²		6

¹ A maximum of one course from either the History of Architecture or the History of Landscape Architecture will count toward the requirements of the Art History Minor.

² At least one of the upper-level Art History courses must be primarily concerned with a subject outside of Europe and the Modern Americas. A maximum of one course from other universities will satisfy the requirements for upper-level Art History courses.

General Studies, Division of

Campus Center for Advising and Academic Services (CCAAS)
Illini Union Bookstore Building,
Fifth Floor
807 S. Wright Street
Champaign, IL 61820
(217) 333-4710
www.dgs.illinois.edu

genstudies@illinois.edu

The Division of General Studies (DGS) assists undeclared students with the process of exploring and declaring majors at the University of Illinois by providing holistic, developmental academic advising. DGS offers students the ability to connect with academic advisors who are committed to their success.

The Division of General Studies helps students:

- Clarify their academic, personal, and career goals;
- Identify their strengths, skills, interests, and values;
- Understand the process of exploring majors at Illinois;
- Identify the programs of study available at Illinois;
- Understand specific programmatic and degree requirements;
- Understand the Intercollegiate Transfer (ICT) process at Illinois;
- Recognize the significance of and their responsibility in the academic advising relationship;
- Learn about and connect with appropriate campus resources and services;
- Learn about the educational opportunities available at the University of Illinois including undergraduate research, study abroad, tutoring, leadership development, involvement in student organizations, volunteer experiences, and connections with faculty.

DGS provides students with opportunities to participate in academic achievement programs, the James Scholar Honors program, and short-term study abroad experiences. In addition, all DGS students enroll in an introduction to the university course, most typically General Studies 101 (GS 101) to assist with their transition to college life and provide insight into the major exploration process at Illinois. Students may be enrolled in the Division of General Studies for up to four semesters before being required to declare a major in one of the undergraduate colleges at the University of Illinois.

Liberal Arts and Sciences, College of

2002 Lincoln Hall
702 South Wright Street
Urbana, IL 61801
(217) 333-1705
www.las.illinois.edu

The College of Liberal Arts and Sciences (LAS) has four missions: scholarly inquiry and the generation of knowledge, preparation of individuals for an array of careers and professions, service to the public, and the provision of the intellectual core of the University. The college shares the first three missions with professional schools and other colleges on this campus, but the last mission is uniquely the responsibility of the College of Liberal Arts and Sciences. By fulfilling this responsibility, the college helps develop broadly educated individuals who are committed to or characterized by open inquiry, critical thinking, effective communication, and responsiveness to the needs of individuals and society.

Students in the college are expected to understand the content of and to develop skills in areas that reflect the overall purpose of the college: fluency and facility in English; literacy in at least one additional language; broad exposure to a number of different disciplines; and intensive study in one discipline (or an interdisciplinary program). The student has a wide choice of courses to satisfy these requirements; however, ultimately he or she must plan a diverse and intensive program of study, prepare for an occupational, professional and intellectual future, and develop that clarity and range of mind that is the goal of educated people.

Information for current students may be found here: <http://www.las.illinois.edu/students/>

Information for newly admitted students may be found here: <http://www.las.illinois.edu/students/admission/>

Information for prospective students may be found here: <http://www.las.illinois.edu/prospective/>

African American Studies

Ronald Bailey, Department Head

1201 West Nevada, Urbana, (217) 333-7781

<http://www.afro.illinois.edu>

The Department of African American Studies undergraduate offerings include an undergraduate major and minor.

African American Studies is a field that systematically explores the life and culture of African American peoples and their African Diaspora relationships, patterns, and ties. Those who major in African American Studies will learn about the historical, political, ideological, legal, social, artistic, and economic issues affecting African Americans. They will learn about the dignity-affirming struggles of African American people to have their humanity acknowledged, valued, and understood.

The major in African American Studies (AAS) is to provide students with a transdisciplinary perspective on the origin, role and policy implications of race in the United States and world political economy, society and culture, over time. AAS students will learn diverse concepts, theories and methodologies for analyzing the experiences and perspectives and the cultural and intellectual production of African Americans and African descended people, largely though not exclusively in the United States. An African American studies major will be encouraged to achieve excellence in developing vital creative and critical competencies, including oral and written communication, computer and statistical skills. Students majoring in AAS will also be encouraged to join a new generation of leadership grounded in African American studies knowledge and committed to public engagement to meet the continuing challenges of a diverse democratic society; and to foster national discourse to produce public policy aimed at achieving social justice.

This program is designed to serve undergraduate students primarily interested in the social sciences and humanities, though all students are welcome and encouraged to enroll in the program. This program prepares students for graduate study and research in traditional disciplines and interdisciplinary fields and for careers in the private or public sectors such as teaching, social work, human resources, criminal justice, management and administration, city planning, marketing, policy-making, medicine and law.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: loturner@illinois.edu (loturner@uiuc.edu)

Minimum required major and supporting course work equates to 48 hours.

General Education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction:

To graduate with distinction, students must complete the following:

1. 3.3 overall G.P.A
2. 3.6 program G.P.A
3. Complete AFRO 495 Senior Thesis Seminar with a grade of 3.3 or better

I. Core course requirements

AFRO 100	Intro to African American St	3
AFRO 220	Intro to Research Methods AfAm	3
AFRO 490	Theory in African American St	3
AFRO 495	Senior Thesis Seminar	3

II. Theory and Methods Requirement

At least one theory and one methods course beyond the core. The courses must be selected from a list maintained in the Department's advising office. 6

III. Thematic Areas

Students must take at least one course each from the following five areas. At least 6 of the remaining hours must be taken from only one of any of the five areas. A list of courses is maintained in the Department's advising office. 21

- A. Comparative Race, Racialized Communities and Identities
- B. Cultural Production and Cultural Movements
- C. Political Economy, Public Policy and Contemporary Issues
- D. Global Interconnections: Black Transnationalism and the African Diaspora

E. Black Women, Gender and Sexuality Studies

IV. Cognate or Supporting Coursework

Students must complete 9 hours of supporting coursework. Supporting coursework courses consists of a set of courses which are logically grouped, and which reflect or support a student's interests outside of the African American Studies major. Supporting coursework courses must be approved by the Department's undergraduate advisor.

9

Total Hours

48

Twelve hours of 300- and 400-level African American Studies courses must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Interdisciplinary Minor in African-American Studies

The Department of African American Studies offers a campus-wide interdisciplinary minor in African American Studies. The minor is premised on the following principles: Interdisciplinarity, the centrality of Black women and gender, the use of the Global Africa/African Diaspora as a contextualizing framework and an emphasis on black agency or self-determining activity of African peoples. A minimum grade point average of 2.33 is required for completion of courses taken in the program. The Department of African American Studies must approve a student's minor course plan.

I. Core course requirements

AFRO 100	Intro to African American St	3
AFRO 490	Theory in African American St	3
or AFRO 220	Intro to Research Methods AfAm	
AFRO 495	Senior Thesis Seminar	3

II. Areas of Concentration

A. Comparative Race, Racialized Communities & Identities. Students must take at least one course in this area. Students may choose courses from a list in the Department office.

3-4

B. Cultural Production & Cultural Movements. Students must take at least one course in this area. Students may choose courses from a list in the Department office.

3-4

C. Political Economy, Public Policy & Contemporary Issues. Students must take at least one course in this area. Students may choose courses from a list in the Department office.

3-4

Elective in any of the above areas

3

Students must take at least one course focusing on Black Women, Gender, and Sexuality Studies chosen from a list in the Department office. Students may count this course toward any of the required areas above.

Total Hours

21

Students must not take more than 6 hours of 100-level courses. A minimum of 6 hours of 300- and 400-level courses is required.

African Studies, Center for

Merle Bowen
Room 210, International Studies Building, 910 South Fifth Street, Champaign, (217) 333-6335
<http://www.afrst.illinois.edu>

Interdisciplinary Minor in African Studies

The Center for African Studies offers an interdisciplinary minor as a complement to any major. The 20 hours selected by students for the African studies minor should form a coherent program of study. This program must be approved by the Center for African Studies. The Dean of the College of Liberal Arts and Sciences will verify that the student has completed the program on the recommendation of the Director of the Center for African Studies and on completion of the requirements below.

E-mail:african@illinois.edu

Requirements

Study of an indigenous African Language. Acceptable languages include but are not limited to Arabic, Bamana, Lingala, Swahili, Wolof, and Zulu.		5
African Studies core courses. These courses contain a minimum of 50 percent African content and are defined according to a list maintained and regularly updated by the Center for African Studies. Courses completed to satisfy the core must come from at least 3 separate departments and must include the following three components:		
Course-work surveying the continent. Choose one of the following:		3
AFST 210	Intro to Mod African Lit	
AFST 222	Introduction to Modern Africa	
AFST 254	Economic Systems in Africa	
HIST 110	History of Africa	
SOC 122	Africa in World Perspective	
300- or 400-level core courses. Language courses cannot be used to meet this requirement.		6
Additional core courses at any level. African language courses may be used to satisfy this requirement if they are at the advanced level (fifth semester or higher). Only 3 hours of AFST 199 may be used to satisfy the requirements of the minor.		6
Total Hours		20

American Indian Studies, Program in

Robert Warrior

1204 W. Nevada, Urbana, (217) 265-9870

www.ais.illinois.edu

American Indian Studies (AIS) at the University of Illinois at Urbana-Champaign prepares students in a range of methodologies, theories, technologies, and teaching approaches that compliments a thorough undergraduate education.

Specifically, an undergraduate minor is designed to assist students in preparing for graduate school or for careers in a variety of pursuits including public and business administration, education, public relations, marketing, politics, and government, especially as they relate to American Indian and Native American constituencies. Career opportunities also exist in agencies such as Indian Health Services, the Bureau of Indian Affairs, and the Bureau of Land Management.

For many, AIS is an ideal minor that presents a critical and intellectual foundation for success in an increasingly challenging world.

Minor in American Indian Studies

American Indian Studies (AIS) at the University of Illinois at Urbana-Champaign is an interdisciplinary program with four subject areas:

1. Culture, Identity, Ethics, and Community
2. Sovereignty, Governance, and Politics
3. Literature, Language, and Performance
4. Colonialism, Decolonization, and Indigeneity

The thinking and intellectual work of Indigenous Peoples is at the center of AIS. Thus, AIS emphasizes tribal peoples' centuries-long fight for sovereignty, including self-government, economic self-determination, and cultural self-representation.

E-mail: ais@illinois.edu

Foundation Courses

AIS 101	Intro to Amer Indian Studies	3
AIS 102	Contemp Issues in Ind Country	3

Subject Area Courses

Students must complete 12 hours selected from 3 of the 4 subject areas. 12

Culture, Identity, Ethics, and Community

AIS 140	Native Religious Traditions
AIS 165	Lang & Culture Native North Am
AIS 288	American Indians of Illinois

Sovereignty, Governance, and Politics

AAS 215	US Citizenship Comparatively
HIST 277	Encounters in Native America
HIST 278	Native American History
AIS 280	Intro to Federal Indian Policy
AIS 430	Indigenous Governance

Literature, Language, and Performance

AIS 265	Intro to American Indian Lit
AIS 275	Am Indian and Indigenous Film
AIS 451	Politics of Children's Lit
AIS 459	Topics in American Indian Lit
AIS 461	Politics of Popular Culture

Colonialism, Decolonization, and Indigeneity

AIS 285	Indigenous Thinkers
AIS 481	History of Amer Indian Educ

Only three courses (9 hours total) at the 100-level may be counted toward the minor. Students also are required to complete two courses (6 hours) at the 300- or 400-level. These advanced course credits must be distinct from credit earned for the student's major or another minor

Anthropology

Andrew Orta

109 Davenport Hall, 607 South Mathews, Urbana, (217) 333-3616

<http://www.anthro.illinois.edu/>

The Department of Anthropology offers two major concentrations and a minor. In addition, students may pursue Anthropology as part of the LAS Major in Computer Science and Anthropology (http://provost.illinois.edu/ProgramsOfStudy/2014/fall/programs/undergrad/las/LAS_comp_science.html).

Anthropology, which views human biology, behavior, and society (both past and present) in a cross-cultural perspective, combines scientific and humanistic interests in a modern social sciences framework. The General Anthropology Concentration includes the four fields of biological anthropology (biological diversity and evolutionary history of human and nonhuman primates), archaeology (human prehistory and the organization and growth of technology and society), sociocultural anthropology (comparative study of identity and power in social contexts from hunter-gatherer to complex urban settings, with attention to contemporary global movements of peoples and diasporic social formations), and linguistic anthropology (comparative study of languages and communication). Although the student should strive for a topical and geographical balance, an undergraduate may specialize in one of these four branches and may also study some world cultural area intensively through an area studies program.

The Sociocultural and Linguistic Anthropology Concentration offers students a program of more focused coursework in sociocultural and linguistic anthropology. Sociocultural anthropology is the study of the daily lives of people around the world, both at home and abroad. Sociocultural anthropologists conduct field research to get a hands-on feel for people's lives and passions. They examine everything from beauty pageants to political protest marches, from Disney films to nuclear scientists' lab practices. Sociocultural anthropology distinguishes itself from other disciplines by its conviction that these local and personal details offer a wonderful window on the largest processes and problems of our time, from globalization to race relations and violence. Linguistic anthropology complements sociocultural anthropology with detailed attention to spoken and signed languages—their structure and use in the daily lives of people around the world, both at home and abroad. Linguistic anthropologists examine such things as the “English Only” movement in the United States, the persuasive language of advertising and politics, racism and hate speech, oral/gestural storytelling traditions around the world, communication in the classroom or at the United Nations, as well as how the way we talk creates our sense of self and reality. Because the field of anthropology presents a wide range of disciplinary perspectives on the human condition, students electing this major concentration are encouraged to select from among relevant course offerings in archaeology or biological anthropology to fulfill General Education requirements.

Anthropology is an appropriate major for those seeking a general liberal education; for those preparing for professional study and careers in law, medicine, bioscience and technology, business, or international relations, and for those planning further graduate study in anthropology. These majors prepare college graduates to enter into a broad range of jobs and professions by providing them with research, writing and analytical skills that will enable them to confront problems, issues and situations that require cultural sensitivity. College graduates with a background in anthropology thrive in social services, teaching, law, medicine, government, NGOs, business, and many more lines of work. Professional anthropologists work as research scientists and teachers in museums, universities, and archaeological surveys; as staff members in government agencies, social service programs, and business firms in which international understanding of human and social concerns is important; or as independent consultants to such agencies, programs, and firms.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences Major in Sciences and Letters Curriculum

E-mail: anthro@illinois.edu

Minimum required major and supporting course work equates to 48 hours including 33 hours of Anthropology courses.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: To be eligible for distinction, a student must complete 33 hours of anthropology courses (including at least 2 hours of both ANTH 391 and ANTH 495), maintain a 3.6 average in those hours and a 3.5 overall average. All candidates for distinction must submit a thesis for judgment by at least two members of the anthropology department.

Select one of the following concentrations in consultation with an adviser.

- General Anthropology Concentration (p. 291)
- Sociocultural and Linguistic Anthropology Concentration (p. 292)

Minor in Anthropology

The minor in anthropology may be tailored to each student's individual needs, thus accommodating students with interests as diverse as premedicine, prelaw, geography, and art history.

E-mail: anthro@illinois.edu

Web address for department: <http://www.anthro.illinois.edu>

Select at least two of the following:	6
ANTH 220	Introduction to Archaeology
ANTH 230	Sociocultural Anthropology
ANTH 240	Biological Anthropology
ANTH 270	Language in Culture
Minimum of six hours of 300- or 400-level courses. Only 3 hours of ANTH 499 may be used to fulfill this requirement.	6
Anthropology courses at any level	6
Total Hours	18

General Anthropology Concentration

All students must discuss their selection of anthropology courses and supporting course work with a departmental adviser.

Four fields courses (student may make one substitution for 1 of the 4 required courses, choosing from the options listed under the required course)

Archaeology		
ANTH 220	Introduction to Archaeology	3
or ANTH 105	World Archaeology	
or ANTH 175	Archaeology and Pop Culture	
or ANTH 225	Women in Prehistory	
Sociocultural Anthropology		
ANTH 230	Sociocultural Anthropology	3
or ANTH 103	Anthro in a Changing World	
or ANTH 160	Contemporary Social Issues	
or ANTH 165	Lang & Culture Native North Am	
or ANTH 209	Food, Culture, and Society	
or ANTH 280	Personal Anthropology	
Biological Anthropology		
ANTH 240	Biological Anthropology	3
or ANTH 102	Human Origins and Culture	
or ANTH 241	Human Variation and Race	
or ANTH 143	Biology of Human Behavior	
or ANTH 249	Evolution and Human Disease	
Linguistic Anthropology		
ANTH 270/271	Language in Culture	3
or ANTH 104	Talking Culture	
Minimum of 12 hours of Anthropology courses at the 300- or 400-level; only one of these four courses may be ANTH 499.		12
Electives in Anthropology (at any level)		6
Senior Capstone in Anthropology ¹		3
Courses in related fields ²		15

¹ Senior Capstone requirement: Either ANTH 495 or ANTH 497; or any existing 400-level course, or ANTH 399 as an independent study, if the student works closely with the instructor to adapt it to fulfill this requirement by beginning and completing a new research/writing project relevant to the course. Can be repeated for up to 6 hours.

- ² Courses in related fields. Of these courses, at least 9 hours must be at the 300- or 400-level. Students may substitute an official minor offered by another department as long as the supporting course work, hours, and level requirements are met.

Sociocultural and Linguistic Anthropology Concentration

All students must discuss their selection of anthropology courses and supporting coursework with a faculty advisor in sociocultural and linguistic anthropology. When a course is listed under two or more categories, the student may decide which of the requirements the course should fulfill; however, it may not be used to fulfill more than one of those requirements

Gateway Courses

ANTH 230	Sociocultural Anthropology	3
ANTH 270	Language in Culture	3
or ANTH 271	Language in Culture-ACP	
ANTH 411	Methods of Cultural Anth	3

Ethnographic Themes and Modes of Thinking

Four courses selected from the list maintained in the advisor's office. At least one of these courses must be at the 300-level and at least one of these courses must be at the 400-level. One of these courses may be a topically oriented archaeology or biological anthropology course, or ANTH 499, chosen in consultation with your advisor. ¹ 12

Ethnographic Places

Four courses selected from the list maintained in the advisor's office. At least one of these courses must be at the 300 or 400 level. One of these courses may be a topically oriented archaeology or biological anthropology course, or ANTH 499, chosen in consultation with your advisor. ² 12

Capstone Course in Sociocultural/Linguistic Anthropology ³ 3

Supporting coursework

Consulting closely with your anthropology faculty advisor, you should plan to take supporting course work from other departments and/or subdisciplines in anthropology that relates to your anthropological work and interests. At least three of these supporting courses must be taken in other departments. Of these four supporting courses, two should be at the 300- or 400-level. ⁴ 12

Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60- 75 hours). Please see your adviser.

¹ Relevant archaeology and biological anthropology courses include ANTH 180, ANTH 241, ANTH 249, ANTH 277, and ANTH 452.

² Relevant archaeology and biological anthropology courses include ANTH 157, ANTH 223, and ANTH 376.

³ Either ANTH 495 or ANTH 497; or any existing 400-level course, or ANTH 399 as an independent study, if the student works closely with the instructor to adapt it to fulfill this requirement by beginning and completing a new research/writing project relevant to the course. Can be repeated for up to 6 hours.

⁴ If you have not selected a course from another subdiscipline of anthropology as part of your "Ethnographic Themes/Modes of Thinking" or "Ethnographic Places" courses, or have not taken such a course in fulfillment of General Education requirements, one of these supporting courses must be selected from course offerings in archeology or biological anthropology.

Asian American Studies

Junaid Rana
Acting Head
1208 West Nevada, Urbana, (217) 244-9530
www.aasp.illinois.edu

Director: Augusto Espiritu
Program Office: 1208 West Nevada, Urbana, (217) 244-9530

The Asian American Studies Program offers a campus-wide Interdisciplinary Minor. This minor represents a coherent program for students who wish to deepen their study of Asian American histories, experiences, contemporary issues and social problems as a part of their liberal education and understanding of multicultural America. It is relevant to curricula such as sciences and letters, business, economics, education, health studies, pre-law, social work, or urban and regional planning.

Interdisciplinary Minor in Asian American Studies

A student's plan of courses for the minor must be approved by the Asian American Studies Program. The minor will consist of 21 hours of approved courses from diverse departments and must include:

AAS 100	Intro Asian American Studies	3
3 courses in the Humanities and 3 courses in the Social Sciences from Asian American Studies Program approved course list ¹		18
Total Hours		21

No course may be used to satisfy more than one requirement.

¹ No more than 6 hours (beyond AAS 100) may be at the 100 level. At least six hours of 300- or 400-level courses are required.

Astronomy

Brian Fields

103 Astronomy Building, 1002 West Green, Urbana, (217) 333-3090

www.astro.illinois.edu

The Department of Astronomy offers a major and a minor in astronomy. In addition, students may pursue astronomy as part of the LAS Major in Computer Science and Astronomy (p. 451).

The major in astronomy, administered by the Department of Astronomy, is based upon both a broad and an in-depth exploration into astronomy and allied disciplines, and is an excellent way to gain a general science education. It may be chosen by students who wish to have an astronomy research career or an astronomy background for use in related fields, such as working in national laboratories, observatories, planetariums, NASA, aerospace industry, many computer-related fields, journalism, or science writing to name a few. Astronomy courses can also be customized to satisfy a secondary field for the undergraduate curriculum in General Engineering.

Astronomy students are also encouraged to double major or minor in a second field such as chemistry, computer science, geology, mathematics or physics. Specific programs of study in other areas such as biology, economics, English, history, or journalism for individual students can be designed and periodically updated through mutual discussions between the students and their academic advisers.

The Department of Astronomy also sponsors the Minor in Astronomy.

For the Degree of Bachelor of Science in Liberal Arts and Sciences Major in Sciences and Letters Curriculum

E-mail: astronomy@illinois.edu

Minimum required major and supporting course work normally equates to 48-49 hours.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction. A student majoring in astronomy may earn distinction or high distinction by attaining a minimum grade point average of 3.5 or 3.75, respectively, in 300- and 400-level astronomy, math, and physics courses. Students desiring distinction should consult with an astronomy adviser before the senior year.

Elementary Astronomy Core

ASTR 210	Introduction to Astrophysics ¹	3
----------	---	---

Advanced Astronomy Core

ASTR 401	Scientific Writing for Astro ²	1
----------	---	---

Select three of the following: 9-10

ASTR 404	Stellar Astrophysics	
ASTR 405	Solar System and IS Medium	
ASTR 406	Galaxies and the Universe	
ASTR 414	Astronomical Techniques	

Advanced Astronomy Electives ³

Select at least 12 hours of 300- or 400-level ASTR courses ⁴ 12

Supporting Technical Courses

Physics 12

PHYS 211	University Physics: Mechanics	
PHYS 212	University Physics: Elec & Mag	
PHYS 213	Univ Physics: Thermal Physics	
PHYS 214	Univ Physics: Quantum Physics	

Mathematics 11

MATH 221	Calculus I ⁵	
----------	-------------------------	--

MATH 231	Calculus II
MATH 241	Calculus III

- ¹ Students without a background in physics or astronomy are encouraged to take ASTR 121 and ASTR 122 during their freshman year.
- ² Requires concurrent enrollment in ASTR 404, ASTR 405, ASTR 406, or ASTR 414.
- ³ Other 300- or 400-level technical classes, e.g. physics, chemistry, computer science or engineering, can be substituted with academic adviser approval.
- ⁴ A maximum of 4 hours of credit in ASTR 390 (or equivalent "Independent Study" course, such as PHYS 497, with academic adviser approval) can be counted towards this requirement.
- ⁵ MATH 220 may be substituted for MATH 221. MATH 220 is appropriate for students with no background in calculus.

Recommended courses for students intending to pursue graduate study in Astronomy:

MATH 284	Intro Differential Systems
MATH 285	Intro Differential Equations
or MATH 286	Intro to Differential Eq Plus
MATH 225	Introductory Matrix Theory
or MATH 415	Applied Linear Algebra
PHYS 325	Classical Mechanics I
PHYS 326	Classical Mechanics II
PHYS 401	Classical Physics Lab
PHYS 427	Thermal & Statistical Physics
PHYS 435	Electromagnetic Fields I
PHYS 436	Electromagnetic Fields II
PHYS 486	Quantum Physics I
PHYS 487	Quantum Physics II

Twelve hours of 300- and 400-level Astronomy/Physics courses must be taken on this campus.

All foreign language requirements must be satisfied.

Minor in Astronomy

The minor in astronomy is designed to broaden the student's knowledge of science and our place in the universe. The minor in Astronomy will benefit especially those students who are eager to learn astronomy but who do not anticipate it to be their career. The Astronomy minor is also suitable for students who intend to pursue careers in areas that may benefit from a good knowledge of astronomy such as aerospace industry, science writing, scientific journalism, or science teaching in schools.

E-mail: astronomy@illinois.edu

Web address for department: <http://www.astro.illinois.edu/>

Basic Astronomy

Select one of the following:	3-6
ASTR 100	Introduction to Astronomy ¹
ASTR 121 & ASTR 122	The Solar System and Stars and Galaxies ¹
ASTR 210	Introduction to Astrophysics

Advanced Astronomy

300- or 400-level courses taught by the Department of Astronomy ²	9
Courses at any level taught by the Department of Astronomy ²	3-6
Minimum total hours	18

¹ Credit not granted for both ASTR 100 and the ASTR 121/ASTR 122 sequence.

² No more than 4 hours of ASTR 390 will be counted towards the minor.

Atmospheric Sciences

Robert Rauber

101 Atmospheric Sciences Building, 105 South Gregory Street, Urbana, (217) 333-2046

www.atmos.illinois.edu

The Science and Letters Curriculum in Atmospheric Sciences prepares students for careers in a wide range of disciplines within the atmospheric sciences including meteorology, environmental science, climate, remote sensing, atmospheric chemistry, computational science and other areas. The curriculum is tailored to achieve the student's long term educational goals, their career aspirations in atmospheric sciences and their general interests in the field. All students receive a firm foundation in mathematics, physics and chemistry and develop data analysis and computational skills that can be used in a wide range of applications within and beyond the atmospheric sciences. Students can emphasize specific areas of interest in their elective choices. Students majoring in Atmospheric Sciences will have opportunities for employment within agencies of government (e.g. the National Weather Service/NOAA, NASA, EPA, DOD, DOE), many private firms and in colleges and universities for those who continue with graduate education. All students take part in independent study, internship or research projects as a capstone experience in their senior year. Students interested in a research career in atmospheric sciences are encouraged to undertake research projects in the capstone experience.

The undergraduate curriculum in atmospheric sciences is modeled on the recently published recommendations of the American Meteorological Society. The American Meteorological Society is the professional society for atmospheric scientists and meteorologists in the United States. Their "recommended attributes" for undergraduate degree programs in the atmospheric sciences are guidelines for graduates to be successful in finding employment or in seeking admission to graduate programs. Therefore, we have closely adhered to these recommended attributes in designing our program.

For the Degree of Bachelor of Science in Liberal Arts and Sciences Major in Sciences and Letters Curriculum

Email: dept@atmos.uiuc.edu

Minimum required major and supporting course work normally equates to 58-59 hours including at least 32 hours in Atmospheric Sciences.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students majoring in Atmospheric Sciences can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

For distinction: A minimum cumulative grade point average of 3.2 in all of their Atmospheric Sciences courses, and completing three Atmospheric Sciences Elective courses.

For high distinction: A minimum cumulative grade point average of 3.4 in all of their Atmospheric Sciences courses, and completing four Atmospheric Sciences Elective courses.

For highest distinction: A minimum cumulative grade point average of 3.6 in all of their Atmospheric Sciences courses, and completing five Atmospheric Sciences Elective courses.

PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1

MATH 241	Calculus III	4
MATH 285	Intro Differential Equations	3
ATMS 201	General Physical Meteorology	3
ATMS 301	Atmospheric Thermodynamics	3
ATMS 302	Atmospheric Dynamics I	3
ATMS 303	Synoptic-Dynamic Wea Analysis	4
ATMS 304	Radiative Transfer-Remote Sens	3
ATMS 305	Computing and Data Analysis	3

ATMS 307	Climate Processes	3
ATMS 313	Synoptic Weather Forecasting	4
ATMS 314	Mesoscale Dynamics	3
ATMS Electives at the 300 or 400 - level selected from an approved course list maintained by the Department of Atmospheric Sciences		3
Total Hours		58-59

Minor in Atmospheric Sciences

The minor in Atmospheric Sciences is designed for students who desire a significant background in Atmospheric Sciences to support work in their major field. This minor will especially benefit students who choose to pursue careers in environmental areas in which multidisciplinary background is essential. The Atmospheric Science minor can complement majors in engineering and agriculture, scientific pursuits such as chemistry, physics, biology, and scientific writing.

Choose from the following:		0-6
ATMS 100	Introduction to Meteorology	
ATMS 120	Severe and Hazardous Weather	
ATMS 140	Climate and Global Change	
ATMS 201	General Physical Meteorology	
300- and 400-level courses from the approved course list. Please see the Atmospheric Sciences advisor for a current list.		12-18
Total Hours		18

Chemical and Biomolecular Engineering

Paul Kenis

114 Roger Adams Laboratory, 600 South Mathews, Urbana, (217) 333-3640

www.chemeng.illinois.edu

Chemical engineering is the study and practice of transforming substances on a large scale to produce products or energy for the improvement of society. Such processes are the fundamental core of the chemical, petroleum, pharmaceutical, and electronics industries. Chemical Engineers work in a variety of segments within these industries, including processing, manufacturing, research and development, management, environmental compliance, and business. Chemical Engineering differs from Chemistry in that Chemical Engineers produce products on a large scale, so that they are affordable and available to as many consumers as possible. In this way, Chemical Engineering emphasizes fundamentals required to design, optimize, and operate chemical processes as safely and efficiently as possible.

For the Degree of Bachelor of Science in Chemical Engineering

Major in Specialized Curriculum in Chemical Engineering

The first two years of the Chemical Engineering curriculum provide a strong foundation in basic sciences through Physics, Mathematics, Chemistry, an introduction to what Chemical Engineers do, and the fundamental basis of Chemical Engineering (Mass and Energy Balances and Thermodynamics.) In the third year, students delve deeper into more specialized Chemistry courses such as Physical and Analytical Chemistry, while exploring fundamental Chemical Engineering courses such as Momentum Transfer, Separations, and Reactor Design. The Senior year incorporates all of this learning through high level technical electives, Process Control, Capstone Lab, and Capstone Design courses. It is through the lab and design class that students apply everything they have learned in previous Chemical Engineering courses to real-world team projects and presentations.

The Chemical Engineering specialized curriculum provides two concentrations: Chemical Engineering and Biomolecular Engineering. Each concentration is based on a strong fundamental understanding of Chemical Engineering, however the Biomolecular concentration's technical electives focus more on bio-applied processing and technology.

Areas of Concentration

- **Chemical Engineering:** The chemical engineering concentration is designed to prepare students for careers in the energy, chemical, food, energy, pharmaceutical, semiconductor processing, personal care, fiber and materials industries.
- **Biomolecular Engineering:** The Biomolecular Engineering concentration builds upon the traditional principles of chemical engineering, but specializes in biological and biotechnological systems in order to better prepare students who are interested in or seek employment in the food, pharmaceutical, and biotechnology industries.

Overview of Curricular Requirements

The curriculum requires 129 hours for graduation and is organized as shown below.

A cumulative grade point average of 2.5 or higher, excluding military training, is required to be eligible to take CHBE 430, CHBE 431, and CHBE 440.

Orientation and Professional Development

These courses introduce opportunities and resources the college, department, and curriculum offers students. They also provide background on the Chemical Engineering curriculum, what chemical engineers do, and the skills to work effectively and successfully in the engineering profession.

CHBE 121	CHBE Profession ¹	1
ENG 100	Engineering Orientation ¹	0
Total Hours		1

¹ Required of incoming freshmen only; waived for transfer students.

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

CHEM 202	Accelerated Chemistry I ¹	3
CHEM 203	Accelerated Chemistry Lab I	2
CHEM 204	Accelerated Chemistry II	3
CHEM 205	Accelerated Chemistry Lab II	2
MATH 221	Calculus I ²	4

MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 285	Intro Differential Equations ³	3
MATH 415	Applied Linear Algebra	3 OR 4
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 214	Univ Physics: Quantum Physics	2
Total Hours		37

¹ Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 105, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.

² MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

³ MATH 441 may be substituted for MATH 285. MATH 286 (4 hours) may be substituted for MATH 285 (3 hours).

Chemical and Biomolecular Engineering Technical Core

These courses stress fundamental concepts and basic laboratory techniques that comprise the common intellectual understanding of chemical engineering and chemical science.

For Both Concentrations

CHBE 221	Principles of CHE	3
CHBE 321	Thermodynamics	4
CHBE 421	Momentum and Heat Transfer	4
CHBE 422	Mass Transfer Operations	4
CHBE 424	Chemical Reaction Engineering	3
CHBE 430	Unit Operations Laboratory	4
CHBE 431	Process Design	4
CHBE 440	Process Control and Dynamics	3
CHEM 236	Fundamental Organic Chem I	4
CHEM 237	Structure and Synthesis	2
CHEM 315	Instrumental Chem Systems Lab ¹	2
CHEM 420	Instrumental Characterization	2
CHEM 442	Physical Chemistry I	4
CS 101	Intro Computing: Engrg & Sci	3
IE 300	Analysis of Data	3
Total Hours		49

¹ Students must register in one of the Chemical Engineering-specific CHEM 315 lab sections.

For the Concentration in Chemical Engineering

Technical Core		49
CHEM 436 or MCB 450	Fundamental Organic Chem II Introductory Biochemistry	3
Total Hours		52

For the Concentration in Biomolecular Engineering

Technical Core		49
MCB 450	Introductory Biochemistry	3
Total Hours		52

Technical Electives

These courses stress the rigorous analysis and design principles practiced in the major subdisciplines of chemical engineering embodied in the chemical engineering and biomolecular engineering concentrations.

For the Concentration in Chemical Engineering

Selected from the departmentally approved List of Approved Chemical Engineering Technical Electives, satisfying these distribution requirements: ¹

400-level ChBE courses, with not more than 3 hours being CHBE 497 or CHBE 499 ²	6
Any 400-level course from List ²	3
Any courses from List ²	6
Any 400-level course from List ³	4
Total Hours	19

¹ List of Approved Chemical Engineering Technical Electives. (<http://chbe.illinois.edu/undergraduate-program/current-students/curricula-information-concentration-and-year>)

² A maximum of 10 total hours of undergraduate research may be counted toward Technical Elective credit.

³ A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit.

For the Concentration in Biomolecular Engineering

Selected from the departmentally approved List of Approved Biomolecular Engineering Technical Electives Categories A and B, satisfying these distribution requirements: ¹

Any courses from Category A ^{2,3}	9
Any courses from Category B ³	6
Any 400-level course from List ³	4
Total Hours	19

¹ List of Approved Biomolecular Engineering Technical Electives Categories A and B (<http://chbe.illinois.edu/undergraduate-program/current-students/curricula-information-concentration-and-year>)

² A maximum of 3 hours from this Category may be undergraduate research credit.

³ A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit.

Social Sciences and Humanities

The social sciences and humanities courses ensure that students have exposure in breadth and depth to areas of intellectual activity that are essential to the general education of any college graduate.

Electives in social sciences and humanities satisfying the campus general education requirements for social sciences and humanities, including cultural studies western and non-western components. 16

Composition

These courses teach fundamentals of expository writing.

RHET 105	Writing and Research	4
Advanced Composition (satisfied by completing the sequence CHBE 430 and CHBE 431 in the Chemical Engineering Technical Core).		
Total Hours		4

Suggested Sequence

The schedule that follows is illustrative, showing the typical sequence in which courses would be taken by a student with no college course credit already earned and who intends to graduate in four years. Each individual's case may vary, but the position of required named courses is generally indicative of the order in which they should be taken. The first three semesters of the Suggested Sequence is the same for all chemical engineering students. The fifth through eight semesters vary with the Concentration chosen. Refer to the appropriate sequence continuation below.

First Year

First Semester

Hours

CHEM 202 ¹	Accelerated Chemistry I	3

- ¹ Students who do not place into CHEM 202, or who do not satisfy the mathematics prerequisite for CHEM 202, may substitute the sequence CHEM 102, CHEM 103, CHEM 104, CHEM 105, CHEM 222, and CHEM 223 for CHEM 202, CHEM 203, CHEM 204, and CHEM 205.
- ² The CHBE 121 and ENG 100 requirement will be waived for students who transfer into the chemical engineering curriculum after their freshman year. Under no circumstances will this requirement be waived for students who are in the chemical engineering curriculum during their freshman year.
- ³ MATH 220 may be substituted, with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.
- ⁴ At least 16 hours must be taken. All Campus General Education requirements must be satisfied, including those in approved course work in the Humanities/Arts, Social/Behavioral Sciences, and Cultural Studies, including the Western, Non-Western and/or U.S. Minorities components. The requirements for the Campus General Education categories Natural Sciences/Technology, Quantitative Reasoning I and II, Composition I, and Advanced Composition are fulfilled through required course work in the curriculum.
- ⁵ Three semesters of college credit in one foreign language is required. Three years of high school credit in one foreign language are equivalent to three semesters of college credit and satisfy the requirement.
- ⁶ Under no circumstances will PHYS 101-PHYS 102 be accepted as a substitute for any part of the Physics sequence.
- ^{7a} MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 285.
- ^{7b} MATH 441 may be substituted for MATH 285. MATH 286 may be substituted for MATH 285.
- ^{8a} At least 19 hours must be selected from the departmentally approved List of Approved Chemical Engineering Technical Electives (http://www.scs.uiuc.edu/chem_eng/undergrad/techelect.php), satisfying these distribution requirements:
 - a) 6 hours must be 400-level ChBE courses, with not more than 3 hours being CHBE 497 or 499.
 - b) 3 hours any 400-level course from List 1.
 - c) 6 hours any courses from List 1.
 - d) 4 hours any 400-level courses from List 2.
 A maximum of 10 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Chemical Engineering Technical Electives may be obtained in 209 RAL or from the department Web site. (http://www.scs.uiuc.edu/chem_eng/undergrad/techelect.php)
- ^{8b} At least 19 hours must be selected from the departmentally approved List of Approved Biomolecular Engineering Technical Electives Categories (http://www.scs.uiuc.edu/chem_eng/undergrad/techelect_bio.php), satisfying these distribution requirements:
 - a) 9 hours must be from Category A
 - b) 6 hours must be from Category B
 - c) 4 hours must be 400-level courses from List 2.
 A maximum of 3 hours from Category A may be undergraduate research credit. A maximum of 9 total hours of undergraduate research may be counted toward Technical Elective credit. The List of Approved Biomolecular Engineering Technical Electives may be obtained in Room 209 RAL or from the department Web site. (http://www.scs.uiuc.edu/chem_eng/undergrad/techelect_bio.php)
- ⁹ Students must register in one of the Chemical Engineering-specific CHEM 315 lab sections.
- ¹⁰ Enrollment in CHBE 430 is limited. Thus CHBE 430 may need to be taken in the second semester and CHBE 431 and/or additional electives taken in the first semester instead. Students in their final semester will have priority for getting into CHBE 430 and CHBE 431.
- ¹¹ The sequence CHBE 430 and CHBE 431 satisfies the General Education Advanced Composition requirement.

Minor in Biomolecular Engineering

Biomolecular Engineering is a broad, interdisciplinary field with its main goal of engineering value-added biomolecules and biomolecular systems for applications in medical, chemical, agricultural and food industries. Its practice ranges from fundamental study of biomolecules and biomolecular systems to the design of cellular factories and artificial organs. The Biomolecular Engineering minor is designed to better prepare non-chemical engineering students for careers in the food, pharmaceutical, personal care, and biotechnology industries. This minor is not open to students majoring in

chemical engineering. Those students should instead take the biomolecular engineering concentration if they are interested in biomolecular engineering coursework.

Students may fulfill the requirements for a minor in biomolecular engineering by completing the following course sequence. For further information, please contact the Department of Chemical and Biomolecular Engineering.

MCB 450	Introductory Biochemistry	3
CHBE 221	Principles of CHE	3
CHEM 232	Elementary Organic Chemistry I	3 OR 4
Biomolecular Engineering Electives ¹		9
Technical Electives ²		3
Total Hours		21

¹ Students must take at least three "Biomolecular Engineering" courses offered by the Department of Chemical and Biomolecular Engineering (for example, including CHBE 471, CHBE 472, CHBE 473, and CHBE 474). Students may obtain a current list of courses that may be used to satisfy this requirement in Room 209 RAL.

² Course to be selected from a departmentally approved list of biomolecular engineering related technical electives.

For more information regarding to the Biomolecular Engineering minor, contact the Chemical and Biomolecular Engineering Department Office, 114 Roger Adams Laboratory, (217) 244-2021, chbe-advising@scs.illinois.edu.

Chemistry

Gregory Girolami

107 Noyes Laboratory, 505 South Mathews, Urbana, (217) 333-0711

www.chemistry.illinois.edu

Students may pursue chemistry by following either the specialized curriculum in chemistry (p. 309) (leading to the Bachelor of Science in Chemistry), or one of two concentrations (Chemistry Concentration (p. 305) or Chemistry Teaching Concentration (p. 306)) in the Sciences and Letters Curriculum (leading to the Bachelor of Science in Liberal Arts and Sciences). Students within the specialized curriculum in Chemistry may choose the Environmental Chemistry concentration (p. 308). In addition, students may pursue chemistry as part of the LAS Major in Computer Science and Chemistry (p. 451). The department also sponsors a minor in chemistry (p. 305). These programs of study are administered by the Department of Chemistry.

The specialized curriculum in chemistry (p. 309) is a rigorous, specialized program suitable for those planning careers in chemistry. It meets standards prescribed by the American Chemical Society. The chemistry concentration (p. 305) in the Sciences and Letters Curriculum is used by some students planning chemistry careers, but it is more often chosen by students wishing to obtain chemistry backgrounds for use in related fields.

Cooperative Education Program: Students accepted into the School of Chemical Sciences Cooperative Education Program spend alternate periods of attendance at the University with periods of employment in industry or government. Transcript recognition is given as well as a certificate of participation at graduation. Additional information and applications are available in the School of Chemical Sciences Placement and Student Services office.

Chemistry Advising Information:

For the Chemistry Majors and Minor, contact the appropriate Chemistry Advisor according to list below:

Last Name A-G: Elaina Bielser Kutz; ebielser@illinois.edu; 217-244-8531

Last Name H-N: Suzi Blanco; sblanco2@illinois.edu; 217-244-0265

Last Name O-Z: Todd Spinner; spinner@illinois.edu; 217-244-6605

Major in Specialized Curriculum in Chemistry (p. 309)

- Environmental Chemistry Concentration (p. 308)

Major in Sciences and Letters Curriculum

Students must select one concentration:

- Chemistry Concentration (p. 305)
- Chemistry Teaching Concentration (p. 306)

Minor in Chemistry

No more than 10 hours of the following courses may count toward the 20 hours required for the Chemistry Minor: CHEM 197, CHEM 199, CHEM 297, CHEM 397, CHEM 497, and CHEM 499.

For advising see the Chemistry Overview Section (p. 305)

Maximum of 10 hours of Chemistry courses numbered 205 or lower. ¹	10
Minimum of 6 hours of 300- or 400-level Chemistry and/or Biochemistry courses	6
Chemistry courses selected in consultation with adviser	4
Total Hours	20

¹ CHEM 101 may not count in the 20 hours.

Chemistry Concentration

For advising see the Chemistry Overview Section (p. 305)

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 48-51 hours including at least 30 hours in Chemistry or Biochemistry courses

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have an overall grade point average of 3.0, must take at least 2 hours of CHEM 499 or BIOC 492 and at least 4 hours from a combination of the following: CHEM 297, CHEM 397, CHEM 497.

Chemistry and biochemistry courses including: ^{1,2} 22-26

CHEM 440 or CHEM 442	Physical Chemistry Principles Physical Chemistry I	
-------------------------	---	--

Two other 300- or 400-level courses, at least one of which must be outside physical chemistry. 4-8

MATH 220 or MATH 221	Calculus Calculus I	4-5
-------------------------	------------------------	-----

MATH 231	Calculus II	3
----------	-------------	---

MATH 241	Calculus III	4
----------	--------------	---

Select one of the following: 8-10

PHYS 101 & PHYS 102	College Physics: Mech & Heat and College Physics: E&M & Modern	
PHYS 211 & PHYS 212	University Physics: Mechanics and University Physics: Elec & Mag	

¹ Excluding CHEM 101, CHEM 108, and CHEM 199.

² No more than 10 hours of the following courses may count toward the 22-26 hours in Chemistry: CHEM 197, CHEM 199, CHEM 297, CHEM 397, CHEM 497, and CHEM 499.

Twelve hours of 300- or 400-level courses in Chemistry and/or Biochemistry must be taken on this campus.

All foreign language requirements must be satisfied.

NOTE: Transfer credit in chemistry must be approved by an adviser in chemistry in order to be included in the 30 hours.

Chemistry Teaching Concentration

This concentration is designed to prepare the student to teach chemistry with a second teaching field in general science. In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

For advising see Chemistry Advising Information above.

Degree title: Bachelor of Science in Liberal Arts and Sciences

General education: Students must complete the Campus General Education requirements. In addition, one course must be selected from: CMN 101 or CMN 113 .

Minimum hours required for graduation: 120 hours

Departmental distinction: Students in this major may earn distinction, high distinction, or highest distinction, awarded on the basis of performance in student teaching and academic achievement.

Prerequisites to transfer to the Teaching Concentration (must be completed or be in progress prior to transfer into the teaching concentration):

EPSY 201	Educational Psychology	3
EPS 201 or EPS 202	Foundations of Education Foundations of Education-ACP	3

Select one of the following (Accelerated or General Chemistry):

CHEM 202 & CHEM 203 & CHEM 204 & CHEM 205	Accelerated Chemistry I and Accelerated Chemistry Lab I and Accelerated Chemistry II and Accelerated Chemistry Lab II	
--	--	--

CHEM 102 & CHEM 103 & CHEM 104 & CHEM 105 & CHEM 222 & CHEM 223	General Chemistry I and General Chemistry Lab I and General Chemistry II and General Chemistry Lab II and Quantitative Analysis Lecture and Quantitative Analysis Lab
--	--

Select one of the following Organic Chemistry course groups:

CHEM 236 & CHEM 237	Fundamental Organic Chem I and Structure and Synthesis
CHEM 232 & CHEM 233	Elementary Organic Chemistry I and Elementary Organic Chem Lab I

Select on of the following Math course groups:

MATH 220 & MATH 231	Calculus and Calculus II
MATH 221 & MATH 231	Calculus I and Calculus II

In addition, the student is required to pass the State Basic Skills Test before application to the teaching minor.

Requirements

In addition to the requirements for the concentration listed below, students must complete the Teacher Education Minor in Secondary School Teaching (p. 129) (37 -38 hours). Conferral of the degree of Bachelor of Science in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Affairs Office. Ordinarily, all students will require 10 semesters to complete this program.

Select one group of courses:

9-11

CHEM 202 & CHEM 203 & CHEM 204 & CHEM 205	Accelerated Chemistry I and Accelerated Chemistry Lab I and Accelerated Chemistry II and Accelerated Chemistry Lab II
CHEM 102 & CHEM 103 & CHEM 104 & CHEM 105 & CHEM 222 & CHEM 223	General Chemistry I and General Chemistry Lab I and General Chemistry II and General Chemistry Lab II and Quantitative Analysis Lecture and Quantitative Analysis Lab

Select one group of courses:

5-6

CHEM 236 & CHEM 237	Fundamental Organic Chem I and Structure and Synthesis
CHEM 232 & CHEM 233	Elementary Organic Chemistry I and Elementary Organic Chem Lab I

CHEM 495	Teaching Secondary Chemistry	4
CHEM 440 or CHEM 442	Physical Chemistry Principles Physical Chemistry I	4
At least four additional hours of 300- or 400-level chemistry and/or biochemistry course work.		4
ASTR 100	Introduction to Astronomy	3
GEOL 107	Physical Geology	4
IB 100	Biological Sciences	3
MATH 220 or MATH 221	Calculus Calculus I	4-5
MATH 231	Calculus II	3
MATH 241	Calculus III	4
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 214	Univ Physics: Quantum Physics	2

Twelve hours of 300- or 400-level courses in Chemistry must be taken on this campus.

Environmental Chemistry Concentration

For advising see the Chemistry Overview Section (p. 305)

This concentration is designed to provide a background in environmental chemistry that is sufficient in breadth and depth to prepare a person to work as an environmental chemist in the public or private sectors and/or to pursue an advanced degree in the field. Students who complete this concentration will be certified in environmental chemistry by the American Chemical Society (ACS). The Environmental Chemistry Concentration is based on the Specialized Curriculum in Chemistry. Students will take a 3-hour, 300-level course in environmental chemistry and three 3-hour, upper level technical courses in environmental areas. These courses can be used as part of the required 14 hours of technical electives for the Specialized Curriculum in Chemistry.

Required Courses for the Specialized Curriculum in Chemistry

Core Chemistry ¹		35
CHEM 202	Accelerated Chemistry I	
CHEM 203	Accelerated Chemistry Lab I	
CHEM 204	Accelerated Chemistry II	
CHEM 205	Accelerated Chemistry Lab II ²	
CHEM 236	Fundamental Organic Chem I	
CHEM 237	Structure and Synthesis	
CHEM 312	Inorganic Chemistry	
CHEM 315	Instrumental Chem Systems Lab	
CHEM 420	Instrumental Characterization	
CHEM 436	Fundamental Organic Chem II	
CHEM 442	Physical Chemistry I	
CHEM 444	Physical Chemistry II	
CHEM 445	Physical Principles Lab I	
Advanced Chemistry		11
Chemistry/Biochemistry courses numbered 300 or higher, which must include one from the following: ³		
CHEM 317	Inorganic Chemistry Lab	
CHEM 437	Organic Chemistry Lab	
CHEM 447	Physical Principles Lab II	
Additional laboratory work: ^{3,4}		
BIOC 445	Current Topics in Biochemistry	
CHEM 317	Inorganic Chemistry Lab	
CHEM 437	Organic Chemistry Lab	
CHEM 447	Physical Principles Lab II	
CHEM 483	Solid State Structural Anlys	
CHEM 494	Lab Safety Fundamentals (lab sections only)	
Additional chemistry/biochemistry courses to complete the 11-hour requirement in advanced chemistry (excluding CHEM 499)		
Mathematics: ¹		11-12
MATH 220	Calculus	
or MATH 221	Calculus I	
MATH 231	Calculus II	
MATH 241	Calculus III	
Physics: ¹		10
PHYS 211	University Physics: Mechanics	
PHYS 212	University Physics: Elec & Mag	
PHYS 214	Univ Physics: Quantum Physics	
Technical Electives, including the following Mathematics courses: ^{4,5}		
MATH 225	Introductory Matrix Theory	2

or MATH 415	Applied Linear Algebra	
MATH 285	Intro Differential Equations (or equivalent)	3

Required Technical Elective Courses for the Environmental Chemistry Concentration

Basic Courses		
CHEM 360	Chemistry of the Environment	3
or CEE 330	Environmental Engineering	
Advanced Courses: Select three courses from the following:		9
CHEM 460	Green Chemistry	
CEE 443	Env Eng Principles, Chemical	
GEOL 380	Environmental Geology	
IB 485	Environ Toxicology & Health	
CHEM 397	Individual Study Junior	
CHEM 497	Individual Study Senior	
CHEM 499	Senior Thesis	
Other 400-level courses dealing with economic, engineering, biological aspects of environmental chemistry upon consultation with the faculty advisor.		

Nontechnical Requirements for the Specialized Curriculum in Chemistry ⁷ variable

General education:		
Foreign language - three semesters of college study (or three years of high school study) in a single foreign language		
Composition I writing requirement (RHET 105, CMN 111 and CMN 112, or equivalent)		
Advanced Composition writing requirement ⁸		
Humanities/Arts to satisfy the campus general education requirements		
Social/Behavioral sciences to satisfy the campus general education requirements		
Cultural Studies to satisfy the campus general education requirement ⁹		
Free electives ¹⁰		31

¹ Hours given are those typical to meet requirement.

² If necessary, CHEM 102 and CHEM 103, CHEM 104 and CHEM 105, CHEM 222, and CHEM 223 may be substituted for CHEM 202, CHEM 203, CHEM 204, and CHEM 205. Warning: CHEM 222 and CHEM 223 are offered only in the fall semester.

³ The course chosen from CHEM 317, CHEM 437, or CHEM 447 cannot be used to satisfy the additional chemistry lab requirement.

⁴ Students who present less than 6 semester hours credit in a combination of CHEM 397, CHEM 497 and/or CHEM 499 for graduation must complete two additional courses chosen from the list maintained in the advising office. Students who will present at least 6 semester hours credit in a combination of CHEM 397, CHEM 497 and/or CHEM 499 for graduation are required to complete only one laboratory course from the list maintained in the advising office.

⁵ Students contemplating transfer to the chemical engineering curriculum should choose MATH 225.

⁷ The requirements for the Campus General Education categories Natural Sciences and Technology and Quantitative Reasoning I and II are fulfilled through required course work in the curriculum.

⁸ The course taken to satisfy the Advanced Composition requirement may also be used to partially satisfy one of the core chemistry, advanced chemistry, mathematics, physics, or technical electives requirements (if appropriate), or may be used to partially satisfy the free electives requirements.

⁹ The courses taken to satisfy Western and/or Non-Western Civilization requirements may also be used to satisfy nontechnical and/or free elective categories.

¹⁰ Restrictions: (1) Courses preparatory to or used to satisfy the minimum requirements specified in the above requirements may not be included as free electives. (2) No first-year foreign language course (e.g., 101, 102, or equivalent) may be included unless it is a different language than used to satisfy the foreign language nontechnical requirement.

Major in Specialized Curriculum in Chemistry

The typical program of courses required to satisfy this degree totals 128-134 hours; in no case will a program totaling less than 120 hours qualify for graduation. Graduation requires grade point averages of at least 2.0 overall and 2.0 in chemistry, mathematics, and physics courses. The Department of Chemistry will supply, upon request, a brochure showing recommended semester-by-semester programs for the completion of the curriculum.

Students in the specialized curriculum in Chemistry must include a course in Biochemistry in the Advanced Hours area or the Technical Elective area to be certified by the American Chemical Society as having met its specifications.

For advising see the Chemistry Overview Section (p. 305)

Web address for department: www.chemistry.illinois.edu

Degree title: Bachelor of Science in Chemistry

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have an overall grade point average of at least 3.0 and must complete a senior thesis course (at least 2 hours of CHEM 499 and a total of at least 4 hours from a combination of CHEM 297, CHEM 397, and CHEM 497).

Core Chemistry ¹		35
CHEM 202	Accelerated Chemistry I	
CHEM 203	Accelerated Chemistry Lab I	
CHEM 204	Accelerated Chemistry II	
CHEM 205	Accelerated Chemistry Lab II ²	
CHEM 236	Fundamental Organic Chem I	
CHEM 237	Structure and Synthesis	
CHEM 312	Inorganic Chemistry	
CHEM 315	Instrumental Chem Systems Lab	
CHEM 420	Instrumental Characterization	
CHEM 436	Fundamental Organic Chem II	
CHEM 442	Physical Chemistry I	
CHEM 444	Physical Chemistry II	
CHEM 445	Physical Principles Lab I	
Advanced Chemistry		11
Chemistry/Biochemistry courses numbered 300 or higher, which must include one from the following: ³		
CHEM 317	Inorganic Chemistry Lab	
CHEM 437	Organic Chemistry Lab	
CHEM 447	Physical Principles Lab II	
Additional laboratory work: ^{3,4}		
BIOC 455	Technqs Biochem & Biotech	
CHEM 317	Inorganic Chemistry Lab	
CHEM 437	Organic Chemistry Lab	
CHEM 447	Physical Principles Lab II	
CHEM 483	Solid State Structural Anlys	
CHEM 494	Lab Safety Fundamentals (lab sections only)	
Additional chemistry/biochemistry courses to complete the 11-hour requirement in advanced chemistry (excluding CHEM 499)		
Mathematics: ¹		11-12
MATH 220	Calculus	
or MATH 221	Calculus I	
MATH 231	Calculus II	
MATH 241	Calculus III	
Physics: ¹		10
PHYS 211	University Physics: Mechanics	
PHYS 212	University Physics: Elec & Mag	
PHYS 214	Univ Physics: Quantum Physics	
Technical Electives, including the following ⁴		14

Required Mathematics: ⁵

MATH 225 Introductory Matrix Theory
or MATH 415 Applied Linear Algebra

MATH 285 or equivalent

Strongly Recommended:

CHEM 499 Senior Thesis (maximum of 10 hours)

Recommended: basic computer science

Other technical courses chosen from:

Chemistry (300 or higher), biochemistry, chemical engineering (200 or higher)

Courses in life sciences (all courses at 200 or higher)

Mathematics or computer science above the basic level

Other courses in the physical and biological sciences and engineering including CHEM 199 ⁶

Nontechnical Requirements ⁷

variable

General education:

Foreign language - three semesters of college study (or three years of high school study) in a single foreign language

Composition I writing requirement (RHET 105, CMN 111 and CMN 112, or equivalent)

Advanced Composition writing requirement ⁸

Humanities/Arts to satisfy the campus general education requirements

Social/Behavioral sciences to satisfy the campus general education requirements

Cultural Studies to satisfy the campus general education requirement ⁹

Free electives ¹⁰

31

¹ Hours given are those typical to meet requirement.

² If necessary, CHEM 102 and CHEM 103, CHEM 104 and CHEM 105, CHEM 222, and CHEM 223 may be substituted for CHEM 202, CHEM 203, CHEM 204, and CHEM 205. Warning: CHEM 222 and CHEM 223 are offered only in the fall semester.

³ The course chosen from CHEM 317, CHEM 437, or CHEM 447 cannot be used to satisfy the additional chemistry lab requirement.

⁴ Students who present less than 6 semester hours credit in a combination of CHEM 397, CHEM 497 and/or CHEM 499 for graduation must complete two additional courses chosen from the list. Students who will present at least 6 semester hours credit in a combination of CHEM 397, CHEM 497 and /or CHEM 499 for graduation are required to complete only one laboratory course from the list.

⁵ Students contemplating transfer to the chemical engineering curriculum should choose MATH 225.

⁶ Three hours maximum credit in CHEM 199. Additional courses in the sciences and engineering can be taken upon the approval of the chair of the chemistry department advising committee. Most approved courses must have a strong technical prerequisite, such as one year of college-level math or science.

⁷ The requirements for the Campus General Education categories Natural Sciences and Technology and Quantitative Reasoning I and II are fulfilled through required course work in the curriculum.

⁸ The course taken to satisfy the Advanced Composition requirement may also be used to partially satisfy one of the core chemistry, advanced chemistry, mathematics, physics, or technical electives requirements (if appropriate), or may be used to partially satisfy the free electives requirements.

⁹ The courses taken to satisfy Western and/or Non-Western Civilization requirements may also be used to satisfy nontechnical and/or free elective categories.

¹⁰ Restrictions: (1) Courses preparatory to or used to satisfy the minimum requirements specified in the above requirements may not be included as free electives. (2) No first-year foreign language course (e.g., 101, 102, or equivalent) may be included unless it is a different language than used to satisfy the foreign language nontechnical requirement.

Classics

Ariana Trail

4080 Foreign Languages Building, 707 South Mathews, Urbana, (217) 333-1008

<http://www.classics.illinois.edu/>

The Department of the Classics offers two majors:

BALAS in Classics:

The study of the languages and cultures of ancient Greece and Rome is valuable for those seeking a broad education in the liberal arts or preparing for graduate study in one of the many fields of Classical, Medieval, or Renaissance scholarship. It is also excellent preparation for the advanced study of law and medicine; it is increasingly admired in the business world. Within the general requirements of the major, the Department of the Classics offers individual programs designed to meet the needs and interests of each student. Close interaction between faculty and students, individual attention, tutorial instruction, opportunity for study abroad in Greece and Italy, and the unmatched resources of the Classics Library and the collections of ancient art and other objects from classical antiquity in the museums on campus provide unique advantages for the pursuit of classical studies.

B.A. in the Teaching of Latin prepares students to teach Latin.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: classics@illinois.edu

Minimum required major and supporting course work normally equates to 42-48 hours.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students seeking departmental distinction must have at least a 3.5 average in relevant courses and should consult a member of the department's honors committee at the earliest opportunity.

Students in Classics must choose one of the following concentrations. Each concentration requires an additional 12 hours of approved supporting course work which may be drawn from a wide range of fields and disciplines. Students must plan their programs in consultation with a departmental adviser.

- Classical Archaeology Concentration (p. 312)
- Classical Civilization Concentration (p. 313)
- Classics Concentration (p. 313)
- Greek Concentration (p. 314)
- Latin Concentration (p. 314)

For the Degree of Bachelor of Arts in the Teaching of Latin

Curriculum Preparatory to the Teaching of Latin (p. 313)

The department sponsors minors in Classical Archaeology (p. 316), Classical Civilization (p. 316), Greek (p. 316), and Latin (p. 317).

Classical Archaeology Concentration

Classical Civilization courses of which at least 20 hours must be chosen from the following list:

30

CLCV 131	Classical Archaeology, Greece
CLCV 132	Class Archaeology, Rome-Italy
CLCV 217	Greek Art
CLCV 231	Development of Ancient Cities
CLCV 232	Ancient Greek Sanctuaries
CLCV 240	Sex & Gender in Antiquity
CLCV 443	The Archaeology of Greece
CLCV 444	The Archaeology of Italy

CLCV 491	Topics Classic Arch & Civ	
Supporting courses selected with the approval of the adviser		12

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

NOTE: Majors choosing the Classical Civilization and Classical Archaeology concentrations are advised, but not required, to satisfy the college foreign language requirement with one of the classical languages.

Classical Civilization Concentration

Classical Civilization courses at the level of 114 and above	30
Supporting courses selected with the approval of the adviser	12

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

NOTE: Majors choosing the Classical Civilization and Classical Archaeology concentrations are advised, but not required, to satisfy the college foreign language requirement with one of the classical languages.

Classics Concentration

Greek and Latin courses including the following: ¹		36
LAT 411	Intermediate Prose Composition	
GRK 411	Greek Prose Composition	
Six additional hours at the 300 or 400 level in each language		
Supporting courses selected with the approval of the adviser		12

¹ Only 4 hours at the 100-level may be counted.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

NOTE: Majors choosing the Classical Civilization and Classical Archaeology concentrations are advised, but not required, to satisfy the college foreign language requirement with one of the classical languages.

Curriculum Preparatory to the Teaching of Latin

Ariana Traill
4080 Foreign Languages Building, 707 South Mathews, Urbana, (217) 333-1008
www.classics.illinois.edu

For the Degree of Bachelor of Arts in the Teaching of Latin

A concentration in Latin (p. 314) is sponsored by the Department of the Classics. See Classics (p. 312).

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

E-mail: classics@illinois.edu Degree title: Bachelor of Arts in the Teaching of Latin

Minimum required course work normally equates to 71 hours. The total hours may be reduced by as much as 16 hours through prerequisite credit for work equivalent to LAT 101-LAT 104 taken in secondary school.

General education: Consult the Curricula Preparatory to Teaching Foreign Languages (p. 483). Minimum hours required for graduation: A minimum of 120 hours of credit is required for graduation. Consult the certification officer at 505 East Green Suite 203 for additional information.

Departmental distinction: Students seeking departmental distinction must have at least a 3.5 average in relevant courses and should consult a member of the department's honors committee at the earliest opportunity.

Professional Education Requirements. Foreign Languages: Curricula Preparatory to Teaching Foreign Languages. (p. 483)		29
LAT 101	Elementary Latin I	4
LAT 102	Elementary Latin II (or equivalent)	4
LAT 103	Intermediate Latin	4
LAT 104	Intro to Latin Literature (or equivalent)	4
LAT 411	Intermediate Prose Composition	3
LAT 301	Survey of Latin Literature I	3
LAT 302	Survey of Latin Literature II (or equivalent)	3
LAT 491	Readings in Latin Literature (or equivalent)	3,4
HIST 241	History of Ancient Rome (or equivalent)	3
CLCV 131	Classical Archaeology, Greece	3
CLCV 132	Class Archaeology, Rome-Italy (or equivalent)	3
Total Hours		66-67

Greek Concentration

Greek courses (excluding GRK 101), including GRK 411 and 9 additional hours at the 400 level		24
Select two of the following:		6
CLCV 114	Introduction to Greek Culture	
CLCV 131	Classical Archaeology, Greece	
CLCV 217	Greek Art	
CLCV 232	Ancient Greek Sanctuaries	
CLCV 443	The Archaeology of Greece	
CLCV 490	Topics in Classical Literature ¹	
CLCV 491	Topics Classic Arch & Civ ¹	
Supporting courses selected with the approval of the adviser		12

¹ CLCV 490 and CLCV 491 apply only when offered on Greek topics.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

NOTE: Majors choosing the Classical Civilization and Classical Archaeology concentrations are advised, but not required, to satisfy the college foreign language requirement with one of the classical languages.

Latin Concentration

Latin courses (excluding LAT 101, LAT 102, and LAT 105), including LAT 411 and 9 additional hours at the 400 level		24
Select two of the following:		6
CLCV 116	The Roman Achievement	
CLCV 132	Class Archaeology, Rome-Italy	
CLCV 444	The Archaeology of Italy	

CLCV 490	Topics in Classical Literature ¹	
CLCV 491	Topics Classic Arch & Civ ¹	
Supporting courses selected with the approval of the adviser		12

¹ CLCV 490 and CLCV 491 apply only when offered on Latin/Roman topics.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

NOTE: Majors choosing the Classical Civilization and Classical Archaeology concentrations are advised, but not required, to satisfy the college foreign language requirement with one of the classical languages.

Communication

John Caughlin
3001 Lincoln Hall, 702 South Wright, Urbana, (217) 333-2683
communication.illinois.edu

The Communication major prepares 21st century students to become critical thinkers, avid consumers of information, and effective problem solvers in both their personal and professional lives.

The goal of the Communication course of study is for undergraduates to learn about communication from a broad liberal arts perspective. Students will study the nature of effective communication across domains, develop effective communication skills, and gain knowledge of how to help others improve their skills. Students gain theoretical and practical knowledge of public advocacy and debate and the critical capacity to evaluate the face-to-face and mediated political and cultural information upon which we all depend. They also should achieve a sophisticated understanding of the political and social import of communication on all aspects of public and private life, from public policy and health care to cultural norms, personal interactions, and notions of racial, class, gender, and sexual identity.

Communication is an appropriate major for:

- students seeking a general liberal arts education, with a particular focus on communication issues
- students preparing for careers in many different fields involving communication skills (for example, law, business management, sales, public relations, human resources, corporate communication, consulting, media-related fields, or politics)
- students preparing for graduate work in areas such as communication, media studies, public policy, or public health
- students preparing for advanced study in law, medicine, business, or human resources

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: communication@illinois.edu

Minimum required major course work equates to a minimum of 37 hours of Communication courses.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Superior students are encouraged to consult the departmental honors adviser about requirements and opportunities for participation in the departmental honors program.

CMN 101	Public Speaking ¹	3
or CMN 112	Oral & Written Comm II	
CMN 102	Intro to Comm Theory & Res	4

Communication Courses: Students will select an option (A or B) and a specialization (if Option B is chosen) in consultation with an undergraduate advisor in Communication. 30

OPTION A: Students who wish a general course of study will take at least one course from five of the following six areas and the remaining hours will be selected in consultation with an advisor.

OPTION B: Students who choose to concentrate within an area must take four courses from one of the six areas listed below and the remaining hours will be selected in consultation with an advisor. Students may complete more than one specialization by completing four courses in each area desired; however, individual courses may not be counted toward more than one specialization.

Special topics courses (CMN 199, CMN 396, or CMN 496) may count toward a specialization with the approval of an advisor; however, CMN 199, CMN 390, CMN 491, and CMN 493 taken as independent studies may not count toward the four required courses for a specialization.

Approved lists of courses within these areas are available from the Communication academic advisor:

- Communication and Culture
- Communication and Health
- Communication and Organizations
- Interpersonal Communication
- Mediated Communication and Technology
- Rhetoric and Public Communication

¹ CMN 111 is a prerequisite for CMN 112. Credit in CMN 111 will not count towards the minimum of 37 hours of Communication courses required for the major.

At least 15 hours of the required 37 hours in Communication must be at the 300 level or above.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

Minor in Communication

E-mail: communication@illinois.edu

The undergraduate minor in Communication is designed for students who wish to obtain a deeper understanding of communication processes and how they influence social, cultural, and political processes. It is appropriate for students majoring in a variety of disciplines in the social sciences or humanities and for students in professionally-oriented programs.

CMN 101	Public Speaking ¹	3
or CMN 112	Oral & Written Comm II	
CMN 102	Intro to Comm Theory & Res	4
At least one course from each of two areas of specialization within the Department of Communication (Communication and Culture, Communication and Health, Communication and Organizations, Interpersonal Communication, Mediated Communication and Technology, and Rhetoric and Public Communication). These courses must be numbered at the 200-level or above. A list of courses is available from the Communication undergraduate advisor.		6
Additional hours in Communication. These courses must be numbered at the 200-level or above.		6
Total Hours		19

¹ CMN 111 is a prerequisite for CMN 112. Credit in CMN 111 will not count towards the 19 hours of Communication courses required for the minor.

At least 6 hours must be at the 300-level or 400-level.

Comparative and World Literature, Program in

Lilya Kaganovsky

3080 Foreign Languages Building, 707 South Mathews, Urbana, (217) 333-4987

<http://www.complit.illinois.edu/Welcome.html>

A student who elects comparative literature as a major must complete 48 hours, including at least 12 hours in courses numbered 300 or above. The major comprises two concentrations, a Comparative Literature concentration (<http://illinois-preview.courseleaf.com/undergraduate/las/academic-units/comp-world-lit/comparative-literature-concentration>) and a World Literature concentration (<http://illinois-preview.courseleaf.com/undergraduate/las/academic-units/comp-world-lit/world-literature-concentration>) (foreign literatures in translation). Besides knowing English, the student who chooses the Comparative Literature concentration must have sufficient linguistic skill in at least one foreign language to participate in 200- to 400-level literature courses offered by the various foreign language and literature departments.

As soon as a student contemplates choosing comparative and world literature as a major, the faculty adviser should be consulted. The adviser will assist the student in selecting appropriate courses that will be especially helpful as preparation for the advanced comparative literature training beginning with the junior year. Courses in classical civilization and in literature (particularly courses dealing with works from several countries) are especially recommended at relatively early stages of study. An ample selection of such courses at the 100- and 200-levels exists in the various literature departments.

The distribution of course work allows for considerable flexibility. The major is administered by the Program in Comparative and World Literature.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: comlit@illinois.edu

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Minimum required major and supporting course work equate to 48 hours with at least 15 hours of Comparative Literature courses in the Comparative Literature concentration and 21 hours of Comparative Literature courses in the World Literature concentration.

Departmental distinction. To be eligible for distinction, a student must have at least a 3.25 cumulative grade-point average and a 3.75 grade-point average in departmental courses, complete a senior thesis (CWL 493), and receive the approval of the departmental honors committee. The departmental honors committee will determine the level of distinction to be awarded.

- Comparative Literature Concentration (p. 321)
- World Literature Concentration (p. 322)

Minor in World Literature

This minor is sponsored by the Program in Comparative and World Literature. Students must choose from either the Europe and the Americas Track or the Asia and Africa Track.

E-mail: comlit@illinois.edu

Europe and the Americas Track

CWL 241	Lit Europe & the Americas I	3
CWL 242	Lit Europe and the Americas II	3
CWL 201	Comparative Lit Studies	3
CWL 202	Literature and Ideas	3
Select two of the following:		6
CWL 395	Special Topics Comp Lit I	
CWL 441	Themes in Narrative	
CWL 461	Lit Genres and Forms	
CWL 471	International Lit Relations	
CWL 496	Special Topics in Comp Lit II	

Other advanced courses approved by the undergraduate comparative literature adviser.

Total Hours 18

Asia and Africa Track

CWL 189	Lit of Asia & Africa I	3
CWL 190	Lit of Asia & Africa II	3
CWL 201	Comparative Lit Studies	3
CWL 202	Literature and Ideas	3

Select two of the following: 6

CWL 395	Special Topics Comp Lit I	
CWL 441	Themes in Narrative	
CWL 461	Lit Genres and Forms	
CWL 471	International Lit Relations	
CWL 496	Special Topics in Comp Lit II	

Other advanced courses approved by the undergraduate Comparative Literature adviser.

Total Hours 18

Comparative Literature Concentration

Comparative Literature Courses (minimum of 15 hours required): 15

CWL 201	Comparative Lit Studies	
CWL 202	Literature and Ideas	

The remaining hours should be selected from different types of courses (e.g., CWL 114, CWL 189, CWL 190, CWL 208, CWL 241, CWL 242, CWL 441, CWL 461, CWL 471).

One Literature in the Original Language (minimum of 15 hours required): 15

Ancient or modern (including Far Eastern and African) 12 hours of which are at the 200-level or above, studied in depth and in its historical development. (Normally this is the primary literature of the student's educational background.)

Second Literature in the Original Language (minimum of 9 hours required): ¹ 9

200-level or above courses in a second literature in the original language. With the assistance of the adviser, these courses should be carefully chosen so as to correlate meaningfully with the student's primary literature. A student may center his or her interest on a cultural period such as medieval, Renaissance, neo-classical and enlightenment, or modern (nineteenth and twentieth centuries), or on genres, relations, or critical theory. ²

Single National Literature (minimum of 9 hours required) or several national literatures including comparative literature; or in other humanistic fields, such as history, philosophy, speech, art, music, psychology, sociology, theatre, anthropology, and Asian studies. Because some of the courses in these subjects are more suitable than others to balance a student's individual major in comparative literature, the student must follow the guidelines set by his or her adviser. 9

Total Hours 48

¹ *Literature in the Original Language is defined by what is currently offered by the University (i.e. mostly English, French, German and Spanish). Literatures generally taught in translation (including, but not limited to, Bengali, Chinese, Hebrew, Japanese, Polish, Russian, and Yiddish) may be chosen in consultation with the Undergraduate Advisor.*

² *If one of the literatures studied is English, a student who continues in a graduate program in comparative literature will be required to acquire a reading knowledge of a second foreign language (i.e., one foreign language for the B.A., two foreign languages for the M.A., three foreign languages for the Ph.D.).*

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

World Literature Concentration

Core sequence in Comparative Literature Courses (minimum of 18 hours required):		18
CWL 201	Comparative Lit Studies	
CWL 202	Literature and Ideas	
The remaining hours should be selected from four of the following 100-or 200-level courses: CWL 114, CWL 151, CWL 189, CWL 190, CWL 208, CWL 241, CWL 242.		
One of the following upper-level methodology courses		3
CWL 395	Special Topics Comp Lit I	
CWL 441	Themes in Narrative	
CWL 461	Lit Genres and Forms	
CWL 471	International Lit Relations	
CWL 496	Special Topics in Comp Lit II	
Area/Literature Concentrations: Courses must be chosen in consultation with the student's faculty advisor and selected from the approved list of courses housed in the department advising office. All courses chosen must be at the 200 level and above.		18
Two courses in the literatures of Europe and the Americas		
Two courses in the literatures of Asia and Africa		
Two courses chosen from the two literature groups above		
Area/Culture Concentrations:		9
3 courses, also at the 200 to 400-level, chosen in consultation with the student's faculty advisor, in other disciplines related to the student's area of concentration (e.g., anthropology, area studies, art history, cinema studies, history, music history, philosophy, religious studies, women's studies). Language courses beyond the fifth semester of study may also be used to satisfy this requirement.		
Total Hours		48

Twelve hours 300 or 400-level courses in the major must be taken on this campus. All foreign language requirements must be satisfied. A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.

School of Earth, Society, and Environment

Stephen Marshak, Director of School

152 Computing Applications Building, 605 East Springfield, Champaign, IL 61820, (217) 333-3440

<http://www.earth.illinois.edu/students/>

The major in Earth, Society, and Environmental Sustainability (ESE) offers a unique, multidisciplinary program in the College of Liberal Arts and Sciences (LAS). Students will learn about the interconnectedness of environmental, economic, and social systems of the world; the implications of our actions on the environment; factors that determine the sustainability of human institutions, organizations, cultures, and technologies; finding solutions through innovative approaches; and expanding future options by practicing environmental stewardship. Following the classical definition of sustainability, the aim is to develop citizens, businesses, and societies that meet the needs of the present without compromising the ability of future generations to do the same.

Required introductory coursework provide breadth in the essential natural and social sciences needed for interdisciplinary environmental sustainability study. The major offers two concentrations within which majors gain content expertise: Science of the Earth System, and Society and the Environment. Depth of knowledge is achieved by requiring a minimum of five advanced classes in a coherent field of study.

The major is available to both on-campus and off-campus students. On-campus students need only be eligible to be in LAS to transfer to the degree. The program is also designed so that students with an associates (or equivalent) degree, or who have sufficient previous coursework, can transfer to the University and complete a Bachelor of Science degree entirely off-campus. Students interested in completing the course off-campus, but have less than 60 hours of coursework, should consult with the program advisor.

The degree will prepare students for a variety of career paths in either the private or the public sector, as well as for graduate study. The interdisciplinary background in both scientific and human aspects of environmental problems will prepare students for a variety of positions with businesses, state and federal regulatory agencies, research institutions, consulting firms and nongovernmental education and advocacy organizations. The major also provides a platform for entry into professional schools (e.g. law, business, and public policy programs) as well as graduate study in a variety of physical science and social science disciplines, and in interdisciplinary programs related to the environment.

For the Degree of Bachelor Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: program-info@eses.uiuc.edu

Earth, Society, and Environmental Sustainability

Minimum required major and supporting courses equate to 48-58 hours.

General education: Students must complete the Campus General Education requirements.

On-campus UIUC students can transfer to this degree without any special requirements.

Off-campus students who plan to transfer to this degree should have completed, or have in progress, the following:

- the Composition 1 requirement.
- the third level of high school foreign language or second level of college foreign language.

It is highly recommended that off-campus students complete the following requirements before transferring to the online degree - students who have not completed the following requirements may have to take additional coursework (either at UIUC or elsewhere) and should consult the program advisor:

- the UIUC LAS language requirement should be satisfied (either two foreign languages at the 3rd level or one foreign language at the 4th level).
- the General Education Distribution Requirements of the College of Liberal Arts and Sciences should be completed.
- the Cognate Coursework should be completed.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students who maintain grade point averages of at least 3.3 in all courses within the major and who undertake a faculty-guided individual research project for credit in the major are recommended for graduation with distinction.

Students must complete the ESE Core requirements listed below and select one concentration in consultation with an academic advisor.

ESES Introductory Core: Students take one approved introductory or advanced course from at least four of the following five areas. Approved courses within these areas are available from the ESE advisor ¹ 12-14

Environment and the Human Response

Sustainability, Policy, and Global Change	
Earth's Physical Systems, Resources, and Hazards	
Visualizing the Earth System	
Earth's Biosphere and Ecology	
ESE coursework	6
GEOG 379	Intro to GIS Systems
ESE 200	Earth Systems
Advanced Courses	15-20
A minimum of five 300- and 400-level courses, from the approved list and in an academically coherent program approved by the advisor, are required. At least three of these five advanced courses must be listed or cross-listed as an ESE or ENSU course. Courses taken to satisfy the "ESE Introductory Core" requirement cannot simultaneously be used to satisfy the Advanced Course requirement. These courses should be used to help meet the LAS requirement of 21 hours of 300- or 400-level courses overall, and the 12 hours of 300- or 400- level courses in the major. It is strongly recommended that students complete the LAS requirement with 21 hours of 300- or 400-level courses related to the ESE curriculum.	
Select a Concentration (hours required depend on concentration chosen):	15-18
Total Hours	48-58

- **Society and the Environment (SAE) Concentration** (p. 325)
- **Science of the Earth System (SES) Concentration** (p. 324)

All students wishing to attend graduate school in any field should discuss necessary supplementary course work with their advisor as early as possible.

Twelve hours of 300- or 400-level courses must be taken on this campus.

Substitutions may be made with advisor approval.

All foreign language requirements must be satisfied.

A Major Plan of Study form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Study abroad courses may be substituted for major and minor requirements with approval of advisor.

3 hours-Economics: ECON 102	
Highly recommended: CHEM 101 or CHEM 102	

All students wishing to attend graduate school in any field should discuss necessary supplementary course work with their advisor as early as possible.

Twelve hours of 300- or 400-level courses must be taken on this campus.

Substitutions may be made with advisor approval.

All foreign language requirements must be satisfied.

A Major Plan of Study form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Study abroad courses may be substituted for major and minor requirements with approval of advisor.

¹ OR in the ESE School office OR at <http://www.earth.illinois.edu/students/guides>

Environmental Fellows Program (EFP)

EFP is a selective undergraduate minor for students interested in environmental issues and is open to students from any college or major at the university. Each Environmental Fellow takes an individual program of study to satisfy the minor. A wide range of coursework options- spanning the humanities, sciences and the arts- can be taken to satisfy the introductory and advanced coursework requirements. The minor also offers a special seminar class, restricted to EFP students (ESE 311), that examines current environmental issues. All students in the minor must complete an environmental capstone project.

To fulfill the requirements of the Environmental Fellows Program minor, students must:

- Submit an application during the fall or spring application period
- Maintain a 3.0 GPA
- Complete at least 18 hours of environmental studies classes from selected areas (See below)

For more information and a list of approved courses visit: www.earth.illinois.edu.

Questions may be addressed to Jonathan Tomkin, tomkin@illinois.edu.

Introductory course from the Earth's Physical Systems, Resources, and Hazards Area course list.	3-4
Introductory course from either the Environment and the Human Response course list or the Sustainability, Policy, and Global Change course list.	3-4
Two Advanced Courses from the approved list, at least one of which must be listed or cross listed as an ESE course.	6-8
ESE 311 Environmental Issues Today	3
Capstone Project: This is a project designed to allow students to explore an environmental interest in depth. Students earn independent study credit by working with a professor on campus on a project of their design.	3
Total Hours	18-22

Minor in Earth, Society, and Environment

The ESE minor is designed for students who desire to obtain a background in topics related to environmental studies, in order to support study and practice of their major field. A minimum of 18 hours is required.

For more information and a list of approved courses visit: www.earth.illinois.edu.

Questions may be addressed to Jonathan Tomkin, tomkin@illinois.edu.

Introductory course from the Earth's Physical Systems, Resources, and Hazards Area course list.	3-4
Introductory course from either the Environment and the Human Response or Sustainability, Policy, and Global Change Area course lists	3-4
ESE 200 Earth Systems	3
Three Advanced Courses from a list maintained by the minor advisor, at least two of which must be listed or cross listed as ESE courses	9-12
Total Hours	18-23

East Asian Languages and Cultures

Gary Xu

2090 Foreign Languages Building, 707 South Mathews, Urbana, (217) 244-1432

<http://www.ealc.illinois.edu>

The Department of East Asian Languages and Cultures offers two concentrations within the East Asian Languages and Cultures major. The goal of the East Asian Languages and Cultures Concentration is that the student gain an introductory knowledge of the civilizations of East Asia, a firm competence in an East Asian language, a solid familiarity with East Asian cultures through multiple disciplines, and a more advanced knowledge of the region including research and writing in a seminar or senior project. This concentration is useful for the student seeking a broad liberal arts education and preparation for graduate or professional study involving East Asia.

The Concentration Preparatory to the Teaching of East Asian Languages is to prepare its graduates for certification for teaching East Asian Languages (currently Mandarin Chinese or Japanese) in the public schools in Illinois.

For the Degree Bachelor of Arts in Liberal Arts and Sciences

E-mail: ealc@illinois.edu

- Concentration in East Asian Languages and Cultures (p. 329)
- Concentration Preparatory for the Teaching of East Asian Languages (p. 328)

Minor in East Asian Languages and Cultures

E-mail: ealc@illinois.edu

Web address for department: <http://www.ealc.illinois.edu>

Select one of the following:

5

CHIN 204	Intermediate Chinese II
JAPN 204	Intermediate Japanese II
KOR 204	Intermediate Korean II

Non-language courses as follows:

15

EALC 120	East Asian Civilizations
12 additional hours of East Asia-related courses (at least 6 of these hours must be at the 300 or 400 level)	

Total Hours

20

Note: Completion of CHIN 204, JAPN 204, or KOR 204 satisfies the LAS foreign language requirement.

Concentration Preparatory for the Teaching of East Asian Languages

This concentration prepares its graduates for teaching an East Asian Language (currently Mandarin Chinese or Japanese) in the public schools in Illinois.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain University of Illinois, cumulative, content area and professional education grade point averages of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages.

Minimum required course work normally equates to 89 hours.

General education: Consult the Curriculum Preparatory to the Teaching of Foreign Languages (p. 483)

Minimum hours required for graduation: A minimum of 120 hours of credit is required for graduation.

Departmental distinction: To be eligible for departmental distinction, a student must have a minimum grade point average of 3.25 overall, a 3.5 average in the major and complete an approved project or series of projects. Consult the Japanese or Chinese teacher education advisor for details.

Foreign study: Future teachers of Mandarin or Japanese are strongly encouraged to engage in one or more semesters of study abroad in China or Japan. Some of the curricular requirements may be met through the Year-in-Japan Program at Konan University or other approved programs or at an exchange program in China.

Students must complete the Professional education course sequence and one teaching area of specialization sequence.

Professional education courses. See the Curricula Preparatory to Teaching Foreign Languages 29

Teaching Area of Specialization: Japanese

JAPN 201 & JAPN 202	Elementary Japanese I and Elementary Japanese II	10
JAPN 203 & JAPN 204	Intermediate Japanese I and Intermediate Japanese II	10
JAPN 305 & JAPN 306	Advanced Japanese I and Advanced Japanese II	10
JAPN 440 & JAPN 441	Fourth Year Japanese I and Fourth Year Japanese II	6
EALC 120	East Asian Civilizations	3
EALC 250	Intro to Japanese Culture	3
Two courses in Japanese history		6
Two courses in Japanese literature		6
JAPN 460	Japanese as a 2nd Language I	3
One Japanese elective: Must be at the 300- or 400-level		3

Teaching Area of Specialization: Mandarin Chinese

CHIN 201 & CHIN 202	Elementary Chinese I and Elementary Chinese II	10
CHIN 203 & CHIN 204	Intermediate Chinese I and Intermediate Chinese II	10
CHIN 305 & CHIN 306	Advanced Chinese I and Advanced Chinese II	10
CHIN 440 & CHIN 441	Fourth-Year Chinese I and Fourth-Year Chinese II	6
EALC 120	East Asian Civilizations	3
EALC 275	Masterpieces of East Asian Lit	3
Two courses in Chinese history		6
Two courses in Chinese literature		6
CHIN 477	Chin Orth & Grm for Lng Tchg	3
One Chinese Studies elective: Must be at the 300- or 400-level		3

The total of hours for Teaching Area of Specialization may be reduced by as much as 20 hours through prerequisite credit for work equivalent to Japan or Chinese 201 through 204 taken in secondary school or by demonstrated proficiency by examination.

Concentration in East Asian Languages and Cultures

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 37-57 hours.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours.

One year of a single East Asian Language beyond the intermediate level (i.e., beyond CHIN 204 or CHIN 242; JAPN 204; KOR 204 or KOR 241).¹ 10-30

Disciplinary and period courses:² 12

EALC 120 East Asian Civilizations

One course on East Asia dealing substantially with the period before 1800

One course in East Asian history

One course in East Asian literature

Advanced courses: 12

Four non-language courses at the 300- or 400-level.

EALC 398 Colloquium in EALC (or an approved senior project.) ³ 3

- ¹ Students testing out of the advanced language requirement (306-level) must take two additional non-language courses from East-Asian-related offerings.
- ² No course may be counted more than once toward these requirements and at least two courses must be at the 200-level or above.
- ³ Students selecting the senior project option must submit to the Director of Undergraduate Study a proposal outlining the project to be undertaken, the course in which the project is to be completed and an agreement signed by the faculty member supervising the project.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Economics

Martin Perry

101 David Kinley Hall, 1407 W. Gregory, Urbana, (217) 333-2682

<http://www.economics.illinois.edu/>

Economics is a social science that studies the problems caused by scarcity and how individuals, institutions, and societies may deal with these problems. Economics shares common interests with business-oriented disciplines such as finance and business administration. Economists frequently require quantitative skills, such as calculus and statistics, to derive economic principles that are useful in forming policies designed to solve economic problems.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: econug@illinois.edu

Minimum required major and supporting course work normally equates to 55-56 hours including a minimum of 30 hours of economics courses excluding ECON 199, ECON 220, ECON 398, and ECON 399.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: A student must have a grade point average of at least 3.25 overall and at least 3.5 in economics; complete a research project (e.g., complete ECON 399); and be recommended by the faculty research adviser.

Economics Courses including:		30
ECON 102	Microeconomic Principles	
ECON 103	Macroeconomic Principles	
ECON 198	Economics at Illinois	
ECON 202	Economic Statistics I	
ECON 203	Economic Statistics II	
ECON 302	Inter Microeconomic Theory	
ECON 303	Inter Macroeconomic Theory	
11 additional hours of economics at the 300- or 400-level ¹		
Mathematics:		7-8
MATH 220	Calculus	
or MATH 221	Calculus I	
MATH 231	Calculus II	
Additional mathematics courses are recommended		
Supporting course work. 18 hours of courses outside economics but related to the student's major interest in economics (see www.economics.illinois.edu/programs/undergrad for details).		18

¹ Excluding ECON 398 and ECON 399.

For further information, see www.economics.illinois.edu/programs/undergrad

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

English

Michael Rothberg
208 English Building, 608 South Wright, Urbana, (217) 333-2391
<http://www.english.illinois.edu>

English majors at the University of Illinois take 12 courses (36 hours) from the Department of English in the study of literature, text, and culture. These courses help students develop sophisticated interpretation and composition skills through studying a wide range of cultural materials, historical periods, and literatures.

The Department of English sponsors two concentrations.

The English Concentration (p. 333) is organized to provide instruction in literature in English, literary theory and criticism, the English language, English education, film, cultural studies, and closely related fields. Students who major in English have many choices in planning a field of study, but the basic program is designed to accommodate students who seek to broaden their familiarity with our literature, to intensify their language skills for personal and professional reasons, and to learn more about literature's relationship to the other arts, history, philosophy, psychology, and the modern languages.

The English Teaching Concentration (p. 335) leads to certification to teach in Secondary School. Coursework in this concentration is largely similar to the English Concentration and based on the same core goals as the English Concentration. Students working toward earning a teaching certificate are guided toward additional coursework focused on language and composition.

The department also offers a major in Creative Writing (p. 332).

For the Degree of Bachelor of Arts in Liberal Arts and Sciences Major in Sciences and Letters Curriculum

Students must select one concentration.

- English Concentration (p. 333)
- English Teaching Concentration (p. 335)

The Department of English also offers a major in Creative Writing (p. 332).

Minor in English

E-mail: englishadvising@illinois.edu

Web address for department: www.english.illinois.edu

ENGL 200	Intro to the Study of Lit	3
ENGL 301	CriticalApproaches to Lit&Text	3
One 200-level course in British literature before 1800		3
One 200-level course in British or American literature after 1800		3
Two additional 300- or 400-level courses in English		6
One English or Creative Writing course selected in consultation with an English Department advisor		3
Total Hours		21

Creative Writing

Michael Rothberg
208 English Building, 608 South Wright, Urbana, (217) 333-2391
<http://www.english.illinois.edu>

The Creative Writing major, administered by the Department of English, combines small workshops (poetry, fiction, nonfiction) and a variety of literature courses. The result is a strong but flexible program of study that develops students' analytical and creative skills and prepares them for work of graduate study in any number of fields.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: english@english.uiuc.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required core and supporting course work normally equates to 36 hours including 15 hours of Creative Writing and 15 hours of English and American Literature.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: A student must enter the honors program with a 3.25 grade point average and complete two English honors seminars and a significant writing project in CW 455. The level of distinction is assigned by the honors committee based on work in rhetoric courses and honors seminars and on the readers' evaluations of the writing project. Interested students should consult the departmental advisor for details.

Select one of the following:

3

CW 243	Inter Expository Writing ¹
CW 208	Creative Nonfiction Writing

Creative Writing courses selected from: ² 12

CW 104	Introductory Narrative Writing
CW 106	Introductory Poetry Writing
CW 204	Intermediate Narrative Writing
CW 208	Creative Nonfiction Writing
CW 404	Advanced Narrative Writing
CW 406	Advanced Poetry Writing
CW 455	Creative Writing Tutorial

One course in Shakespeare: 3

ENGL 300	Writing About Lit Text&Culture (when offered on a Shakespeare topic)
ENGL 418	Shakespeare

English and American literature courses selected from 200-, 300- and 400-level courses. 12

Six hours of supporting coursework 6

History and Culture Coursework: Choose one of the following pairs:	
HIST 141 (or HIST 140) & HIST 142 (or HIST 143)	
HIST 255 & HIST 256	British Isles to 1688 and Britain and World Since 1688
CWL 241 & CWL 242	Lit Europe & the Americas I and Lit Europe and the Americas II
HIST 171 & HIST 172	US Hist to 1877 and US Hist Since 1877

¹ Credit is not given for RHET 233 and CW 243(formerly RHET 243). Students who have received credit for RHET 233 must take CW 208. Other students should take CW 243.

² With the written permission of a Creative Writing adviser, 3 of these 12 hours may be selected from the following courses: ENGL 380, ENGL 401, ENGL 402, ENGL 403, ENGL 481; BTW 250, BTW 261, BTW 263, BTW 271; CMN 310, CMN 415, CMN 416, CMN 417, CMN 423, CMN 432; JOUR 475; and PHIL 102.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus, of which at least three hours must be Creative Writing Courses (CW 404 or CW 406). All Creative Writing courses must be taken in sequence (CW 104 before CW 204, etc.)

All foreign language requirements must be satisfied.

English Concentration

E-mail: englishadvising@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting course work equates to 42 hours including a minimum of 36 hours of English Department courses. Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 300, ENGL 301, and 9 more hours). Twelve hours of 300- and 400-level courses in the major must be taken on this campus. All foreign language requirements must be satisfied.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in the departmental honors program should contact the English department advising office.

Topical Streams: Course descriptions are tagged to indicate the topical streams each course is a part of. These streams are not part of any requirement; the streams exist to help student guide themselves through the major. To learn more about topical streams you may be interested in studying, visit www.english.illinois.edu/undergraduate/streams.html.

Introduction to the Study of Literature, Text, and Culture

ENGL 200	Intro to the Study of Lit (prerequisite for other English courses; can be taken at the same time as a course that satisfies the Composition I requirement) ¹	3
ENGL 209	British Lit to 1800	3
ENGL 255	Survey of American Lit I	3

Textual Analysis in Action

ENGL 301	Critical Approaches to Lit & Text	3
ENGL 300	Writing About Lit Text & Culture (fulfills the university's Advanced Composition requirement)	3

Period Courses (American, British, transatlantic, anglophone, etc.) ²

At least two courses focused on literature, text, and/or culture in two or more of the following categories: 6

Medieval (before 1550)		
Shakespeare		
Early modern (1550-1660 other than Shakespeare)		
The long eighteenth century (1600-1800)		
One course focused on literature, text and/or culture in the category 1800-1900		3

Additional Coursework ^{2,3}

At least four courses chosen from those controlled by or crosslisted with the Department of English (Business and Technical Writing, Creative Writing, and English). 12

One course must focus on race/ethnicity/indigeneity/post-coloniality/sexuality. This course can be used to fulfill part of the Textual Analysis, Period Courses, or Additional Coursework requirements. ²

Supporting Coursework--History and Culture Coursework: Choose one of the following pairs: 6

CWL 241 & CWL 242	Lit Europe & the Americas I and Lit Europe and the Americas II	
HIST 141 & HIST 142	Western Civ to 1660 and Western Civ Since 1660	
HIST 171 & HIST 172	US Hist to 1877 and US Hist Since 1877	
HIST 255 & HIST 256	British Isles to 1688 and Britain and World Since 1688	

Total Hours 42

¹ Students are encouraged to take ENGL 209 and ENGL 255 as early as possible after completing ENGL 200.

² Chosen from the list maintained in the Department of English.

³ Student may count 1 Independent Study course (ENGL 290, ENGL 390 or BTW 290) toward the additional coursework requirement.

⁴ Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 300, ENGL 301, and 9 more hours.)

English Teaching Concentration

www.english.illinois.edu

This concentration is designed for students preparing to teach English at the secondary level.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

E-mail: englishadvising@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required concentration and supporting course work normally equates to 78 hours: 36 hours of English Department courses, 6 hours of supporting coursework (History and Culture Coursework), and 37-38 hours of courses from the Teaching Education Minor in Secondary School Teaching. Twelve hours of 300- and 400-level courses in the major must be taken on this campus. All foreign language requirements must be satisfied.

General education: Students must complete the Campus General Education requirements. In addition students must take a speech performance course, CMN 101, or course sequence CMN 111 and CMN 112. Completion of the CMN 111/CMN 112 sequence also satisfies the Campus Composition I requirement.

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in the departmental honors program should contact the English department advising office.

Prerequisites to transfer to the Teaching Concentration. In addition to EPSY 201 and EPS 201, students must also complete ENGL 200 and at least nine hours from ENGL 209, ENGL 210, ENGL 255, or ENGL 256 prior to transfer into the Teaching Concentration.

Note: In addition to the requirements for the concentration listed below, students must complete the Teaching Education Minor in Secondary School Teaching (<http://provost.illinois.edu/ProgramsOfStudy/2012/fall/programs/undergrad/education/secondary.html>) (37-38 hours). Conferral of the degree of Bachelor of Arts in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Affairs Office. While it is possible to complete this program in 8 semesters, many students may require an extra semester or two.

Topical Streams: Course descriptions are tagged to indicate the topical streams each course is a part of. These streams are not part of any requirement; the streams exist to help student guide themselves through the concentration. To learn more about topical streams you may be interested in studying, visit www.english.illinois.edu/undergraduate/streams.html.

The professional education sequence as approved by the Council on Teacher Education:		
5 semester hours in the fall of the junior year		
6 in the spring of the junior year		
8 in the fall of the senior year		
12 in the spring of the senior year (combining courses in pedagogy and the student teaching experience)		
Total Hours		80-81
¹	Students are encouraged to take ENGL 209 and ENGL 255 as early as possible after completing ENGL 200.	
²	Chosen from the list maintained in the Department of English.	
³	Student may count 1 Independent Study course (ENGL 290, ENGL 390 or BTW 290) toward the additional coursework requirement.	

French and Italian

Marcus Keller

2090 Foreign Languages Building, 707 South Mathews Avenue, Urbana, (217) 333-2020

<http://www.french.illinois.edu>

The Department offers three majors- French, Italian and Teaching of French- and two minors-French and Italian.

The **BALAS in French** allows students to specialize in one of the following concentrations:

The French Studies concentration focuses on courses in literature, language, linguistics, and civilization.

The Commercial French Studies concentration combines a focus in French with appropriate courses in business.

The **BALAS in Italian** allows students to study Italian language, literature, film, linguistics, and cultural studies.

The **B.A. in the Teaching of French** prepares students to teach French.

Study Abroad opportunities enhance the undergraduate education in French and Italian.

The **minors in French and Italian** offer a unique opportunity for students to enhance their education with the study of language and culture courses.

FR 485	Commercial & Econ French I	3
FR 486	Commercial & Econ French II	3
Approved supporting course work in business administration, finance, and/or economics selected in consultation with the concentration adviser.		15
Western civilization. Select from:		6-8
CWL 241 & CWL 242	Lit Europe & the Americas I and Lit Europe and the Americas II	
HIST 140 (or HIST 141) & HIST 142 (or HIST 143)		
FR 435 & FR 436	French Civilization I and French Civilization II	

ARTH 111 Ancient to Medieval Art
& ARTH 112 and Renaissance to Modern Art

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.

French Studies Concentration

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

Email: french@illinois.edu

Minimum required major and supporting course work normally equates to 45 hours beyond the 100-level plus the Western Civilization requirement.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: A student must have at least a 3.45 LAS cumulative grade point average, complete a senior thesis FR 492, and complete two additional advanced-level courses in French or in supporting course work. Consult the honors adviser for details.

FR 205	Oral French	2
FR 207	Grammar and Composition	3
FR 208	Critical Writing and Reading	3
FR 209	Intro to French Lit I	3
FR 210	Intro to French Lit II	3
French Language Courses		7
FR 213	French Phonetics	
FR 217		
FR 414	Advanced Grammar and Style	
French Literature Courses: Four courses in French Literature (can include FR 443 - Studies in French, when dealing with a literary topic and FR 479 - Studies in Francophonie)		12
Two courses in French language, linguistics, film studies, culture or literature		6
Western Civilization requirement. Select from:		6-8
FR 435 & FR 436	French Civilization I and French Civilization II	
CWL 241 & CWL 242	Lit Europe & the Americas I and Lit Europe and the Americas II	
HIST 140 (or HIST 141) & HIST 142 (or HIST 143)		
ARTH 111 & ARTH 112	Ancient to Medieval Art and Renaissance to Modern Art	
Total Hours		45

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.

Italian

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: french@illinois.edu

Minimum required major and supporting course work normally equates to 45-51 hours including at least 30 hours in Italian courses beyond 104.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department's honors adviser.

Select 18 credits (max) from the following: 18

ITAL 200	Intro Italian Literature
ITAL 210	Practical Review Italian
ITAL 220	Contemp Italian Oral & Written
ITAL 240	Italy Middle Ages & Renaiss
ITAL 270	Introduction to Italian Cinema
ITAL 310	Advanced Grammar
ITAL 380	Ital Business & Profess
ITAL 390	Spec Topics Italian Studies
ITAL 491	Honors Senior Thesis

Select 12 credits (min) from the following: 12

ITAL 406	Italian Culture
ITAL 413	Dante
ITAL 414	Petrarch & Boccaccio
ITAL 420	Masterpieces Renaiss Lit
ITAL 440	Modern Italian Novel
ITAL 450	Italian Syntax & Phonology
ITAL 470	Topics in Italian Cinema
ITAL 490	Italy, Modernity & Theory

Supporting course work or a minor chosen in consultation with an adviser, in one related area (or a combination, with no fewer than 8 hours in each). Areas may include, for example, any other language and literature, history, political science, biology (premed), international law (prelaw), economics, finance, business administration, education, architecture, fine arts, journalism.¹ 15-18

Course work in Italian must include at least one course in each of the following areas: advanced language/linguistics (Choose from: ITAL 310, ITAL 380, ITAL 450), literature (Choose from: ITAL 200, ITAL 413, ITAL 414, ITAL 420, ITAL 440), and culture (Choose from: ITAL 240, ITAL 270, ITAL 406, ITAL 470, or ITAL 490).

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

¹ A minor consists of 16-21 hours.

Minor in French

FR 205	Oral French	2
FR 207	Grammar and Composition	3
FR 208	Critical Writing and Reading	3
FR 209	Intro to French Lit I	3
FR 210	Intro to French Lit II	3
FR 213	French Phonetics	2
Select one of the following:		3
FR 435	French Civilization I	
FR 436	French Civilization II	
One other 300 or 400-level French course		3
Total Hours		22

Minor in Italian

E-mail: french@illinois.edu

Minimum of 19 hours of course work in Italian language and literature beyond ITAL 103 including:

ITAL 104	Intermediate Italian II	4
----------	-------------------------	---

Minimum of 15 hours of electives at the 200- to 400-level. Choose from the following: ¹ 15

ITAL 200	Intro Italian Literature	
ITAL 210	Practical Review Italian	
ITAL 220	Contemp Italian Oral & Written	
ITAL 240	Italy Middle Ages & Renaiss	
ITAL 270	Introduction to Italian Cinema	
ITAL 310	Advanced Grammar	
ITAL 380	Ital Business & Profess	
ITAL 390	Spec Topics Italian Studies	
ITAL 406	Italian Culture	
ITAL 413	Dante	
ITAL 414	Petrarch & Boccaccio

ITAL 450	Italian Syntax & Phonology	
ITAL 470	Topics in Italian Cinema	
ITAL 490	Italy, Modernity & Theory	
ITAL 491	Honors Senior Thesis	

Total Hours 19

¹ At least 6 of the 15 hours must be taken from among the following advanced-level courses: ITAL 310, ITAL 380, ITAL 406, ITAL 413, ITAL 414, ITAL 420, ITAL 440, ITAL 450, ITAL 470, ITAL 490.

Gender and Women's Studies

Stephanie Foote

1205 W. Nevada Street, Urbana, (217) 333-2990

www.gws.illinois.edu

The mission of the Department of Gender & Women's Studies is to examine relationships of power, identity and transformation by:

1. reading narratives and representations
2. questioning institutions and cultures
3. challenging discrimination and inequity; and
4. understanding racialized, sexualized, and queer bodies

A major in Gender & Women's Studies encourages students to think broadly about intersections of race, gender and sexuality while challenging discrimination and inequities. Students majoring in Gender & Women's Studies gain foundational skills to examine gender, race, class, ethnicity, religion and sexuality in relation to local, national, colonial, post-colonial and transnational contexts. The major forges together an array of feminist and intersectional approaches which draw upon social sciences, humanities, sciences, arts and community engagement. Students will sharpen their abilities to critically analyze gender, approach problems theoretically, and utilize cross-disciplinary research methods to question institutions and cultures.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: gws@illinois.edu

www.gws.illinois.edu

Minimum required courses: 33 hours.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction. To be eligible for graduation with distinction, a student must have a college grade-point average of 3.5, a Gender and Women's Studies Concentration grade point average of 3.5, complete the Senior Seminar, GWS 498, with a grade of A, and complete a semester paper in GWS 498 that is deemed worthy of "distinction" by the instructor.

High distinction. To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a Gender and Women's Studies Concentration grade-point average of 3.7, complete the Senior Seminar, GWS 498, with a grade of A, and complete a semester paper in GWS 498 that is deemed worthy of "high distinction" by the instructor.

Advising: The Department of Gender and Women's Studies provides advising for students to help plan a coherent program of study.

Required Courses

GWS 201	Race, Gender & Power	3
GWS 202	Sexualities	3
GWS 498	Senior Seminar	3
GWS 350	Feminist & Gender Theory	3
or GWS 370	Queer Theory	

Additional Coursework ¹

At least 15 additional hours of coursework offered by the Gender & Women's Studies Department, with no more than 3 hours at the 100 or 200 level. Required courses are offered by the Department of Gender & Women's Studies and are on an approved list maintained in the department office and with the GWS advisor. 15

Area Electives

Two courses, at least one of which must be transnational, non-U.S. No more than one may be counted from the 100 or 200 level. For a list of approved courses contact the GWS department or the GWS advisor. 6

Total Hours 33

¹ Topics courses (GWS 199, GWS 295, GWS 395, GWS 495) may count up to 3 hours toward the additional coursework with consent of the GWS advisor. GWS 390 or GWS 490 may count up to 3 hours toward additional coursework with consent of the GWS advisor.

Twelve hours of 300- and 400-level courses must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

- Minor in Gender and Women's Studies (p. 344)
- Minor in LGBT/Queer Studies (p. 344)

Minor in Gender and Women's Studies

A minor in GWS provides complementary tools for many majors in the humanities, arts and sciences. The minor advocates actively reading, questioning, challenging, and understanding racialized, sexualized, and gendered bodies. The Department of Gender and Women's Studies must approve a student's minor course plan. Students must register their minor with the Gender and Women's Studies advisor.

E-mail: gws-email@illinois.edu

Select two of the following:	6
GWS 201 Race, Gender & Power	
GWS 202 Sexualities	
GWS 350 Feminist & Gender Theory	
Additional Coursework- At least 9 additional hours of coursework offered by the Gender and Women's Studies Department at the 300- or 400-level. Required courses consist of a selected list of courses offered by the Department of Gender & Women's Studies; they are on an approved list maintained in the department office and with the GWS advisor. ¹	9
3 hours of area electives at any level. For a list of approved courses contact the GWS department office or the GWS advisor.	3
Total Hours	18

¹ Topics courses (GWS 395, GWS 495) may count up to 3 hours toward additional coursework with consent of the GWS advisor. GWS 390 or GWS 490 may count up to 3 hours toward additional coursework with consent of the GWS advisor.

At least 6 hours of advanced coursework must be distinct from credit earned for the student's major or another minor.

Minor in LGBT/Queer Studies

The LGBT/Queer Studies minor provides students the opportunity to explore how various political, social, and cultural definitions of sexual identities and their expression have been constructed and challenged in different places and points in time. Attention is given to queer politics, and interactions with nation, race, ethnicity, and gender. A minor in LGBT/Queer Studies provides complementary tools for many majors in the humanities, arts and sciences.

The Department of Gender and Women's Studies must approve a student's minor course plan. Students must register their minor with the Gender and Women's Studies advisor.

GWS 202 Sexualities	3
or GWS 255 Queer Lives, Queer Politics	
GWS 370 Queer Theory	3
Additional Coursework- Select three of the following: ¹	9
GWS 325 Lesbian/Queer Media Cultures	
GWS 385 Transnational Sexualities	
GWS 387 History of Sexuality in U.S.	
GWS 459 Gender, Sex, & Postcoloniality	
GWS 467 Locating Queer Culture	
GWS 470 Transgender Studies	
GWS 478 Sex, Power and Politics	
Area electives at any level. For a list of approved courses contact the GWS Department office or the GWS advisor.	3
Total Hours	18

¹ Topics courses (GWS 395, GWS 495) may count up to 3 hours toward additional coursework with consent of the GWS advisor. GWS 390 or GWS 490 may count up to 3 hours toward additional coursework with consent of the GWS advisor.

At least 6 hours of advanced coursework must be distinct from credit earned for the student's major or another minor.

Students may choose to major in Gender & Women's Studies and Minor in LGBT/Queer Studies, but classes may not count towards both.

Geography and Geographic Information Science

Sara McLafferty

255 Computing Applications Building, 605 East Springfield, Champaign, IL 61820, (217) 333-1880

www.geog.illinois.edu

The Department of Geography and Geographic Information Science offers four areas of undergraduate specialization.

General Geography (<http://www.geog.illinois.edu/undergrad/general>)

Geography majors study how space on the earth's surface is arranged and occupied. Majors in the General Geography track can sample courses from different subfields of geography without having to choose one specialty of the discipline. Upon completion, the students are prepared for a number of diverse employment opportunities, or for further studies in our graduate program in geography.

Geographic Information Science (GIS) (<http://www.geog.illinois.edu/undergrad/gis>)

The GIS program emphasizes the creation, use and analysis of digital geographic information to examine economic, environmental, physical and social phenomena. The GIS program provides students with in-depth training in contemporary software packages to prepare them for careers in the field. There is growing demand for professional knowledge of the earth's systems and the use of geographic information systems to enhance business, protect the environment and manage the massive amounts of spatial data now widely available on the internet. The U.S. Department of Labor has identified geospatial technologies as one of the fastest-growing domestic job sectors.

Human Geography (<http://www.geog.illinois.edu/undergrad/human>)

The Human Geography option gives students an opportunity to pursue specialization in the social science aspect of modern geography. The curriculum includes the systematic study of human social organization and its environmental consequences through patterns and processes. Employment opportunities for the Human Geographer include: urban and regional planning, transportation, marketing, real estate, tourism, and international business.

Physical Geography (<http://www.geog.illinois.edu/undergrad/physical>)

The Physical Geography option is for those wishing to specialize in the earth science emphasis of modern geography. Patterns of climates, land forms, vegetation, soils, and water are all included in this option.. As a graduate, Physical Geography majors will be equipped for careers in weather forecasting, land and water resources management, rangelands, and river management.

The department also offers a minor in Geography and GIS. The minor will expose students to a comprehensive selection of courses embracing our three broad areas of study: human geography, physical/environmental geography, and geographic information science.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: geograph@illinois.edu

Minimum of at least 35 hours of Geography and Geographic Information Science courses are required for the major.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction. All students majoring in Geography and Geographic Information Science who have maintained a University grade point average of 3.25 and who satisfactorily complete an independent project (GEOG 391) in their senior year will be eligible to graduate with distinction. Students should consult their advisors regarding distinction requirements as soon as they enter the major (no later than the end of their junior year).

Students must complete the core requirements listed below and select one concentration in consultation with an academic advisor.

- General Geography Concentration (p. 347)
- Geographic Information Science Concentration (p. 348)
- Human Geography Concentration (p. 349)
- Physical Geography Concentration (p. 350)

Geography and Geographic Information Science Core

Select one of the following: ¹

3-4

ATMS/GEOG 100	Introduction to Meteorology
GEOG 103	Earth's Physical Systems
GEOG 222	Big Rivers of the World

Select one of the following:	3-4
GEOG 101	Global Development&Environment
GEOG 104	Social and Cultural Geography
GEOG 105	The Digital Earth
GEOG 106	Geographies of Globalization
GEOG 110	Geography of Intl Conflicts
GEOG 210	Contemp Social & Env Problems
Choose one of the following:	4
GEOG 371	Spatial Analysis
GEOG 379	Intro to GIS Systems
Total Hours	10-12

¹ Students in the Physical Geography Concentration may fulfill the core by completing *ATMS 100* and *GEOG 103* and one of the five courses: *GEOG 101*, *GEOG 104*, *GEOG 105*, *GEOG 106* and *GEOG 110*, with *GEOG 371* or *GEOG 379* not required.

For all concentrations: Students are strongly encouraged to elect *GEOG 473*. Students are also encouraged to elect one or more of the following techniques courses as part of their coursework: *GEOG 280*, *GEOG 371*, *GEOG 373*, *GEOG 390*, *GEOG 473*, *GEOG 476*, *GEOG 477*, *GEOG 478*, *GEOG 479*, and *GEOG 480*.

Minor in Geography and GIS

The minor in Geography and GIS will expose students to a comprehensive selection of courses embracing our three broad areas of study: human geography, physical/environmental geography, and geographic information science. Students select 6 hours at the 100 level, then 3 hours each from the human, physical/environmental, and geospatial sub-disciplines (as listed below), and then 3 additional hours from any of the three sub-disciplines for a total of 18 credits. At least 6 hours total must be at the 300 or 400 level.

Two courses selected from the following:	6
ATMS/GEOG 100	Introduction to Meteorology
GEOG 101	Global Development&Environment
GEOG 103	Earth's Physical Systems
GEOG 104	Social and Cultural Geography
GEOG 105	The Digital Earth
GEOG 106	Geographies of Globalization
GEOG 110	Geography of Intl Conflicts
One course in human geography, selected from the following:	3
GEOG 204	Cities of the World
GEOG 205	Business Location Decisions
GEOG 224	Geog Patterns of Illinois
GEOG 310	Political Geography
GEOG 350	Sustainability and the City
GEOG 356	Geography of South Asia
GEOG 373	Spring Field Course
GEOG 384	Population Geography
GEOG 410	Geography of Dev and Underdev
GEOG 438	Geography of Health Care
GEOG 455	Geog of Sub-Saharan Africa
GEOG 465	Transp and Sustainability
GEOG 471	Recent Trends in Geog Thought
GEOG 483	Urban Geography
One course in physical/environmental geography, selected from the following:	3
GEOG 210	Contemp Social & Env Problems
GEOG 215	Resource Conflicts
GEOG 222	Big Rivers of the World
ESE 320	Water Planet, Water Crisis

GEOG 373	Spring Field Course	
GEOG 381	Environmental Perspectives	
NRES/GEOG 401	Watershed Hydrology	
GEOG 406	Fluvial Geomorphology	
GEOG 408	Watershed Analysis	
GEOG 412	Geospatial Tech & Society	
GEOG 468	Biological Modeling	
GEOG 481	Intl Environ Cooperation	
GEOG 493	Democracy and Environment	
GEOG 496	Climate & Social Vulnerability	
One course in geographic information science, selected from the following:		3
GEOG 371	Spatial Analysis	
GEOG 379	Intro to GIS Systems	
GEOG 380	GIS II: Spatial Prob Solving	
GEOG 412	Geospatial Tech & Society	
PATH 439	Health Applications of GIS	
GEOG 460	Anal & Interp Aerial Photo	
GEOG 473	Map Compilation and Construct	
GEOG 476	Applied GIS to Environ Studies	
GEOG 477	Introduction to Remote Sensing	
GEOG 478	Techniques of Remote Sensing	
GEOG 479	Advanced Topics in GIS	
GEOG 480	Principles of GIS	
One 200-400 level course selected from any of the above.		3
Total Hours		18

At least 6 hours total must be at the 300 or 400 level.

General Geography Concentration

Geography and Geographic Information Science Core Requirements:

Select one of the following:		3-4
ATMS/GEOG 100	Introduction to Meteorology	
GEOG 103	Earth's Physical Systems	
GEOG 222	Big Rivers of the World	
Select one of the following:		3-4
GEOG 101	Global Development&Environment	
GEOG 104	Social and Cultural Geography	
GEOG 105	The Digital Earth	
GEOG 106	Geographies of Globalization	
GEOG 110	Geography of Intl Conflicts	
GEOG 210	Contemp Social & Env Problems	
Choose one of the following:		4
GEOG 371	Spatial Analysis	
GEOG 379	Intro to GIS Systems	
Total Hours		10-12

General Geography Concentration Requirements:

Geography and Geographic Information Science courses, selected from 200- to 400-level courses, of which 6 hours must be at the 300 or 400 level 25-27

For all concentrations: Students are strongly encouraged to elect GEOG 473 . Students are also encouraged to elect one or more of the following techniques courses as part of their coursework: GEOG 280, GEOG 371, GEOG 373, GEOG 390, GEOG 473, GEOG 476, GEOG 477, GEOG 478, GEOG 479, and GEOG 480.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Geographic Information Science Concentration

Geography and Geographic Information Science Core Requirements:

Select one of the following:	3-4
ATMS/GEOG 100	Introduction to Meteorology
GEOG 103	Earth's Physical Systems
GEOG 222	Big Rivers of the World
Select one of the following:	3-4
GEOG 101	Global Development&Environment
GEOG 104	Social and Cultural Geography
GEOG 105	The Digital Earth
GEOG 106	Geographies of Globalization
GEOG 110	Geography of Intl Conflicts
GEOG 210	Contemp Social & Env Problems
Choose one of the following:	4
GEOG 371	Spatial Analysis
GEOG 379	Intro to GIS Systems
Total Hours	10-12

Geographic Information Science Concentration Requirements:

Students must take one of these courses as part of the core requirements and the other as part of the GIS concentration requirements:	4
GEOG 371	Spatial Analysis
GEOG 379	Intro to GIS Systems
GEOG 380	GIS II: Spatial Prob Solving
Select one of the following courses:	3
INFO 103	Introduction to Programming
CS 105	Intro Computing: Non-Tech
Other Computer Science course approved by Department's Advisor	
Select a minimum of three courses from the following:	9-11
GEOG 205	Business Location Decisions
GEOG 412	Geospatial Tech & Society
PATH/GEOG 439	Health Applications of GIS
GEOG 460	Anal & Interp Aerial Photo
GEOG 468	Biological Modeling
GEOG 473	Map Compilation and Construct
GEOG 476	Applied GIS to Environ Studies
GEOG 477	Introduction to Remote Sensing
GEOG 478	Techniques of Remote Sensing
GEOG 479	Advanced Topics in GIS
GEOG 480	Principles of GIS
GEOG 489	Programming for GIS

Select two additional Geography and Geographic Information Science courses from the Human Geography Concentration and/or Physical Geography Concentration course lists	6-8
--	-----

Required total concentration hours	26
---	-----------

For all concentrations: Students are strongly encouraged to elect GEOG 473. Students are also encouraged to elect one or more of the following techniques courses as part of their coursework: GEOG 280, GEOG 371, GEOG 373, GEOG 390, GEOG 473, GEOG 476, GEOG 477, GEOG 478, GEOG 479, and GEOG 480.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Human Geography Concentration

Geography and Geographic Information Science Core Requirements:

Select one of the following:	3-4
------------------------------	-----

ATMS/GEOG 100	Introduction to Meteorology
GEOG 103	Earth's Physical Systems
GEOG 222	Big Rivers of the World

Select one of the following:	3-4
------------------------------	-----

GEOG 101	Global Development&Environment
GEOG 104	Social and Cultural Geography
GEOG 105	The Digital Earth
GEOG 106	Geographies of Globalization
GEOG 110	Geography of Intl Conflicts
GEOG 210	Contemp Social & Env Problems

Choose one of the following:	4
------------------------------	---

GEOG 371	Spatial Analysis
GEOG 379	Intro to GIS Systems

Total Hours	10-12
-------------	-------

Human Geography Concentration Requirements:

200-to 400-level Geography and Geographic Information Science courses (of which at least 6 hours must be at the 300 or 400 level) selected from the following:	25-27
--	-------

GEOG 204	Cities of the World
GEOG 205	Business Location Decisions
GEOG 210	Contemp Social & Env Problems
GEOG 224	Geog Patterns of Illinois
GEOG 310	Political Geography
ESE 320/GEOG 370	Water Planet, Water Crisis
GEOG 371	Spatial Analysis
GEOG 373	Spring Field Course
GEOG 381	Environmental Perspectives
GEOG 384	Population Geography
GEOG 390	Individual Study
GEOG 391	Honors Individual Study
GEOG 394	Special Topics Social Geog
GEOG 410	Geography of Dev and Underdev
GEOG 412	Geospatial Tech & Society
ATMS/GEOG 421	Earth Systems Modeling
LA 427	Amer Vernacular Cultural Land

GEOG 438	Geography of Health Care
PATH/GEOG 439	Health Applications of GIS
UP/GEOG 446	Sustainable Planning Seminar
GEOG 455	Geog of Sub-Saharn Africa
GEOG 465	Transp and Sustainability
GEOG 466	Environmental Policy
GEOG 468	Biological Modeling
GEOG 471	Recent Trends in Geog Thought
GEOG 473	Map Compilation and Construct
GEOG 476	Applied GIS to Environ Studies
GEOG 477	Introduction to Remote Sensing
GEOG 478	Techniques of Remote Sensing
GEOG 479	Advanced Topics in GIS
GEOG 481	Intl Environ Cooperation
GEOG 483	Urban Geography

For all concentrations: Students are strongly encouraged to elect GEOG 473. Students are also encouraged to elect one or more of the following techniques courses as part of their coursework: GEOG 280, GEOG 371, GEOG 373, GEOG 390, GEOG 473, GEOG 476, GEOG 477, GEOG 478, GEOG 479, and GEOG 480.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Physical Geography Concentration

Geography and Geographic Information Science Core Requirements:

Select one of the following: ¹	3-4
ATMS 100	Introduction to Meteorology
GEOG 103	Earth's Physical Systems
GEOG 222	Big Rivers of the World
Select one of the following:	3-4
GEOG 101	Global Development&Environment
GEOG 104	Social and Cultural Geography
GEOG 105	The Digital Earth
GEOG 106	Geographies of Globalization
GEOG 110	Geography of Intl Conflicts
GEOG 210	Contemp Social & Env Problems
Choose one of the following:	4
GEOG 371	Spatial Analysis
GEOG 379	Intro to GIS Systems
Total Hours	10-12

¹ Students in the Physical Geography Concentration may fulfill the core by completing *ATMS 100 and GEOG 103 and one of the five courses: GEOG 101, GEOG 104, GEOG 105, GEOG 106 and GEOG 110, with GEOG 371 or GEOG 379 not required.*

Physical Geography Concentration Requirements:

200- to 400-level Geography and Geographic Information Science courses (of which at least 6 hours must be at the 300 or 400 level) selected from the following: 25-27

GEOG 210	Contemp Social & Env Problems
GEOG 222	Big Rivers of the World

ESE 320/GEOG 370	Water Planet, Water Crisis
GEOG 371	Spatial Analysis
GEOG 373	Spring Field Course
GEOG 381	Environmental Perspectives
GEOG 390	Individual Study
GEOG 391	Honors Individual Study
NRES/GEOG 401	Watershed Hydrology
GEOG 406	Fluvial Geomorphology
GEOG 408	Watershed Analysis
GEOG 412	Geospatial Tech & Society
ATMS/GEOG 421	Earth Systems Modeling
GEOG 460	Anal & Interp Aerial Photo
GEOG 468	Biological Modeling
GEOG 471	Recent Trends in Geog Thought
GEOG 473	Map Compilation and Construct
GEOG 476	Applied GIS to Environ Studies
GEOG 477	Introduction to Remote Sensing
GEOG 478	Techniques of Remote Sensing
GEOG 479	Advanced Topics in GIS
GEOG 480	Principles of GIS
GEOG 481	Intl Environ Cooperation

All students in this concentration must take the following courses:

12-14

MATH 220	Calculus
or MATH 221	Calculus I
Select one of the following:	
PHYS 101	College Physics: Mech & Heat
or PHYS 211	University Physics: Mechanics
Select one of the following:	
CHEM 102 & CHEM 103	General Chemistry I and General Chemistry Lab I
or	
CHEM 104 & CHEM 105	General Chemistry II and General Chemistry Lab II

Required total concentration hours

37

For all concentrations: Students are strongly encouraged to elect GEOG 473 . Students are also encouraged to elect one or more of the following techniques courses as part of their coursework: GEOG 280, GEOG 371 , GEOG 373, GEOG 390, GEOG 473, GEOG 476, GEOG 477, GEOG 478, GEOG 479and GEOG 480

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Geology

Tom Johnson

156 Computing Applications Building, 605 East Springfield, Champaign, IL 61820, (217) 333-3540

<http://www.geology.illinois.edu>

The **Sciences and Letters Curriculum major in Geology**, administered by the Department of Geology, is designed for students who want a more flexible course of study than is provided by the Specialized Curriculum in Geology and Geophysics. It may be used by those wishing to obtain a more liberal education and/or background in geology for use in fields such as anthropology, business, mineral economics, regional planning, journalism, law, sales, or library and information science. It is not intended to prepare a student for graduate work in the geological sciences unless the student selects additional courses in mathematics, chemistry, and physics comparable to those required in the Specialized Geology and Geophysics Curriculum. Students must choose one concentration: Geology, Earth and Environmental Sciences, or Earth Science Teaching. The Earth Science Teaching Concentration is designed for students preparing to teach earth science at the secondary school level.

The **Specialized Curriculum in Geology and Geophysics** is designed for students who plan to pursue graduate study in geology or geophysics or who wish to work professionally in the environmental field upon obtaining the bachelor's degree. It consists of geology, geophysics, and environmental geology concentrations, and offers more training in geology and related science than is required of students who make geology their major in the Sciences and Letters Curriculum. Students must choose one concentration: Geology, Geophysics, or Environmental Geology.

The Department of Geology also sponsors the Minor in Geology.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: geology@illinois.edu

Minimum required major and supporting course work normally equates to 47-52 hours including at least 29 hours in Geology and 18 hours of supporting course work selected in consultation with an adviser

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students who maintain grade point averages of at least 3.5 in all geology courses and 3.0 in all other science and mathematics courses and who complete an acceptable senior thesis, including at least four hours of credit in GEOL 492 or GEOL 493, are recommended for graduation with distinction.

Select one concentration in consultation with an adviser.

- Earth and Environmental Science Concentration (p. 355)
- Earth Science Teaching Concentration (p. 353)
- Geology Concentration (p. 356)

For the Degree of Bachelor of Science in Geology

Major in Specialized Curriculum in Geology and Geophysics

Graduation requires a grade point average of at least 2.0 overall and a 2.0 average in all required science and technical courses (geology, physics, mathematics, chemistry, and technical requirements listed below). The Department of Geology will supply upon request a Guide for Geology Undergraduates giving more information about the curriculum.

E-mail: geology@illinois.edu

Web address for department: www.geology.illinois.edu

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 126 hours

Departmental distinction: Students who maintain a grade point average of at least 3.5 in all geology courses and 3.0 in all other science and mathematics courses and who complete an acceptable senior thesis, including at least 4 hours credit in GEOL 492 or GEOL 493, are recommended for graduation with distinction.

Select one concentration in consultation with an adviser.

- Geology Concentration (p. 357)
- Geophysics Concentration (p. 358)
- Environmental Geology Concentration (p. 355)

Minor in Geology

The geology minor is designed for students who desire a significant background in Geology to support study and practice of their major field. Selection of courses at the 300- or 400- level will depend on the major and interests of the student.

E-mail: geology@illinois.edu

Web address for department: www.geology.illinois.edu

GEOL 107	Physical Geology	4
GEOL 208	History of the Earth System ¹	4
Select at least 10 hours of advanced geology courses from the following:		10-11
GEOL 333	Earth Materials and the Env	
GEOL 380	Environmental Geology	
400-level courses taught by the Department of Geology		
Total Hours		18-19

¹ Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

Earth Science Teaching Concentration within the Sciences and Letters Curriculum

Completion of this concentration fulfills state certification requirements to teach both earth science and general science. In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

E-mail: geology@illinois.edu

Web address for department: www.geology.illinois.edu

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required course work normally equates to 56-60 hours

General education: Students must complete the Campus General Education requirements. In addition, students must take one of the following speech performance courses: CMN 101, CMN 113, CMN 321, or CMN 323.

Minimum hours required for graduation: 120 hours

Departmental distinction: The student must have a grade-point average of at least 3.5 in all geology courses as well as all courses in the Teacher Education Minor and a GPA of at least 3.0 in all other science and mathematics courses and must present evidence of exemplary teaching.

Prerequisites to transfer to the Teaching Concentration (must be completed or be in progress):

EPSY 201	Educational Psychology	3
EPS 201	Foundations of Education	3
or EPS 202	Foundations of Education-ACP	
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
One of the following:		4-5
MATH 220	Calculus	
MATH 221	Calculus I	

MATH 234	Calculus for Business I	
GEOL 107	Physical Geology	4
GEOL 208	History of the Earth System	4
GEOL 333	Earth Materials and the Env	4

In addition, the student is required to pass the State Basic Skills Test before application to the teaching minor.

Requirements

In addition to the requirements for the concentration listed below, students must complete the Teacher Education Minor in Secondary School Teaching (<http://illinois.dev6.leapfrog.com/2012/fall/programs/undergrad/education/secondary.html>) (37 - 38 hours). See the College of Education section for requirements of the minor - www.ed.uiuc.edu/CTE. (<http://www.ed.uiuc.edu/CTE>) Conferral of the degree of Bachelor of Science in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Affairs Office. Ordinarily, all students will require 10 semesters to complete this program.

Select one group of courses: 5-6

¹ Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

² Students can substitute GEOL 333 with GEOL 432.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

Earth and Environmental Science Concentration within the Sciences and Letters Curriculum

Core requirements, including:

13-18

GEOL 107	Physical Geology
GEOL 208	History of the Earth System (preferred courses) ¹
CHEM 102	General Chemistry I
CHEM 103	General Chemistry Lab I
Select one of the following:	
MATH 220	Calculus
or MATH 221	Calculus I
MATH 234	Calculus for Business I
An introductory Statistics course, e.g., STAT 100, SOC 280, ECON 202, or a second semester of Calculus is recommended	

Additional hours beyond the core requirements

27-31

ATMS 140	Climate and Global Change
or GEOL 118	Natural Disasters
Select one of the following:	
GEOL 333	Earth Materials and the Env
GEOL 432	Mineralogy and Mineral Optics
GEOL 380	Environmental Geology
Ten to twelve hours of additional advanced geology courses	
Six to eight hours Environmental Studies electives. (see Geology advisor for list of approved courses)	

¹ Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

Environmental Geology Concentration within the Specialized Curriculum

Chemistry- Select one group of courses:

8-9

CHEM 102	General Chemistry I
CHEM 103	General Chemistry Lab I
CHEM 104	General Chemistry II
CHEM 105	General Chemistry Lab II
or	
CHEM 202	Accelerated Chemistry I

Six hours of other 300- or 400-level science, math, or engineering courses selected with adviser approval.		

¹ Students who decide to follow the curriculum after first taking GEOL 100 or GEOL 103 should enroll in GEOL 208. GEOL 100 or GEOL 103 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.

Germanic Languages and Literatures

Craig Williams, Interim Head

2090 Foreign Languages Building, 707 South Mathews, Urbana, (217) 333-1288

<http://www.germanic.illinois.edu>

Administered by the Department of Germanic Languages and Literatures, the major serves to develop competence in German or Scandinavian languages and cultures. Students will gain familiarity with the structure of the language and its use in the context of business, contemporary culture, intellectual history, literature, science, and teaching. The department also sponsors a BA in the Teaching of German, study abroad programs, a combined 5-year BALAS/MA, and two undergraduate minors- German and Scandinavian Studies.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: german@illinois.edu

Minimum required major and supporting course work normally equates to 51 hours with at least 31 hours in German except for the concentration in Scandinavian Studies which requires a minimum major and supporting course work of 50-52 hours with at least 30 credit hours of Scandinavian courses.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students majoring in the Department of Germanic Languages and Literatures are urged to consult the departmental honors adviser by the second semester of the junior year for information pertaining to senior honors work and honors awards in the department.

Students must select one concentration in consultation with an adviser.

- Modern German Studies Concentration (p. 364)
- German and Commercial Studies Concentration (p. 361)
- Language and Literature Concentration (p. 362)
- Languages Studies Concentration (p. 362)
- Scandinavian Studies Concentration (p. 364)

Combined 5-year BALAS/MA in Germanic Languages and Literatures

The Department of Germanic Languages and Literatures offers a 5-year program leading to two degrees, a BALAS in Germanic Languages and Literatures and an MA in German. In order to be admitted to this program, student can apply during their second or third year of studies. Requirements for this program are identical to those for the BALAS and the MA in the Department of Germanic Languages and Literatures.

In order to be admitted to the 5-year BALAS/MA during their *second* year, students will need to be in good standing, have finished GER 211 and GER 331, have a general **GPA of 3.0** and a German GPA of 3.0, and be required to write a short essay in German.

In order to apply for the 5-year BALAS/MA during their *third* year, students will have to have finished GER 401 and GER 420, have a general **GPA of 3.0** and a German GPA of 3.0, and be required to write a short essay in German.

The department will continue to monitor the GPAs of students admitted to the BALAS/MA program into their third and fourth years and before formal admission to the Graduate College. The decision about students' admission to the 5-year program will be made by the graduate admissions committee in conjunction with undergraduate and graduate advisors of the department. The Department will consider students in the fifth year of this program for departmental support as Teaching Assistants and Research Assistants, or for fellowships and scholarships.

The minimum total number of hours required for graduation from the BALAS/MA program is 152. Up to 12 hours not required for the BALAS (120 hours) taken during the fourth year can be used to meet the requirements for the MA (32 hours). Students admitted to the program will receive both degrees once all requirements for the 5-year BALAS/MA degree program have been successfully completed. More detailed information may be obtained from the departmental office.

For the Degree of Bachelor of Arts in the Teaching of German

Curriculum Preparatory to the Teaching of German (p. 361)

- Minor in German (p. 366)
- Minor in Scandinavian Studies (p. 366)

Curriculum Preparatory to the Teaching of German

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

E-mail: german@illinois.edu

Web address for department: www.germanic.illinois.edu

Degree title: Bachelor of Arts in the Teaching of German

Minimum required course work normally equates to 75 hours

General education: Consult the Curricula Preparatory to Teaching Foreign Languages (p. 483).

Minimum hours required for graduation: A minimum of 120 hours of credit is required for graduation. Consult the certification officer at 505 East Green Suite 203 for additional information. <http://www.cote.illinois.edu/>

Departmental distinction: Students should consult their advisers by the second semester of the junior year for information pertaining to seminar honors work and honors awards in the department.

The total of 47 hours may be reduced by as much as 16 hours through prerequisite credit for work equivalent to GER 101-GER 104 taken in secondary school.

Professional education courses. (See Foreign Languages: Curricula Preparatory to Teaching Foreign Languages.)		29
GER 101	Beginning German I	4
GER 102	Beginning German II	4
GER 103	Intermediate German I	4
GER 104	Intermediate German II	4
GER 211	Conversation and Writing I	3
GER 212	Conversation and Writing II	3
GER 331	Intro to German Literature	3
GER 332	German Literature and Culture	3
GER 401	Global Issues in German	3
GER 420	German Cultural History	4
Select one of the following:		3
GER 470	Middle Ages to Baroque	
GER 471	Enlightenment to Romanticism	
GER 472	Realism to Expressionism	
GER 473	1920s to Today	
GER 465	Ling Structures of German	3
Two German courses as electives		6
Total Hours		76

NOTE: GER 299 is strongly recommended.

German and Commercial Studies Concentration

Designed to provide students with an understanding of the language and customs of the business world in German-speaking countries, together with study of international affairs and commerce, especially trade with Europe.

Minimum of 31 hours of German courses including:		31
GER 205	Germany and Europe	
GER 211	Conversation and Writing I	
GER 212	Conversation and Writing II	
GER 320	German for Business	
GER 321	German for Economics	

GER 331	Intro to German Literature
GER 401	Global Issues in German
GER 403	Translation, Theory & Practice
GER 420	German Cultural History
GER 465	Ling Structures of German
Supporting coursework outside German selected in consultation with an adviser.	

20

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Language Studies Concentration

Designed to acquaint students with the structure and development of Germanic languages.

German/Scandinavian courses including:		31
SCAN 251	Viking Mythology	
GER 211	Conversation and Writing I	
GER 212	Conversation and Writing II	
GER 331	Intro to German Literature	
GER 332	German Literature and Culture	
GER 401	Global Issues in German	
GER 420	German Cultural History	
GER 465	Ling Structures of German	
GER 470	Middle Ages to Baroque	
or GER 471	Enlightenment to Romanticism	
GER 472	Realism to Expressionism	
or GER 473	1920s to Today	
Supporting coursework outside German including:		20
SCAN 101	Beginning Scandinavian I	
SCAN 102	Beginning Scandinavian II	
LING 400	Intro to Linguistic Structure	
ENGL 403	History of the English Lang	

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Language and Literature Concentration

Designed as a traditional study of German, providing students with a balanced knowledge of German language, literature, and civilization.

Minimum of 31 hours of German courses including:		31
GER 201	German Popular Culture	
or GER 205	Germany and Europe	
or SCAN 251	Viking Mythology	
GER 211	Conversation and Writing I	
GER 212	Conversation and Writing II	
GER 331	Intro to German Literature	
GER 332	German Literature and Culture	
GER 401	Global Issues in German	

GER 420	German Cultural History
GER 465	Ling Structures of German
GER 470	Middle Ages to Baroque
or GER 471	Enlightenment to Romanticism
GER 472	Realism to Expressionism
or GER 473	1920s to Today
Courses outside of German language and literature selected in consultation with the major adviser.	
20	

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Modern German Studies Concentration

Designed to provide students with an understanding of present-day civilization and culture in German-speaking countries of Central Europe.

Minimum of 31 hours of German courses including:

31

GER 201	German Popular Culture
GER 211	Conversation and Writing I
GER 212	Conversation and Writing II
GER 331	Intro to German Literature
GER 332	German Literature and Culture
GER 401	Global Issues in German
GER 420	German Cultural History
GER 465	Ling Structures of German
Select two of the following:	
GER 471	Enlightenment to Romanticism
GER 472	Realism to Expressionism
GER 473	1920s to Today

Courses outside of German language and literature selected in consultation with an adviser (e.g. history, political science).

20

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Scandinavian Studies Concentration

Designed for students with a broad interest in Scandinavian Studies, including acquiring proficiency in a modern Scandinavian language. Fulfilling the requirements for the Major usually involves one semester of study abroad at a Scandinavian university. 30 credit hours of Scandinavian courses are required for the concentration.

Language Courses beyond SCAN 101-SCAN 102:

11-12

SCAN 103	Intermediate Scandinavian I
SCAN 104	Intermediate Scandinavian II
SCAN 494	Topics in Scan Languages

At least two courses from the following 200-level course offerings:

6

SCAN 215	Madness, Myth, and Murder
SCAN 225	Vikings to Volvos: Scandinavia
SCAN 251	Viking Mythology
SCAN 252	Viking Sagas in Translation

At least four courses from the following 300- and 400-level course offerings:

12-13

SCAN 375	Scandinavian Sexualities
GLBL/SCAN 386	Arctic Environmt & Society
SCAN 463	Ibsen in Translation
SCAN 464	Strindberg in Translation
SCAN 490	Ingmar Bergman & Europ Cinema
SCAN 492	New Scandinavian Cinema
SCAN 496	Special Topics in Scan Studies

Supporting coursework comprised of study in areas relevant for Scandinavian Studies, chosen in consultation with the Scandinavian Studies faculty advisor. Areas could include: Germanic Languages and Literatures, English, Linguistics, History, Political Science, Comparative and World Literatures, International and Area Studies, European Studies.

21

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minor in German

The minor in German offers students a background in the language through the advanced undergraduate level, an introduction to the study of German literary classics, and a knowledge of the history of German culture.

E-mail: german@illinois.edu

Web address for department: www.germanic.illinois.edu

Select four of the following:		12
GER 104	Intermediate German II	
GER 211	Conversation and Writing I	
GER 212	Conversation and Writing II	
GER 320	German for Business	
GER 321	German for Economics	
GER 401	Global Issues in German

Global Studies

Thomas Bassett

703 S. Wright Street, 3rd Floor, MC-301, Champaign, IL

www.globalstudies.illinois.edu

The Global Studies major develops knowledge sets, skills and values necessary for the analysis and solution of contemporary world problems. The requirements of the major enrich, complement, and coordinate departmental offerings with the goals of:

- providing knowledge of diverse cultures: their social, economic and political interactions and impacts on the world;
- developing skills for successfully negotiating realities of contemporary societies;
- fostering values that respect diverse ways of living and deepen commitment to sustainability.

The Global Studies major is interdisciplinary, drawing upon the resources of faculty and departments across the university. The major has three elements. The Foundations requirement introduces a variety of global issues and skills necessary for their analysis. The Language and Culture requirements allow students to develop area expertise in one world region through on-campus coursework and a semester-long study abroad. The Thematic Area focuses student programs on a topic of global importance to allow for an in-depth and multidisciplinary understanding of relevant historical and emerging issues, how they are analyzed and addressed. Students work with an advisor to customize the major curriculum most appropriate to their individual interests and career plans.

This program of study was developed in response to the growing demand for knowledge and skills to successfully navigate concerns at international and global levels. The competencies established through this program are critical for students preparing for careers or further study in a variety of fields including international affairs, public policy, business, law, finance, education, and communications.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: globalstudies@illinois.edu

Minimum required major and supporting course work equates to 51-56 hours and includes a semester-long full time study abroad program and a minimum of 12 hours of 300- and 400-level courses.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Global Studies major whose overall and major grade point averages are 3.25 or higher, who successfully completes 3 hours of GLBL 494 or other approved research methods course and who completes a distinction research project. See the departmental academic advisor for details.

Foundations Requirements

GLBL 100	Intro to Global Studies	3
Global Studies. Four courses must be selected from the approved course list; they must include no more than one course from four of the following six departments: Anthropology, Economics, Geography, History, Political Science, and Sociology.		12
Global Studies Seminars. Students study current events and contemporary global issues. Select three courses from GLBL 296 or one GLBL 298 course and one GLBL 296 course.		3-4

Language and Culture Requirements

Language. Select courses from the approved course list in a language other than your primary language(s). These various courses represent the 5th and 6th level of study.	6
Area Studies. 200- to 400-level courses which complement the language requirement must include work in at least two disciplinary departments. Area Studies and Language must be geographically related.	9
One Semester (Fall or Spring) Study Abroad. Students study a variety of subjects in an approved study abroad program that furthers their language and cultural knowledge or their cultural knowledge and thematic area knowledge. Students must be enrolled full-time to receive credit toward this requirement.	

Thematic Area Requirements

Students choose an approved thematic area and, in consultation with a Global Studies advisor, construct an appropriate customized curriculum of a minimum of 18 hours. Students cannot include more than 3 hours of 100-level work and must complete 9 hours of 300- and 400-level coursework. Courses must be taken from more than one department. Approved thematic areas are:

- Cultures in Contact
- Wealth and Poverty in a Globalized World

C. Human Rights		
D. Governance, Conflict and Resolution		
E. Knowledge, Communication and Information Systems		
F. Environment, Sustainability, and Social Responsibility		
G. Global Health		
H. Special Topic: Curriculum must be approved prior to pursuing a special topic.		
GLBL 494 & GBL 495	Research Methods I and Research Methods II (Senior Capstone. Students do an individual research project based on their Thematic Area.)	0-4
Total Hours		51-56

A Major Plan of Study Form must be completed and submitted to the Global Studies academic advisor before the end of the fourth semester (60 hours) and prior to the required study abroad. Please see your advisor.

Minor in Global Studies

The Global Studies Minor provides a multidisciplinary study of a global theme with the requirement of advanced language training to promote the development of intercultural skills. In consultation with an advisor, students select 21 hours of thematically-related courses from a variety of departments to form a coherent program of study suited to individual interests, educational and/or career aspirations. The Global Studies Minor can complement any major.

E-mail: globalstudies@illinois.edu

Global Studies. Three courses must be selected from the approved course list; they must include no more than one course each from three of the following departments: Anthropology, Economics, Geography, History, Political Science, and Sociology.	9
Language and Culture. Select courses from the approved course list in a language other than your primary language. These various courses represent the 5th level of study or above.	3
Thematic Area: Students choose an approved thematic area and, in consultation with a Global Studies advisor, construct an appropriate customized curriculum. Students must choose 200- to 400-level courses and at least 6 hours must be at the 300- or 400-level.	9
Total Hours	21

A minimum of 6 hours of 300- and 400-level course work must be completed.

History

Diane Koenker, Chair of Department

309 Gregory Hall, 810 South Wright, Urbana, (217) 333-1155

www.history.illinois.edu

Administered by the Department of History, students in the history concentration should acquire a broad background from the study of the human experience in different cultures and time periods. A wide distribution of courses is therefore advisable. This is especially true for those who wish to enter government service, or professional schools for law, social work, museum and library science, business administration, or labor and industrial relations. The Social Science: History Teaching Concentration (p. 370) prepares students to teach social studies in Secondary School. The department also offers an undergraduate minor.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

Students must select one concentration.

- History Concentration (p. 369)
- Social Science: History Teaching Concentration (p. 370)

Minor in History

A history minor is designed for students who desire to understand the historical background of their major field and to provide an evolutionary or developmental perspective on the study and practice of their major field. Selection of courses will depend on the major and on the interests of the student.

E-mail: history@illinois.edu

Web address for department: www.history.illinois.edu

Students must have at least 9 hours in one of the following fields: US, European, or Nonwestern and 6 hours in a second of those fields.

Six hours of coursework in History at any level ¹	6
A minimum of 9 hours of 300- or 400-level History courses taken on the Champaign-Urbana campus, with permission, 3 hours may be study abroad hours	9
A minimum of 6 hours of history courses above the 100 level	6
Total Hours	21

¹ A maximum of 6 hours at the 100 level may be used in the minor.

History Concentration

E-mail: history@illinois.edu

Minimum required major course work normally equates to 36 hours of History courses.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction:

To be eligible for distinction, a student must be admitted to the Honors Program in History and complete its required coursework. Those admitted (ideally before the beginning of the junior year) must have earned at least a 3.5 GPA in History and a 3.25 GPA overall. They will then pursue a sequence consisting of HIST 495, HIST 492 and successful completion of either:

1. HIST 493 and HIST 499 in two consecutive semesters (in which case, the level of distinction awarded to student will be decided by the examining committee) OR
2. the completion of two approved independent research projects under the supervision of two different advisors (HIST 490). (in which case, students will be eligible for an award of distinction only (not high or highest distinction).

Minimum of 36 hours of History courses including:

Two introductory History courses at the 100 level (preliminary coursework)	6
African, Asian, Global, Latin American, Middle Eastern History courses at the 200-level or above, at least 3 hours at the 300 level or above ¹	6
European History courses at the 200-level or above, at least 3 hours at the 300 level or above ¹	6
U.S. History courses at the 200-level or above, at least 3 hours at the 300 level or above. 3 hours must be in U.S. Minority History. ¹	6
Hours of history electives (at the 200-level or above). NOTE: HIST 200 and HIST 498 (or HIST 495) are required. HIST 200, HIST 495, and HIST 498 may count toward any of the area requirements or the 12 hours of History electives. For those students in the Honors Program, HIST 490 or HIST 493 may count toward any of the area requirements or the 12 hours of History electives. HIST 492 and HIST 499 must be taken as part of the 12 hours of required History electives.	12
Of the 36 hours of History courses, students must take 6 hours in a pre-modern period, one defined as before 1600 and one defined as before 1800 (HIST 100 and HIST 142 may not be used to fulfill this requirement). ¹	
Total Hours ²	36

¹ Chosen from the list maintained in the Department of History

² Eighteen advanced hours (300- and 400-level) of History courses are required in the major. 12 of those 18 advanced hours must be taken on this campus.

Students must pass HIST 200 with a grade of a C (2.0) or better in order to remain in good standing in the major. Students transferring to the major after freshman year must have passed two 100-level history courses and have passed HIST 200 on this campus with a grade of C (2.0) or better. Transfer students must enroll in HIST 200 during their first semester on campus.

All foreign language requirements must be satisfied.

Social Science: History Teaching Concentration

This concentration prepares its graduates for teaching social studies in grades six through twelve. In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

E-mail: history@illinois.edu

Web address for department: www.history.illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required course work normally equates to 123 hours including a minimum of 36 hours of History courses

General education: Students must complete the Campus General Education requirements. A semester survey course in American history, a course in Speech Performance, and American Government are required by the Illinois State Board of Education for certification and can be counted towards the General Education requirements. The Advanced Composition requirement should be satisfied by HIST 140, HIST 143, HIST 170, HIST 173, or HIST 498 (or by HIST 492 or HIST 495 for students in the Honors Program). Additionally, the other program requirements will fulfill the remaining general education requirements.

Minimum hours required for graduation: 123 hours

Departmental distinction: To be eligible for distinction, a student must be admitted to the Honors Program in History and complete its required coursework. Those admitted (ideally before the beginning of the junior year) must have earned at least a 3.5 GPA in History and a 3.25 GPA overall. They will then pursue a sequence consisting of HIST 495, HIST 492 and successful completion of either

1. HIST 493 and HIST 499 in two consecutive semesters (in which case, the level of distinction awarded to student will be decided by the examining committee) OR
2. the completion of two approved independent research projects under the supervision of two different advisors (HIST 490) (in which case, students will be eligible for an award of distinction only (not high or highest distinction)).

Prerequisites to transfer to the Teaching Concentration:

Requirements that must be completed or in-progress at the time of application to the program. These courses can be counted toward the Campus General Education requirements.

EPSY 201	Educational Psychology	3
EPS 201	Foundations of Education	3
PS 101	Intro to US Gov & Pol	3
PSYC 100	Intro Psych	4
SOC 100	Introduction to Sociology	4
STAT 100	Statistics	3

Select one of the following:

ANTH 143	Biology of Human Behavior	
ECON 102	Microeconomic Principles	
ECON 103	Macroeconomic Principles	
HIST 140	Western Civ to 1660-ACP	3-4
or HIST 141	Western Civ to 1660	
HIST 142	Western Civ Since 1660	3-4
or HIST 143	Western Civ Since 1660-ACP	

Select one of the following:

HIST 170	US Hist to 1877-ACP	
HIST 171	US Hist to 1877	
HIST 172	US Hist Since 1877	
HIST 173	US Hist Since 1877-ACP	

One additional History course (HIST 200 - Intro Hist Interpretation recommended) ¹

¹ HIST 200 is required for the major and recommended for transfer into the program.

The four history courses above will count toward the 36 hours required in history courses overall to complete the concentration but only one of the 4-hour Advanced Composition History courses (HIST 140, HIST 143, HIST 170, HIST 173) may be used.

In addition to the requirements for the concentration listed below, students must complete the Teacher Education Minor in Secondary School Teaching (p. 129) (37-38 hours). See the College of Education (p. 116) for requirements of the minor. Conferral of the degree of Bachelor of Arts in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Affairs Office.

You must also complete 50 hours of tutoring at the secondary level and pass the Illinois Basic Skills Test. Please contact the Director of Secondary Education Programs for more information about these and all of the requirements for the teaching concentration.

HIST 141	Western Civ to 1660	3-4
or HIST 140	Western Civ to 1660-ACP	
HIST 142	Western Civ Since 1660	3-4
or HIST 143	Western Civ Since 1660-ACP	

United States History: 15

HIST 171	US Hist to 1877	
or HIST 170	US Hist to 1877-ACP	
HIST 172	US Hist Since 1877	
or HIST 173	US Hist Since 1877-ACP	
HIST 273	Illinois History	
or HIST 288	American Indians of Illinois	

One 200-400 level course in 18th-19th century

One 200-400 level course in 20th-21st century

Nonwestern and Global History: 6

HIST 100	Global History	
One 200-400 level course in global or nonwestern history		

European History: 6

One 200-400 level course to 1700

One 200-400 level course since 1700

HIST 200	Intro Hist Interpretation	3
----------	---------------------------	---

Students must take HIST 498 - Research and Writing Seminar or HIST 495 - Honors Research & Writing Sem (for those students in the Honors Program). Students may count the 3 hours towards any of the history areas noted above: US, Nonwestern/Global, or European.

Social Science Requirement (many of these will also satisfy general education requirements):

41

PS 100	Intro to Political Science
PS 101	Intro to US Gov & Pol
PS 240	Intro to Comp Politics
or PS 241	Comp Politics in Dev Nations
SOC 100	Introduction to Sociology
SOC 380	Social Research Methods
ANTH 143	Biology of Human Behavior
ANTH 230	Sociocultural Anthropology
PSYC 100	Intro Psych
ECON 102	Microeconomic Principles
ECON 103	Macroeconomic Principles
GEOG 103	Earth's Physical Systems
GEOG 104	Social and Cultural Geography

Twelve hours of 300- and 400-level History courses must be taken on this campus.

All foreign language requirements must be satisfied.

Students must maintain a University and cumulative 2.5 grade point to remain in good standing.

Integrative Biology, School of

Carla Caceres

286 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3044

<http://sib.illinois.edu/>

Students in Integrative Biology (<http://sib.illinois.edu/options>) focus on the disciplines of genetics, physiology, behavior, ecology and evolution. In Integrative Biology, the emphasis is on bringing multiple disciplines to bear on complex scientific questions. From genomics to global change, Integrative Biology seeks to discover the complex interrelationships between organisms and the physical and biological environment in which they live. This major prepares students for careers in medicine and the health professions, research, organisms, and the environment. The School of Integrative Biology also sponsors two minors. The Minor in Integrative Biology is designed for students intending to have a career for which a background in integrative biology is complementary, e.g. law, technology, bioinformatics, business, scientific writing, and engineering. The Minor in Ecology and Conservation Biology prepares students for diverse careers, including environmental lawyer, environmental consultant, conservation technician, environmental educator, and environmental engineer.

- Integrative Biology Concentration (p. 373)
- Integrative Biology Honors Concentration (p. 374)
- Minor in Integrative Biology (p. 377)
- Minor in Ecology and Conservation Biology (p. 376)

Integrative Biology Concentration

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: sib@life.uiuc.edu

The Integrative Biology Concentration provides students with a solid preparation in genetics and evolution, anatomy and physiology, ecology and molecular biology. After completion of the core 100- and four 200-300-level core courses in IB, students may complete the required advanced coursework by taking a variety of IB and other courses or focus on a limited area of IB. Plans for the student's combination of advanced courses are developed in consultation with an adviser.

All undergraduates in this field are required to have a strong background in the biological and physical sciences. Students who do not begin mathematics, chemistry, and biology in their freshman year generally will be at a disadvantage.

Students pursuing a degree in Integrative Biology will be allowed to earn a second degree in the Specialized Curriculum in Biochemistry. Students pursuing a degree in Integrative Biology will not be allowed to double major in Molecular and Cellular Biology.

Minimum Required Courses normally equate to 66-76 hours.

General Education: Students must complete the Campus General Education requirements.

Minimum Hours Required for Graduation: 120 hours

Integrative Biology Distinction: To be eligible for distinction a student must graduate with a grade-point average of at least 3.25 and submit a report of an independent student project (IB 490) about one month prior to graduation for approval by the Integrative Biology Distinction Committee.

MATH 220	Calculus	4-5
or MATH 221	Calculus I	
Statistics (an approved introductory statistics course). See the IB website for a course list: http://sib.illinois.edu/IB_Major		3
Select one group of courses:		8-10
CHEM 102	General Chemistry I	
CHEM 103	General Chemistry Lab I	
CHEM 104	General Chemistry II	
CHEM 105	General Chemistry Lab II	
or		
CHEM 202	Accelerated Chemistry I	
CHEM 203	Accelerated Chemistry Lab I	
CHEM 204	Accelerated Chemistry II	

CHEM 205	Accelerated Chemistry Lab II	
Select one group of courses:		5-6
CHEM 232 & CHEM 233	Elementary Organic Chemistry I and Elementary Organic Chem Lab I	
CHEM 236 & CHEM 237	Fundamental Organic Chem I and Structure and Synthesis	
Select one group of courses:		8-10
PHYS 101 & PHYS 102	College Physics: Mech & Heat and College Physics: E&M & Modern	
PHYS 211 & PHYS 212	University Physics: Mechanics and University Physics: Elec & Mag	
PHYS 101 & PHYS 211	College Physics: Mech & Heat and University Physics: Mechanics	
PHYS 102 & PHYS 211	College Physics: E&M & Modern and University Physics: Mechanics	
IB 150	Organismal & Evolutionary Biol	4
MCB 150	Molec & Cellular Basis of Life	4
IB 202	Anatomy and Physiology ¹	3 OR 4
IB 203	Ecology	4
IB 204	Genetics	4
IB 302	Evolution ¹	4
At least four additional courses at the 200- to 400-level are required as follows:		14-18
At least one course from two of the following three areas:		
Area I: Organismal and Evolutionary Biology		
Area II: Behavior, Ecology, and the Environment		
Area III: Integrative Anatomy, Physiology, and Molecular Biology		
One course chosen from either the Area Courses or the Approved List of Additional IB Courses		
One course from the Area Courses, the Approved List of Additional IB Courses, or MCB 244, or MCB 250. (NOTE: MCB 244, and MCB 250 DO NOT count towards the 21 advanced hours required by LAS).		
One of the four courses selected above must have a laboratory and/or field component.		

¹ IB 202 and IB 302 requires animal dissection and no equivalent alternative is available.

Integrative Biology Honors Concentration

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

Integrative Biology Honors is designed for superior students wishing to pursue an intensive program in integrative biology and, concurrently, to gain a strong background in the physical sciences and mathematics. Admission is by interview in spring of the freshman year prior to registration for fall. An overall 3.0 GPA is required to apply for admission. Integrative Biology Honors provides preparation suitable for graduate and professional training in biology, as well as for biology careers in the private and public sectors.

E-mail: ibhonors@life.illinois.edu

Minimum required courses normally equate to 82-89 hours including 25 hours of 300- and 400-level courses.

Students earning the Integrative Biology Honors Concentration will automatically complete the Chemistry minor.

Students pursuing a degree in Integrative Biology Honors will be allowed to earn a second degree in the Specialized Curriculum in Biochemistry. Students pursuing a degree in Integrative Biology Honors will not be allowed to double major in Molecular and Cellular Biology.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Candidates for distinction must:

1. Consult with an IB Honors adviser no later than the beginning of their junior year to discuss their proposed research plan.
2. Present an acceptable written report on the research to the Integrative Biology Distinction Committee about a month prior to graduation. The research must have been an in-depth experience and produced substantial results to be considered eligible for distinction. Additional details on requirements, procedures, and deadlines are available at sib.illinois.edu.

Students must consult with their Integrative Biology honors adviser at least once each semester.

IB 150	Organismal & Evolutionary Biol	4
MCB 150	Molec & Cellular Basis of Life	4
IB 270	Evolution of Molecules & Cells	5
IB 271	Organismal Biology	5

One 400-level course in biological or earth systems modeling ³		
An approved 300- or 400- level course in statistics ⁴		3
IB 490	Independent Study (2 semesters)	6
300- or 400- level courses in the biological sciences		10

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

No more than 8 hours of credit in 100-level courses in SIB or SMCB may be counted toward graduation.

Students may count toward graduation no more than a combined maximum of 10 hours of IB 390 and IB 490 credit offered for independent study.

Substitutions or other changes in the requirements given above may be made only by petition to and approval of the director of the Integrative Biology Honors Concentration.

- ¹ Continuation in the Integrative Biology Honors Concentration requires a grade of B or better in each of IB 270, IB 271, and IB 372 and a 3.0 GPA.
- ² Introductory chemistry should be completed prior to enrolling in IB 270.
- ³ Current suitable courses are ATMS 421, GEOG 477, or ANSC 448.
- ⁴ MATH 461 or STAT 400 are recommended, as is additional training in statistics. Suitable courses for those taking more than one course are CPSC 440 and MATH 464/STAT 410.

Minor in Ecology and Conservation Biology

The minor, administered by the School of Integrative Biology, is designed for students interested in gaining strength in this subdiscipline of biology. Preparation for many careers is advanced by coursework in ecology and conservation, e.g. environmental lawyer, environmental consultant, conservation technician, environmental educator, and environmental engineer.

Students must contact an SIB advisor for acceptance into the minor.

Web address for School advising information: <http://sib.illinois.edu/advising/>

IB 150	Organismal & Evolutionary Biol	4
IB 203	Ecology	4
IB 204	Genetics	4
Select two of the following:		6-8
NRES/IB 348	Fish and Wildlife Ecology	
IB 431	Behavioral Ecology	
CPSC 431/IB 440	Plants and Global Change	
IB 443	Evolutionary Ecology	
IB 444	Insect Ecology	
IB 449	Limnology	
IB 451	Conservation Biology	
IB 452	Ecosystem Ecology	
IB 453	Community Ecology	
Total Hours		18-20

Minor in Integrative Biology

The minor, administered by the School of Integrative Biology, is designed for students intending to have a career in a field other than biology, but for whom a background in biology is nevertheless complementary, e.g. law, technology, bioinformatics, business, scientific writing, and engineering. A minor in integrative biology provides an understanding of fundamental principles for one major subdiscipline of biology, whether this be organismal and evolutionary biology; behavior, ecology and the environment; or integrative anatomy, physiology, and molecular biology.

Students must contact an SIB advisor for acceptance into the minor.

Web address for School advising information: sib.illinois.edu/advising/.

Select one of the following:

4

IB 150	Organismal & Evolutionary Biol
IB 103	Introduction to Plant Biology
IB 104	Animal Biology

Select two of the following:

7-8

IB 202	Anatomy and Physiology
IB 203	Ecology
IB 204	Genetics
IB 302	Evolution

Two additional courses at the 300 or 400 level (3-4 hours, some 5 hours) These courses to be selected from SIB Area Courses or Approved List of Additional Courses for the IB Major: http://sib.illinois.edu/courses/area_courses. The prerequisite course(s) must be taken if specified by an advanced course.

6-8

Total Hours

17-20

Other possible combinations of courses are possible for the Integrative Biology minor, if an SIB advisor approves the combination.

Interdisciplinary Studies

LAS Program Advisor: Associate Dean for the Humanities
 Program Office: 2090 Lincoln Hall, 702 South Wright Street, Urbana
www.las.illinois.edu

Interdisciplinary Studies Majors

Departments in the College of Liberal Arts and Sciences, in addition to their own disciplinary majors, have developed and sponsor an interdisciplinary program of study, which encompasses several distinct programs designed to acquaint students in a coherent manner with topics that cross disciplinary boundaries. Administered by the College of Liberal Arts and Sciences, the interdisciplinary studies major includes program concentrations in American Civilization, Jewish Studies, Medieval Civilization, and Renaissance Studies. Although it is not possible to offer concentrations in all specialties or topics of humanistic study, students whose interests do not coincide with one of the specific concentrations are encouraged to consider developing their own programs through the Individual Plans of Study (IPS) major. Enrollment in the major in interdisciplinary studies requires election of one of the concentrations. The College of Liberal Arts and Sciences also sponsors an Interdisciplinary Minor in Science and Technology in Society (<http://catalog.illinois.edu/undergraduate/las/interdisciplinary-minors/science-technology-society-minor>).

Each concentration of the major in interdisciplinary studies is supervised by faculty members whose own scholarship and educational interests have involved them in interdisciplinary teaching and research. An advisor for students is available in each concentration and is responsible for approving students' plans of study.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: ips@illinois.edu

Minimum required major and supporting course work equates to 45-51 hours.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction. To be eligible for graduation with distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.5, completion of HUM 498 with a grade of A, and completion of a semester paper in HUM 498 that is judged to be deserving of "distinction" by a committee of at least two faculty members.

High distinction. To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.7, and must have completed HUM 492 (instead of HUM 498) with a grade of A and a thesis in HUM 492 that is judged to be deserving of "high distinction" by a committee of at least two faculty members.

Requirements for the Major

Elect one of the concentrations offered within the major and file a concentration declaration with the LAS Student Academic Affairs Office no later than the end of the first semester of the junior year. Students who do not begin work on concentration requirements by the junior year will be at a disadvantage.

Select specific courses counted toward completion of a concentration with the advice and approval of the concentration advisor, subject to specific concentration requirements. Students are strongly encouraged also to enroll in 6-7 hours of Western civilization (HIST 140 or HIST 141 and HIST 142 or HIST 143, or CWL 241 and CWL 242).

For the elected concentration, complete the stated minimum number of hours in courses applicable toward the major and in accord with the distribution requirements listed below; at least 25 hours must be at the 200,300 or 400 level.

All campus General Education and foreign language requirements must be satisfied.

- American Civilization Concentration (p. 379)
- Jewish Studies Concentration (p. 380)
- Medieval Civilization Concentration (p. 381)
- Renaissance Studies Concentration (p. 382)

Minor in Science and Technology in Society

The Interdisciplinary Minor in Science and Technology in Society requires students to integrate and synthesize a wide variety of materials. Students will enrich their experiences in diverse disciplines with a substantive engagement with science studies. Required courses in the minor emphasize critical and creative thinking and many courses require substantial writing and research. This minor is administered by the LAS Student Academic Affairs Office.

All courses must be selected in consultation with the adviser from the list of courses approved for the minor. No more than 3 hours of course work may be 100-level. Students must maintain a 3.0 GPA in course work in the minor.

Select one of the following:	3
HIST 490 Honors Independent Study	
PHIL 390 Individual Study	
SOC 390 Individual Study	
300- and 400-level courses	6
History course selected in consultation with adviser	3
Philosophy course selected in consultation with adviser	3
Sociology course selected in consultation with adviser	3
Select a course from the approved list in consultation with adviser	3
Total Hours	21

Recommended courses to fulfill the requirements of the minor

History

HIST 265	Science in Western Civ	3
HIST 367	History of Western Medicine	3
HIST 498	Research and Writing Seminar (when appropriate)	3
HIST 475	Formation of US Public Health	3

Philosophy

PHIL 214	Biomedical Ethics	3
PHIL 270	Philosophy of Science	3
PHYS/PHIL 419	Space, Time, and Matter-ACP	3
PHIL 439	Philosophy of Mathematics	3
PHIL 471	Contemporary Phil of Science	3
PHIL 477	Philosophy of Psychology	3

Sociology

SOC 350	Technology and Society	3
SOC 476	Organization of Health Care	2-4
SOC 496	Advanced Special Topics (when appropriate)	3

Other

LIS 199	Undergraduate Open Seminar (when appropriate)	1-5
GWS 490	Individual Study (when appropriate)	2-4

American Civilization Concentration

Concentration suspended. Program is under revision.

This concentration offers a comprehensive introduction to the study of American civilization primarily through the study of art, history, literature, philosophy, and the social sciences.

Two introductory courses chosen with the approval of the concentration advisor; the introductory courses should provide a broad overview of the development of American culture; for example, HUM 141 and HUM 142. 6

Nine hours selected from the following:	9
ENGL 250	The American Novel to 1914
ENGL 251	The American Novel Since 1914
ENGL 255	Survey of American Lit I
ENGL 259	Afro-American Literature I

ENGL 260	Afro-American Literature II	
ENGL 449	American Lit 1820-1865	
ENGL 450	American Lit 1865-1914	
ENGL 451	American Lit 1914-1945	
ENGL 462	Topics in Modern Fiction	
Nine hours selected from the following:		9
HIST 270	United States History to 1815	
HIST 271	Nineteenth Century America	
HIST 272	Twentieth Century America	
HIST 370	Colonial America	
HIST 371	The American Revolution	
HIST 373	Origins of the Civil War	
HIST 374	Civil War and Reconstruction	
HIST 472	Immigrant America	
HIST 377	United States since 1932	
HIST 376	Soc History Indus Am from 1918	
HIST 479	19thC US Intel & Cultr Hist	
HIST 481	20th Century US Culture Wars	
Six hours selected from the following:		6
ARCH 415	Neoclass & Nineteen Cent Arch	
ARCH 416	Modern American Architecture	
ARTH 446	Art Since 1940	
ARTH 350	American Art 1750-1900	
ARTH 351	Early American Modernism	
Select in consultation with the concentration advisor from courses offered in the departments of anthropology, economics, geography, political science, and sociology.		12
HUM 397	Special Topics Junior (An advanced-level course with an American focus may be substituted with the approval of the advisor.)	3
HUM 498	Special Topics Senior	3

Substitutions for any of the above specific courses may be permitted with the approval of the concentration advisor only in exceptional cases.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Jewish Studies Concentration

The Program in Jewish Culture & Society (<http://www.jewishculture.illinois.edu/academics/major>) sponsors this concentration.

This concentration provides the student with knowledge of the Hebrew language, the opportunity to begin a study of Yiddish, and a broad appreciation of Jewish religion, culture, and history.

JS 199	Undergraduate Open Seminar (An Independent Study experience to be arranged with a Jewish Studies affiliated faculty member)	3
Hebrew and/or Yiddish language courses, including:		26-29
HEBR 201	Elementary Modern Hebrew I	
HEBR 202	Elementary Modern Hebrew II	
HEBR 403	Intermediate Modern Hebrew I	
HEBR 404	Intermediate Modern Hebrew II	
HEBR 405	Advanced Modern Hebrew I	
or YDSH 101	Beginning Yiddish I	
RLST 205	Intensive Biblical Hebrew	

or HEBR 406	Advanced Modern Hebrew II	
or YDSH 102	Beginning Yiddish II	
One course at the 100 or 200 level from each of the following clusters in the Jewish Studies Minor: Religion, Culture, and History. List maintained by the Advisor in the Program in Jewish Culture and Society Office.		9
Three courses at the 300 level or above from any of the four clusters in the Jewish Studies Minor: Religion, Culture, History, and Language. List maintained by the Advisor in the Program in Jewish Culture and Society Office.		9

All substitutions must be approved by the Advisor in the Program in Jewish Culture and Society Office (<http://www.jewishculture.illinois.edu/academics/major>).

Substitution for specific courses listed above will be approved by the concentration advisor only in exceptional cases.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Medieval Civilization Concentration

The Program in Medieval Studies (<http://www.medieval.illinois.edu/education/undergrad>) sponsors this concentration.

This concentration introduces students to medieval (ca. 500- ca. 1500 CE) cultures across the world, providing them with an understanding of periods and movements, institutions, material culture, ideas, beliefs, and values of the diverse cultures that comprise the medieval globe. The coursework spans both geographic regions and disciplines to introduce students to the breadth of medieval cultures as well as to the diversity of methods and perspectives for their study.

The concentration includes a minimum of 45 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework as specified below; (III) advanced medieval coursework selected by the student in consultation with a Medieval Studies faculty advisor; and (IV) a capstone experience involving an intensive writing and research project. Because Medieval Studies is an interdisciplinary field of study, students are urged to consult with a Medieval Studies faculty advisor to ensure that they take a diverse range of courses providing some exposure to the fields of History and Anthropology; Literature; the Arts; and Philosophy or Religion. Although study of medieval languages is not a requirement, students who intend to pursue graduate study in Medieval Studies should complete at least two courses in an appropriate language; up to twelve hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

Introduction to Medieval Studies ¹

ENGL 202/MDVL 201	Medieval Lit and Culture	3
-------------------	--------------------------	---

Geographical Distribution Coursework ²

Select two of the following (Medieval Europe): 6

ARTH 111/MDVL 222	Ancient to Medieval Art
ARTH/MDVL 222	Medieval Art
ARTH/MDVL 231	Northern Renaissance Art
ITAL/MDVL 240	Italy Middle Ages & Renaiss
HIST/MDVL 245	Women & Gender Pre-Mod Europe
HIST/MDVL 247	Medieval Europe
SCAN/MDVL 251	Viking Mythology
SCAN/MDVL 252	Viking Sagas in Translation
HIST/MDVL 255	British Isles to 1688
ARCH/MDVL 412	Medieval Architecture

Select two of the following (Classical and medieval East Asia): 6

HIST 220	Traditional China
HIST 226	Premodern Japanese History
EALC 240	Chinese Civilization
EALC 275	Masterpieces of East Asian Lit
RLST 287	Introduction to Buddhism

Select two of the following (Medieval Central Asia, South Asia, or the Middle East): 6

HIST 130	History of South Asia
----------	-----------------------

HIST 135	History of Islamic Middle East	
LA 218	S Asian Cultural Landscapes	
LA 222	Islamic Gardens & Architecture	
RLST 213 or RLST 214	Intro to Islam - ACP Introduction to Islam	
RLST 223	The Qur'an (Koran)	
RLST 260	Mystics and Saints in Islam	
RLST 283	Jewish Sacred Literature	
CWL 208	Cultures & Lits of South Asia	

Additional Medieval Studies Coursework

Medieval-related coursework from participating departments selected in consultation with the concentration advisor. At least 12 hours must be at the 300- or 400-level. A list of courses in Medieval Studies is maintained on the Medieval Studies Program website. Up to 12 hours of appropriate language study can be applied to meet this requirement with approval of a Medieval Studies faculty advisor. 21

Capstone Experience

A capstone experience (normally in the student's senior year) involving intensive interdisciplinary research and writing on a medieval topic. Any 400-level MDVL course (or medieval-related course not cross-listed with MDVL, with the approval of a Medieval Studies faculty advisor) can be designated as a capstone experience with approval of the instructor. For the course to qualify as a capstone experience, the student must undertake a substantial research project that supplements the standard course requirements, in the form either of an additional project or of a longer and more research-intensive version of an existing course project. The project must involve both primary and secondary research using advanced disciplinary methodologies and resources.³ 3

Total Hours 45

- ¹ A student may substitute the "Medieval World" section of HIST 100, by petition to a Medieval Studies faculty advisor. Only the section of HIST 100 devoted to the Middle Ages may be substituted.
- ² A student may substitute up to 6 hours in geographical distribution coursework with courses on the medieval civilizations of the Americas: ANTH 277, ANTH 278, or both. However, at least one course must still be taken from each of the three regional areas.
- ³ A student may also petition to satisfy the capstone experience by enrolling in MDVL 500, Seminar in Medieval Studies. Enrollment requires approval of the instructor and Director of the Program in Medieval Studies.

Substitution for specific courses listed above will be approved by the concentration advisor only in exceptional cases.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Renaissance Studies Concentration

This concentration incorporates course work in the Renaissance and related periods and places an emphasis on independent study and the completion of research papers in the junior and senior years.

NOTE: Students must acquire a reading knowledge of a foreign language relevant to their interests in Renaissance study, selected in consultation with the concentration advisor. These hours will not count towards the minimum of 45 hours required for this concentration. variable

Renaissance-related course work in a single discipline at the 200 to 400 level from among the following: art, history, literature, or music. 15

Renaissance-related course work in the following areas with at least one course in each: art, history, music, philosophy, and literature. At least one of these courses must be in classical literature or culture. 24

HUM 397	Special Topics Junior (An advanced-level course with a Renaissance focus may be substituted with the approval of the advisor.)	3
HUM 498	Special Topics Senior (which will lead to the completion of a significant research paper)	3

Substitution for specific courses listed above will be approved by the concentration advisor only in exceptional cases.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Jewish Culture and Society, Program in

Matti Bunzl, Director

608 South Wright Street, Urbana, Illinois 61801, 217-333-7978

www.jewishculture.illinois.edu

Interdisciplinary Minor in Jewish Culture and Society

The Program in Jewish Culture and Society offers an interdisciplinary minor and a concentration in Jewish Studies (through the LAS Interdisciplinary Studies Major (p. 380)).

E-mail: jewishculture@illinois.edu

One course in the cluster of Religion, chosen from a list of courses maintained by the Advisor in the Program in Jewish Culture and Society Office.	3
One course in the cluster of Culture, chosen from a list of courses maintained by the Advisor in the Program in Jewish Culture and Society Office.	3
One course in the cluster of History, chosen from a list of courses maintained by the Advisor in the Program in Jewish Culture and Society Office.	3
Electives within the minor. Students may choose additional courses from any of the three clusters or can choose from the following language courses:	9
HEBR 199	Undergraduate Open Seminar
HEBR 205	Intensive Biblical Hebrew
HEBR 403	Intermediate Modern Hebrew I ¹
HEBR 404	Intermediate Modern Hebrew II ¹
HEBR 405	Advanced Modern Hebrew I
HEBR 406	Advanced Modern Hebrew II
HEBR 407	Topics Hebrew Lang & Lit I
HEBR 408	Topics Hebrew Lang & Lit II
YDSH 103	Intermediate Yiddish I
YDSH 104	Intermediate Yiddish II
Total Hours	18

Of the 18 required hours, two courses (6 hours) must be 300-or 400-level courses. HEBR 403 and HEBR 404 cannot be used to satisfy this requirement.

¹ *HEBR 403 and HEBR 404 cannot be used to satisfy LAS Advanced Hours requirement (<http://www.las.illinois.edu/students/requirements/> minimum) or the 6 hours of 300- or 400- level courses for the Jewish Culture and Society Interdisciplinary Minor.*

No more than 6 hours (two courses) may be at the 100 level.

The 18 hours selected by students for a minor in Jewish Culture and Society should form a coherent program and must be approved by the undergraduate advisor for the Program in Jewish Culture and Society.

A list of courses, regularly updated by the Program in Jewish Culture and Society, is available from the Program Office, 109 English Bldg., 608 South Wright Street, Urbana, Illinois, 61801.

Latin American and Caribbean Studies, Center for

Dara Goldman, Director of Center

201 International Studies Building, 910 South Fifth Street, Champaign, (217) 333-3182

<http://www.clacs.illinois.edu>

A major in Latin American Studies, which is administered by the Center for Latin American and Caribbean Studies, provides an integrated exploration of a major world area. Depending upon the student's interests and career aspirations, individual programs of study are designed in close consultation with the Associate Director of the Center, who also serves as the academic adviser. Consultation revolves around the career goals of the student. The undergraduate program reflects an integrative, cross-disciplinary approach, and courses must be taken in at least three of these five areas or perspectives:

1. anthropological and geographical;
2. historical;
3. humanistic;
4. social, political, and economic;
5. ecological and environmental.

Courses for the major must be selected in consultation with the Associate Director of the Center.

Students are also expected to demonstrate a substantial command of a Latin American language (Spanish, Portuguese, Quechua or other Native American language indigenous to Middle or South America), either by passing a proficiency examination or through advanced courses of Latin American language(s) beyond the general Liberal Arts and Sciences language requirement.

Major in Latin American and Caribbean Studies

Major in Sciences and Letters Curriculum

E-mail: clacs@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting course work equates to 45 hours

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours¹

Departmental distinction: To be eligible, a student must achieve at least a 3.5 grade point average in the major, complete a senior thesis, and receive the approval of the center's research committee.

LAST 170	Introduction to Latin America ²	3
LAST 490	Individual Study ³	3

Approved courses with Latin American content including courses in the following perspectives: ⁴ 33-34

Anthropological and Geographical Perspective. Normally courses in anthropology and geography.

Historical Perspective. Normally courses in history.

Humanistic Perspective. Normally courses in Spanish and Portuguese literature, comparative literature, linguistics, art history, and music.

Social, Political, and Economic Perspective. Normally courses in sociology, rural sociology, political science, economics, and agricultural economics.

Ecological and Environmental Perspective. Normally courses in biology, forestry, and physical anthropology (primatology).

When appropriate, approved courses with Latin American content in other scientific and professional areas may be substituted for courses in the five perspectives listed above with the consent of the Associate Director of the Center for Latin American and Caribbean Studies.

Advanced conversation and composition in a Latin American language (Spanish, Portuguese, Quechua or other Native American language indigenous to Middle or South America) beyond the level specified by the LAS language requirement, or the equivalent as demonstrated by special examination. Students successfully completing the examination are expected to use these 5 or 6 hours in approved courses of Latin American content from any of the above perspectives (including literature courses). At the end of their language study, all students are urged to take an oral proficiency test based on ACTFL guidelines. 5-6

¹ Each student's course of study is devised in consultation with the Associate Director of the Center for Latin American and Caribbean Studies and is subject to the Associate Director's approval.

- 2Normally taken in the freshman or sophomore year.
- 3Normally taken in the senior year.
- 4Includes 12 hours in one of the listed perspectives, 9 semester hours each in two other perspectives. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Interdisciplinary Minor in Latin American Studies

The Center for Latin American and Caribbean Studies offers an interdisciplinary minor for students majoring in another discipline. The minor in Latin American Studies consists of a total of 21 credit hours selected from offerings by the Center and various departments. This program must be approved by the Associate Director.

The minor is for those students who wish to concentrate their work in a specific discipline yet maintain a Latin American focus in their coursework. For students completing a major sponsored by the College of Liberal Arts and Sciences, the department or unit sponsoring the student's major must approve the minor.

E-mail: clacs@illinois.edu

Web address for department: http://www.clacs.illinois.edu

Two courses in a Latin American language (Spanish, Portuguese, Quechua or other Native American language indigenous to Middle or South America) beyond the level specified by the LAS language requirement, or the equivalent as demonstrated by special examination. At the end of their language study, all students are urged to take an oral proficiency test based on ACTFL guidelines.

5-6

Courses drawn from the Latin American Studies curriculum. The curriculum normally consists of courses with 50 percent or more Latin American content and is defined according to a list maintained and regularly updated by the Center for Latin American and Caribbean Studies. Courses include:

15-16

LAST 170	Introduction to Latin America
No more than 6 hours chosen from a single department	
Six hours of 300- to 400-level course offerings	
No more than 6 hours of literature	

Total Hours

21

Latina/Latino Studies

Jonathan Inda, Chair

Office: 1207 W. Oregon Street, Room 127A, Urbana, (217) 265-0370

<http://www.lls.illinois.edu>

Email: lls-studies@illinois.edu

The Undergraduate Major in Latina/Latino Studies explores the experiences and lives of Latina/os in the context of the United States. The major provides a broad and deep approach to theory, research, and multidisciplinary study of the Latina/o experience. Students will complete 34 hours of required and elective courses, and a minimum of 18 hours of supporting course work or a minor in an area outside of the major. Students majoring in Latina/Latino Studies receive excellent preparation for graduate study or careers in education, social and welfare policy, counseling, law, public policy, and other fields that address Latino issues.

Major in Latina/Latino Studies

Major in Sciences and Letters Curriculum

E-mail: aprodrig@illinois.edu

www.lls.illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required hours: 52 hours required, including 34 hours in Latina/Latino Studies courses

General education: The LAS General Education requirements will fulfill the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Advising: The Department of Latina/Latino Studies provides advising for students. Students will also be assigned a faculty advisor to help plan a coherent program in their selected area of study.

Departmental distinction: To graduate with distinction in Latina/Latino Studies, a student must have at least a 3.25 overall GPA, a minimum 3.5 GPA in the major, and complete a senior honors thesis. To complete the honors thesis requires a student to enroll in four hours of LLS 495, normally distributed evenly across two consecutive semesters. Students graduating with at least a 3.5 GPA in the major (and meeting the other conditions) will be awarded Distinction; those with at least a 3.7 GPA in the major will be given High Distinction.

LLS 100	Intro Latina/Latino Studies	3
LLS 385	Theory and Methods in LLS	3
Thematic Areas		
Students must take two courses in each of the following three areas. A list of courses is maintained in the Department's office.		
A. Literature, Media and Culture		6
B. Race, Gender, and Sexuality		6
C. History, Politics, and Society		6
LLS 490	Senior Research Project	4
or LLS 495	Senior Honors Thesis	
LLS Electives selected from the list of all LLS and cross-listed LLS classes		6
Supporting coursework chosen in consultation with an advisor; may be a campus approved minor		18
Total Hours		52

Twelve hours of 300- and 400-level Latina/Latino Studies courses must be taken on this campus.

Interdisciplinary Minor in Latina/Latino Studies

The Interdisciplinary Minor in Latina/Latino Studies will allow students following any major plan of study to gain extensive knowledge in Latina/Latino Studies by completing seven courses (at least 21 credit hours) chosen in consultation with the Department of Latina/Latino advisor. The courses must form a coherent program of study and be approved by the Department of Latina/Latino Studies or Latina/Latino Studies advisor.

LLS 100	Intro Latina/Latino Studies	3
LLS 385	Theory and Methods in LLS	3
Thematic Areas		

Students must take one course in each of the following three areas. A list of courses is maintained in the Department's office.

A. Literature, Media, and Culture	3
B. Race, Gender, and Sexuality	3
C. History, Politics, and Society	3
2 elective courses selected from the list of all LLS and cross-listed LLS classes	6
Total Hours	21

No more than 3 hours may be at the 100 level and at least 6 hours must be 300 and 400-level courses.

Students must officially declare their minor by registering with the Latina/Latino Studies advisor.

Completion of the program requires a minimum grade point average of 2.75 (A+ = 4.0) in Latina/Latino Studies courses.

Linguistics

James Yoon

4080 Foreign Languages Building, 707 South Mathews, Urbana, (217) 333-3563

www.linguistics.illinois.edu

The Department of Linguistics offers undergraduate instruction of four types: courses in linguistics, in English as an International Language, English as a Second Language, and in non-Western languages.

Linguistics courses focus on empirical and theoretical issues connected with how languages are structured, how they are used, and how they change through time. These courses are of interest not only to linguistics majors, but to students in any field where the analysis of languages is important: anthropology, speech and hearing science, psychology, philosophy, computer science, foreign languages, and others.

English as an International Language courses are concerned with the teaching of English to speakers of other languages, and are useful to any students planning a career in language teaching.

English as a Second Language courses are for students whose first language is not English, to build up skills in speaking, understanding, reading, and writing English.

Non-Western Language courses build up skills in speaking, listening, reading and writing a specific language; familiarize students with literatures and cultures connected with the language; and examine linguistic issues peculiar to the language itself. These courses are of interest to students planning international careers, or simply desiring to broaden their perspective and learn about a different language and culture.

Undergraduate Major offered by the Department of Linguistics

- Linguistics

In addition, students may pursue linguistics as part of the LAS Major in Computer Science and Linguistics (p. 451)

Undergraduate Minors offered by the Department of Linguistics

- Arabic Studies
- English as a Second Language
- Hindi Studies
- Linguistics
- Sub-Saharan African Languages
- Teacher Education Minor in English as a Second Language

Languages Offered by the Department of Linguistics

- African Languages (Bamana, Lingala, Swahili, Wolof, and Zulu)
- Arabic
- Hindi
- Modern Greek
- Persian
- Sanskrit
- Turkish

Major in Linguistics

Major in Sciences and Letters Curriculum

E-mail: lasersoh@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum major and supporting course work normally equates to 50-52 hours.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Students are strongly encouraged to fulfill the requirements for completing their program with distinction. Candidates for the degree with distinction must register their candidacy with their advisers no later than the end of the second semester of the junior year. They must achieve a grade point average of at least 3.4 for the required 36 hours in linguistics, and register for at least 4 hours of LING 391 - Honors Individual Study, plus submit a senior honors thesis to the Department of Linguistics by the first day of the month preceding the month of graduation.

Major core courses: 18

LING 100	Intro to Language Science
LING 210	Language History
LING 301	Elements of Syntax
LING 302	Elements of Phonology
LING 307	Elmnts Semantics & Pragmatics
LING 401	Intro to General Phonetics

Select one of the following: 3

LING 225	Elements of Psycholinguistics
LING 250	Language Diversity in the USA

Major electives: 15 hours of Linguistics courses at the 200- to 400-level, chosen in consultation with the student's advisor 15

Students must fulfill the LAS foreign language requirement, and in addition, complete at least 8 hours in a second foreign language. One of these languages must be a non-Western language chosen from the following list or approved in consultation with the student's advisor: American Sign Language, Arabic, Bamana, Basque, Chinese, Hebrew, Hindi/Urdu, Japanese, Korean, Lingala, Persian, Quechua, Sanskrit, Swahili, Turkish, Wolof, Zulu. Courses used to complete this requirement may also be used to meet the requirement of "Courses in linguistically relevant areas," below. 8-10

Courses in linguistically relevant areas chosen in consultation with the student's advisor. There are two ways of meeting this requirement: 14

A. The courses may come from any of the following disciplines: any foreign language, anthropology, classics, computer science, English, English as an international language, philosophy, psychology, speech and hearing science, communication.
B. Students desiring to specialize in the linguistics of a particular language should complete at least four semesters of instruction in that language beyond the elementary level, and a linguistics course or independent study focusing on the selected language or its language family.

Students must complete 21 hours of coursework at the 300- or 400-level, including at least 12 hours of 300- or 400-level linguistics courses on this campus. These courses may be included in the core courses or electives required above.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

- Minor in Arabic Studies (p. 391)
- Minor in English as a Second Language (p. 391)
- Minor in Hindi Studies (p. 392)
- Minor in Linguistics (p. 392)
- Minor in Sub-Saharan African Languages (p. 393)
- Teacher Education Minor in English as a Second Language (p. 393)

Minor in Arabic Studies

The minor in Arabic Studies is designed for students interested in developing an expertise in one, or more, aspect of the Arab World, as complement to their disciplinary major. Completion of the minor requires at least 18 hours in applicable courses.

Language requirement		6
ARAB 405	Advanced Standard Arabic I	
ARAB 406	Advanced Standard Arabic II	
Arabic Culture and Linguistics courses		6
LING/ARAB 411	Survey of Arabic Varieties	
3 hours: Choose one course from the following in consultation with the advisor: ARAB 150- Lang;Culture of Arab World OR ARAB 210: Colloquial Arabic I or a Study Abroad Equivalent (must be approved by the advisor)		
Two Interdisciplinary courses related to the Arab World (To be chosen from the following list in consultation with the advisor)		6
ARAB 407	Topics Stand Arabic Lang&Lit I	
ARAB 408	Topics Stand Arabic LangLit II	
ARAB 409	Adv Top Stand Arabic LangLit I	
ARAB 410	AdvTop Stand Arabic LangLit II	
HIST 135	History of Islamic Middle East	
HIST 337	Middle East in 20th Century	
HIST 438	Egypt Since World War I	
PS 347	Gov & Pol of Middle East	
RLST 213	Intro to Islam - ACP	
RLST 214	Introduction to Islam	
RLST 223	The Qur'an (Koran)	
RLST 260	Mystics and Saints in Islam	
RLST 403	Women in Muslim Societies	
RLST 408	Islam & Politics in Mid. East	
RLST 481	Muslim Ethics in Global Age	
RLST 482	Muslim-Christian Interactions	
Total Hours		18

Minor in English as a Second Language

This minor, sponsored by the Department of Linguistics, prepares a student to teach English overseas and in contexts other than U.S. public schools. Completion of the minor fulfills the course work requirement for a Certificate in Teaching English as a Second Language (TESL). To receive a Certificate in TESL and a letter of completion from the department, the student must apply for the Certificate after completing all certificate requirements. Students must declare their minor at the start of their study. The Certificate in TESL does not lead to ISBE State certification for K-12 Schools.

E-mail: rsadler@illinois.edu

Introduction to Linguistics (select one of the following)		3
LING 100	Intro to Language Science	
LING 400	Intro to Linguistic Structure	
EIL 487	Topics in Second Lang Studies	
LING 489	Theoretical Foundations of SLA	3,4
EIL 411	Intro to TESL Methodology	3
Select three of the following:		9
EIL 422	Engl Grammar for ESL Teachers	
EIL 445	Second Lang Reading & Writing	
EIL 456	Lang and Social Interaction I	
EIL 460	Principles of Language Testing	
EIL 488	English Phon & Morph for TESL	
Total Hours		18-19

Minor in Hindi Studies

The minor in Hindi Studies is designed for students interested in receiving training in processing and using Hindi in a wide variety of authentic (from informal to institutional) contexts. Students will be encouraged to read authentic Hindi material from different genres and registers (including Hindi print media). Completion of the minor requires at least 19 hours in applicable courses.

Hindi language requirement		10
HNDI 404	Intermediate Hindi II	
HNDI 405	Advanced Hindi I	
HNDI 406	Advanced Hindi II	
Two courses in Indian Linguistics/sociolinguistics (to be chosen from the following list in consultation with advisor)		6
LING 115	Language and Culture in India	
HNDI 412	Business Hindi	
LING 111	Language in Globalization	
One historically significant language course related to Modern Hindi or a course on Indian/South Asian Literature		3-5
SNSK 201	Elementary Sanskrit I	
SNSK 202	Elementary Sanskrit II	
ARAB 201	Elementary Standard Arabic I	
ARAB 202	Elementary Standard Arabic II	
PERS 201	Elementary Persian I	
PERS 202	Elementary Persian II	
HNDI 408	Intro to South Asian Lit	
Students with prior knowledge of any of the languages mentioned above can also meet the 3-5 credit requirement by taking upper level courses of the languages.		
Total Hours		19-21

Minor in Linguistics

The Linguistics Minor is designed for students who seek a basic familiarity with the field and is especially suited for students with majors in foreign language and other language-related fields such as anthropology, computer science, English, psychology, communication, and for anyone interested in the nature of language.

E-mail: lasersoh@illinois.edu

LING 100	Intro to Language Science	3
Select two of the following:		6
LING 301	Elements of Syntax	
LING 302	Elements of Phonology	
LING 307	Elmnts Semantics & Pragmatics	
Nine additional hours of linguistics courses, including at least six hours chosen from the following:		9
LING 301	Elements of Syntax (if not chosen for the second requirement above)	
LING 302	Elements of Phonology (if not chosen for the second requirement above)	
LING 307	Elmnts Semantics & Pragmatics (if not chosen for the second requirement above)	
LING 210	Language History	
LING 225	Elements of Psycholinguistics	
LING 250	Language Diversity in the USA	
LING 400	Intro to Linguistic Structure	
LING 401	Intro to General Phonetics	
LING 406	Intro to Computational Ling	

Minor in Sub-Saharan African Languages

The minor in Sub-Saharan African Languages is designed for students who are interested in developing proficiency in any one of the languages for which there is faculty expertise, and to develop their understanding of the region, as a complement to their disciplinary major. Available African Languages include: Bamana, Lingala, Swahili, Wolof and Zulu. Completion of the minor requires at least 18 hours.

E-mail: [k\(bokamba@illinois.edu\)reidel@illinois.edu](mailto:k(bokamba@illinois.edu)reidel@illinois.edu)

Language	6
Advanced African Language courses beyond the second year courses chosen in consultation with the minor advisor. Only one African Language can be chosen to fulfill this requirement.	
African Linguistics	6
3 hours: Introductory course chosen from the following:	
LING 100	Intro to Language Science
LING 400	Intro to Linguistic Structure
3 hours: 300 or 400-level course chosen from the following:	
LING 412	Lang in African Culture & Soc
LING 420	Intro to African Linguistics
A similar course at the 300- or 400-level approved by the advisor	
African Studies	6
Courses must be selected in consultation with the advisor.	
One course chosen from the list of approved introductory courses; and	
One course chosen from the list of approved courses at the 300 or 400-level.	
Note that many courses on the list require a prerequisite such as AFST 222 or HIST 110.	
Total Hours	18

Teacher Education Minor in English as a Second Language

For those in another teacher education curriculum who want to prepare themselves to gain an ESL approval on their teacher's certificate related to their major field. Teacher education minors are available only to students seeking to add additional teaching fields to their teaching majors.

Students are advised that additional course work is necessary to teach middle grades six through eight. Consult the certification officer at 505 East Green suite 203 for additional information.

E-mail: rsadler@illinois.edu

Select one of the following:		2
EIL 214	TESL in the Elementary School	
EIL 215	TESL in the Secondary School	
EIL 422	Engl Grammar for ESL Teachers	3
EIL 411	Intro to TESL Methodology	3
Select one of the following:		3
EIL 456	Lang and Social Interaction I	
CI 446	Culture in the Classroom	
EIL 460	Principles of Language Testing	3
EIL 488	English Phon & Morph for TESL	3
LING 489	Theoretical Foundations of SLA	3,4
LING 490	Special Topics in Linguistics	3,4
LING 100	Intro to Language Science	3
Total Hours		26-28

Mathematics

Matthew Ando, Department Chair

273 Altgeld Hall, 1409 West Green, Urbana, (217) 333-3350

www.math.illinois.edu

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses in Part I provide fundamental background for mathematics in general. The concentrations in Part II allow the student to broaden this background or begin to specialize. Students must complete the core courses (Part I) and a concentration (Part II).

An entering student in mathematics should have academic preparation to enroll in MATH 220 during the first semester. Admission to MATH 220 requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.

The Department of Mathematics sponsors the Mathematics major, including the Teaching of Mathematics concentration; the Mathematics minor; Teacher Education Minors; the Actuarial Science (p. 394) major; and a major in Mathematics and Computer Science (p. 401) in coordination with the Department of Computer Science.

- Actuarial Science (p. 394)
- Mathematics (p. 398)
- Mathematics and Computer Science (p. 401)
- Minor in Mathematics (p. 405)
- Teacher Education Minor in Mathematics, Grades 6-8 (p. 406)
- Teacher Education Minor in Mathematics, Grades 9-12 (p. 406)

Actuarial Science

Matthew Ando

273 Altgeld Hall, 1409 West Green, Urbana, (217) 333-3350

<http://www.math.illinois.edu/~gorvett>

This major is sponsored by the Department of Mathematics, and is an interdisciplinary subject involving mathematics, statistics, and financial economics. It is designed to prepare students to enter the actuarial profession, as well as to provide a background in quantitative finance and risk management. See also Mathematics (p. 394) and Mathematics and Computer Science (p. 401).

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: math@illinois.edu

Minimum required major and supporting course work normally equates to 57-59 hours including 29-30 hours of mathematics beyond calculus.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: To qualify for distinction, the student must take MATH 472, have a grade point average in mathematics courses of at least 3.25, and pass at least six hours of examinations offered by the professional actuarial societies. To qualify for high or highest distinction, the student must have passed at least eight hours of professional exams, with highest distinction going to those whose grade point averages in mathematics are at least 3.75. Finance courses and additional professional exams may also be given consideration in close decisions.

Calculus through:		11-12
MATH 241	Calculus III (or equivalent)	
Select one of the following:		3
CS 101	Intro Computing: Engrg & Sci	
CS 105	Intro Computing: Non-Tech	
CS 125	Intro to Computer Science	
MATH 210	Theory of Interest	3
MATH 408	Actuarial Statistics I	3-4
or MATH 461	Probability Theory	

MATH 409	Actuarial Statistics II	4
MATH 469	Methods of Applied Statistics	3
MATH 410	Lin Algebra & Financial Apps	3
MATH 471	Actuarial Theory I	4
Select two of the following:		6
MATH 472	Actuarial Theory II	
MATH 476	Actuarial Risk Theory	
MATH 478	Actuarial Modeling	
MATH 479	Casualty Actuarial Mathematics	
A third course from the list above or an approved section of MATH 490 (e.g. financial mathematics)		3
FIN 221	Corporate Finance	3
FIN 300	Financial Markets	3
FIN 321	Advanced Corporate Finance	3
Select two of the following:		6
ECON 302	Inter Microeconomic Theory	
ECON 303	Inter Macroeconomic Theory	
FIN 230	Introduction to Insurance	
FIN 431	Property-Liability Insurance	
FIN 432	Managing Fin Risk for Insurers	
FIN 434	Employee Benefit Plans	

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

Applied Mathematics Concentration

Each student must fulfill the core requirements of Part I and the concentration requirements of Part II.

Part I: Core Courses

MATH 241	Calculus III ¹	4
MATH 347	Fundamental Mathematics	3-4
or MATH 348	Fundamental Mathematics-ACP	
MATH 416	Abstract Linear Algebra ²	3
MATH 417	Intro to Abstract Algebra	3
or MATH 427	Honors Abstract Algebra	
MATH 424	Honors Real Analysis ³	3
or MATH 444	Elementary Real Analysis	
or MATH 447	Real Variables	
MATH 461	Probability Theory ⁴	3-4
or STAT 400	Statistics and Probability I	
CS 101	Intro Computing: Engrg & Sci	3-4
or CS 125	Intro to Computer Science	
Approved supporting coursework or any minor		12

Part II: Concentration Courses

MATH 441	Differential Equations	3
MATH 446	Applied Complex Variables	3
or MATH 448	Complex Variables	
CS 357	Numerical Methods I	3
or MATH 442	Intro Partial Diff Equations	
or MATH 489	Dynamics & Differential Eqns	

MATH 412	Graph Theory	3
or MATH 413	Intro to Combinatorics	
or MATH 482	Linear Programming	
One additional 400- or 500-level Math course		3

- ¹ Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.
- ² Beginning in Fall 2012, students may not receive credit for both MATH 416 and either MATH 410 or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of MATH 410 or MATH 415.
- ³ If MATH 424 or MATH 447 is completed, a group requirement for the Graduate Preparatory concentration has been satisfied.
- ⁴ If STAT 400 is completed, a group requirement for the Operations Research concentration has been satisfied.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours) except for students in the Teaching of Mathematics concentration. Please see your adviser.

Graduate Preparatory Concentration

Each student must fulfill the core requirements of Part I and the concentration requirements of Part II.

Part I: Core Courses

MATH 241	Calculus III ¹	4
MATH 347	Fundamental Mathematics	3-4
or MATH 348	Fundamental Mathematics-ACP	
MATH 416	Abstract Linear Algebra ²	3
MATH 417	Intro to Abstract Algebra	3
or MATH 427	Honors Abstract Algebra	
MATH 424	Honors Real Analysis ³	3
or MATH 444	Elementary Real Analysis	
or MATH 447	Real Variables	
MATH 461	Probability Theory ⁴	3-4
or STAT 400	Statistics and Probability I	
CS 101	Intro Computing: Engrg & Sci	3-4
or CS 125	Intro to Computer Science	
Approved supporting coursework or any minor		12

Part II: Concentration Courses

The courses chosen from the core and the Graduate Preparatory concentration must include at least two of MATH 424, MATH 425, MATH 427, MATH 428.

MATH 418	Intro to Abstract Algebra II	3
or MATH 428	Honors Topics in Mathematics	
MATH 424	Honors Real Analysis ⁵	3
or MATH 447	Real Variables	
MATH 448	Complex Variables	3
MATH 423	Differential Geometry	3
or MATH 425	Honors Advanced Analysis	
or MATH 432	Set Theory and Topology	
MATH 441	Differential Equations	3
Two additional 400- or 500-level Math courses		6

- ¹ Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.
- ² Beginning in Fall 2012, students may not receive credit for both MATH 416 and either MATH 410 or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of MATH 410 or MATH 415.
- ³ If MATH 424 or MATH 447 is completed, a group requirement for the Graduate Preparatory concentration has been satisfied.
- ⁴ If STAT 400 is completed, a group requirement for the Operations Research concentration has been satisfied.
- ⁵ If MATH 424 or MATH 447 is completed as one of the core courses, this 3 hour group requirement has been satisfied.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours) except for students in the Teaching of Mathematics concentration. Please see your adviser.

Major in Mathematics

Major in Sciences and Letters Curriculum

E-mail: mathadvising@illinois.edu

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 46-57 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework.

Within the core there is a choice of courses with differing numbers of credit hours, and the number of required courses in a concentration varies from four to six. The number of required hours of mathematics beyond calculus in the core varies between 15 and 17, depending on the choice of MATH 347 or MATH 348 and the choice of MATH 461 or MATH 463. The minimum number of hours of required mathematics courses beyond calculus is 27, occurring in either the General Mathematics concentration or the Teaching of Mathematics concentration as the result of a choice of 15 hours from the core and 12 hours specified in the concentration. The maximum number of hours of mathematics required beyond calculus is 35, the result in the Graduate Preparatory concentration of choosing 17 hours from the core and 18 hours specified in the concentration. (See footnote 5.)

The minimum number of required hours of mathematics and supporting coursework is 46, consisting of 27 hours of required math courses beyond calculus in the General Mathematics concentration, four hours of MATH 241, three hours of CS 101, and 12 hours of supporting coursework. The maximum number of hours of required mathematics and supporting coursework is 57, consisting of 12 hours of calculus in the Teaching of Mathematics concentration, 17 hours of mathematics beyond calculus in the core, four hours of CS 125, 12 hours of required math courses beyond calculus specified in the concentration, and 12 hours of supporting coursework.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

Each student must fulfill the requirements of Part I and one of the concentrations described in Part II.

Part I: Core Courses

MATH 241	Calculus III ¹	4
MATH 347 or MATH 348	Fundamental Mathematics Fundamental Mathematics-ACP	3-4
MATH 416	Abstract Linear Algebra ²	3-4
Select one of the following:		3
MATH 417	Intro to Abstract Algebra	
MATH 427	Honors Abstract Algebra	
Select one of the following: ³		3
MATH 424	Honors Real Analysis	
MATH 444	Elementary Real Analysis	
MATH 447	Real Variables	

Select one of the following: ⁴	3-4
MATH 461	Probability Theory
STAT 400	Statistics and Probability I
Select one of the following:	3-4
CS 101	Intro Computing: Engrg & Sci
CS 125	Intro to Computer Science
Approved supporting course work or any minor	12
Part II: Concentration	
Select one concentration	6-21

- ¹ Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.
- ² Beginning in Fall 2012, students may not receive credit for both MATH 416 and either MATH 410 or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of MATH 410 or MATH 415.
- ³ If MATH 424 or MATH 447 is completed, a group requirement for the Graduate Preparatory concentration has been satisfied.
- ⁴ If STAT 400 is completed, a group requirement for the Operations Research concentration has been satisfied.

³ If MATH 424 or MATH 447 is completed, a group requirement for the Graduate Preparatory concentration has been satisfied.

⁴ If STAT 400 is completed, a group requirement for the Operations Research concentration has been satisfied.

Mathematics Concentration

Each student must fulfill the core requirements of Part I and the concentration requirements of Part II.

Part I: Core Courses

MATH 241	Calculus III ¹	4
MATH 347	Fundamental Mathematics	3-4
or MATH 348	Fundamental Mathematics-ACP	
MATH 416	Abstract Linear Algebra ²	3
MATH 417	Intro to Abstract Algebra	3
or MATH 427	Honors Abstract Algebra	
MATH 424	Honors Real Analysis ³	3
or MATH 444	Elementary Real Analysis	
or MATH 447	Real Variables	
MATH 461	Probability Theory ⁴	3-4
or STAT 400	Statistics and Probability I	
CS 101	Intro Computing: Engrg & Sci	3-4
or CS 125	Intro to Computer Science	
Approved supporting coursework or any minor		12

Part II: Concentration Courses

Select a total of two courses from two of the following three lists:

6

Geometry

MATH 402	Non Euclidean Geometry
MATH 403	Euclidean Geometry
MATH 423	Differential Geometry
MATH 481	Vector and Tensor Analysis

Differential Equations and Complex Analysis

MATH 441	Differential Equations
----------	------------------------

MATH 446	Applied Complex Variables	
MATH 448	Complex Variables	
Number Theory		
MATH 453	Elementary Theory of Numbers	
Two additional 400- or 500-level Math courses		6

Each student must fulfill the core requirements of Part I and the concentration requirements of Part II.

Part I: Core Courses

MATH 241	Calculus III ¹	4
MATH 347	Fundamental Mathematics	3-4
or MATH 348	Fundamental Mathematics-ACP	
MATH 416	Abstract Linear Algebra ²	3
MATH 417	Intro to Abstract Algebra	3
or MATH 427	Honors Abstract Algebra	
MATH 424	Honors Real Analysis ³	3
or MATH 444	Elementary Real Analysis	
or MATH 447	Real Variables	
MATH 461	Probability Theory ⁴	3-4
or STAT 400	Statistics and Probability I	
CS 101	Intro Computing: Engrg & Sci	3-4
or CS 125	Intro to Computer Science	
Approved supporting coursework or any minor		12

Part II: Concentration Courses

The courses chosen from the core and the Graduate Preparatory concentration must include at least two of MATH 424, MATH 425, MATH 427, MATH 428.

MATH 418	Intro to Abstract Algebra II	3
or MATH 428	Honors Topics in Mathematics	
MATH 424	Honors Real Analysis ⁵	3
or MATH 447	Real Variables	
MATH 448	Complex Variables	3
MATH 423	Differential Geometry	3
or MATH 425	Honors Advanced Analysis	
or MATH 432	Set Theory and Topology	
MATH 441	Differential Equations	3
Two additional 400- or 500-level Math courses		6

¹ Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.

² Beginning in Fall 2012, students may not receive credit for both MATH 416 and either MATH 410 or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of MATH 410 or MATH 415.

³ If MATH 424 or MATH 447 is completed, a group requirement for the Graduate Preparatory concentration has been satisfied.

⁴ If STAT 400 is completed, a group requirement for the Operations Research concentration has been satisfied.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours) except for students in the Teaching of Mathematics concentration. Please see your adviser.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours) except for students in the Teaching of Mathematics concentration. Please see your adviser.

Mathematics and Computer Science

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: academic@cs.illinois.edu or math@illinois.edu

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 68-70 hours.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction. In addition, students must complete at least three semester hours of additional Computer Science or Mathematics courses selected from the following:

CS 196	Freshman Honors	1
CS 296	Honors Course	1
CS 397	Individual Study	1-3
CS 492	Senior Project I	3
CS 493	Senior Project II, ACP	3
CS 499	Senior Thesis	3
any CS course numbered 411 or higher		
MATH 412	Graph Theory	3,4
MATH 414	Mathematical Logic	3,4
MATH 417	Intro to Abstract Algebra	3,4
MATH 418	Intro to Abstract Algebra II	3,4
MATH 423	Differential Geometry	3,4
MATH 432	Set Theory and Topology	3,4
MATH 448	Complex Variables	3,4
MATH 482	Linear Programming	3,4
MATH 484	Nonlinear Programming	3,4
MATH 496	Honors Seminar	3

Requirements

Calculus through MATH 241-Calculus III		11-12
MATH 347	Fundamental Mathematics	3
or MATH 348	Fundamental Mathematics-ACP	
CS 125	Intro to Computer Science	4
CS 173	Discrete Structures	3
CS 225	Data Structures	4
CS 233	Computer Architecture	4
CS 241	System Programming	4
CS 242	Programming Studio	3
CS/MATH 357	Numerical Methods I	3
CS 373	Theory of Computation	3
CS 457	Numerical Methods II	3

MATH 415	Applied Linear Algebra	3 OR 4
or MATH 416	Abstract Linear Algebra	
400-level mathematics and computer science requirements:		21-22
Students must select at least seven 400-level mathematics and computer science courses, including one from each of the following groups:		
GROUP I		
MATH 461	Probability Theory	
STAT 400/MATH 463	Statistics and Probability I	
GROUP II		
MATH 412	Graph Theory	
MATH 417	Intro to Abstract Algebra	
GROUP III		
MATH 441	Differential Equations	
MATH 446	Applied Complex Variables	
MATH 484	Nonlinear Programming	
GROUP IV		
MATH 444	Elementary Real Analysis	
MATH 447	Real Variables	
GROUP V		
MATH 414	Mathematical Logic	
CS/MATH 473	Fundamental Algorithms	
CS/MATH 475	Formal Models of Computation	
GROUP VI		
CS 421	Progrmg Languages & Compilers	
CS 423	Operating Systems Design	

NOTE: A student taking a cross-listed course in this major may designate it as either mathematics or computer science.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

Operations Research Concentration

Each student must fulfill the core requirements of Part I and the concentration requirements of Part II.

Part I: Core Courses

MATH 241	Calculus III ¹	4
MATH 347	Fundamental Mathematics	3-4
or MATH 348	Fundamental Mathematics-ACP	
MATH 416	Abstract Linear Algebra ²	3
MATH 417	Intro to Abstract Algebra	3
or MATH 427	Honors Abstract Algebra	
MATH 424	Honors Real Analysis ³	3
or MATH 444	Elementary Real Analysis	
or MATH 447	Real Variables	
MATH 461	Probability Theory ⁴	3-4
or STAT 400	Statistics and Probability I	
CS 101	Intro Computing: Engrg & Sci	3-4
or CS 125	Intro to Computer Science	
Approved supporting coursework or any minor		12

Part II: Concentration Courses

CS 357	Numerical Methods I	3
MATH 412	Graph Theory	3
or MATH 484	Nonlinear Programming	
STAT 400	Statistics and Probability I ⁵	4
STAT 410	Statistics and Probability II	3
or STAT 420	Methods of Applied Statistics	
MATH 482	Linear Programming	3

¹ Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.

² Beginning in Fall 2012, students may not receive credit for both MATH 416 and either MATH 410 or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of MATH 410 or MATH 415.

³ If MATH 424 or MATH 447 is completed, a group requirement for the Graduate Preparatory concentration has been satisfied.

⁴ If STAT 400 is completed, a group requirement for the Operations Research concentration has been satisfied.

⁵ If STAT 400 is completed as one of the core courses, this 4 hour requirement has been satisfied.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours) except for students in the Teaching of Mathematics concentration. Please see your adviser.

Teaching of Mathematics Concentration

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

General education: Students must fulfill the Campus general education requirements. In addition, students must take a speech performance course chosen from the following list:

CMN 101	Public Speaking
CMN 113	Small Group Communication
CMN 321	Strategies of Persuasion
CMN 323	Argumentation

or satisfy the Comp I requirement with:

CMN 111 & CMN 112	Oral & Written Comm I and Oral & Written Comm II
----------------------	---

Prerequisites to transfer to the Teaching Concentration:

EPSY 201	Educational Psychology	3
EPS 201	Foundations of Education	3
or EPS 202	Foundations of Education-ACP	
MATH 220	Calculus	5
or MATH 221	Calculus I	
MATH 231	Calculus II	3
MATH 241	Calculus III	4
Three advanced mathematics courses, including		
MATH 347	Fundamental Mathematics	
or MATH 348	Fundamental Mathematics-ACP	

Prerequisite courses must be completed prior to transfer into the teaching concentration and hence must be in progress or completed at the time of application.

Part I: Core Courses

MATH 241	Calculus III ¹	4
MATH 347 or MATH 348	Fundamental Mathematics Fundamental Mathematics-ACP	3-4
MATH 416	Abstract Linear Algebra ²	3
MATH 417 or MATH 427	Intro to Abstract Algebra Honors Abstract Algebra	3
MATH 424 or MATH 444 or MATH 447	Honors Real Analysis ³ Elementary Real Analysis Real Variables	3
MATH 461 or STAT 400	Probability Theory Statistics and Probability I	3-4
CS 101 or CS 125	Intro Computing: Engrg & Sci Intro to Computer Science	3-4
Approved supporting course work or any minor		12

In addition to the requirements listed above in Part I and the concentration requirements below in Part II, students must complete the **Teacher Education Minor in Secondary School Teaching** (37 - 38 hours). Conferral of the degree of Bachelor of Science in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Academic Affairs Office. While it is possible to complete this program in eight semesters, many students may require an extra semester or two.

Part II: Concentration Requirements

MATH 220 or MATH 221	Calculus Calculus I	4-5
MATH 231	Calculus II	3
MATH 402 or MATH 403	Non Euclidean Geometry Euclidean Geometry	3
MATH 453	Elementary Theory of Numbers	3
Two additional 400- or 500-level mathematics courses		6

¹ Students should have credit for MATH 220/MATH 221 and MATH 231 before enrolling in MATH 241.

² Beginning in Fall 2012, students may not receive credit for both MATH 416 and either MATH 410 or MATH 415. However, if one course is taken prior to Fall 2012, credit may be earned for both MATH 416 and either of MATH 410 or MATH 415.

³ If MATH 424 or MATH 447 is completed, a group requirement for the Graduate Preparatory concentration has been satisfied.

⁴ If STAT 400 is completed, a group requirement for the Operations Research concentration has been satisfied.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours) except for students in the Teaching of Mathematics concentration. Please see your adviser.

Minor in Mathematics

E-mail: math@illinois.edu

Web address for department: www.math.illinois.edu

MATH 241	Calculus III	4
Completed in one of two ways:		15
MATH 347	Fundamental Mathematics (and four courses chosen from at least two of the following lists of courses)

Medieval Studies, Program In

The purpose of the Program in Medieval Studies is to foster the interdisciplinary and cross-cultural study of the history, literature, languages, religion, philosophy, art, and archaeology of cultures across the globe from approximately the fourth through the fifteenth centuries C.E., by sponsoring activities such as seminars, conferences, symposia, and lectures, visiting scholars, and exchange and outreach programs, and by offering an undergraduate Interdisciplinary Studies Medieval Studies Concentration (p. 381) and Minor in Medieval Studies.

Interdisciplinary Minor in Medieval Studies

This minor introduces students to medieval (ca. 500- ca. 1500 CE) cultures across the world, providing them with an understanding of periods and movements, institutions, material culture, ideas, beliefs, and values of the diverse cultures that comprise the medieval globe. The coursework spans both geographical regions and disciplines to introduce students to the breadth of medieval cultures as well as to the diversity of methods and perspectives for their study.

The minor includes a minimum of 21 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework as specified below; and (III) advanced medieval coursework selected by the student in consultation with a faculty advisor. 3 hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

Introduction to Medieval Studies ¹

ENGL 202/MDVL 201/CWL 253	Medieval Lit and Culture	3
---------------------------	--------------------------	---

Geographical Distribution Coursework ² 9

3 hours- Medieval Europe- One course chosen from the following:

ARTH/MDVL 111	Ancient to Medieval Art
ARTH/MDVL 222	Medieval Art
ARTH/MDVL 231	Northern Renaissance Art
ITAL/MDVL 240	Italy Middle Ages & Renaiss
HIST/MDVL 245	Women & Gender Pre-Mod Europe
HIST/MDVL 247	Medieval Europe
SCAN/MDVL 251	Viking Mythology
SCAN/MDVL 252	Viking Sagas in Translation
HIST/MDVL 255	British Isles to 1688
ARCH/MDVL 412	Medieval Architecture

3 hours-Classical and Medieval East Asia- One course chosen from the following:

HIST 220	Traditional China
HIST 226	Premodern Japanese History
EALC 240	Chinese Civilization
EALC 275	Masterpieces of East Asian Lit
RLST 287	Introduction to Buddhism

3 hours-Medieval Central Asia, South Asia, or the Middle East-One course chosen from the following:

HIST 130	History of South Asia
HIST 135	History of Islamic Middle East
LA 218	S Asian Cultural Landscapes
LA 222	Islamic Gardens & Architecture
RLST 213	Intro to Islam - ACP
RLST 214	Introduction to Islam
RLST 223	The Qur'an (Koran)
RLST 260	Mystics and Saints in Islam
RLST 283	Jewish Sacred Literature
CWL 208	Cultures & Lits of South Asia

Additional Medieval Studies Coursework 9

Medieval-related coursework from participating departments selected in consultation with the minor advisor. At least 6 hours must be at the 300- or 400-level. A list of courses is maintained on the Medieval Studies Program website. 3 hours of appropriate language study can be applied to meet this requirement with approval of the Director of the Program in Medieval Studies.

Total Hours

21

- ¹ A student may substitute the "Medieval World" section of HIST 100 by petition to the Director of Medieval Studies. Only the section of HIST 100 devoted to the Middle Ages may be substituted.
- ² A student may substitute 3 hours in geographical distribution coursework with a course on the medieval civilizations of the Americas: ANTH 277 or ANTH 278.

Molecular and Cellular Biology, School in

Stephen Sligar, Director of School

393 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3166

<http://mcb.illinois.edu>

The Molecular and Cellular Biology major provides students with a solid preparation in molecular biology, molecular genetics, microbiology, cellular biology, biochemistry, physiology, and structural biology. Students will also acquire a strong background in chemistry, math and physical sciences. After completion of the core curriculum in MCB, students may complete the required advanced course work by taking a variety of MCB courses or by selecting a more focused group of courses in any of the following areas: biochemistry, cells and tissues, developmental biology, infection and immunity, microbiology, genetics, neurobiology and physiology. The MCB Advising Program (MAP) staff is available to help students plan their combination of advanced courses.

The Molecular and Cellular Biology Honors Concentration is designed for students whose preparation and interests motivate them to desire a more intensive undergraduate biology experience and to prepare for graduate or professional school. The MCB Honors Concentration is based on the MCB major. Students must satisfy all of the requirements for the MCB major in addition to the requirements for the MCB Honors Concentration. Students interested in the MCB Honors Concentration should contact the MCB Honors Concentration coordinator during the freshman year for more information.

The School of Molecular and Cellular Biology also sponsors the Minor in MCB and the Biochemistry Specialized Curriculum.

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail address: undergrad@mcb.illinois.edu

Minimum required courses: 67-71 hours, including 21 hours of 300- or 400-level courses; 12 hours of 300- and 400-level courses in the major must be taken on this campus.

General Education requirements: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours.

Distinction: To be eligible for graduation with distinction a student must graduate with a 3.25 grade point average, and submit a thesis or a paper describing an undergraduate research project for approval by the MCB Distinction Committee by the posted deadline <http://mcb.illinois.edu/undergrad/research.html#distinction>

Students earning a degree in Molecular and Cellular Biology may not also earn a second degree in the Specialized Curriculum in Biochemistry.

Students earning a degree in Molecular and Cellular Biology may not double major in Integrative Biology.

- Molecular and Cellular Biology Concentration (p. 411)
- Molecular and Cellular Biology Honors Concentration (p. 412)

For the Degree of Bachelor of Science in Biochemistry

- Major in Specialized Curriculum in Biochemistry (p. 413)

The typical program of courses required to satisfy this degree totals 126-131 hours as outlined below including up to 12 hours of non-primary language (if not completed in high school); in no case will a program totaling less than 120 hours qualify for graduation. In addition, in order to graduate there is a minimum 2.0 cumulative academic grade point average and student must attain a 2.5 academic grade point average in the chemistry, biochemistry, biology, mathematics, physics and advanced electives in science/engineering courses specified in this curriculum. All proposals for course substitutions must be approved by the academic advisor. This curriculum is intended for those students who desire a rigorous education in chemistry, biochemistry, and biology, who have definite research-oriented goals, and whose career objectives include graduate school, MD/PhD programs, or industry.

E-mail: biocug@life.uiuc.edu

Web address for department: <http://mcb.illinois.edu/departments/biochemistry/index.html>

All students must complete the General education requirements.

Minimum hours required for graduation: 120 hours

Students earning the Biochemistry degree automatically complete the Chemistry minor. Students earning a degree in the Specialized Curriculum in Biochemistry may not earn a second degree in the Science and Letters Curriculum in Molecular and Cellular Biology.

Departmental distinction: In addition to meeting the above requirements, a student seeking distinction must satisfy the following:

- Complete 10 hours of BIOC 492.
- Earn at least a 3.25 grade-point average.
- Present a senior thesis to the department.

Minor in Molecular and Cellular Biology

The minor, administered by the School of Molecular and Cellular Biology, is designed to provide students with an understanding of foundational principles of physiology, cellular and developmental biology, microbiology, molecular genetics and biochemistry. A minor in Molecular and Cellular Biology will prepare students for training in medicine and other health sciences, graduate studies in related disciplines, as well as for employment opportunities in pharmaceutical and biotechnology industries.

Students must contact an MCB advisor (<http://www.life.uiuc.edu/mcb/advising>) for acceptance into the minor. MCB 150 must be completed or in progress before acceptance into the minor.

MCB 244	Human Anatomy & Physiology I	3
or MCB 246	Human Anatomy & Physiology II

MCB 252	Cells, Tissues & Development	3
MCB 253	Exp Techniqs in Cellular Biol	2
MCB 354	Biochem & Phys Basis of Life	3
At least four additional courses at the 300- to 400-level from the Approved List of Advanced Courses for MCB Majors are also required, including one lab course. (http://mcb.illinois.edu/undergrad/courses/advanced)		15-16

Certain advanced courses may be taken prior to completion of the MCB 250-MCB 253, MCB 354 sequence with permission of an academic advisor. A minimum of 15 hours of 300- or 400-level courses in MCB from the approved list is required.

In addition, undergraduate research (MCB 290 or departmental equivalent) is strongly recommended for students planning to go to graduate school. No more than 10 hours of MCB 290 or departmental equivalent credit may be counted towards the 120 hours required for a degree in MCB.

All foreign language requirements must be satisfied.

Molecular and Cellular Biology Honors Concentration

The Molecular and Cellular Biology Honors Concentration is designed for students whose preparation and interests motivate them to desire a more intensive undergraduate biology experience and to prepare for graduate or professional school. The MCB Honors Concentration is based on the MCB concentration (p. 411). Students must satisfy all of the requirements for the MCB concentration in addition to the requirements for the MCB Honors Concentration. Students interested in the MCB Honors Concentration (<http://mcb.illinois.edu/undergrad/honors>) should contact the MCB Honors Concentration coordinator (shawna@illinois.edu) during the freshman year for more information.

Specialized Curriculum in Biochemistry

For the Degree Bachelor of Science in Biochemistry

The typical program of courses required to satisfy this degree totals 126-131 hours as outlined below including up to 12 hours of non-primary language (if not completed in high school); in no case will a program totaling less than 120 hours qualify for graduation. In addition, in order to graduate there is a minimum 2.0 cumulative academic grade point average and student must attain a 2.5 academic grade point average in the chemistry, biochemistry, biology, mathematics, physics and advanced electives in science/engineering courses specified in this curriculum. All proposals for course substitutions must be approved by the academic advisor. This curriculum is intended for those students who desire a rigorous education in chemistry, biochemistry, and biology, who have definite research-oriented goals, and whose career objectives include graduate school, MD/PhD programs, or industry.

E-mail: biocug@life.uiuc.edu

Web address for department: <http://mcb.illinois.edu/departments/biochemistry/index.html>

All students must complete the General education requirements.

Minimum hours required for graduation: 120 hours

Students earning the Biochemistry degree automatically complete the Chemistry minor. Students earning a degree in the Specialized Curriculum in Biochemistry may not earn a second degree in the Science and Letters Curriculum in Molecular and Cellular Biology.

Departmental distinction: A student seeking distinction must satisfy the following:

- Complete a minimum of 6 credit hours of undergraduate research (BIOC 290 and BIOC 492) with a minimum of 4 credit hours of BIOC 492.
- Earn at least a 3.25 grade-point average.
- Present a senior thesis to the department.

Select one of the following:

8-9

CHEM 202 & CHEM 203 & CHEM 204 & CHEM 205	Accelerated Chemistry I and Accelerated Chemistry Lab I and Accelerated Chemistry II and Accelerated Chemistry Lab II (preferred sequence)
CHEM 102 & CHEM 103 & CHEM 104 & CHEM 105	General Chemistry I and General Chemistry Lab I and General Chemistry II and General Chemistry Lab II (with advisor approval)

Organic chemistry, select from:

8-9

CHEM 236 & CHEM 237 & CHEM 436	Fundamental Organic Chem I and Structure and Synthesis and Fundamental Organic Chem II (preferred sequence)
CHEM 232 & CHEM 233 & CHEM 332	Elementary Organic Chemistry I and Elementary Organic Chem Lab I and Elementary Organic Chem II (with advisor approval)

Molecular and Cellular Biology

17

MCB 150	Molec & Cellular Basis of Life
MCB 250	Molecular Genetics
MCB 251	Exp Techniqs in Molecular Biol
MCB 252	Cells, Tissues & Development
MCB 253	Exp Techniqs in Cellular Biol
MCB 354	Biochem & Phys Basis of Life

or equivalent as approved by academic advisor

Physical chemistry, select one group of courses:

7-8

CHEM 440	Physical Chemistry Principles (Biological Perspective Section)
BIOC 446	Physical Biochemistry (preferred sequence)
or	
CHEM 442	Physical Chemistry I
CHEM 444	Physical Chemistry II (with advisor approval)

Mathematics

11-12

MATH 220 or MATH 221	Calculus Calculus I	
MATH 231	Calculus II	
MATH 241	Calculus III	
Physics, select from: ³		10-12
PHYS 211 & PHYS 212 & PHYS 213 & PHYS 214	University Physics: Mechanics and University Physics: Elec & Mag and Univ Physics: Thermal Physics and Univ Physics: Quantum Physics (preferred sequence)	
PHYS 101 & PHYS 102	College Physics: Mech & Heat and College Physics: E&M & Modern (or equivalent as approved by academic advisor (with advisor approval))	
Biochemistry: ⁴		23
BIOC 455	Technqs Biochem & Biotech	
BIOC 460	Biochemistry Senior Seminar	
BIOC 445	Current Topics in Biochemistry	
BIOC 492	Senior Thesis ⁵	
Advanced Science/Technical Electives: select from approved list ⁶		6
Nontechnical Requirements: ⁷		variable
General education:		
Foreign language - three semesters of college study (or three years of high school study) in a single foreign language to satisfy the campus foreign language requirement		
Composition I writing requirement to satisfy the campus Composition I requirement		
Advanced Composition writing requirement (BIOC 460 is required)		
Humanities/Arts to satisfy the campus general education requirements		
Social/Behavioral sciences to satisfy the campus general education requirements		
Cultural Studies to satisfy the campus general education requirement ⁸		
Electives (not including any credit in satisfaction of the above requirements)		variable

¹ Transfer credit must be approved by an advisor in biochemistry in order to be used to satisfy degree requirements.

² A more detailed description of the requirements is listed in the Biochemistry Curriculum Handbook, available in room 419A of Roger Adams Laboratory.

³ PHYS 213 is not required if CHEM 442/CHEM 444 sequence is taken.

⁴ Freshman orientation course is under development and will be required. See advisor for details.

⁵ BIOC 290 is strongly recommended.

⁶ An approved list of current courses will be updated annually in January/February for the coming year. Contact advisor.

⁷ The requirements for the Campus General Education categories of Natural Sciences and Technology, and Quantitative Reasoning I are fulfilled through coursework in the curriculum.

⁸ The courses taken to satisfy Western and/or Non-Western Civilization requirements may also be used to satisfy non-technical and/or free elective categories.

Philosophy

Kirk Sanders, Chair of Department

105 Gregory Hall, 810 South Wright, Urbana, (217) 333-2889

<http://www.phil.uiuc.edu>

Philosophy is the oldest, broadest, and most fundamental form of inquiry. Some philosophical questions have to do with the understanding of ourselves and whatever else there may be. Others focus upon the nature of different forms of knowledge and experience, and upon ethical issues and problems of value. The study of philosophy is one of the most important elements in a good liberal education. It also improves one's ability to think clearly, and to construct, analyze, and criticize arguments of any kind. The major and minor are sponsored by the Department of Philosophy.

Major in Philosophy

Major in Sciences and Letters Curriculum

E-mail: phildept@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 44 hours including at least 32 hours of Philosophy courses

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Eligibility for distinction may be pursued by either:

1. the thesis option, which requires at least 35 hours of philosophy courses (including 5 courses at the 300- or 400-level), a grade point average of 3.0 in all philosophy courses, and writing a thesis; or
2. the course work option, which requires 38 hours of philosophy (including 8 advanced courses) and a 3.5 grade point average in all philosophy courses. For further information, inquire in the department office.

32 hours of Philosophy courses including: ¹

Select one of the following: 3

PHIL 102	Logic and Reasoning	
PHIL 103	Logic and Reasoning QR II	
PHIL 202	Symbolic Logic ²	
PHIL 203	Ancient Philosophy	4
PHIL 206	Early Modern Philosophy	4

At least one course in Ethics and Value Theory chosen from the following: 3

PHIL 421	Ethical Theories	
PHIL 422	Recent Developments in Ethics	
PHIL 429	Value Theory	
PHIL 435	Social Philosophy	
PHIL 436	Phil of Law and of the State	
PHIL 441	Existential Philosophy	

At least one course in Epistemology and Metaphysics chosen from the following: 3

PHIL 425	Philosophy of Mind	
PHIL 426	Metaphysics	
PHIL 430	Theory of Knowledge	
PHIL 438	Philosophy of Language	
PHIL 443	Phenomenology	

At least 15 additional hours of course work in philosophy, with 12 of those hours being above the 100 level (including at least two 300- or 400-level courses). 15

A student may select either of two types of programs of supporting course work and should work out a specific program of the type chosen with the help and approval of a departmental adviser. 12

Twelve hours minimum. Select from:

Option I: Intensive study in another discipline. Courses normally beyond the 100 level in one other discipline. Most approved minors satisfy this requirement. A second major may also be used to satisfy this requirement	
or	
Option II: A special program of study built around a unifying theme or topic. Course work outside philosophy in one or more other discipline(s), normally beyond the 100 level.	

Total Hours	44
-------------	----

- 1

If possible, students should take these courses prior to the senior year. Substitutions may be made only with the approval of the chair of the department.
- 2

Those considering graduate work in philosophy should take PHIL 202.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

PHIL 206	Early Modern Philosophy	4
Four other Philosophy courses, including at least 6 hours at the 300- or 400- level		12
Total Hours		20

Political Science

William Bernhard, Head of Department

420 David Kinley Hall, MC - 713, 1407 West Gregory Drive, Urbana, IL, (217) 333-3881

<http://www.pol.illinois.edu>

The Department of Political Science encourages students to acquire a broad understanding of political science and to pursue selected subfields of the discipline in depth. To accomplish these objectives, the department provides courses of study that introduce students to the discipline and to its principal fields. Among these are American government and politics, comparative government and politics, international relations, and political philosophy. Supporting courses are an integral part of the program and should be selected with a view toward building a coherent selection adapted to the student's particular interests.

The Civic Leadership Program

Students are admitted to the Civic Leadership Program through a competitive process administered by the Department of Political Science. The Civic Leadership Program offers a plan of study to enable students with the capacity, skills, and knowledge to provide informed, principled, and effective civic leadership. Students can participate either as Political Science Majors with a concentration in Civic Leadership or as majors in other fields with a Minor in Political and Civic Leadership. All students in the Civic Leadership Program must complete 17 hours of courses related to and distributed within the Civic Leadership Program. See the Civic Leadership concentration and Political and Civic Leadership minor for full information.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: pol@illinois.edu

Minimum required major and supporting course work equates to 50 hours including 30 hours of Political Science courses

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction

To be eligible for distinction, a student majoring in Political Science must complete one of the following two tracks:

1. Individual Study Track. On this track, a student must:
 - a. Complete a senior thesis,
 - b. Earn a political science major grade point average on this campus of at least 3.25 or higher, and
 - c. Earn a grade point average in PS 496 of 3.67 or higher.
2. Honors Program Track. On this track, a student must:
 - a. Complete a senior thesis,
 - b. Earn a political science major grade point average on this campus of at least 3.25 or higher,
 - c. Be admitted to and maintain good standing within the departmental honors program, and
 - d. Complete required coursework in the departmental honors program with a grade point average in PS 495 and PS 496 between 2.67 and 3.66.

Admission to the departmental honors program requires the following:

1. Completion of PS 230 or PS 231 or an acceptable substitute,
2. An on-campus political science major grade point average of 3.5,
3. Completion of nine hours (including at least three advanced hours) or political science on this campus,
4. Application and affirmative vote of a departmental committee.

High Distinction

To be eligible for high distinction, a student majoring in Political Science must:

1. Complete a senior thesis,
2. Earn a political science major grade point average on this campus of at least 3.25 or higher,
3. Be admitted to and maintain good standing in the departmental honors program, and
4. Complete required coursework in the departmental honors program with a grade point average in PS 495 and PS 496 of 3.67 or higher.

Students must complete the Political Science Core Requirements and select one concentration in consultation with an academic adviser.

Political Science Core Requirements

PS 101	Intro to US Gov & Pol	3
Select three of the following:		9
PS 100	Intro to Political Science ¹	
or PS 200	Foundations of Pol Sci	
PS 220	Intro to Public Policy	
PS 230	Intro to Pol Research	
PS 231	Strategic Models	
PS 240	Intro to Comp Politics	
PS 270	Intro to Political Theory	
PS 280	Intro to Intl Relations	
Concentration Requirements (Students must choose one concentration)		38-40
Total Hours		50-52

¹ Credit is not given for PS 100 and PS 200.

Concentrations

General Concentration in Political Science (p. 419)

Civic Leadership Concentration (p. 418)

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours for internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. PS 496 is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 50-hour minimum required for the major.

- Political and Civic Leadership Minor (p. 421)
- Political Science Minor (p. 421)

Civic Leadership Concentration

Political Science Core Requirements:

PS 101	Intro to US Gov & Pol	3
Select three of the following:		9
PS 100	Intro to Political Science ¹	
or PS 200	Foundations of Pol Sci	
PS 220	Intro to Public Policy	
PS 230	Intro to Pol Research	
PS 231	Strategic Models	
PS 240	Intro to Comp Politics	
PS 270	Intro to Political Theory	
PS 280	Intro to Intl Relations	

Civic Leadership Concentration Requirements:

Completion of the Civic Leadership Concentration must include either as major or supporting coursework one course in each of the following areas, chosen from a list maintained by the department:

1. An intermediate or advanced course in public policy (3 hours)
2. A course examining the construction and consequences of social identity relating to race, religion, ethnicity, or gender (3 hours)
3. A course exploring different perspectives on a just, ordered, and moral society (3 hours)

At least four political science courses at the advanced level ²	12
Supporting coursework is required and must be selected in consultation with the student's adviser. Supporting courses should complement subfields in political science chosen by the student. At least 12 of these 20 hours must be in courses numbered 200 or above.	20
At least two sections of PS 199 designated as pertaining to the Civic Leadership Program. A list of such sections is available in the Undergraduate Studies Office of the Department of Political Science. ³	2
PS 491 Internship	3
One additional course (1-3 credits) in political science at any level	1-3

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours for internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. PS 496 is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 50-hour minimum required for the major.

- ¹ Credit is not given for both PS 100 and PS 200.
- ² Most advanced level courses will require as prerequisites the appropriate 200-level courses (or, in the case of American politics courses, PS 101) or the consent of the instructor. Students may count a maximum of six hours of credit in PS 300 and six hours of credit in PS 494 toward this requirement. Neither PS 495 nor PS 496 toward the 30 credits of PS required for the major.
- ³ PS 199 is a temporary designation. As these courses are developed and receive PS numbers, these new course numbers will take the place of PS 199.

General Concentration in Political Science

Political Science Core Requirements

PS 101	Intro to US Gov & Pol	3
Select three of the following:		9

Civic Leadership Concentration Requirements:

Completion of the Civic Leadership Concentration must include either as major or supporting coursework one course in each of the following areas, chosen from a list maintained by the department:

1. An intermediate or advanced course in public policy (3 hours)
2. A course examining the construction and consequences of social identity relating to race, religion, ethnicity, or gender (3 hours)
3. A course exploring different perspectives on a just, ordered, and moral society (3 hours)

At least four political science courses at the advanced level ² 12

Supporting coursework is required and must be selected in consultation with the student's adviser. Supporting courses should complement subfields in political science chosen by the student. At least 12 of these 20 hours must be in courses numbered 200 or above. 20

At least two sections of PS 199 designated as pertaining to the Civic Leadership Program. A list of such sections is available in the Undergraduate Studies Office of the Department of Political Science. ³ 2

PS 491 Internship 3

One additional course (1-3 credits) in political science at any level 1-3

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours for internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. PS 496 is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 50-hour minimum required for the major.

¹ Credit is not given for both PS 100 and PS 200.

² Most advanced level courses will require as prerequisites the appropriate 200-level courses (or, in the case of American politics courses, PS 101) or the consent of the instructor. Students may count a maximum of six hours of credit in PS 300 and six hours of credit in PS 494 toward this requirement. Neither PS 495 nor PS 496 toward the 30 credits of PS required for the major.

Minor in Political Science

A minor in political science is designed for students who desire to enhance their ability to deal intelligently and critically with issues and ideas about government and politics. The minor permits choices among five sub-fields, each involving important theoretical and applied questions about the role of citizens, associations, and states in the application of political power. These sub-fields are: American Government and Politics, Comparative Government and Politics, International Relations, Political Philosophy, and Public Policy/Public Administration. Within a given sub-field, students will be exposed to advanced courses that build on relevant introductory courses. These advanced courses will provide students with in-depth treatments of topics relevant to issues dealt with in their major field of study.

Select one of the following:

3

PS 100	Intro to Political Science ¹
or PS 200	Foundations of Pol Sci
PS 101	Intro to US Gov & Pol

Select at least two of the following courses:

6

PS 201	US Racial & Ethnic Politics
PS 220	Intro to Public Policy
PS 230	Intro to Pol Research
PS 240	Intro to Comp Politics
PS 270	Intro to Political Theory
PS 280	Intro to Intl Relations

Select at least three courses at the 300-level. These courses must be selected from sub-fields in which credit already has been completed. For a listing of courses by sub-field see the Curriculum Planning Map. (http://www.pol.illinois.edu/documents/ps_curriculum_planning.pdf)

9

Total Hours

18

¹ Credit is not given for both PS 100 and PS 200.

Minor in Political and Civic Leadership

The Minor in Political and Civic Leadership is for students who are not political science majors. Minors must be admitted to the Civic Leadership Program and meet all of its requirements (17 hours). At least three courses (nine hours) must be at the advanced level.

One Foundation Course, chosen from the following:

3

PS 100	Intro to Political Science ¹
or PS 200	Foundations of Pol Sci
PS 101	Intro to US Gov & Pol
GLBL 100	Intro to Global Studies
GLBL 220	Governance

An intermediate (200 level) or advanced (300 level) course in public policy ²

3

A course examining the construction and consequences of social identity relating to race, religion, ethnicity, or gender ²

3

A course exploring different perspectives on a just, ordered, and moral society ²

3

PS 491 or approved internship course in another department

3

At least two sections of PS 199 designated as pertaining to the Civic Leadership Program. A list of such sections is available in the Undergraduate Studies Office of the Department of Political Science. ³

2

Total Hours

17

¹ Credit is not given for both PS 100 and PS 200.

² Choose from a list maintained by the Department of Political Science.

³ PS 199 is a temporary designation. As these courses are developed and receive PS numbers, these new course numbers will take the place of PS 199.

Psychology

David Irwin
315 Psychology Building, 603 East Daniel, Champaign, (217) 333-0631
<http://www.psychology.illinois.edu>

Psychology is the scientific investigation of human and animal behavior. Psychologists study behavior in systems ranging from single cells to the individual person, from small groups of people to communities. Psychologists strive to describe behavior and to understand its underlying biological and social mechanisms. This enterprise, designed to better understand the human condition, accumulates knowledge that can help solve problems faced by individuals and by communities. Students that graduate with a major in psychology acquire a wide range of knowledge and useful skills that allows them to find employment in many different areas.

Undergraduate Program

The Psychology program of study is a broad-based curriculum within a research-focused department. The program is designed both for students interested in a liberal arts education with psychology as a focal area and for students who plan to attend graduate or professional school either in psychology or in a different field such as medicine, law, social work, business administration, counseling, labor relations and many others. Undergraduate students also have the opportunity to participate in current research projects by working in labs. Students should contact our undergraduate advising office for help in creating a plan of study that best meets their goals and interests.

The graduate preparatory work in psychology is designed to provide students with a solid academic background that will prepare them for graduate education in a number of psychology specializations. Career opportunities in these specializations vary, as does the required level of graduate school training. While a doctorate is needed for most areas of academic psychology, a master's degree is sufficient for careers in many applied psychology fields such as personnel psychology, measurement psychology, and engineering psychology.

Academic Advising

The psychology undergraduate advising office is open to help students choose patterns of courses relevant to their interests, as well as to help students explore graduate school, professional school, and career options. Advising is done by an award-winning staff of academic professionals along with mentoring by faculty for students with research interests. Peer registration assistants are also available to help with the registration process.

Major in Psychology

Major in Sciences and Letters Curriculum

E-mail: advising@psychology.illinois.edu

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required major and supporting course work equates to 44 hours including 32 hours of Psychology courses.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Department Distinction: To be eligible for graduation with Distinction in Psychology, a student must complete a two-semester research sequence in PSYC 494, submit a Senior Thesis, and maintain an overall 3.0 GPA at the time of submission. To be eligible for High or Highest Distinction, a student must first be admitted to the Honors Program (requirements: junior standing, 3.5 GPA in Psychology and overall, and completion of an introductory and two other psychology courses plus psychological statistics). The student then has to complete the three semester Honors Program (1 semester of PSYC 398 and 2 semesters of PSYC 498), submit a Senior Thesis, and maintain an overall GPA of at least a 3.0 to be awarded High Distinction or a GPA 3.5 for Highest Distinction.

Select one of the following:		4
PSYC 100	Intro Psych	
PSYC 103	Intro Experimental Psych	
PSYC 105	Psych Introduction	
PSYC 235	Intro to Statistics (or equivalent)	3
Select two of the following:		6
PSYC 204	Intro to Brain and Cognition	
PSYC 210	Behavioral Neuroscience	
PSYC 220	Images of Mind	
PSYC 224	Cognitive Psych	

PSYC 230	Perception & Sensory Processes	
PSYC 248	Learning and Memory	
Select two of the following:		6
PSYC 201	Intro to Social Psych	
PSYC 216	Child Psych	
PSYC 238	Abnormal Psych	
PSYC 239	Community Psych	
PSYC 245	Industrial Org Psych	
PSYC 250	Psych of Personality	
Select any 300- or 400-level Psychology courses including at least one course from the following laboratory/research methods courses:		13
PSYC 311	Behavioral Neuroscience Lab	
PSYC 331	Cognitive Psych Lab	
PSYC 332	Social Psych Methods Lab	
PSYC 333	Social Psych in Society Lab	
PSYC 334	Perception Lab	
PSYC 350	Personality Lab	
PSYC 363	Developmental Child Psych Lab	
PSYC 379	Clinical/Abnormal Psych Lab	
PSYC 437	Advanced Psychology Lab	
PSYC 489	Neural Network Modeling Lab	
PSYC 490	Measurement & Test Develop Lab	
Supporting course work outside psychology that will complement the core program. These courses must be approved by an academic adviser.		12
These courses could be:		
A declared minor		
A second major		
Pre-law interest courses		
Pre-health courses		
Graduate school preparatory courses		
Courses from varying departments having a common theme		

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Some areas of interest in psychology

- Biological psychology is the study of the biological mechanisms underlying behavior. Biological psychologists generally are interested in the brain and the nervous system, in the endocrine system, and in other organismic processes.
- Clinical psychology is the study of problems encountered by individuals, groups, and families — especially problems involving psychopathology. Clinical psychologists are interested in the application of psychological knowledge and techniques for the alleviation of these problems.
- Cognitive neuroscience is concerned with understanding the neuroscientific bases of cognition. Various methods are employed to assess the roles of different brain systems in psychological functions such as memory, attention, language, executive control, decision making, response processing, and emotion.
- Cognitive and neurobiological aging examine how the aging process affects memory, thought, and brain function, as well as how life experiences affect cognitive function.
- Developmental psychology is the study of intellectual development, emerging personality, and the acquisition of language, as well as psychophysiological and social development processes as individuals develop from birth through old age.
- Community psychology is the study of social processes and problems of groups, organizations, and neighborhoods, and the development and evaluation of progress for social change and social policy based on psychological understanding.
- Engineering psychology is the study of human behavior in the context of interactions between humans and machines.
- Cognitive psychology is the study of basic behavioral and cognitive processes, including learning, memory, problem-solving, motivation, and language.

- Language processing and psycholinguistics focus on how humans acquire and use language and how these processes are related to neural organization.
- Measurement and mathematical psychology specialists develop mathematical models of psychological processes and devise methods for quantitative representation and analysis of data about behavior. These are used in the study of differences between individuals in ability, personality, preferences, and other psychological phenomena.
- Personality psychology focuses on individual behavior. It is the study of ways to understand and describe an individual's behavior and to predict an individual's future behavior.
- Personnel psychology is the application of techniques of assessment, prediction, and intervention to areas of human resources in organizations, including, but not limited to, standard personnel selection and training, attitude assessments and interventions, and program evaluations.
- Social psychology is the study of attitudes, social perception and cognition, interpersonal relations, interpersonal interactions, and social and cultural factors affecting human behavior.
- Visual cognition is the study of attention, visual perception, visual memory, and human performance. Visual cognition research uses tools drawn from cognitive psychology and cognitive neuroscience to better understand how visual information is perceived and remembered.

Religion

David Price

3080 Foreign Languages Building, 707 South Mathews, Urbana, (217) 333-2022

<http://www.religion.illinois.edu>

This major is sponsored by the Department of Religion.

Major in Religion

Major in Sciences and Letters Curriculum

E-mail: religion@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

A minimum of 30 hours of coursework is required for the major. This includes (a) RLST 230 or RLST 231, and (b) completing a Capstone Course, as explained below.

At least 15 of the 30 hours must be at the 300 or 400 level, and no more than 9 hours may be at the 100 level.

Each student must complete two courses in any of the following: Hinduism, Buddhism, Chinese and Japanese Religions, or indigenous American religious practices, chosen from a list maintained in the departmental adviser's office. And each student must complete two courses in any of the following: Judaism, Christianity, Islam, or religious practices of the ancient Near East, chosen from a list maintained in the departmental adviser's office.

Additionally, each student will establish a primary and secondary field of study. For the primary area of study, a student must complete a minimum of three courses (nine credit hours), and for the secondary area two courses (six credit hours) are required. An individual course may not be counted twice toward fulfilling the requirements of the primary and secondary areas of interest. (Students are encouraged to complete more than the minimum of three courses in the primary area of study.)

The following are the areas of study: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or individually designed area of study chosen with the approval of the departmental advisor.

Capstone Experience

Research paper for one 400-level course in RLST: Each major must make special arrangements with a professor teaching a 400-level RLST course to conduct a significant research project that results in a research paper of 20 pages (minimum). The goal of this requirement is to ensure that each RLST major has conducted a significant research project. RLST 493 can be used to satisfy this requirement.

Students considering graduate study in Religion are urged to consult with professors on the necessary preparation for graduate study in their area of interest.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: To be considered for departmental distinction a student must have an overall GPA of at least 3.5. Distinction is granted on the basis of a senior thesis written in the context of RLST 493. The level of distinction is based on evaluation of the thesis.

Students must complete the core courses and additional required courses described below and one concentration.

Minimum of 30 hours of Religion courses including:

PHIL/RLST 230	Philosophy of Religion Intro	3
or RLST 231	Religion and Philosophy	
Distribution Requirement: Courses taken must include:		12
(a) Two courses in the following: Judaism, Christianity, Islam, or religious practices of the ancient Near East, chosen from a list maintained in the departmental adviser's office and		
(b) Two courses in the following: Hinduism, Buddhism, Chinese and Japanese Religions, or indigenous American religious practices, chosen from a list maintained in the departmental adviser's office.		
Three courses in a primary area of study ¹		9
Two courses in a secondary area of study ¹		6

Capstone Experience: a 400-level RLST course in which a research project is undertaken and a 20 page research paper is written. This course can be RLST 493 and can also be used to fulfill part of the distribution or primary or secondary area of study requirement. 3

¹ Areas of study include: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or an individually designed area of study approved by the departmental advisor. Courses chosen to fulfill the primary area of study cannot also be used to fulfill the secondary area of study.

Twelve hours of 300 or 400-level courses in your major must be taken on this campus.

Foreign Language Requirements: The major in Religious Studies does not require any foreign language study beyond meeting the University's general foreign language requirement. However, majors are strongly encouraged to learn the languages relevant to their primary field of study and to begin that course of study as soon as possible. Please consult with the Director of Undergraduate Studies in Religion or a professor in your area of interest about appropriate foreign language study.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minor in Religious Studies

E-mail: religion@illinois.edu

Web address for department: www.religion.illinois.edu

RLST 110	World Religions	3
One course in Ethics or Philosophy of Religion		3
Recommended courses are as follows:		
RLST 230	Philosophy of Religion Intro	
RLST 424	Philosophy of Religion	
Five additional courses:		15
Two courses (6 hours) must be from an Asian religious tradition (Hinduism, Buddhism, or Islam, with at least one course in Hinduism and Buddhism)		
Two courses (6 hours) must be from the Western religious traditions (Biblical Studies, Judaism, Christianity, Islam, with at least one course in Biblical Studies, Judaism, or Christianity)		
Total Hours		21

No more than nine (9) hours may be selected from courses at the 100 level.

At least six (6) hours must be selected from courses at the 300 or 400 level.

Russian, East European, and Eurasian Studies Center

David Cooper, Director of Center

104 International Studies Building, 910 South Fifth Street, Champaign, (217) 333-1244

<http://www.reeec.illinois.edu>

There are two "Russian" majors (and minors) at the University of Illinois. What is the difference between them and which is the right one for you?

The major in Russian, East European, and Eurasian Studies has a multidisciplinary area studies focus. Students take courses in a variety of disciplines (history, sociology, political science) and develop a broad expertise in the history, politics, and culture of the region that includes Russia, but also many other countries, from the Czech Republic to Estonia to Uzbekistan. Language study can be in Russian or in any of the other languages of the region offered here. Students often go on to careers in government service or to work at NGOs.

The major in Slavic Studies enables students to specialize in one of five concentrations: Russian Language, Literature, and Culture; Polish Studies; South Slavic Studies; Czech Studies; Ukrainian Studies. Unlike the **major in Russian, East European, and Eurasian Studies**, which has a multidisciplinary area studies and current affairs focus, the major in Slavic Studies emphasizes the study of language, literature, and culture in their historical context. Students develop intensive cultural literacy and communication skills through humanities-oriented training, and many go on to careers in writing and editing, media, or work with international cultural foundations and organizations. The major is an excellent preparation for law school, business school, or other graduate study, as well as careers in the N.G.O. world, teaching, or research.

That said, the majors are only as different, or as similar, as you make them. You can choose literature as your primary field for the REEEC major, or take social science courses to develop broad area expertise in your supporting coursework for the Russian language and literature major. Both are excellent preparation for law school or graduate school and careers in teaching or research.

The Russian, East European, and Eurasian Center offers an interdisciplinary major and minor in Russian, East European, and Eurasian Studies (REEES). These programs involve students in the study of an important and complex world area in a manner that draws together the approaches of different disciplines, while at the same time building knowledge in a single discipline. A student will construct an individual program of study, depending on the student's interests and career goals, in consultation with the undergraduate advisor of the Center.

The aim of the REEES major is to provide students with a knowledge base in one discipline that will permit them to qualify for graduate study, an interdisciplinary focus on issues critical to the region, and foundational language training necessary for professional specialization in the area.

Major in Russian, East European, and Eurasian Studies

Major in Sciences and Letters Curriculum

E-mail: reec@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting courses equate to 48 hours.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: To qualify for departmental distinction, a student must have at least a 3.5 GPA in the courses taken for Component 2 (see below) and must complete a senior thesis in consultation with a faculty member affiliated with the center. Students who wish to qualify for distinction in this major should consult with the center director at the beginning of the junior year or earlier to prepare a suitable plan.

Component 1: Completion of three years of college-level study of Russian or another language of Eastern Europe or Eurasia, or equivalent proficiency. This stipulation may be partially satisfied through fulfillment of the LAS two-year language requirement if a regionally appropriate language is chosen for that purpose. A third year of study, however, is demanded beyond this. If a non-Russian, East European or Eurasian language is selected to meet the LAS requirement, then the three years of Russian, East European or Eurasian language study specified here must be taken in addition to those completed to satisfy the LAS requirement. Only the hours earned in the third, most advanced year of language study are calculated into the degree here, as these represent proficiency beyond that required by all LAS BA degree programs and as the first two years of language study are a prerequisite for the third.

6

Component 2: Russian and East European studies core courses, including:

24

REES 200	Intro to Russia and Eurasia
REES 201	Introduction to Eastern Europe
REES 495	Senior Seminar

15 hours: Choose one course from each of three departments other than the department used for component 3 below. The courses comprising the remaining hours of component 2 may be from the same discipline as those under component 3; however, a course may be counted toward the total for only one component. Language courses that concentrate on the basic skills of speaking, listening, reading, and writing cannot be counted as part of this component.

Component 3: Courses in a single discipline. Among those disciplines that are most commonly used with this specialization are anthropology, economics, geography, history, political science, Russian language and literature, and sociology. Among disciplines also used are business administration, comparative literature, education, English, fine arts, French, German, journalism, linguistics, mathematics, music, philosophy, psychology, and various natural sciences. Others are permitted. Consult your advisor. ² 18

¹ The Center maintains a list of applicable courses on its web site.

² If a foreign language is used for this component, 20 hours must be taken beyond the requirement of 6 additional hours outlined under component 1 above.

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Interdisciplinary Minor in Russian, East European, and Eurasian Studies

The interdisciplinary minor in Russian, East European, and Eurasian studies allows students in diverse fields to complement their programs with a study of Russia, Eastern Europe, and Eurasia. Programs of study can be tailored to the needs and interests of individual students, in consultation with the undergraduate advisor.

E-mail: reec@illinois.edu

Web address for department: www.reec.uiuc.edu (<http://www.reec.uiuc.edu>)

The equivalent of three semesters of college-level language study in Russian or another language of Eastern Europe or Eurasia. This stipulation may be satisfied through partial fulfillment of the LAS two-year language requirement if a regionally appropriate language is chosen for that purpose. If a non-REEE language is selected to meet the LAS requirement, then the three semesters of REEE language study specified here must be taken in addition to those completed to satisfy the LAS requirement. Only those hours earned in the second and third semester of language study are calculated into the degree, as the first semester represents a prerequisite for the other two. 6-8

Courses on Russia, Eastern Europe, or Eurasia from at least three different academic units. (Literature courses are acceptable for this requirement; language courses are not.) No more than 6 hours may be counted from any one unit; 6 hours must be at the 300- or 400-level. 15

Total Hours ² 21

¹ The Center maintains a list of applicable courses.

² No more than 9 hours may be taken at the 100-level.

Slavic Languages and Literatures

Michael Finke
3080 Foreign Languages Building, 707 South Mathews, Urbana, (217) 333-0680
<http://www.slavic.illinois.edu>

The major in Slavic Studies enables students to specialize in one of five concentrations:

1. Russian Language, Literature, and Culture
2. Polish Studies
3. South Slavic Studies
4. Czech Studies
5. Ukrainian Studies

Unlike the major in Russian, East European, and Eurasian Studies (p. 427), which has a multidisciplinary area studies and current affairs focus, the major in Slavic Studies emphasizes the study of language, literature, and culture in their historical context. Students develop intensive cultural literacy and communication skills through humanities-oriented training, and many go on to careers in writing and editing, media, or work with international

cultural foundations and organizations. The major is an excellent preparation for law school, business school, or other graduate study, as well as careers in the N.G.O. world, teaching, or research.

The department also offers a minor in Russian Language and Literature and a minor in Slavic Language, Literature, and Culture.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: slavic@illinois.edu

Minimum required major courses equate to 30 hours including 6 hours in advanced language and 24 hours in literature and culture.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Graduation with distinction may be earned by completion of one of the following two options:

- GPA in departmental courses of 3.75; or
- GPA in departmental courses of 3.50, plus successful completion of academic study trip to the region, documented by graded transcript. See a departmental adviser to work out details, preferably two semesters before graduation.

Students must select one concentration in consultation with an academic advisor. Students in all concentrations must complete a) 6 hours of language beyond the second year, and b) 24 hours of literature and culture courses.

- Russian Language, Literature, and Culture Concentration (p. 430)
- Polish Studies Concentration (p. 430)
- Slavic Studies Concentration (p. 431)
- Czech Studies concentration (p. 429)
- Ukrainian Studies Concentration (p. 431)
- Minor in Russian Language and Literature (p. 433)
- Minor in Slavic Language, Literature, and Culture (p. 433)

Czech Studies Concentration

Language: A minimum of 6 hours beyond the second year of the Czech language: CZCH 484 Readings in Czech for 6 hours or equivalent; or 6
Students may choose to complete the second year (200-level sequence) of a second Slavic language, including Russian, in addition to Czech
Literature and Culture: A minimum of 24 hours is required in the following areas: 24

6 hours of Introductory Culture courses:

SLAV 120	Russian & E Euro Folktales (and)
----------	----------------------------------

Choose one of the following:

REES 201	Introduction to Eastern Europe
----------	--------------------------------

RUSS 261	Intro Russian-Jewish Culture
----------	------------------------------

SLAV 117	Russ & E Euro Science Fiction
----------	-------------------------------

6 hours of Literature Survey courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹

12 hours of Upper-level (300- and 400-level) Literature and Culture courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹

Capstone Experience: All majors are required to complete a capstone course, project, or experience chosen from among the following: 0-3

(1) RUSS 493 Honors Senior Thesis (2 hrs); or

(2) a 300- or 400-level course in the Slavic Department in which a research project is undertaken; or

(3) Study abroad in the region.

Majors should consult with the Undergraduate Advisor to plan their capstone experience.

¹ Up to 9 hours of the literature requirement (but no more than 6 at the upper level) can be replaced by courses at the same level in other departments, chosen in consultation with and approved by the Undergraduate Advisor, that treat the history, culture, and society of the Czech region.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Study abroad courses may be substituted for major and minor requirements with approval of adviser.

Polish Studies Concentration

Language: A minimum of 6 hours beyond the second year of the Polish language: POL 301 and POL 302, or equivalent; or students may choose to complete the second year (200-level sequence) of a second Slavic language, including Russian, in addition to Polish. 6

Literature and Culture: A minimum of 24 hours is required in the following areas (POL 401 and POL 402 can count toward the requirements in any category): 24

6 hours of Introductory Culture courses:

POL 115	Intro to Polish Culture (and)
---------	-------------------------------

Choose one of the following:

REES 200	Intro to Russia and Eurasia
----------	-----------------------------

REES 201	Introduction to Eastern Europe
----------	--------------------------------

RUSS 261	Intro Russian-Jewish Culture
----------	------------------------------

SLAV 117	Russ & E Euro Science Fiction
----------	-------------------------------

SLAV 120	Russian & E Euro Folktales
----------	----------------------------

6 hours of Literature Survey courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹

12 hours of Upper-level (300- and 400-level) Literature and Culture courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹

Capstone Experience: All majors are required to complete a capstone course, project, or experience chosen from among the following: 0-3

(1) RUSS 493 Honors Senior Thesis (2 hrs); or

(2) a 300- or 400-level course in the Slavic Department in which a research project is undertaken; or

(3) Study abroad in the region.

Majors should consult with the Undergraduate Advisor to plan their capstone experience.

¹ Up to 9 hours of the literature requirement (but no more than 6 at the upper level) can be replaced by courses at the same level in other departments, chosen in consultation with and approved by the Undergraduate Advisor, that treat the history, culture, and society of Poland or the region.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Study abroad courses may be substituted for major and minor requirements with approval of adviser.

Russian Language, Literature, and Culture Concentration

Language: A minimum of 6 hours beyond the second year of the Russian language: RUSS 301, 302 – Third-Year Russian I, II, or equivalent 6

Literature and Culture: A minimum of 24 hours is required in the following areas (RUSS 401 and 402- Fourth Year Russian I, II- can count toward the requirements of any category): 24

6 hours of Introductory Culture courses:

RUSS 115	Intro to Russian Culture (and)
----------	--------------------------------

Choose one of the following:

REES 200	Intro to Russia and Eurasia
----------	-----------------------------

RUSS 261	Intro Russian-Jewish Culture
----------	------------------------------

SLAV 117	Russ & E Euro Science Fiction
----------	-------------------------------

SLAV 120	Russian & E Euro Folktales
----------	----------------------------

6 hours of Literature Survey courses: Two 200-level literature or cinema courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department.

12 hours of Upper-level (300- and 400-level) Literature and Culture courses chosen from the following:

Author Courses (6 hrs.):

RUSS 320	Russian Writers
----------	-----------------

RUSS 322	Dostoevsky
----------	------------

RUSS 323	Tolstoy
RUSS 325	Chekhov
RUSS 335	Nabokov

Literature and Culture Courses (6 hrs.):

Two 400-level literature or culture courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department.

Capstone Experience: All majors are required to complete a capstone course, project, or experience chosen from among the following: 0-3

(1) RUSS 493 Honors Senior Thesis (2 hrs); or

(2) a 300- or 400-level course in the Slavic Department in which a research project is undertaken; or

(3) Study abroad in the region.

Majors should consult with the Undergraduate Advisor to plan their capstone experience.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours).

Study abroad courses may be substituted for major and minor requirements with approval of adviser.

South Slavic Studies Concentration

Language: A minimum of 6 hours beyond the second year of a South Slavic language: SCR 301, 302-Third-Year Serbian/Croatian I, II- or equivalent; or Students may choose to complete the second year (200-level sequence) of a second Slavic language, including Russian, in addition to SCR. 6

Literature and Culture: A minimum of 24 hours is required in the following areas: 24

6 hours of Introductory Culture courses:

BCS 115	South Slavic Cultures (and)
---------	-----------------------------

Choose one of the following:

REES 201	Introduction to Eastern Europe
----------	--------------------------------

SLAV 117	Russ & E Euro Science Fiction
----------	-------------------------------

SLAV 120	Russian & E Euro Folktales
----------	----------------------------

6 hours of Literature Survey courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹

12 hours of Upper-level (300- and 400-level) Literature and Culture courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹

Capstone Experience: All majors are required to complete a capstone course, project, or experience chosen from among the following: 0-3

(1) RUSS 493 Honors Senior Thesis (2 hrs); or

(2) a 300- or 400-level course in the Slavic Department in which a research project is undertaken; or

(3) Study abroad in the region.

Majors should consult with the Undergraduate Advisor to plan their capstone experience.

¹ Up to 9 hours of the literature requirement (but no more than 6 at the upper level) can be replaced by courses at the same level in other departments, chosen in consultation with and approved by the Undergraduate Advisor, that treat the history, culture, and society of the South Slavic region.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours).

Study abroad courses may be substituted for major and minor requirements with approval of adviser.

Ukrainian Studies Concentration

Language: A minimum of 6 hours beyond the second year of the Ukrainian language: UKR 301, 302- or equivalent; or Students may choose to complete the second year (200-level sequence) of a second Slavic language, including Russian, in addition to Ukrainian 6

Literature and Culture: A minimum of 24 hours is required in the following areas: 24

6 hours of Introductory Culture courses:

UKR 113	Ukrainian Culture (and)
---------	-------------------------

Choose one of the following:

REES 200	Intro to Russia and Eurasia
----------	-----------------------------

REES 201	Introduction to Eastern Europe
RUSS 261	Intro Russian-Jewish Culture
SLAV 117	Russ & E Euro Science Fiction
SLAV 120	Russian & E Euro Folktales
6 hours of Literature Survey courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹	
12 hours of Upper-level (300- and 400-level) Literature and Culture courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. ¹	
Capstone Experience: All majors are required to complete a capstone course, project, or experience chosen from among the following:	
(1) RUSS 493 Honors Senior Thesis (2 hrs); or	
(2) a 300- or 400-level course in the Slavic Department in which a research project is undertaken; or	
(3) Study abroad in the region.	
Majors should consult with the Undergraduate Advisor to plan their capstone experience.	

0-3

¹ Up to 9 hours of the literature requirement (but no more than 6 at the upper level) can be replaced by courses at the same level in other departments, chosen in consultation with and approved by the Undergraduate Advisor, that treat the history, culture, and society of the Ukrainian region.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Study abroad courses may be substituted for major and minor requirements with approval of adviser.

Minor in Russian Language and Literature

A minor in Russian language and literature may be useful and enriching for students in many disciplines, from economics and political science through comparative literature and theatre to engineering and mathematics. The 18- to 20-hour program listed below provides considerable flexibility within a general structure. Additional information may be obtained from the undergraduate adviser in the Department of Slavic Languages and Literatures.

E-mail: slavic@illinois.edu

Introduction to Slavic culture. Select from:		3
RUSS 115	Intro to Russian Culture	
RUSS 261	Intro Russian-Jewish Culture	
SLAV 117	Russ & E Euro Science Fiction	
SLAV 120	Russian & E Euro Folktales	
Intermediate Russian Language:		6-8
RUSS 201	Second-Year Russian I	
RUSS 202	Second-Year Russian II (or equivalent)	
Russian literature and culture: Three 200-, 300- or 400-level courses from the list maintained by the undergraduate advisor, including at least one at the 300- or 400-level. Advanced Russian language (RUSS 301, 302, 305, or equivalent) can substitute for one course in this requirement.		9
Total Hours		18-20

6 hours must be advanced (300- or 400-) level courses.

Minor in Slavic Language, Literature, and Culture

A minor in Slavic language, literature, and culture may be useful and enriching for students in many disciplines, from economics and political science through comparative literature and theatre to engineering and mathematics. The 18- to 20-hour program listed below provides considerable flexibility within a general structure.

In completing the requirements for the minor, students may choose to pursue study of a particular Slavic language and culture, or may combine study of a single language with other courses that treat the region more broadly. For example, a student could specialize in Polish by taking POL 201, POL 202, POL 301 for the language and POL 115, POL 245, and HIST 467 for the literature and culture requirements. Please consult the Undergraduate Advisor to choose coursework.

Introduction to Slavic culture. Select from:		3
BCS 115	South Slavic Cultures	
POL 115	Intro to Polish Culture	
REES 200	Intro to Russia and Eurasia	
REES 201	Introduction to Eastern Europe	
RUSS 261	Intro Russian-Jewish Culture	
SLAV 117	Russ & E Euro Science Fiction	
SLAV 120	Russian & E Euro Folktales	
UKR 113	Ukrainian Culture	
Intermediate Slavic Language:		6-8
BCS 201 & BCS 202	2nd Year Serbian & Croatian I and 2nd Year Serbian & Croatian II	
CZCH 201 & CZCH 202	Second-year Czech I and Second-year Czech II	
POL 201 & POL 202	Second Yr Polish I and Second Yr Polish II	
UKR 201 & UKR 202	Second-Year Ukrainian I and Second-Year Ukrainian II	
Slavic Literature and Culture: Three 200-, 300- or 400-level courses from the list maintained by the undergraduate advisor, including at least one at the 300- or 400-level. Advanced Slavic language (the 301 or 302 level of the language of specialization, or equivalent) can substitute for one course in this requirement. Also, one course at the same level in another department, chosen in consultation with the advisor, that treats the history, culture, and society of the region can count toward this requirement.		9
Total Hours		18-20

6 hours must be advanced (300- or 400-) level courses.

Sociology

Antoinette Burton, Interim Head of Department

3120 Lincoln Hall, 702 S. Wright Street, Urbana, (217) 333-1950

<http://www.sociology.illinois.edu>

Sociologists study the organization and construction of social relations among individuals, including phenomena such as stratification, social movements, institutional change, intergroup relations, and population change. Sociologists generate, modify, and assess theories of social behavior and organization using a variety of analytic and methodological approaches.

Each student should see a sociology departmental adviser at least once a year to choose sociology courses and supporting course work, and to monitor progress.

Major in Sociology

Major in Sciences and Letters Curriculum

E-mail: soc@illinois.edu

Degree title: Bachelor of Arts in Liberal Arts and Sciences

Minimum required major and supporting course work equates to 44 hours including 32 hours of Sociology courses.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours.

Departmental distinction: In order to achieve distinction, high distinction, or highest distinction, a sociology major must meet the following requirements:

- Have completed SOC 490 or SOC 495
- Attain a UIUC GPA of 3.25 or higher
- If both these requirements are met, then the MAJOR GPA distributes as follows:
 - 3.25 – Distinction
 - 3.50 – High Distinction
 - 3.75 – Highest Distinction

SOC 100	Introduction to Sociology	4
SOC 200	Intro to Sociological Theory	3
SOC 280	Intro to Social Statistics ¹	4
SOC 380	Social Research Methods	4
Select one of the following:		3
SOC 480	Methods of Field Research	
SOC 481	Survey Research	
SOC 485	Intermediate Social Statistics	
SOC 488	Demographic Methods	
Students may select any sociology courses to fulfill the requirement of 32 hours in Sociology		2-14
Supporting course work taken outside the Department of Sociology ²		12

¹ If a statistics course is taken outside the Department of Sociology, that course does not count toward the 32 hours of Sociology courses.

² Supporting course work is designed to expand the student's education in the social sciences. All supporting course work is taken outside the Department of Sociology. A student may take supporting course work from one department, such as psychology, economics, history or statistics, or from a cohesive selection of courses in a variety of departments. With an adviser's approval, departmental or interdisciplinary minors, or a double major may be used to fulfill the requirements of supporting course work

Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minor in Sociology

A minor in sociology requires that students learn the basic theoretical and methodological approaches in sociology. Students must also learn about the substance of sociology in some depth and are thus required to take at least two sociology courses at an advanced level and a total of at least 18 hours of sociology courses. The course work must include the requirements listed below.

E-mail: soc@illinois.edu

SOC 100	Introduction to Sociology	4
SOC 200	Intro to Sociological Theory	3
SOC 280	Intro to Social Statistics ¹	4
At least two Sociology courses at the 300- or 400-level		6
Elective Sociology hours, as needed to fill the 18-hour requirement		3-6
Total Hours		18

¹ If a statistics course is taken outside the Department of Sociology, that course does not count toward the 18 hours of Sociology courses.

South Asian and Middle Eastern Studies, Center for

<http://www.csames.illinois.edu/>

Center Director: Valerie Hoffman
Center Office: 221 ISB

The Center for South Asian and Middle Eastern Studies offers two Interdisciplinary Minors: South Asian Studies and Study of the Islamic World.

For additional information, please contact:

Associate Director: Angela Williams
Email: aswilliams@illinois.edu
Phone: 244-5939

- Interdisciplinary Minor in South Asian Studies (p. 437)
- Interdisciplinary Minor in the Study of the Islamic World (p. 437)

Interdisciplinary Minor in South Asian Studies

The Center for South Asian and Middle Eastern Studies (<http://www.csames.illinois.edu>) offers an Interdisciplinary Minor in South Asian Studies. The minor is especially suited for students interested in a program of studies with focus on South Asia, as a complement to their disciplinary study. The structure of the minor provides students a great amount of flexibility; possible areas of emphasis include language and literature, as well as history and social sciences.

A minimum grade-point average of 2.75 in South Asian Studies courses is required for completion of the minor. The 18-20 hours of courses selected by students for the South Asian Studies Minor should form a coherent program of study and must meet the approval of an advisor in the Center for South Asian and Middle Eastern Studies. The program must include at least 6 hours of 300- or 400-level courses. A student's plan of courses for the minor must be approved by the program.

Fourth-semester course work in an area-relevant language. Courses that meet this requirement and are currently offered on a regular basis are HNDI 404 (5 hours) AND SNSK 404 (3 hours) The requirement may also be met by comparable courses in these and other South Asian and South Asia-related languages, taught at UIUC or at other universities, through online courses (where available), and through a proficiency examination. 3-5

HIST/ANTH 130	History of South Asia	3
Courses on South Asian history, language, literature, culture, and society from the following list: ¹		12
ANTH 499	Topics in Anthropology (appropriate sections)	
ASST 398	Colloquium in Asian Studies (appropriate sections)	
CWL 189	Lit of Asia & Africa I (appropriate sections)	
or CWL 190	Lit of Asia & Africa II	
ECON 450	Development Economics (appropriate sections)	
HNDI 405	Advanced Hindi I	
& HNDI 406	and Advanced Hindi II	
HNDI 408	Intro to South Asian Lit	
HIST 430	India from Colony to Nation	
LA/ASST 218	S Asian Cultural Landscapes	
PS/ASST 346	Gov & Pol of South Asia	
RLST 104	Asian Mythology	
RLST 213	Intro to Islam - ACP	
RLST 260	Mystics and Saints in Islam	
RLST 286	Introduction to Hinduism	
RLST 494	Topics in Religious Thought (appropriate sections)	
RLST/ANTH 403	Women in Muslim Societies (Same as GWS 403, HIST 434)	
RLST 408	Islam & Politics in Mid. East	
Total Hours		18-20

¹ Other area-relevant courses may be substituted as they are offered, with approval of the advisor. These include courses in languages other than Hindi and independent study courses with South Asia teaching faculty and with appropriate topics, such as the following ANTH 390, HIST 490, LING 290, PS 490, RLST 390, SOC 390. Students wanting to take such independent study courses need to get permission from the instructor; not more than two independent study courses may be taken to meet the degree requirements.

Interdisciplinary Minor in the Study of the Islamic World

An interdisciplinary minor in the Study of the Islamic World is offered by the Center for South Asian and Middle Eastern Studies. It is designed for students interested in developing an expertise in one or more parts of the Islamic world or in Islamic culture generally, as a complement to their disciplinary major. Completion of the minor requires 19 credit hours in applicable courses with a minimum grade-point average of 2.75.

Completion of a fourth semester course in an Islamic language (e.g. Arabic, Turkish, Swahili, Wolof). Select courses from the approved course list. 4

Select one of the following:		3
SAME 133		
HIST 135	History of Islamic Middle East	
RLST 214	Introduction to Islam	
or RLST 213	Intro to Islam - ACP	

Additional courses chosen from the approved course list. The courses must come from at least two disciplines. At least six hours must be at the 300- or 400-level.	12
Total Hours	19

Spanish and Portuguese

Silvina Montrul, Head of Department

4080 Foreign Languages Building, 707 South Mathews, Urbana, (217) 333-3390

www.sip.illinois.edu

The Dept of Spanish and Portuguese offers majors in the following areas: Spanish, Portuguese, and a Curriculum Preparatory to the Teaching of Spanish. The department also offers the following undergraduate minors: Spanish and Portuguese.

- Major in Spanish (p. 440)
- Teaching of Spanish Concentration (p. 439)
- Major in Portuguese (p. 440)
- Minor in Spanish (p. 442)
- Minor in Portuguese (p. 442)

Curriculum Preparatory to the Teaching of Spanish

For the Degree of Bachelor of Arts in the Teaching of Spanish

E-mail: sip@illinois.edu

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Minimum required course work normally equates to 33-36 hours in Teaching Area of Concentration and 29 hours of professional education courses.

Minimum hours required for graduation: A minimum of 123 hours of credit is required for graduation.

General education: Consult the Curricula Preparatory to Teaching Foreign Languages (p. 483).

Departmental distinction: To be eligible for departmental distinction, a student must have a minimum grade point average of 3.0, display exceptional teaching ability, and complete an approved project or series of projects. Consult the Spanish teacher education adviser for details.

Foreign study: It is strongly recommended that future teachers of Spanish engage in one or more semesters of study in a Spanish-speaking country. A number of the curricular requirements listed above may be met through the Year Abroad Program or other approved programs; see Study Abroad Programs (<http://www.sip.illinois.edu/studyabroad/spanish>).

Professional education courses. (See Foreign Languages: Curricula Preparatory to Teaching Foreign Languages.) (p. 483)

29

Teaching Area of Concentration: Spanish

Portuguese

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: sip@illinois.edu

Minimum required major and supporting courses normally equate to 42-45 hours including at least 27 hours in Portuguese courses beyond the 100 level.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department's honors adviser.

PORT 200	Advanced Grammar	3
PORT 320	Readings in Portuguese	3
PORT 404	Luso-Brazilian Culture	3
PORT 406	Brazilian Film	3
PORT 410	Studies in Brazilian Lit	3
Additional courses in Portuguese literature/culture beyond the 100 level		12

Supporting course work or a minor in a related area of study chosen by the student and approved by the adviser. There is a wide choice of supporting courses because the student's interests may vary from Iberian literature to animal husbandry in Angola and urbanology in Brazil. Supporting areas may include humanities (comparative literature, comparative religion, linguistics, philosophy), social sciences (anthropology, geography, history, Latin American studies, political science, sociology), education, fine and applied arts, and/or journalism. Other fields, or groups of fields, may be approved by the undergraduate adviser.¹

¹ A minor consists of a minimum of 18 hours.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Spanish

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: sip@illinois.edu

Minimum required major and supporting course work normally equates to 48 hours, including 33 hours in Spanish courses beyond SPAN 141 or SPAN 142. It must include at least 18 hours of core courses, plus at least 15 hours of electives, and a minimum of 15 hours of supporting coursework.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department's honors adviser.

Statistics

Douglas G. Simpson

101 Illini Hall, 725 South Wright St., Champaign, IL 61820, (217) 333-2167

<http://www.stat.illinois.edu>

Statistics is the science of modeling, summarizing, and analyzing data, and of using mathematics and computing tools to make predictions and decisions in the face of uncertainty. Statistical ideas are applicable in any area involving quantitative measurement and in almost every area of scholarly pursuit. The major, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A major in statistics will prepare students for a career in business, industry, or government, and for further graduate study in statistics or in a related area.

- Major in Statistics (p. 443)
- Major in Statistics and Computer Science (p. 444)

Minor in Statistics

- Applied Status Track Minor (p. 446)
- Mathematical Statistics Track Minor (p. 446)

The minor, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A minor in statistics will assist students with their major field of study to better prepare them for a career in their chosen field. It will also prepare students to for graduate studies in statistics or in one of many areas where data analysis plays an important role. Interested students should contact the Statistics undergraduate advisor for admission into the minor. Students should have completed the calculus sequence through MATH 241 before entering the minor. Students must choose from either the Applied or Mathematical Statistics Track.

Statistics and Computer Science

This major is sponsored jointly by the Departments of Statistics and Computer Science. The Statistics and Computer Science major is designed for students who would like a strong foundation in computer science, coupled with significant advanced coursework in statistics. The major prepares students for professional or graduate work in statistics and computer science, and for applications of computing in which knowledge of statistics is particularly important, such as data mining and machine learning. See also Computer Science (p. 451), Mathematics (p. 394), Mathematics and Computer Science (p. 401), and Statistics (p. 443).

Major in Sciences and Letters Curriculum

E-mail: stat-office@illinois.edu or academic@cs.illinois.edu (academic@cs.uiuc.edu)

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 70-72 hours

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science, Statistics, and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction.

Calculus through MATH 241 - Calculus III	11-12
MATH 415 Applied Linear Algebra	3 OR 4
Required Computer Science Courses:	28
CS 125 Intro to Computer Science	
CS 173 Discrete Structures	
CS 225 Data Structures	
CS 233 Computer Architecture	
CS 241 System Programming	
CS 242 Programming Studio	
CS 357 Numerical Methods I	
CS 373 Theory of Computation	
Required Statistics courses:	10
STAT 400 Statistics and Probability I	
STAT 410 Statistics and Probability II	
STAT 428 Statistical Computing	
Other Specified Requirements. At least six other statistics, computer science, and mathematics courses, with at least one chosen from each of the following groups:	18
Group I: Applied Statistics	
STAT 200 Statistical Analysis (or a 300 or 400-level statistics course, with STAT 426 recommended) ¹	
Group II: Analysis and Differential Equations	
MATH 347 Fundamental Mathematics	
MATH 441 Differential Equations	
MATH 444 Elementary Real Analysis	
MATH 447 Real Variables	
Group III: Foundations	
CS 473 Fundamental Algorithms	
CS 475 Formal Models of Computation	
Group IV: Software	
CS 421 Progrmg Languages & Compilers	
CS 423 Operating Systems Design	
Group V: Application software	
CS 411 Database Systems	

CS 418	Interactive Computer Graphics
CS 446	Machine Learning
Group VI: Linear Regression Analysis	
STAT 420	Methods of Applied Statistics
STAT 424	Analysis of Variance
STAT 425	Applied Regression and Design

- ¹ *STAT 200 should be taken during the first 60 hours of course work (to provide the student with an early introduction to statistical concepts). The latter option of a 300 or 400-level statistics course is designed for students who wish to take STAT 400 before the junior year.*

Twelve hours of 300 and 400-level courses must be taken on this campus.

All foreign language requirements must be satisfied.

Applied Statistics Track Minor

Select one of the following:		2-3
MATH 125	Elementary Linear Algebra	
MATH 225	Introductory Matrix Theory	
MATH 415	Applied Linear Algebra	
Select one of the following:		3-4
ACE 261	Applied Statistical Methods	
CPSC 241	Intro to Applied Statistics	
ECON 202	Economic Statistics I	
EPSY 280	Elements of Statistics	
PSYC 235	Intro to Statistics

SOC 280	Intro to Social Statistics	
STAT 200 or STAT 212	Statistical Analysis Biostatistics	3
STAT 400	Statistics and Probability I ¹	4
STAT 420	Methods of Applied Statistics	3
Choose one 300- or 400-level course from the list maintained by the department. Please see the Statistics advisor for a current list.		3-4
Total Hours		18-21

Mathematical Statistics Track Minor

MATH 415	Applied Linear Algebra	3 OR 4
STAT 200 or STAT 212	Statistical Analysis Biostatistics	3
STAT 400	Statistics and Probability I ¹	4
STAT 410 or ECE 313	Statistics and Probability II Probability with Engrg Applic	3
Choose two 300- or 400-level courses from the list maintained by the department. Please see the Statistics advisor for a current list.		6
Total Hours		19-20

¹ Students who have completed STAT 408 and STAT 409 will not need to take STAT 400.

Art History

Nan Goggin

143 Art and Design Building, 408 East Peabody, Champaign, (217) 333-0855

www.art.illinois.edu

Like the other humanities, the history of art as an undergraduate major offers an enrichment of and a preparation for life, rather than training for a specific occupation. The student who goes on to graduate work in the field can pursue a career in teaching, museum work, or employment in a commercial art gallery, or auction house.

Working in consultation with the LAS undergraduate adviser for art history in the School of Art and Design, each student will design a program of study that satisfies the requirements listed below. Students who wish to take a considerable number of studio courses as part of their major should enroll in the history of art option offered by the School of Art and Design within the College of Fine and Applied Arts.

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail address: tweissma@illinois.edu

Minimum required major and supporting course work equates to 48 hours including 30 hours of Art History courses, 15 hours of supporting coursework and 3 hours of studio.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: To be eligible for distinction, a student must earn a high grade point average and complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for details.

Supporting Requirements in Art

Studio course in Art and Design	3
---------------------------------	---

Supporting Requirements in Art History

Select three of the following: ¹	12
---	----

ARTH 111	Ancient to Medieval Art	
----------	-------------------------	--

ARTH 112	Renaissance to Modern Art	
----------	---------------------------	--

ARTH 113	Introduction to African Art	
----------	-----------------------------	--

ARTH 114	Introduction to East Asian Art	
----------	--------------------------------	--

ARTH 115	Art in a Global Context	
----------	-------------------------	--

Art or Architectural History 200- to 400-level

ARTH 395	Junior Seminar in Art History	3
----------	-------------------------------	---

ARTH 495	Senior Seminar in Art History	3
----------	-------------------------------	---

One upper-level course from each of the following categories: ²	12
--	----

African or East Asian Art or Architecture	
---	--

Art or Architectural History before 1700	
--	--

Art or Architectural History after 1700	
---	--

200- to 400-level courses in supporting areas chosen with the approval of the adviser. Although the program in art history allows considerable latitude in the selection of such courses, they should be chosen with the goal of enhancing the student's understanding of the cultural context within which works of art and architecture have been created. Recent practice suggests that supporting courses will most commonly be drawn from such fields as anthropology, classics, history, literature, music and dance history, philosophy, psychology, and religious studies.	15
--	----

¹ Credit will not be given for ARTH 112 and ARTH 115.

² Courses in the history of architecture, excluding ARCH 210, may be used with the approval of the adviser for as many as 9 hours of credit in meeting the requirement for 18 hours of art history at the 200-400 level.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied. For students considering graduate work in Art History French or German is strongly recommended for the foreign language requirement. Other languages including Chinese or Japanese may be used with the approval of the adviser as the needs of the student's program dictate.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Biology

Students interested in applying to either school of biology should simply choose Biology as their major. After taking two introductory courses, students will choose a major in either Integrative Biology or Molecular and Cellular Biology.

Integrative Biology, School of (<http://www.life.uiuc.edu/sib>)

Director of School: Carla Cáceres

School Office: 286 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3044

Molecular and Cellular Biology, School of (<http://mcb.illinois.edu>)

Director of School: Stephen Sligar

School Office: 393 Morrill Hall, 505 South Goodwin Avenue, Urbana, (217) 333-3166

An interschool option in Teaching of Biology (p. 449) is sponsored by the School of Integrative Biology and the School of Molecular and Cellular Biology.

Also, see majors in Integrative Biology (p. 373) and Molecular and Cellular Biology (p. 410).

Biology Teaching

For the Degree of Bachelor of Science in Liberal Arts and Sciences

See interschool concentrations in Biology (p. 449), major in Integrative Biology (p. 373), and major in Molecular and Cellular Biology (p. 410).

Completion of this concentration fulfills state certification requirements to teach both biology and general science. In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education (p. 483) for the list of courses used to compute these grade-point averages.

E-mail: advising@life.uiuc.edu

Minimum required courses normally equate to 79-81 hours

General education: Students must complete the Campus General Education requirements. In addition, one course must be selected from CMN 101 or CMN 113.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction, the student must have at least a 3.5 grade point average for all work completed, and present evidence of exemplary student teaching.

Prerequisites to transfer to the Teaching Concentration

EPSY 201	Educational Psychology	3
EPS 201	Foundations of Education	3
or EPS 202	Foundations of Education-ACP	
MATH 220	Calculus	5
or MATH 221	Calculus I	
Select one of the following sequences:		
CHEM 102 & CHEM 103 & CHEM 104 & CHEM 105	General Chemistry I and General Chemistry Lab I and General Chemistry II and General Chemistry Lab II	
CHEM 202 & CHEM 203 & CHEM 204 & CHEM 205	Accelerated Chemistry I and Accelerated Chemistry Lab I and Accelerated Chemistry II and Accelerated Chemistry Lab II	
CHEM 232	Elementary Organic Chemistry I	3 OR 4

CHEM 233	Elementary Organic Chem Lab I	2
IB 150	Organismal & Evolutionary Biol	4
MCB 150	Molec & Cellular Basis of Life	4

At least one required 200-level IB course and at least one required 200-level MCB course

In addition, the student is required to take the Illinois Certification Testing System test of Basic Skills by the December before applying to the Teacher Education Minor in Secondary School Teaching. A passing grade on this test is required before admission to the Teacher Education Minor in Secondary School Teaching.

Requirements

In addition to the requirements for the concentration listed below, students must complete the Teacher Education Minor in Secondary School Teaching (p. 129) (37 - 38 hours). See the College of Education section for requirements of the minor. Conferral of the degree of Bachelor of Science in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Affairs Office. Ordinarily, all students will require ten semesters to complete this program.

MATH 220 or MATH 221	Calculus Calculus I	4-5
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
CHEM 232	Elementary Organic Chemistry I ¹	3 OR 4
CHEM 233	Elementary Organic Chem Lab I	2
IB 150	Organismal & Evolutionary Biol	4

IB 202	Anatomy and Physiology ²	3 OR 4
IB 203	Ecology	4
IB 204	Genetics	4
IB 302	Evolution ²	4
MCB 250	Molecular Genetics	3
MCB 251	Exp Techniqs in Molecular Biol	2
MCB 252	Cells, Tissues & Development	3
MCB 253	Exp Techniqs in Cellular Biol	2
PHYS 101	College Physics: Mech & Heat	5
PHYS 102	College Physics: E&M & Modern	5
GEOL 101 or GEOL 107	Physical Geology	4
ASTR 100 or ASTR 210	Introduction to Astronomy Introduction to Astrophysics	3
Select one of the following:		3-4
EPSY 480	Educational Statistics	
STAT 100	Statistics	
MATH 161	Statistics	
Additional 300- and 400-level courses selected from IB and/or MCB in consultation with the advisor.		8

¹ Students should speak with an advisor to help choose the appropriate section of CHEM 232.

² IB 202 and IB 302 requires animal dissection and no equivalent alternative is available.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

Computer Science and Liberal Arts and Sciences Discipline

The LAS major in Computer Science and an LAS Discipline is a flexible program for students who plan to pursue technical or professional careers in arts and sciences areas requiring a sound grounding in computer science. This major allows students to combine study of computer science with training in a field in Liberal Arts and Sciences to offer students novel perspectives in interdisciplinary work. Students can use the supporting coursework to prepare for employment immediately upon graduation or for pursuing graduate study in a wide variety of fields or to complete a significant body of courses in a single area, such as a double major or minor.

Students are strongly encouraged to get involved in undergraduate research through independent studies and funded research experiences, with the goal of learning from the University of Illinois CS and LAS internationally recognized scholars outside the classroom and participating in the exciting quest for new contributions to the field.

Students interested in Mathematics or Statistics should enroll in the Math/CS (p. 401) or Stat/CS (p. 444) degree

Current approved curricula include:

Computer Science and Anthropology

Computer Science and Astronomy

Computer Science and Chemistry

Computer Science and Linguistics

For the degree of Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

Computer Science and Linguistics

Computer Science email: academic@cs.illinois.edu

Linguistics email: lasersoh@illinois.edu

Minimum required major and supporting course work normally equates to 66 hours, including a minimum of 30 in Computer Science

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Required Computer Science Courses:

30

CS 125	Intro to Computer Science
CS 173	Discrete Structures
CS 225	Data Structures
CS 233	Computer Architecture
CS 241	System Programming
CS 242	Programming Studio
CS 373	Theory of Computation

CS 421	Progrmg Languages & Compilers	
CS 473	Fundamental Algorithms	
Mathematics (may also fulfill the General Education Quantitative Reasoning I and II requirements)		12
MATH 221	Calculus I	
MATH 225	Introductory Matrix Theory	
MATH 231	Calculus II	
STAT 100	Statistics	
LAS Discipline coursework (Min. of 24 hours) ¹		24
An additional 24 hours of coursework in one of the following Liberal Arts and Sciences disciplines: Anthropology, Astronomy, Chemistry, or Linguistics. Coursework must be chosen in consultation with an advisor and approved by the LAS department. Must include at least 12 hours at the 300- or 400-level.		
Total Hours		66

¹ Students should discuss pursuing a LAS Minor or double majoring in a LAS discipline with the Computer Science academic advisor and the advisor in the appropriate LAS discipline (<http://www.las.illinois.edu/students/programs/majors>).

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All LAS foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office by the beginning of the fifth semester (60-75 hours). Please see the computer science advisor as well as the advisor in your LAS discipline.

Individual Plans of Study (IPS)

Mercedes Ramirez Fernandez, LAS Program Advisor
2002 Lincoln Hall, 702 S. Wright St., Urbana, IL 61801
<http://www.las.illinois.edu/students/programs/majors/ips/>

For the Degree of Bachelor of Arts in Liberal Arts and Sciences, or Bachelor of Science in Liberal Arts and Sciences

Major in Sciences and Letters Curriculum

E-mail: las-ips@illinois.edu

Minimum required major and supporting course work normally equates to 51-70 hours.

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction, a student must

1. have a cumulative grade point average of at least 3.25 and
2. successfully complete a project that has been approved by the IPS advisory committee.

Further information on requirements for graduation with distinction may be obtained from the secretary of the IPS advisory committee.

Students in the College of Liberal Arts and Sciences may choose any of the undergraduate degree programs offered within the college. These majors and specialized curricula, each with its own pattern of requirements and electives, are continuously reviewed by the sponsoring departments and the college and revised as needed. At the same time, it is not possible to anticipate or specify all possible undergraduate fields of study. So, in order to encourage the growth of new academic disciplines, the college sponsors the experimental major-the Individual Plans of Study program. IPS allows the student to create an original major more appropriate for the individual's educational needs and characterized by a unique pattern of upper-level courses with a new academic direction. Recent IPS students have successfully pursued such innovative majors as Cinematography, Entomology, Neuroscience, Meteorology, and Middle Eastern Studies.

The development of an IPS program begins with the student's perception that a more appropriate field of study could exist beyond the present majors. Consultation with the secretary of the IPS advisory committee and with faculty members in related fields will soon establish whether an original major is appropriate. Then, with the cooperation of one or more faculty members who consent to serve as advisers for this IPS program, an IPS major is planned and justified as carefully as if this were a departmental major.

Once an IPS program is formulated, the student and adviser make formal application to the IPS advisory committee, which evaluates and decides whether a proposed IPS program is appropriate for the aims of both the student and the college. The IPS Advisory Committee and the college will determine whether BA or BS is appropriate for the proposed program of study. Students interested in IPS are encouraged to inquire as early as possible in the sophomore year. In all cases, IPS programs must be initiated and approved before the end of the student's junior year. If program innovation sounds challenging and attractive, additional information is available at the LAS Student Academic Affairs Office, 2002 Lincoln Hall.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Physics

Dale Van Harlingen

209 Loomis Laboratory of Physics, 1110 West Green, Urbana, (217) 333-3761

<http://physics.illinois.edu>

The major in Physics in the Sciences and Letters Curriculum allows students maximum flexibility to develop scientifically oriented careers in fields requiring a physics background through the Physics Concentration or the Physics Teaching Concentration.

The Physics Concentration is a flexible program for students who plan to pursue technical or professional careers in areas requiring a sound grounding in physical science and mathematics. Students can use the concentration to prepare for employment immediately upon graduation or for continuing on to graduate study in a wide variety of fields.

The Physics Teaching Concentration fulfills state certification requirements to teach both physics and general science.

The LAS Specialized Curriculum in Physics is designed for students who plan to pursue graduate study in physics or a closely allied field. In some cases, however, the greater flexibility of the Science and Letters Curriculum may make it a better choice for graduate school preparation for those who want to pursue a combined major and minor, a double major, or double degrees.

See also Engineering Physics (p. 221) in the College of Engineering. See the Physics Department for additional information.

For the Degree of Bachelor of Science in Physics

- LAS Specialized Curriculum in Physics (p. 454)

LAS Specialized Curriculum in Physics

E-mail: undergrad-info@physics.illinois.edu

Degree Title: Bachelor of Science in Physics

General Education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 126

Departmental distinction: Graduation with distinctions awarded to students who complete 8 additional hours of 300- or 400-level physics courses or advanced courses in closely related technical subjects and who have attained cumulative grade point averages as follows: distinction, 3.2; high distinction, 3.5; highest distinction, 3.8.

The LAS Specialized Curriculum in Physics is designed for students who plan to pursue graduate study in physics or a closely allied field. However, students who want to pursue a combined major and minor, a double major, or a double degree should consider the LAS Science and Letters Curriculum in Physics because of the greater flexibility it offers. Students in the Specialized Curriculum beyond the freshman year must maintain an overall grade point average of at least 2.5 and also a grade point average of 2.5 in all required mathematics and physics courses.

Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement in mathematics should begin the general physics sequence in the first semester. All students are strongly encouraged to take a Freshman Discovery Seminar during the first year fall semester and plan ahead to allow space in their programs for undergraduate research.

Physics Concentration within the Sciences and Letters Curriculum

E-mail: undergrad-info@physics.illinois.edu

Degree title: Bachelor of Science in Liberal Arts and Sciences

Minimum required major and supporting course work normally equates to 65-73 hours

General education: Students must complete the Campus General Education requirements.

Minimum hours required for graduation: 120 hours

Departmental distinction: Graduation with distinction is awarded to students who complete 8 additional hours of 300- or 400- or 500-level physics courses or advanced courses in closely related technical subjects, and who have attained cumulative grade point averages as follows: distinction, 3.2; high distinction, 3.5; highest distinction, 3.8.

The Physics Concentration is a flexible program for students who plan to pursue technical or professional careers in areas requiring a sound grounding in physical science and mathematics. Students can use the concentration to prepare for employment immediately upon graduation or for continuing on to graduate study in a wide variety of fields. Students who are certain that they want to go on to graduate study in physics or in a closely allied field should also consider the LAS Specialized Curriculum in Physics. In some cases, however, the greater flexibility of the Science and Letters Curriculum may make it a better choice for graduate school preparation for those who want to pursue a combined major and minor, a double major, or double degrees. Students in the concentration must maintain an overall grade point average of at least 2.0 and also a grade point average of at least 2.0 in all required physics and mathematics courses. To be permitted to enroll in advanced physics courses in this concentration a student must maintain at least a 2.0 average in all attempts at science and mathematics courses taken at the University of Illinois.

Students in this concentration must choose an approved elective technical or professional option no later than the end of the second semester of the sophomore year. A set of pre-approved options is available via the departmental web site (<http://physics.illinois.edu/undergrad/las-options.asp>) and from the departmental undergraduate studies office. Students may also design and follow a "custom option" subject to departmental approval. Students completing the Astrophysics option will earn a minor in Astronomy, if appropriate Minor form is filed.

Entering freshmen typically take calculus, chemistry, rhetoric, and PHYS 110 during the first semester and begin the general physics sequence in the second semester. Students with advance placement in mathematics should begin the general physics sequence in the first semester. All students are strongly encouraged to take a Freshman Discovery Seminar during the first year fall semester and plan ahead to allow space in their programs for undergraduate research.

Fixed Physics Core 23-24

PHYS 110	Physics Careers
PHYS 211	University Physics: Mechanics

PHYS 213	Univ Physics: Thermal Physics
PHYS 214	Univ Physics: Quantum Physics
PHYS 225	Relativity & Math Applications
PHYS 325	Classical Mechanics I
PHYS 435	Electromagnetic Fields I
PHYS 486	Quantum Physics I
or PHYS 485	Atomic Phys & Quantum Theory

Flexible physics core electives. Choose three courses from a departmentally approved list, with at least one being PHYS 401, PHYS 403, or PHYS 404. The number of hours varies depending upon the courses chosen. (<http://physics.illinois.edu/undergrad/las-sl-flexcore.asp>) 9-15

Supporting Technical Courses 21-22

MATH 221	Calculus I ¹
MATH 231	Calculus II
MATH 241	Calculus III
MATH 285	Intro Differential Equations
or MATH 286	Intro to Differential Eq Plus
CHEM 102	General Chemistry I
CHEM 103	General Chemistry Lab I
CS 101	Intro Computing: Engrg & Sci

Elective Technical or Professional Option 12

A set of technical or professional courses that addresses an intellectually coherent body of knowledge. At least 9 hours should be at the 200-level or higher. Required courses may not be included in the set. Students may select from a list of pre-approved options or design a custom option, subject to departmental approval.

¹ MATH 220 may be substituted with four of the five credit hours applying toward the degree. MATH 220 is appropriate for students with no background in calculus.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

All foreign language requirements must be satisfied.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Physics Teaching Concentration within the Sciences and Letters Curriculum

Completion of this concentration fulfills state certification requirements to teach both physics and general science. Certification in other areas can also be earned. In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain UIUC, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages. <http://www.cote.illinois.edu/>

E-mail: undergrad-info@physics.illinois.edu

Web address for department: <http://physics.illinois.edu>

Degree title: Bachelor of Science in Liberal Arts and Sciences

General education: Students must complete the Campus General Education requirements. In addition, students must take one of the following speech performance courses: CMN 101, CMN 113, CMN 321, or CMN 323 .

Minimum hours required for graduation: 120 hours

Departmental distinction: Distinction is determined by a combination of grade point average and achievement in student teaching. The student's practice teaching experience will be evaluated by the departmental honors adviser and the teaching supervisor. Distinction requires a 3.2 grade point average; high distinction, 3.4; highest distinction, 3.6. Students desiring distinction should consult with the departmental honors adviser during the junior year.

Prerequisites to transfer to the Teaching Concentration: EPSY 201; EPS 201; CHEM 102 and CHEM 103, or CHEM 202 and CHEM 203; MATH 220, MATH 221, MATH 231, MATH 241, and MATH 285; and PHYS 211, PHYS 212, PHYS 213, and PHYS 214 must be completed prior to transfer into the teaching concentration. Candidates must also pass the Illinois Certification Test of Basic Skills before they may be admitted to the program.

In addition to the requirements for the concentration listed below, students must complete the Teacher Education Minor in Secondary School Teaching (<http://illinois.dev6.leapfrog.com/2012/fall/programs/undergrad/education/secondary.html>) (37 - 38 hours). See the College of Education (<http://education.illinois.edu>) section for requirements of the minor. Conferral of the degree of Bachelor of Science in Liberal Arts and Sciences prior to completion of the minor requires approval by petition to the LAS Student Affairs Office. Ordinarily, all students will require 10 semesters to complete this program.

Physics Core

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Media, College of

Student Services Center
18 Gregory Hall
810 S. Wright St., MC-477
Urbana, IL 61801, (217) 244-4329
www.media.illinois.edu

media-ssc@illinois.edu

The College of Media strives to give students solid backgrounds in social sciences and humanities and to provide them broad career competence in advertising, journalism or media studies. The College's premise is that students need to understand the world and its people if they are to communicate effectively and enjoy fulfilling and meaningful lives.

The College offers Bachelor of Science degrees in Advertising, Agricultural Communication and Media and Cinema Studies and Bachelor of Science in Journalism degrees in Broadcast Journalism and News-Editorial Journalism. Students who seek to become leaders in cutting-edge media study with leading professionals and scholars and learn using the latest equipment and facilities. Included are laboratories for reporting, editing, design, and photojournalism; editing suites for radio and television production; and a television studio. The Communications Library is recognized as one of the best in the nation. Career services are available for students.

The College also includes the Division of Broadcasting, which operates WILL-AM, FM, TV and online, and the Institute of Communications Research.

The College has a rich past and a bright future. It traces its history to 1902, when instruction in journalism began. A school of journalism was established in 1927. In 1950 it became the School of Journalism and Communications. In 1957 the school was elevated to college status. The name College of Communications was adopted in 1968. To better reflect the College's emphasis on mediated communication, the name College of Media was adopted in 2008.

Departments and Curricula

The College, fully accredited by the Accrediting Council on Education in Journalism and Mass Communication, offers these majors:

- **ADVERTISING (ADV)**, which offers students the opportunity to learn and think about advertising as a way of modeling the mind, as a material reflection of social structure, as a fundamentally modern phenomenon, as an art form and even as a basis for community, by drawing on insights from psychology, sociology, history, literature, and anthropology. This program will thoroughly infuse the understanding of consumer behavior and message knowledge base and, therefore, provide a better and longer-lasting education for students.
- **AGRICULTURAL COMMUNICATION (AGCM)**, which prepares students for a variety of opportunities in communications with a focus on food, agricultural, energy and environmental sciences. Students pursuing this major choose one of two specializations: Journalism or Advertising. The College of Media and the College of Agricultural, Consumer and Environmental Sciences jointly offer this curriculum.
- **JOURNALISM (JOUR)**, prepares students for exciting and fulfilling careers in traditional broadcast journalism, news-editorial journalism, and emerging media. The primary professional aim is to train students as public affairs and enterprise journalists. The Journalism Department seeks to prepare broadly educated professionals who will assume decision-making and leadership roles in a variety of media organizations.
- **MEDIA AND CINEMA STUDIES (MACS)**, prepares students with dynamic skills for careers in media, information, creative, and visual industries, as well as informed interaction with everyday media technologies. Majors have the opportunity to participate in original research, mixed media production, internships, study abroad, and public engagement through a transformative learning environment.

The Departments of Advertising and Journalism offer graduate programs leading to Master of Science degrees in Advertising and in Journalism. The Department of Media and Cinema Studies offers an undergraduate and graduate Minor in Cinema Studies. The College also offers an interdisciplinary program leading to a Doctor of Philosophy degree in communications and media.

Requirements

Admission

High school seniors and transfer students from another institution should contact the Office of Admissions and Records for admission requirements and applications for a specific term.

Current University of Illinois students who will have completed at least one year on the Urbana-Champaign campus should apply during the first weeks of the semester during which they will complete their 30th hour of course credit. Successful applicants will be admitted for the following semester. Applications also will be accepted from more advanced students provided that by the end of the semester in which they apply, they will have completed no more than 90 hours. Forms are available on the College web site. Specific deadlines are cited on the forms.

Students seeking to transfer from another university may apply early in the spring semester provided they will have completed at least 30 transferable hours by the end of the spring semester. Hours planned during upcoming summer semesters are not considered. Forms are available from the University Office of Admissions and Records.

Inter-college transfer students (students already on campus) should include a personal essay of up to 500 words. The essay should demonstrate the applicant's media-related abilities and detail the applicant's interest in and demonstrated commitment to a career for which a College of Media degree would be appropriate.

Admission is competitive. While there is no specific requirement regarding grades, a strong GPA is advantageous especially in core classes that are part of the major you wish to transfer in to. Students with the best essays and the best academic or professional qualifications, including any pertinent extracurricular activities or internships, will receive highest priority. For a University of Illinois student, one way to demonstrate interest is to have earned a grade of B or better in introductory courses such as ADV 150, JOUR 200, MACS 100, MACS 101, MACS 261, MACS 262, or Discovery courses taught by the College.

Students currently enrolled in other colleges on campus are accepted on the condition that by the time they join the College at the start of the semester after they apply, they must:

- Have completed at least two semesters in the University of Illinois college to which they were admitted, if admitted as freshmen.
- Be classified by the University as sophomores (at least 30 credit hours) or as juniors (fewer than 90 credit hours).
- Be in good academic standing.
- Have completed approximately one-fourth (if sophomores) or one-half (if juniors) or more of the total credit hours required to satisfy the University's General Education requirements.
- Have made substantial progress toward completing any departmental requirements for courses outside the College of Media. For example, applicants for Advertising ideally will have completed ECON 102 and ECON 103, STAT 100 and two of these three courses: SOC 100, ANTH 103 and PSYC 100.

Students may apply to any major in the College: Advertising, Agricultural Communications, Broadcast Journalism, Media and Cinema Studies or News-Editorial Journalism. College of Media students may not pursue a Minor in Cinema Studies and may not complete double majors within the College.

Students who would require more than nine total semesters of overall college or university enrollment to complete their degree will be denied admission. Students must complete their College of Media degrees within seven semesters of joining the College as sophomores or within five semesters of joining the College as juniors. A minimum of three semesters within the College is required for students admitted as juniors. A minimum of five semesters within the College is required for students admitted as sophomores.

Minors in areas outside the College are strongly encouraged. However, because considerable coursework in other colleges is implicit within the requirements for all College of Media degrees, students are not admitted to the College of Media for the purpose of pursuing second majors or second undergraduate degrees.

Students completing freshman and sophomore studies at institutions other than the University of Illinois at Urbana-Champaign are strongly advised to defer courses in Media and Cinema Studies, Journalism, Agricultural Communication, and Advertising until they enroll in the College of Media. Students may transfer up to eight hours of Advertising, Agricultural Communication, Journalism, Media and Cinema Studies or College of Media electives. However, those hours will not be applied to the minimum number of hours required in College of Media courses and may not be used to replace required courses.

Graduation

To graduate, students must satisfy all University requirements as to residency, scholarship, and fees and must complete the University's general education requirements. Although the College currently requires completion only of the equivalent of a third-semester college-level course in a language other than English, students planning to join the College as freshmen in future years are strongly urged to plan for completion of the equivalent of a fourth-semester language course as this requirement may change in the future. All students also must fulfill these general requirements of the College of Media:

- Complete a total of 124 semester hours of course credit of which no more than 12 hours total may be in basic physical education activity courses (KIN 100-KIN 111, KIN 122), vocational and technical education courses, basic courses in military science (AFAS, MILS and NS courses numbered below 300), Institute of Aviation courses, Undergraduate Open Seminar (199) courses, and independent study courses and other experimental or special topics courses (such as LAS 110) outside the College of Media. The exception is that Agricultural Communication majors must complete 126 semester hours of credit. Independent study courses additionally must be approved by the College to ensure that credit is given only for academic work directly supervised by a faculty member. The College encourages its students to have appropriate professional internships and to participate in professional activities. While it does not allow academic credit for such experience, one credit hour is possible through an academic course or independent study supervised by a College of Media faculty member and taken in conjunction with an internship.
- Agricultural Communication majors must complete 20 hours from the College of Media in one of three specializations: advertising, broadcast journalism, or news-editorial journalism. All other majors must complete not less than 36 hours in courses offered by or cross-listed with Advertising

(ADV), Journalism (JOUR) or Media and Cinema Studies (MS, CINE, or MACS), Agricultural Communications (AGCM) or the College of Media (MDIA).

- Complete not less than 80 hours of credit outside the College of Media, of which 65 hours must be taken in traditional liberal arts and sciences, which may include courses offered outside the College of Liberal Arts and Sciences. Math courses numbered below 100 may not count in this total.
- No course of any number that is offered by or cross-listed with Advertising, Agricultural Communications, Journalism or Media and Cinema Studies or is substantially similar to courses offered by Advertising, Agricultural Communications, Journalism or Media and Cinema Studies may count in this total, regardless of the rubric under which it is taken. For each hour of credit beyond 44 in such courses, the number of hours required for graduation increases by one additional hour to ensure that the requirement of 80 hours outside the College is met.
- Complete not less than 20 hours in courses numbered 200 or above outside the College of Media and not cross-listed in the College of Media, regardless of the rubric under which they are taken. At least 9 of the 20 hours must be in courses numbered 300 and above.
- Complete the specific requirements of one of the five curricula offered by the College.
- Earn a cumulative grade point average of 2.00 (A = 4.00) in all courses presented for the degree and a cumulative 2.00 grade point average for all courses taken in the College.

Special Programs

Dean's List

To be eligible for Dean's List recognition for any semester, students must rank in the top 20 percent of the College in grade point average and must complete at least 14 hours taken for a letter grade (A through F) on the Urbana-Champaign campus. Transfer, study abroad and guided individual study coursework is excluded.

The specific grade point average necessary to achieve Dean's List recognition may vary. College of Media standards are high.

Dean's List recognition is determined before the start of the ensuing semester. Students who are not initially selected but who believe they might qualify because of the late resolution of incomplete, deferred or missing grades may petition before the end of the next semester for retroactive addition to the list.

Honors at Graduation

For graduation with honors, a student must rank in the upper 20 percent of his or her graduation class in overall grade point average. For graduation with high honors, a student must additionally rank in the upper 10 percent. For graduation with highest honors, a student must additionally rank in the upper 5 percent.

For purposes of this award, "graduating class" means all students listed as receiving or as being candidates for receiving bachelor's degrees in all College majors at the College's annual commencement convocation each May. This includes students who graduated in the previous December and those who are candidates for graduation in May and August. Grade point averages are computed through the fall semester immediately preceding the annual convocation and include all transfer courses and other grades posted as of that date.

Transfer students, in addition to meeting the general requirement, must have cumulative University of Illinois at Urbana-Champaign grade-point averages as high as the lowest ones listed for students who qualify on the basis of having completed all of their work at the University of Illinois at Urbana-Champaign and must have earned 40 or more semester hours at the University of Illinois at Urbana-Champaign through the fall semester immediately preceding the annual convocation.

Kappa Tau Alpha

Each year, scholastically high-ranking graduating juniors and seniors in the College of Media are considered for membership in Kappa Tau Alpha, the seventh oldest national honorary society, founded to recognize and promote academic excellence and scholarship in journalism and mass communication.

Students must rank in the upper 10 percent of their class, must have completed at least five semesters of degree work and must have completed at least nine semester hours in professional skills courses, as defined by the national society.

Edmund J. James Scholars

The James Scholar Program, named for the University of Illinois' fourth president, Edmund J. James, focuses on giving high-ability students the opportunity to gain additional knowledge by working closely with instructors.

To remain in good standing as a James Scholar in the College of Media, students must maintain semester and cumulative GPAs of 3.5 and higher, complete at least 14 credit hours for traditional letter grades each semester and complete at least one honors course or project each academic year. Students may choose from taking a Campus Honors Program course, completing an Honors Credit Learning Agreement with a professor in any course, working on an honors project with a College of Media professor as an independent study, or from the pre-approved honors activity list as provided by the honors coordinator to complete the honors requirement. Freshmen must take a College honors course during the spring semester. Students who study

abroad will be exempt of the GPA and credit hour requirements during the semester(s) they are abroad. The honors requirement should be completed the semester the student is on campus.

James Scholars' academic records are reviewed each summer. If a student has met the stated requirements for each of the two past semesters at the time of the review, he or she will be certified as a James Scholar for the next academic year and the James Scholar designation will be added to his or her transcripts for that academic year. Any student who does not fulfill the requirements will be removed from the James Scholars program. Because James Scholar review takes place once a year, a student who does not meet the requirements in the fall semester will remain in the program for the spring. However, s/he will be dropped during the summer review period and the James Scholar notation will not appear on the transcript for the previous academic year. In order to graduate with the James Scholar designation, all students must have completed a minimum of four honors activities, with at least one being completed each year the student is in the program.

Students entering the College of Media as freshmen are invited to join the James Scholars program during the summer if they rank in the top 20 percent of the College's incoming class, as determined by an Office of Admissions and Records standard that combines factors such as standardized test scores and high school GPA.

Students already in the College of Media are invited to become James Scholars for the upcoming fall semester if they have completed fewer than 75 hours, have at least a 3.5 overall GPA and were included on the Dean's List for the spring semester. If a student loses the James Scholar status, he or she must sit out of the program for at least one semester before becoming eligible for reinstatement. A student may only be reinstated by making the College's Dean's List.

Students who transfer into the College of Media from another college on the Urbana-Champaign campus are invited to participate in the James Scholar program immediately if they were a James Scholar in their previous college or for the upcoming fall semester if they have fewer than 75 hours, are in the top 20 percent of the incoming class, and have at least a 3.5 GPA. On-campus students who transfer into Media during a spring semester would fall under the rules of a current student; see description above. Students who transfer to the College from another institution may request to participate if they have a transfer GPA of at least 3.7.

A qualifying student may enter the program for his or her sophomore or junior year, but not for his or her senior year alone. Students who join the James Scholar program during the sophomore or junior year will need to pick up additional honors activities in order to graduate with the minimum four required to graduate with the honor.

For complete policies and procedures, please see: http://media.illinois.edu/current/jscholars_students.html

Credit/No Credit Grading Option

The College follows credit-no credit provisions described in the Grading System and Other Regulations section of the Programs of Study.

All courses listed or cross-listed with departments in the College, or specifically required by one of those departments for its majors or used to fulfill University General Education requirements, must be taken for a traditional letter grade. For Advertising majors, this means these courses outside the College must be taken for a grade: STAT 100 (or any of the allowed substitutes for it), ECON 102-ECON 103, BADM 320, and two out of the three courses PSYC 100, SOC 100 and ANTH 103. For all majors, courses taken to fulfill the College's advanced hour requirement (20 hours outside the College in courses numbered 200 and above) also must be taken for traditional letter grades.

- Advertising (p. 463)
- Agricultural Communications (p. 469)
- Journalism (p. 464)
- Media and Cinema Studies (p. 465)
- Cinema Studies (p. 468)

Departments

- Advertising (p. 463)
- Journalism (p. 464)
- Media and Cinema Studies (p. 465)

Advertising

<http://www.media.illinois.edu/advertising>

For the Degree of Bachelor of Science in Advertising

To graduate from the advertising curriculum, a student must meet all general University and College requirements for the degree and must complete the following courses, all of which must be taken for a traditional letter grade:

Required Courses

ADV 150	Introduction to Advertising	3
ADV 281	Advertising Research Methods	3
ADV 283	Content, Contact, Connections	3
ADV 284	Consumer Insight	3
ADV 390	Content Creation	3
ADV 460	Innovation in Advertising	3
ADV 483	Audience Analysis	3
ADV 498	The Sandage Project	3
Total Advertising Core		24
College of Media Electives ¹		12-20
Subtotal in College of Media		36-44

Other Requirements

STAT 100	Statistics ²	3
ECON 102 & ECON 103	Microeconomic Principles and Macroeconomic Principles	6
BADM 320	Principles of Marketing ³	3
Select two of the following:		7-8
PSYC 100	Intro Psych	
SOC 100	Introduction to Sociology	
ANTH 103	Anthro in a Changing World	

¹ All courses offered by or cross-listed with Advertising (ADV), Agricultural Communication (AGCM), Journalism (JOUR), Media and Cinema Studies (MS, CINE, or MACS) or the College of Media (MDIA) count in this total.

² Or another approved basic course or course sequence in statistical methods, which currently include ECON 202, EPSY 280, MATH 161, PSYC 235, and SOC 280). Such courses may, if they qualify, also be credited toward the requirement of advanced hours and General Education courses outside the College.

³ Which may be credited toward the College requirement of advanced hours outside the College.

Journalism

Rich Martin, Department Head

119 Gregory Hall

810 S. Wright Street, Urbana, IL, 61801, 217-333-0709

www.media.illinois.edu/journalism

For the Degree of Bachelor of Science in Journalism

To graduate from the Department of Journalism, a student must meet all general University and College requirements for the degree and must complete the following courses, all of which must be taken for a traditional letter grade and for which all pre-requisites will be enforced:

Core Curriculum

JOUR 200	Introduction to Journalism	3
JOUR 210	Newsgathering Across Platforms	4
JOUR 215	Multimedia Reporting	4
JOUR 311	Media Law	3

Either of two three-course sequences (12 hours minimum)

JOUR 315	Adv Public Affairs Reporting	4
JOUR 320	News Editing	4
JOUR 425	Multimedia Editing and Design	4

OR

JOUR 335	Audio Journalism	4
JOUR 340	Video Reporting & Storytelling	4
JOUR 445	Video Storytelling 2-Producing	4

College of Media Electives

At least three three-hour Journalism courses numbered 200 or above and not cross-listed from other departments. Courses in the sequence not chosen may be used to fulfil this requirement. Additional courses offered by or cross-listed with Advertising (ADV), Agricultural Communications (AGCM), Journalism (JOUR), Media and Cinema Studies (MS, CINE or MACS) or the College of Media (MDIA) count in this total. 10-18

Note: For each hour beyond 44 in the College of Media, the 124 hours required for graduation increases by one.

Hours outside the College of Media (80 hours minimum)

Including at least six hours in each of these seven areas: 80

Economics

Literature

History

Philosophy

Political Science

Sociology or anthropology

Natural science or technology

Plus six additional hours in two of those areas or a total of 12 hours in each of two other departmentally approved areas of specialization.

Courses used to fulfil University General Education requirements or to fulfil requirements for a minor may count toward these requirements.

Courses used to fulfill the College of Media advance outside hours requirement also may count toward these requirements. That requirement calls for:

Not less than 20 hours in courses numbered 200 or above outside and not cross-listed with the College of Media.

At least nine of the 20 hours must be in courses numbered 300 or above.

Media and Cinema Studies

Dr. C. Cole, Department Head

119 Gregory Hall, 810 South Wright Street, Urbana, IL, (217) 333-1549

www.media.illinois.edu/macs/

The Department of Media and Cinema Studies in the College of Media offers a B.S. Degree in Media and Cinema Studies with two concentrations, Media Studies and Cinema Studies. Students from outside the Department or College can earn an undergraduate Minor in Cinema Studies and a graduate Minor in Cinema Studies. College of Media students may not pursue the Minor in Cinema Studies.

Students in the media and cinema studies program develop an understanding of modern communications media and cinema from an interdisciplinary perspective. They explore the theory behind contemporary media and their origins, structures and implications for our society; and they address the history of media and cinema both in the United States and internationally. The development of all mediated forms is considered in light of more general concerns about technology, culture, society, and politics.

For the Degree of Bachelor of Science in Media and Cinema Studies

To graduate from the media and cinema studies curriculum, a student must meet all general University and College requirements for the degree and must complete the following courses:

- Media Studies Concentration (p. 467)
- Cinema Studies Concentration (p. 466)

Minor in Cinema Studies

The Minor in Cinema Studies provides undergraduate students with certain core courses in the discipline while also allowing them the freedom to explore the various approaches to the subject presented by different departments.

The Minor in Cinema Studies requires a minimum of 21 hours distributed over seven courses as follows. At least six hours of advanced (300 or 400) level courses must be included:

MACS 261	Survey of World Cinema I	3
MACS 262	Survey of World Cinema II	3
Select one of the following (Non-US Cinema):		3-4
MACS 207	Indian Cinema in Context	
MACS 419	Russian & East European Film	
MACS 466	Japanese Cinema	
MACS 470	Topics in Italian Cinema	
MACS 490	Ingmar Bergman & Europ Cinema	
MACS 492	New Scandinavian Cinema	
MACS 493	German Cinema I	
ITAL 270	Introduction to Italian Cinema	
ANTH 266	African Film and Society	
Select one of the following (Identity, Culture and Politics):		3
MACS 211	Intro to African-American Film	
MACS 250	Latina/os on the Bronze Screen	
MACS 275	Am Indian and Indigenous Film	
MACS 335	Film, TV, and Gender	
MACS 356	Sex & Gender in Popular Media	
MACS 365	Asian American Media and Film	
MACS 375	Latina/o Media in the US	
MACS 381	Black Women and Film	
MACS 432	Commodifying Difference	
MACS 461	Politics of Popular Culture	
AAS 120	Intro to Asian Am Pop Culture	
ENGL 272	Minority Images in Amer Film	
Select one of the following:		3-4

MACS 264	Economics of the Media	
MACS 317	History of Communication	
MACS 320	Popular Culture	
MACS 331	Media and Democracy	
MACS 351	Social Aspects of Media	
MACS 410	Media Ethics	

Two additional courses on film offered by or cross-listed with MACS, other than those used to fulfill the requirements above. A list of approved courses is maintained by the department. 6-7

Cinema Studies Concentration

MACS 261	Survey of World Cinema I	3
MACS 262	Survey of World Cinema II	3
MACS 361	Film Theory and Criticism	3
Select one of the following (Non-US Cinema):		3-4

MACS 207	Indian Cinema in Context	
MACS 419	Russian & East European Film	
MACS 466	Japanese Cinema	
MACS 470	Topics in Italian Cinema	
MACS 490	Ingmar Bergman & Europ Cinema	
MACS 492	New Scandinavian Cinema	
MACS 493	German Cinema I	
MACS 494	German Cinema II	
ITAL 270	Introduction to Italian Cinema	
ANTH 266	African Film and Society	

Select one of the following (Identity, Culture and Politics): 3

MACS 211	Intro to African-American Film	
MACS 250	Latina/os on the Bronze Screen	
MACS 275	Am Indian and Indigenous Film	
MACS 335	Film, TV, and Gender	
MACS 356	Sex & Gender in Popular Media	
MACS 365	Asian American Media and Film	
MACS 375	Latina/o Media in the US	
MACS 381	Black Women and Film	
MACS 432	Commodifying Difference	
MACS 461	Politics of Popular Culture	
AAS 120	Intro to Asian Am Pop Culture	
ENGL 272	Minority Images in Amer Film	

Sequence Elective Requirements: Two courses selected from the following Media Studies Core Requirements: 6-7

MACS 264	Economics of the Media	
MACS 317	History of Communication	
MACS 320	Popular Culture	
MACS 331	Media and Democracy	
MACS 351	Social Aspects of Media	
MACS 410	Media Ethics	

Four to eight courses from within the College of Media, including all MACS courses not listed or used above. 13-23

Overall Credits in the College of Media 36-44

Required Area of Study or Minor Outside the College. In addition to the 36-44 hours within the College described above, students must complete at least 18 hours in one or two approved areas outside of the College of Media, such as African American studies, American Indian studies, anthropology, art history, Asian American studies, economics, gender and women's studies, history, Latina/o studies, linguistics, literature, non-English languages, philosophy, political science, psychology, regional area studies, communication, or sociology. A minimum of three courses or 9 hours is required in each area if two areas are used. A university-approved minor that requires at least 18 hours may substitute for this requirement. Courses may, if they qualify, also count against the requirement for advanced hours outside the College.

Media Studies Concentration

MACS 264	Economics of the Media	4
MACS 317	History of Communication	3
MACS 320	Popular Culture	3
MACS 351	Social Aspects of Media	3
MACS 410	Media Ethics	3-4

academics.aces.illinois.edu/majors/agcom

For the Degree of Bachelor of Science with a Major in Agricultural Communications

The major in Agricultural Communications is for students wishing to pursue careers as professionals in writing, editing, and publishing; public relations; advertising; radio and television broadcasting; photography; and related activities with an emphasis on the fields of food, agriculture, the environment, and consumer behavior. Concentrations in journalism or advertising allow students to pursue these professional interests. Program requirements in each concentration include the completion of an interdisciplinary minor in Food and Environmental Systems. The College of Media and the College of Agricultural, Consumer and Environmental Sciences jointly offer this curriculum.

A minimum of 126 hours is required for graduation.

General Education Requirements

Agricultural Communications major requirements

Minor in Food and Environmental Systems requirements

Prescribed Courses including Campus General Education

Composition I and Speech

Select one of the following: 6-7

RHET 105 & CMN 101	Writing and Research and Public Speaking (See College Composition I requirement)
-----------------------	---

CMN 111 & CMN 112	Oral & Written Comm I and Oral & Written Comm II
----------------------	---

Advanced Composition

Select from campus approved list. (JOUR 200; AGCM 220). 3-4

Cultural Studies

Select one course from Western culture and one from non-Western/U.S. minority culture from campus approved list. 6

Foreign Language

Coursework at or above the third level is required for graduation.

Quantitative Reasoning I

Select one of the following: 3-5

STAT 100	Statistics (or its equivalent)
----------	--------------------------------

MATH 124	Finite Mathematics
----------	--------------------

MATH 220	Calculus
----------	----------

MATH 221	Calculus I
----------	------------

MATH 234	Calculus for Business I
----------	-------------------------

Quantitative Reasoning II

Select one from campus approved list. 3-4

Natural Sciences and Technology

Physical Science

Select one from the following: 3-4

GEOL 107	Physical Geology

AGCM 430	Comm in Env Social Movements	
Total Hours		56-65

ACES Minor in Food and Environmental Systems Required (p. 80)

Media Concentration

Twenty-one hours from the College of Media in one of two concentrations: advertising or journalism. Courses fulfilling this requirement cannot be used to fill other graduation requirements. 21

Social Work, School of

www.socialwork.illinois.edu

Dean of the School: Dean Wynne Korr
 Director of BSW Program: Brenda Lindsey
 1010 W. Nevada St.
 Urbana, IL 61801
 (217) 244-5246
 E-mail: undergradsocialwork@illinois.edu

Overview of Curriculum and Requirements

The purpose of undergraduate social work education at the School of Social Work is to provide a comprehensive educational experience for students that is grounded in a liberal arts tradition and prepares graduates for excellence in the areas of social work practice, policy, social engagement and leadership.

Upon degree completion, graduates will be prepared for entry into generalist social work practice, advanced standing in graduate social work education, and a multitude of career opportunities. These can include careers in communications, corrections, education, government, health care, human resources, law, non-profit organizations, religious studies, and public service. Obtaining an undergraduate degree in Social Work gives students the opportunity to pursue a License of Social Work (LSW). A BSW degree also makes students eligible to pursue Advanced Standing status in many masters of Social Work (MSW) programs. The advanced standing status enables BSW graduates to receive a MSW in only one year.

The focus of undergraduate curriculum delivery is through a student-centered strengths-based educational model that fosters student understanding by providing a challenging, yet supportive environment of high expectations that encourage the development of well-informed and engaged citizens.

Degree title: Bachelor of Social Work

The social work major prepares practitioners for generalist social work practice with individuals, groups, families and communities. The curriculum requires a minimum of 120 hours for graduation. Minimum required course work in the major equates to 50 course hours of core professional education, including 8 hours for an agency-based field practicum (internship) where students receive additional supervision and training 4 days per week for one semester.

Admission Requirements

The following requirements must be met for consideration for admission into the BSW Program:

- Completion and documentation of a minimum of 50 (fifty) hours of volunteer¹ or paid work experience prior to submission of the BSW application. These hours must be completed by working with or for an underrepresented population or population in need. All volunteer hours must have been completed within 2 calendar years of application date.
- Cumulative minimum GPA 2.5 or higher
- Evidence of strong communication and interpersonal skills
- Evidence of personal attributes that are suitable for the profession of social work
- Successful completion of the application process for professional program entry http://www.socialwork.illinois.edu/future_students/BSW/apply.html.

¹ Volunteer hours can be completed through service learning projects completed for course requirements, as well as, through volunteer experiences with community organizations, registered student organizations, Greek organization affiliation, etc. The office of Volunteer Programs at the University <http://union.illinois.edu/ovp/index.html> is a good resource for ideas on how to get involved.

Applications for both fall and spring are accepted. Applications are accepted on a rolling admissions basis.

- Optometry (p. 478)
- Pharmacy (p. 479)
- Physical Therapy (p. 480)
- Veterinary Medicine (p. 481)

Dentistry

Dentistry is a career requiring a professional degree. Students are required to complete certain undergraduate prerequisite courses in order to be eligible to apply to dental school. It is essential for students to research and know the requirements for admission to each of the dental schools to which they apply. These requirements are listed in the Official Guide to Dental School, published by the American Dental Education Association (ADEA). This resource can be viewed at The Career Center. Additional information about preparation for dental school can be found at www.adea.org (<http://www.adea.org>).

Pre-Health Advising at The Career Center

Admission into dental school is highly competitive. The Career Center provides pre-professional advising for students who are interested in pursuing dentistry as a career. This includes discussion of prerequisites and expectations of dental schools, preparation in and outside the classroom, details of the application process, and characteristics of competitive applicants. The Center also coordinates the visits of deans and admissions officers to the campus to provide information about various health professions.

Contact The Career Center at (217) 333-0820 or online at www.careercenter.illinois.edu.

Academic Advising

Since students who are interested in the health professions are expected to enter degree programs of their choice, their academic advising is provided by the departmental offices of the curricula or majors that they have selected. Academic Advisors can assist students in making sure they are making appropriate progress towards completing their degree at Illinois.

The following chart represents the MINIMUM course requirements to prepare for dental school. Colleges of Dentistry may require additional coursework and/or expect students to go beyond minimum preparation. Students are strongly encouraged to research their specific schools of interest!

Composition I requirement		3
Advanced Composition requirement		3
General Biology with laboratory		8-10

Nursing

Preprofessional Requirements for Nursing

The University offers a degree program leading to the bachelor of science in nursing for students with two or more years of selected general education courses and for registered nurses who meet a specific set of requirements. Students transferring to the College of Nursing are encouraged to have completed 57 hours of courses, including an Upper Division course. The upper division course requirement can be fulfilled after admission into the College of Nursing.

The program is made up of two phases: two preprofessional years at UIUC or at any other accredited college or university and the professional phase which is offered at the Chicago and Urbana sites of the University of Illinois at Chicago College of Nursing. Students in the BSN program are required to complete 63 semester hours of nursing courses, which may be completed in 4 semesters (two academic years). There is also an option for students who are RN's to complete their BSN online in as little as 16 months. More information about this online option can be found at online.uic.edu/nurses (<http://online.uic.edu/nurses>).

Admission to the professional phase is on recommendation of the Admissions Committee of the College of Nursing after completion of the following requirements with a cumulative gpa of 2.75 (A=4.0) and a gpa of 2.5 for the 5 required science courses. A minimum grade of C is required in all prerequisite courses.

For additional information about the programs in nursing, write to the University of Illinois at Chicago College of Nursing-Urbana Regional Program, 408 S. Goodwin Avenue, Urbana, IL 61801, or email to conurbana@illinois.edu.

Web address for most current program requirements: www.uic.edu/nursing (<http://www.uic.edu/nursing>)

Prerequisite General Education Requirements

RHET 105	Writing and Research (or equivalent coursework, ACT/AP credit is NOT sufficient)	4
MCB 244 & MCB 245	Human Anatomy & Physiology I and Human Anat & Physiol Lab I	5
MCB 246 & MCB 247	Human Anatomy & Physiology II and Human Anat & Physiol Lab II	5
MCB 100	Introductory Microbiology	3
CHEM 102 & CHEM 103	General Chemistry I and General Chemistry Lab I	4
CHEM 104 & CHEM 105	General Chemistry II and General Chemistry Lab II (equivalent courses at other institutions may not suffice, check with the College of Nursing)	4
FSHN 120	Contemporary Nutrition	3
HDFS 105	Intro to Human Development	3

General Education Courses:

Understanding the Individual and Society

Understanding US Society

Understanding Creative Arts

Understanding the Past

Understanding World Cultures

Upper division course in social science, humanities, or natural sciences (may be completed after admission to the College of Nursing)

Transfer guides for most community colleges are available from the College of Nursing or online at www.uic.edu (<http://www.uic.edu>).

Students may obtain a guide to UIUC courses that meet Nursing GEN ED's from the College of Nursing.

Occupational Therapy

Preprofessional Requirements for Occupational Therapy

Occupational Therapy is a career requiring a professional degree. Students are required to complete certain undergraduate prerequisite courses in order to be eligible to apply to occupational therapy school. It is essential for students to research and know the requirements for admission to each of the occupational therapy schools to which they apply. Additional information including a complete list of all occupational therapy programs is available at www.aota.com (<http://www.aota.com>).

Pre-Health Advising at The Career Center

Admission into occupational therapy programs is highly competitive. The Career Center provides pre-professional advising for students who are interested in pursuing occupational therapy as a career. This includes discussion of prerequisites and expectations of occupational therapy schools, preparation in and outside the classroom, details of the application process, and characteristics of competitive applicants. The Center also coordinates the visits of deans and admissions officers to the campus to provide information about various health professions.

Veterinary Medicine

Preprofessional Requirements for Veterinary Medicine

For information regarding the College of Veterinary Medicine at the University of Illinois at Urbana-Champaign contact the Office of the Associate Dean for Academic and Students Affairs (217)-265-0380 for academic advising questions or refer to the Office's website at <http://vetmed.illinois.edu/asa/>.

Specific admissions questions may be answered by reference to: <http://publish.illinois.edu/vetmed-admissions/>. More individualized or specific admissions questions can be addressed to admissions@vetmed.illinois.edu.

Students wishing to complete the preprofessional requirements for veterinary medicine may do so within a variety of curricula. Science course prerequisites are similar to those required for most post-graduate medical professions curricula.

Because of the competition for admission, students should strongly consider completing a bachelor's degree. In recent years, there have been approximately eight applicants for each space available in the entering class for the D.V.M. (Doctor of Veterinary Medicine) program. The mean grade point average of recently admitted students has been 3.5.

Teacher Education

505 E. Green Street, Suite 203

Champaign, IL 61820

Phone: (217) 333-7195

www.cote.illinois.edu

The Council on Teacher Education formulates, modifies, implements, and monitors compliance with policies related to the education of future educators. The Council also facilitates communication and promotes collaboration among all participants involved in the preparation and continuing professional development of educators. The Council is the designated unit responsible for the coordination of teacher, school support personnel, and administrator education curricula at the Urbana campus and serves as the liaison between the campus and state educator licensure and program approval authorities.

Six colleges and two schools of the University of Illinois at Urbana-Champaign offer degree programs in teacher, school support personnel, and administrator education: the Colleges of Agricultural, Consumer and Environmental Sciences; Applied Health Sciences; Education; Fine and Applied Arts; Liberal Arts and Sciences; and the Graduate College. The list of teacher education curricula can be found at the end of this section.

Candidates may consult their teacher education advisers or the Council for additional information about academic regulations and other policies affecting teacher education. Consult the Executive Director of the Council for information about the Grievance Policy and Procedures for Students Enrolled in Educator Preparation Programs under the purview of the Council on Teacher Education.

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education (ISBE) or the Illinois General Assembly.

Requirements

Admissions

Applicants to educator preparation programs must meet the admission requirements of the colleges and departments offering the chosen curricula. Council policy mandates candidates pass an ISBE approved test of basic skills before they may be admitted to an educator preparation program. With final approval from ISBE, candidates may use an ACT or SAT score to meet the test of basic skills if it meets ISBE requirements for substitution. See www.cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf for information regarding specific requirements.

Applicants are advised that certain felony convictions, enumerated in Articles 10-21.9 and 21B-80 of the School Code of Illinois (<http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=1005&ChapAct=105%2C%2A0ILCS&160;5/&ChapterID=17&ChapterName=SCHOOLS&ActName=School+Code.html>), prohibit licensure or employment in public schools. Questions pertaining to this matter should be addressed to the Council.

Continuation in Teacher Education

To be eligible for continuation in teacher education, candidates must satisfy all requirements of the applicable Common Assessment Plan (CAP), which includes maintaining University of Illinois at Urbana-Champaign and overall grade point averages of 2.5 (A = 4.0) or higher. In addition, candidates must meet the content area and professional education grade-point requirements specific to their programs. The full text of the three Common Assessment Plans is available on the Council website (<http://www.cote.illinois.edu/about/professional/cap.html>). The Council on Teacher Education reviews each candidate's academic progress after the fall and spring semesters. Candidates who do not meet the criteria of the appropriate CAP will receive a warning letter from the Council advising them that their continuation in the program, entry into student teaching, and receiving a recommendation for licensure from the University are at risk. Candidates will be directed to their college deans for more information. Candidates may be dropped from licensure programs by the Council if they fail to meet the criteria of the appropriate CAP after receiving an initial warning letter.

Teaching effectiveness is influenced not only by academic proficiency, but also by the dispositions and professional behaviors of the candidate. Therefore, faculty members take these characteristics into account as they evaluate candidates' progress in the program. Teaching effectiveness can also be influenced by the candidate's health. For this reason, the University provides counseling and medical services for all students. A candidate wishing additional information about these services may call or visit the Council office.

Because it is essential that counseling and medical services be offered as soon as the need becomes apparent, teacher education advisers and faculty members are asked to recommend for assistance or examination any candidate about whom they feel concern. A candidate who is recommended for assistance or examination will receive a written request to make an appointment to discuss the situation. It is a requirement of the Council on Teacher Education that a candidate who receives such a request must respond. Failure to do so will jeopardize the candidate's continuation in teacher education. During the appointment, the candidate will be informed of the counseling (<http://www.counselingcenter.illinois.edu>) and medical services (<http://www.mckinley.illinois.edu>) available at the University. The candidate's use of these services is usually optional. In exceptional cases, however, the Council may require a candidate to satisfactorily complete a mental health or physical examination with one of the campus services. Candidates who wish to continue in teacher education must comply with such referrals.

Student Teaching

State law mandates candidates pass the appropriate content area test prior to student teaching. Students who have not passed the appropriate content area test will not be permitted to student teach. Student teaching application forms are available in the college clinical experiences office that houses each program. (Candidates may obtain referrals to the appropriate office by contacting the Council.) A candidate seeking placement in student teaching should contact the appropriate program's clinical experiences office no later than October 1 of the academic year preceding the desired placement to determine departmental deadlines and meeting dates. Departments may set earlier deadlines. Candidates who apply after their departments' deadlines cannot be guaranteed a student teaching assignment during the next academic year. A candidate who will not be on campus during the fall semester, but who expects to enroll in educational practice (student teaching) during the next school year, should secure an application form from his or her program's clinical experiences office before leaving campus. A candidate who has submitted an application will receive a student teaching assignment pending verification that he or she has completed all requirements of the appropriate Common Assessment Plan.

Only those candidates officially registered in teacher education curricula are eligible for student teaching placements. The Council reserves the right to deny student teaching placement to candidates who have not met all requirements of the appropriate Common Assessment Plan. Candidates may also be denied a student teaching placement for health reasons.

Candidates in teacher education should anticipate and plan for student teaching assignments. For most candidates, additional expense will be incurred during the semester in which student teaching is scheduled. Candidates cannot be guaranteed assignments in local schools. Student teaching is a full-time commitment on the part of teacher candidates. Teacher candidates should not plan to take additional coursework outside their program during student teaching, nor should they plan to be employed. School districts have the right to not accept a candidate and therefore, the Council cannot guarantee each candidate a placement. However, each program will exhaust every effort to seek a placement for each candidate.

Candidates are expected to complete all field experiences, including student teaching, at the University of Illinois at Urbana-Champaign. A candidate who wishes to complete student teaching through another university, yet receive a University of Illinois at Urbana-Champaign degree and recommendation for licensure, must secure the prior approval of his or her adviser, clinical experiences program coordinator, college, and the Council on Teacher Education via petition. The petition must be supported by verification from the other university that it will accept the candidate as a student teacher and will comply with all Council on Teacher Education requirements. Approvals of such arrangements are rare, and candidates should expect to incur additional costs. Consult the Council for additional information.

Teacher Licensure

A candidate who completes all of the coursework and other requirements in a program approved for purposes of licensure by the Illinois State Board of Education is entitled to receive the recommendation of the University for the appropriate license and endorsement(s), provided the candidate has met all of the requirements of the appropriate Common Assessment Plan and has passed all licensure tests and assessments required by the State of Illinois. In addition, all professional education and content-area coursework that forms part of an application for licensure, endorsement, or approval must have been passed with a grade no lower than "C" or equivalent in order to be counted towards fulfillment of the applicable requirements. CR/NC and proficiency credit may not be used toward licensure, endorsement, or approvals. However, AP credit may be used.

In some instances a candidate may be denied a recommendation for licensure but be granted a degree by his or her college. A candidate who believes that the recommendation for licensure has been withheld unjustly may seek redress through the grievance policy established by the Council on Teacher Education.

General Education

Candidates for licensure are required to complete coursework that includes the theoretical and practical understanding generally expected of a liberally educated person. General education includes developing knowledge related to the arts, communications, history, literature, mathematics, philosophy, sciences, and the social studies from multicultural and global perspectives. This requirement is satisfied by the University of Illinois general education pattern incorporated into all undergraduate teacher education programs.

Licensure Tests

All candidates for licensure as teachers, school administrators, and school support personnel must pass tests mandated by the Illinois State Board of Education as a condition for licensure. Illinois law requires that applicants to all educator preparation programs pass a test in basic skills (reading, writing, grammar, and mathematics) and a separate test in their major area. All candidates in programs leading to teaching must also pass an Assessment of Professional Teaching. In addition, teacher education candidates who receive their license on or after September 1, 2015 must also pass a teacher performance assessment (edTPA). Candidates for Learning Behavior Specialist I licensure must pass a fourth test: Special Education General Curriculum.

State law requires prospective candidates for licensure as school administrators or school support personnel pass a test of basic skills, as determined by the State, if the Illinois Test of Basic Skills was not passed previously. If the basic skill tests was not already taken and passed, the Test of Academic Proficiency must be passed prior to admission to the educator preparation program. In addition, candidates must pass the appropriate content-area test. With final approval from ISBE, candidates may use an ACT or SAT score to meet the test of basic skills if it meets ISBE requirements for substitution. See www.cote.illinois.edu/certification/documents/act_procedures_for_admission.pdf for information regarding specific requirements.

Time Limit on Licensure

Because licensure requirements are subject to change at any time as a result of new mandates from the Illinois State Board of Education and the Illinois General Assembly, the University is unable to guarantee a recommendation for licensure to anyone who does not apply for licensure immediately upon completion of licensure requirements. A candidate completing an approved program is strongly encouraged to apply for licensure during his or her last term on campus and claim said license on the Educator Licensure Information System (ELIS) once it has been entitled. Applications for licensure are available on the candidate's student portal or in the Council office. Failure to claim a license through the Educator Licensure Information System once it has been entitled could result in additional requirements should candidate seek to claim license at a later date.

Background Investigation of Applicants for Field Placement and Employment

State law mandates that all candidates for public school licensure in programs under the purview of the Council on Teacher Education complete a criminal background check and checks of the Statewide Sex Offender Database and Statewide Child Murderer and Violent Offender Against Youth Database before they may be placed in schools. Candidates are responsible for all fees connected with this procedure.

Final decisions regarding the placement of candidates in schools are made in agreement between the relevant department/college/program and the school/district.

The criminal background check is typically conducted at the time a candidate enters the program and before student teaching or internship.

Each applicant for employment in a school district in Illinois is required to authorize the employing school district to initiate a criminal background check which will include a request for fingerprints. A school district may employ a person only after a background check has been initiated and may not knowingly employ a person who has been convicted of a felony or of attempting to commit certain offenses enumerated in The School Code of Illinois. This criminal background check is in addition to that required for field placements at the University of Illinois at Urbana-Champaign.

Curricula

A candidate seeking licensure must complete the requirements of both his or her chosen curriculum, Council on Teacher Education requirements, and all additional State mandated requirements. Teacher education, school support personnel, and administrator curricula and the colleges and departments that offer them are listed below. All curricula have been approved by the Illinois State Board of Education.

Candidates are advised that licensure requirements may be altered at any time by the Illinois State Board of Education or the legislature. In such cases, candidates may be compelled to satisfy the new requirements to qualify for the University's recommendation for licensure.

College of Agriculture, Consumer and Environmental Sciences (p. 12)

- Agriculture¹

College of Applied Health Sciences (p. 83)

- Physical Education¹

College of Education (p. 116)

- Early Childhood Education (Includes Early Childhood Special Education Approval)
- Elementary Education²
- Learning Behavior Specialist I¹
- Teacher Education Minor in Secondary School Teaching²

College of Fine and Applied Arts (p. 231)

- Music Education¹
- Visual Arts Education¹

College of Liberal Arts and Sciences (p. 281)

- English Language Arts
- Foreign Language: Chinese (Mandarin)¹
- Foreign Language: French¹
- Foreign Language: German¹
- Foreign Language: Japanese¹
- Foreign Language: Latin¹

- Foreign Language: Spanish¹
- Mathematics
- Science: Biology
- Science: Chemistry
- Science: Earth and Space Science
- Science: Physics
- Social Science: History

Graduate College

Graduate-level licensure programs are offered in the areas listed below. For additional information, contact the Council on Teacher Education or departmental office indicated.

Agricultural Education¹

- College of Agricultural, Consumer and Environmental Science Office of Academic Programs

Director of Special Education

- Department of Special Education

Early Childhood Education

- Department of Curriculum and Instruction

Elementary Education²

- Department of Curriculum and Instruction

Foreign Language: Latin¹

- Department of Classics

Foreign Language: Spanish¹

- Department of Spanish, Italian, and Portuguese

Learning Behavior Specialist I¹

- Department of Special Education

Learning Behavior Specialist II¹

- (Options: Curriculum Adaptation, Behavior Interventions, Multiple Disabilities, Transition Specialist)
- Department of Special Education

Library Information Specialist¹

- Graduate School of Library and Information Science

Music¹

- School of Music

Principal

- Department of Education Policy, Organization and Leadership

School Social Worker

- School of Social Work

Secondary Education (English Language Arts, Mathematics, Sciences, Social Science: History)³

- Department of Curriculum and Instruction

Speech-Language Pathologist: Nonteaching

- Department of Speech and Hearing Science

Superintendent

- Department of Education Policy, Organization and Leadership

Teacher Leader

- Department of Education Policy, Organization and Leadership

- ¹ Individuals completing these programs who wish to be able to teach departmentalized subjects in grades five through eight must complete additional coursework and receive the endorsement prior to January 1, 2018. Contact the Council on Teacher Education for additional information.
- ² Individuals entering this program Fall 2014 will be entitled for grades 1-6 upon completion of all requirements. Individuals who were admitted Fall 2013 or earlier will be entitled for K-9 upon completion of all requirements if their program is completed by September 1, 2017 and a license is claimed prior to September 1, 2018. Candidates in this category who wish to be able to teach departmentalized subjects in grades five through eight must complete additional coursework and receive the endorsement prior to January 1, 2018. Contact the Council on Teacher Education for additional information.
- ³ This minor is a required component of the teaching option within the following Science and Letters majors in the College of Liberal Arts and Sciences: biology, chemistry, English, geology, history, mathematics, and physics. It is available only to students registered in these programs.

Teacher Education Minors

- English as a second language
- Mathematics: Grades 6-8 (must be completed and endorsement received prior to January 1, 2018.)
- Mathematics: Grades 9-12

Candidates should be aware that the state recognizes teaching fields that are not listed above. Candidates may obtain subsequent teaching endorsements for any fields for which they satisfy the state minimum requirements. Contact the Council on Teacher Education for additional information regarding the endorsement fields available and the qualifications for each. Endorsement requirements (<http://www.cote.illinois.edu/certification/Endorsements.html>) are also listed on the Council on Teacher Education Web site. (<http://www.ed.uiuc.edu/cte/cert>) Further questions may be directed to the Council on Teacher Education.

Minor in Informatics

Contact info-minor@illinois.edu, or 333-2322, if you have any questions.

The Minor in Informatics will teach you to become a better creator and user of computing technology in your major area and to think critically about new technology's role in society. No other field has, and will have, a greater influence on humanity in our generation.

Informatics studies the design, application, use and impact of information technology. The ability to handle vast amounts of information cheaply has changed the way we live. Advances in computer power, the World Wide Web, search engines, social networking, mobile technology, GIS, and large-scale collaborative initiatives, to name a few, have revolutionized the way knowledge is created and shares. Information has become a ubiquitous, indispensable component of our everyday lives, as we strive to manage information, create knowledge, and make decisions.

The Informatics Minor signals that you have concrete expertise in computing and Information Technology (IT) and understand their human implications.

Students from any major interested in applying technology or studying its affect on humanity are encouraged to apply, preferably by the end of sophomore year. Although there are no prerequisites, basic familiarity with computers is expected.

To receive the Informatics Minor students must complete three core INFO courses plus three upper-level classes with sufficient informatics or computational content from an approve list of courses offered from a wide range of disciplines. The core courses are INFO 102, INFO 103, and INFO 202. INFO 102 is a broad introduction to computer science and provides an understanding of the nature, capabilities, and limitations of IT. INFO 103 is for non-CS majors and uses the Python language to teach elementary principles of object-oriented programming. Areas of application include graphics and multimedia, game design, programming in a 3D environment, computer art, and poetry. INFO 202 explores the ways in which IT has and is transforming society and how these technologies affect a range of social, political, and economic issues from the individual to societal levels. Some substitutions can be made. The list of upper-level courses that count toward the minor is here: <http://www.informatics.illinois.edu/display/infominor/Upper-level+informatics-related+courses>. This list is dynamic as new classes are added.

Select one of the following:

4

INFO 102	Little Bits to Big Ideas
CS 105	Intro Computing: Non-Tech
ECE 101	Exploring Digital Info Technol

Select one of the following:

3

INFO 103	Introduction to Programming
CS 101	Intro Computing: Engrg & Sci
CS 125	Intro to Computer Science
ECE 190	

INFO 202	Social Aspects Info Tech	3
----------	--------------------------	---

Upper-level courses from an Informatics-approved list of courses from a variety of disciplines, all with sufficient informatics or computational content 9-12

Visit <http://www.informatics.illinois.edu/display/infominor> for information about the Informatics Minor. This minor is offered by the Illinois Informatics Institute, <http://www.informatics.illinois.edu>, 333-4930.

Minor in Global Labor Studies

Global Labor Studies analyzes the interplay of class, gender, race, and labor organizations in the workplace, the economy, and the political arena from a multi-disciplinary and global perspective. A minor in Global Labor Studies requires 18 credit hours in LER Global Labor Studies Courses.

A minimum grade point average of 2.75 is required for completion of the minor and all courses required for the minor must be taken for a grade.

Email: illinoislabored@illinois.edu

LER 100	Introduction to Labor Studies	3
---------	-------------------------------	---

LER 130	Intro Labr Wrkng Class History	3
---------	--------------------------------	---

Minimum of six hours 300- or 400-level courses.	6
---	---

Two courses that focus on international or comparative labor issues.	6
--	---

Total Hours	18
-------------	----

Graduate

The Graduate College offers more than 130 master's programs and more than 90 doctoral programs in a wide range of disciplinary fields. Some of these degrees programs are offered in part or entirely online.

Concentrations

A graduate concentration constitutes a coherent program of study requiring additional breadth or considerable depth of knowledge. A concentration may refer to a subfield within a discipline, or to an interdepartmental and/or interdisciplinary area of knowledge. Concentrations appear on academic transcripts.

Some concentrations (major-based) are only open to a student majoring in the offering department. Other concentrations (floating) are open to students in a broad range of majors. Both types are listed here, with the eligible programs listed below each concentration.

Accountancy (p. 500)

- Business Administration (M.B.A. (p. 581) and M.S. (p. 571))
- Finance (M.S.) (p. 706)
- Technology Management (M.S.) (p. 571)

Acting

- Theatre (M.F.A.) (p. 935)

Actuarial Science

- Applied Mathematics (M.S.) (p. 796)

Advocacy, Leadership and Social Change

- Social Work (M.S.W. on campus) (p. 898)

African American Studies (p. 511)

- African Studies (M.A.) (p. 514)
- Educational Policy Studies (M.A. and Ph.D.) (p. 657)
- Educational Psychology (all, except online degrees) (p. 684)
- History (all) (p. 734)
- Political Science (all) (p. 865)
- Sociology (all) (p. 908)

Analytics

- Statistics (M.S.) (p. 929)

Animal Sciences

- Bioinformatics (M.S.) (p. 531)

Applied Statistics

- Statistics (M.S.) (p. 929)

Astrochemistry (p. 548)

- Astronomy (Ph.D.) (p. 552)
- Chemistry (Ph.D.) (p. 596)

Bioengineering

- Bioinformatics (M.S.) (p. 562)

Business and Public Policy (p. 709)

- Accountancy (M.A.S., M.S.) (p. 499)
- Business Administration (M.S. (p. 571))
- Finance (M.S.) (p. 706)
- Technology Management (M.S.) (p. 571)

Chemical and Biomolecular Engineering

- Bioinformatics (M.S.) (p. 591)

Children, Youth and Family Services

- Social Work (M.S.W. on campus and extramural) (p. 898)

Choral Music

- Music (M.Mus. and A.Mus.D.) (p. 819)

Civic Leadership

- Political Science (M.A.) (p. 868)

Crafts

- Art and Design (M.F.A.) (p. 547)

Crop Sciences

- Bioinformatics (M.S.) (p. 632)

Computer Science

- Bioinformatics (M.S.) (p. 625)

Community College Teaching and Learning

- Human Resource Education (Ed.M. online only) (p. 676)

Corporate Governance and International Business (p. 573)

- Accountancy (M.A.S., M.S.) (p. 499)
- Business Administration (M.B.A. (p. 581) and M.S. (p. 571))
- Finance (M.S.) (p. 706)

Design and Technology

- Theatre (M.F.A.) (p. 936)

Digital Libraries

- Library and Information Science (C.A.S. on-campus and online) (p. 782)

Ecology, Ethology & Evolution

- Biology (M.S., Ph.D.) (p. 529)

Educational Administration and Leadership

- Educational Organization and Leadership (Ed.M., M.S., C.A.S., Ed.D., Ph.D.) (p. 657)

Energy Systems

- Engineering (M.Eng.) (p. 609)

English

- Secondary Education (Ed.M.) (p. 644)

Finance (p. 708)

- Accountancy (M.A.S.) (p. 501)

Food Science

- Food Science and Human Nutrition (M.S., Ph.D.) (p. 712)

Global Studies in Education

- Educational Policy Studies (Ed.M., M.A., Ph.D.) (p. 657)

Graphic Design

- Art and Design (M.F.A.) (p. 547)

Major: Accountancy

Degrees Offered: M.A.S., M.S., Ph.D.

Graduate Concentration: Business and Public Policy (p. 709) (M.A.S., M.S.), Corporate Governance and International Business (p. 573) (M.A.S., M.S.), Finance (p. 709) (M.A.S. only), Information Technology and Control (p. 574) (M.A.S., M.S.), Supply Chain Management (p. 574) (M.A.S., M.S.), Taxation (M.A.S. only)

Graduate Minor: Accountancy

Graduate Concentration: Accountancy

Off Campus Program: Major: Taxation

Degrees Offered: M.S.

Graduate Degree Programs

The Department of Accountancy offers on campus graduate programs leading to the degrees of Master of Accounting Science (M.A.S.), Master of Science in Accountancy (M.S.A.), and Doctor of Philosophy in Accountancy. The M.A.S., M.S.A. and Ph.D. degrees are offered on the Urbana-Champaign campus. We also offer the Master of Science in Taxation (M.S.T.) at the Illini Center in Chicago. The master's degree requirements can be completed in one year. The Ph.D. degree takes approximately four to five years of full-time study and research.

Admission

All applicants for the M.S.A. and Ph.D. programs, domestic or international, are required to take the Graduate Management Admission Test (GMAT). This test should be taken early enough to ensure that the results will be available to the department before action on admission. The admission requirements of the Graduate College also apply, including prior academic performance and references. In addition, all international applicants must take the Internet-Based Test of English as a Foreign Language (TOEFL iBT) or the International English Language Testing System (IELTS) test. The M.S.T. offered in Chicago does not require the GMAT for applicants who meet the two-year minimum work experience requirement. Applications for admission to the doctoral program, supported by three letters of recommendation, must be approved by the department admissions committee, which may require an oral or a written examination.

- Master of Accounting Science (M.A.S.) (p. 501)
- Master of Accounting Science (M.A.S.), Finance Concentration (p. 501)
- Master of Accounting Science (M.A.S.), Taxation Concentration (p. 502)
- Master of Science in Accountancy (p. 502)
- Master of Science in Taxation (p. 503)

Doctor of Philosophy

The student's doctoral program is determined in consultation with a faculty advisory committee. The student's evolving plans for the doctoral thesis serve as a guide in planning the program. Program coursework is comprised of two general categories: core studies and advanced studies within an area of specialization (i.e., a supporting field). The latter coursework is tailored to facilitate the student's dissertation.

In addition, candidates must pass a written accountancy core examination and both oral preliminary and oral final examinations on the doctoral thesis. In the accountancy core examination, candidates must demonstrate a thorough knowledge of research methods and accounting theory; a general acquaintance with the subject matter of the variety addressed within accountancy doctoral core studies; and proficiency in the required areas of economic theory, quantitative methods, behavioral science and financial economics.

Requirements

Graduate study, at least 16 hours of which are in a supporting field (e.g., economics, finance, psychology). Students generally take at least one graduate elective course in finance and at least one graduate elective course in psychology. They take additional courses in their supporting field.

24

A two-course introduction to mathematical statistics and probability theory

Microeconomics at the graduate level (ECON 500), and another economics course at the graduate level from an approved listing		8
ACCY 599	Thesis Research	32
Total Hours		96

Other Requirements ¹

Other requirements may overlap

Minimum Hours Required Within the Unit:	56
Minimum 500-level Hours Required Overall:	60
Students must present a research paper at the Accountancy Research Forum no later than one year after the successful completion of the Accountancy Core Examination	
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the accountancy Ph.D. program.	
Masters Degree Required for Admission to PhD?	No
Qualifying Exam Required (Accountancy Core Examination)	Yes
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's program information online (<https://business.illinois.edu/accountancy/programs/phd>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Graduate Minor in Accountancy

The minor in Accountancy seeks to develop business leaders who understand the role of accountancy and accounting in the conduct of business and the allocation of resources within society.

This minor requires twelve graduate hours of coursework. Admission to the minor requires an application to the Department and admission to one of the M.S. programs in the College of Business or a graduate program in a related discipline approved by the Department. Admission is limited and acceptance is on a competitive basis.

Note: Students within the major cannot minor in the same program.

ACCY 501	Accounting Analysis I	4
ACCY 502	Accounting Analysis II	4
ACCY 503	Managerial Accounting	4
or ACCY 517	Financial Statement Analysis	
or substitute graduate accountancy courses approved by a program advisor		
Total Hours		12

Other Requirements ¹

In addition to the minor requirements, students must also complete the requirements of their major degree.

Please contact your department for more information regarding the addition of a minor to your program of study.

¹ For additional details and requirements refer to the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Graduate Concentration in Accountancy

This concentration is available to students in the following degree programs:

- Master of Science in Finance (MSF)
- Master of Science in Technology Management (MSTM)
- Master of Business Administration (MBA)
- Master of Science in Business Administration (MSBA)

ACCY 501	Accounting Analysis I	4
ACCY 502	Accounting Analysis II	4
ACCY 503	Managerial Accounting	4
or ACCY 517	Financial Statement Analysis	
Or, substitute graduate accountancy courses approved by an Accountancy MSA program advisor.		
Total Hours		12

Other Requirements

In addition to the concentration requirements, students must also complete the requirements of their major degree.

Master of Accounting Science (M.A.S.) in Accountancy

The M.A.S. program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from the University of Illinois. Graduate concentrations in finance (p. 709), corporate governance and international business (p. 573), information technology and control (p. 574), and business and public policy (p. 709) are also available to M.A.S. students. The Department also offers a graduate concentration in taxation designed to provide students with sufficient knowledge and skills to begin a career in taxation. The prerequisite for admission is admission to the Master of Accounting Science program. Admission to the tax concentration is limited and acceptance is on a competitive basis. Admission to the concentration requires application to the Department no later than February 1 for fall admission.

Finance Concentration A concentration in Finance may be completed with this degree by competing the concentration requirements (p. 708) within the electives allowed below.

ACCY 511	Risk Measurement/Reporting I	8
& ACCY 512	and Risk Measurement/Reporting II	
Electives in either accountancy or non-accountancy		8
Accountancy electives		8
Electives in non-accountancy		8
Total Hours		32

Other Requirements ¹

Other requirements may overlap

A concentration is not required.

Minimum 500-level Hours Required Overall: 20

24 of the 32 total graduate hours must be earned while enrolled in the Graduate College at the Urbana Campus.

The electives, both accountancy and non-accountancy, shall form a coherent program of study, approved by a program advisor.

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's program information online (<https://business.illinois.edu/accountancy/programs/mas>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Master of Accounting Science (M.A.S.) in Accountancy, Taxation Concentration

The M.A.S. program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from the University of Illinois. Graduate minors in finance (<http://provost.illinois.edu/ProgramsOfStudy/2014/fall/programs/graduate/finance.html>), corporate governance and international business (http://provost.illinois.edu/ProgramsOfStudy/2014/fall/programs/graduate/bus_admin_ms.html), and information technology and control (http://provost.illinois.edu/ProgramsOfStudy/2014/fall/programs/graduate/bus_admin_ms.html) are also available to M.A.S. students. The Department also offers a graduate concentration in taxation designed to provide students with sufficient knowledge and skills to begin a career in taxation. The prerequisite for admission is admission to the Master of Accounting Science program. Admission to the tax concentration is limited and acceptance is on a competitive basis. Admission to the concentration requires application to the Department no later than February 1 for fall admission.

ACCY 511 & ACCY 512	Risk Measurement/Reporting I and Risk Measurement/Reporting II	8
Electives in either accountancy or non-accountancy		8
Electives in non-accountancy		4
Graduate hours of taxation		12
Total Hours		32

Other Requirements ¹

Other requirements may overlap

A concentration is not required.

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's program information online (<https://business.illinois.edu/accountancy/programs/mas>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Master of Science in Accountancy

The M.S. in Accountancy (M.S.A) program is a one-year program designed to meet the professional accounting career development needs of individuals seeking to pursue a career in accountancy. The program offers options both for students who did not major in accountancy as an undergraduate and for students with an undergraduate degree in accountancy.

The MSA program consists of at least 20 hours in graduate-level accounting courses, together with 12 hours of appropriate graduate electives, at least 4 hours of which must be in non-accountancy graduate courses.

For students who do not have an undergraduate degree in accountancy, the 20 accountancy hours are ACCY 501 through ACCY 505 (each of the five courses awards 4 hours). With the approval of a program advisor, students that have an accountancy undergraduate degree with appropriate course work may substitute other graduate accountancy courses for some or all of these courses. For example, advanced accountancy students may substitute ACCY 511, ACCY 512 and ACCY 560 for ACCY 501, ACCY 502 and ACCY 503.

The MSA program begins in June each year with Summer Session II.

Requirements

ACCY 501	Accounting Analysis I	4
ACCY 502	Accounting Analysis II	4
ACCY 503	Managerial Accounting	4
ACCY 504	Auditing	4
ACCY 505	Federal Taxation	4
or substitute graduate accountancy courses approved by a program advisor		
Graduate electives with at least 4 hours credit in a non-accountancy graduate course		12
Total Hours		32

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall: 20 (of the total 32 required)

Students shall earn at least 24 of the 32 total graduate hours while enrolled in the Graduate College at Urbana-Champaign.

Electives shall form a coherent program of study approved by a program advisor.

Minimum MSA program coursework cumulative GPA, both by semester and program overall 3.0

Minimum MSA accountancy coursework cumulative GPA, both by semester and program overall 3.0

An optional CPA Review course (ACCY 398) is available. Neither this CPA Review course nor the grade count toward the minimum MSA graduation requirements.

¹ For additional details and requirements refer to the department's program information online (<https://business.illinois.edu/accountancy/programs/msa>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Master of Science in Taxation

The Master of Science in Taxation (M.S.T) is an executive-style degree offered only at the Illini Center in Chicago. The M.S.T. is a one-year program for students with at least two years of work experience. The program begins in May and meets weekly on Friday afternoons and all day Saturday. Students applying for admission should have acquired a background in business and an accounting undergraduate major from an accredited college or university. Graduation requires 36 graduate hours of study that consists of twelve required courses delivered in three thirteen-week semesters.

ACCY 551	Corporate Income Taxation	4
ACCY 552	Partnership Income Taxation	4
ACCY 554	International Taxation	4
ACCY 555	Inc Tx Acctg & Multistate Tx	4
ACCY 558	Taxation of Closely-Held Bus.	4
ACCY 559	Tax Policy & Procedures	4
ACCY 556 & ACCY 560	Tax Research and Information in Value Creation	3
ACCY 557	Advanced Topics in Taxation	5
ACCY 561	Taxes and Business Strategy	4
Total Hours		36

Other Requirements ¹

Minimum 500-level Hours Required Overall: 36

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's program information online (<https://business.illinois.edu/mst>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Advertising

Patrick Vargas, Director of Graduate Studies in Advertising

320 Gregory Hall
810 S. Wright Street
Urbana, IL 61801, (217) 333-1602
media.illinois.edu/advertising

pvargas@illinois.edu

Major: Advertising
Degrees Offered: MS

Graduate Degree Program

The Department of Advertising offers a graduate program leading to the Master of Science degree. The Master of Science degree in Advertising is designed to prepare leaders in the industry or for an advanced degree in advertising education. The preparatory nature of the curriculum provides the theoretical foundations, methodological tools, and practical applications to prepare students for an advertising career or for an advanced degree program. The Department of Advertising at the University of Illinois is the oldest such program in the country. We are grounded in the principles of our founder and "father of advertising education" Charles H. Sandage, that students must understand the theory of advertising as well as the practice. His goal was to enable students to become leaders and problem solvers. We honor that vision by creating a comprehensive, cohesive curriculum that provides foundational courses but also allow for flexibility of interest through electives within and outside the college.

Admission

Admission to graduate study in advertising requires completion of the requirements for a bachelor's degree in an accredited institution of recognized standing. Applicants are required to submit results from either the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT) and are required to upload to the application a short essay indicating why they want to pursue graduate work in advertising. The Department of Advertising requires non-native English-speaking applicants to show evidence of English proficiency, which is provided by a satisfactory score on the Test of English as a Foreign Language (TOEFL). Minimum scores for TOEFL (international students only): 253 (CBT), 104 (IBT), 607 (PBT), and IELTS greater than 6.5. Three letters of recommendation are required. Transcripts from all universities that you have attended must be submitted (note: can be uploaded in your application). The required method of applying is online through the Graduate College Web site, and the Graduate College admission requirements also apply, see <http://www.grad.illinois.edu/admissions/apply/requirements>. Completed applications are due February 1, and applications are accepted for fall admission only.

Faculty Research Interests

Faculty profiles (<http://media.illinois.edu/faculty/advertising.html>) are available at the Advertising Department's Web site.

Master of Science in Advertising

Students are required to complete 36 hours towards the degree, including a professional project or thesis requirement. Full-time status requires 12 hours per semester, making it possible to complete the degree in three semesters. Admission is only granted for fall semester.

A graduate course listing for Advertising students is available online.

M.B.A. Joint Degree Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the [joint program requirements](#) and contact the M.B.A. program and their major department office for more information.

Aerospace Engineering

Philippe Geubelle
306 Talbot Laboratory
104 South Wright Street
Urbana, IL 61801, (217) 333-2651
aerospace.illinois.edu

Director of Graduate Programs: John Lambros

E-mail: aerospace@illinois.edu

Major: Aerospace Engineering
Degrees Offered: M.S. and Ph.D.

Online Program: Aerospace Engineering. M.S.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Aerospace Engineering and Doctor of Medicine (M.D. through the Medical Scholars Program (<http://www.med.illinois.edu/msp>))

Graduate Degree Programs

The Department of Aerospace Engineering (AE) offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. The AE graduate program provides students with a strong background in engineering and applied science while placing emphasis on aircraft and spaceflight engineering. Students may major in one of the following general areas: aerodynamics, astrodynamics, combustion and propulsion, control systems, dynamical systems, fluid mechanics, structural mechanics, and materials. Opportunity also exists for specializing in

1. computational science and engineering,
2. energy and sustainability engineering, and
3. systems engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (<http://cse.illinois.edu/students/graduate-program>) the Energy and Sustainability Engineering (EaSE) Option (<http://ease.illinois.edu>) and the Systems Engineering Option (SE) (<http://aerospace.illinois.edu/graduate-programs/aerospace-systems-engineering>).

The Medical Scholars Program (<http://www.med.illinois.edu/msp>) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Aerospace Engineering. Additional information about the Aerospace Engineering graduate program may be found on the department's graduate program Web site (<http://www.aerospace.illinois.edu>).

Admission

The Department of Aerospace Engineering accepts applications for admission to the graduate program for both fall and spring semesters. The application deadline for the fall semester for the Ph.D. and M.S. with Thesis programs and for full consideration for funding opportunities is January 15. The application deadline for the MS Non-thesis and the MS Non-thesis Systems Engineering option for the fall semester is June 1. The deadline for spring admission for all programs is October 8.

Typically, the prerequisite for graduate study is the equivalent of the B.S. in aerospace engineering (<http://aerospace.illinois.edu/undergraduate-programs>); however, graduates of curricula leading to degrees in other fields of engineering, the physical sciences, or mathematics may also be admitted to advanced study. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, having a GPA higher than the minimum is no guarantee of admission. Scores on the Graduate Record Examination (GRE) (<http://ets.org>) general test are required of all applicants. There are no minimum score requirements.

Applicants to the Aerospace Engineering graduate program are asked to complete a supplemental form that will capture additional information about their specific interests. Applicants receive an email after submitting the online application which contains the link to the supplemental form. Applicants may select up to three areas from the following list:

- aerodynamics
- aeroelasticity
- astrodynamics
- combustion
- computational mechanics
- control and estimation
- dynamical systems
- experimental mechanics

- fluid mechanics
- information technology
- materials
- propulsion
- robotics
- structural mechanics-structural dynamics
- systems engineering

All applicants whose native language is not English are required to submit a minimum TOEFL (<http://www.toefl.org>) score of 103 (iBT), 257 (CBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) (<http://www.ielts.org>) academic exam scores of 7.0 overall and 6.0 in all subsections. No exemptions from the TOEFL are granted by the department. Full admission status (<http://grad.illinois.edu/admissions/instructions/04c>) is granted for those meeting the minimum requirements and having taken the TOEFL or IELTS since the scores required for admission to Aerospace Engineering are above the minimum scores demonstrating an acceptable level of English language proficiency. Applicants wishing to be considered for teaching assistantships must score 24 on the SPEAK portion of the TOEFL exam.

Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Aerospace Engineering and the College of Medicine. An application to the Medical Scholars Program will also serve as the application to the Aerospace Engineering graduate program. Further information on this program is available by contacting the Medical Scholars Program (125 Medical Sciences Building, (217)-333-8146, mspo@illinois.edu).

Full information on admission requirements and how to apply, see the department's graduate programs Web site (<http://aerospace.illinois.edu>).

Medical Scholars Program

Students in the Medical Scholars program must meet the specific requirements for both the medical (<http://med.illinois.edu/mdphd>) and graduate degrees. On average, students take eight years to complete both degrees. The first year of the combined program is typically spent meeting requirements of the Aerospace Engineering graduate degree.

Graduate Teaching Experience

M.S. students are not required to hold a teaching assistantship. Ph.D. students are required to hold a 25% teaching assistantship for at least one semester in order to meet the requirements for the Department of Aerospace Engineering doctoral program. Information about teaching assistantships can be found in the department's Website (<http://aerospace.illinois.edu>).

Faculty Research Interests

Research activities in the AE Department encompass a wide range of problem areas in aerospace engineering and related engineering disciplines cited in the Graduate Programs section above and more fully described at the department's research area Web site (<http://aerospace.illinois.edu/research>).

Centers, Programs, and Institutes

Several nationally renowned interdisciplinary centers exist within the College of Engineering in which Aerospace Engineering faculty members along with many other campus faculty engage in research. A list of these, along with links to full descriptions, appears at the department's interdisciplinary centers Web site (<http://aerospace.illinois.edu/research/interdisciplinary-centers>). Among these are the Beckman Institute for Advanced Science and Technology, the Center for the Simulation of Advanced Rockets (CSTAR), the Coordinated Science Laboratory (CSL), the Micro and Nanotechnology Laboratory, and the National Center for Supercomputing Applications (NCSA).

Facilities and Resources

Members of the Aerospace Engineering Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department's research laboratories Web site (<http://aerospace.illinois.edu/research/research-laboratories>).

Financial Aid

Students in the M.S. non-thesis option are not provided funding by the department. Financial aid for graduate students in thesis graduate programs is available in the form of fellowships, teaching and research assistantships, and tuition waivers. A block grant from the National Aeronautics and Space Administration supports a multidisciplinary research and training program. Qualified candidates are considered for financial support upon application. In addition, graduate students making satisfactory progress toward their degrees may also be considered for financial support. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (<http://www.grad.illinois.edu/admissions/taengprof.htm>) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on

the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

Master of Science in Aerospace Engineering

Thesis Option

AE 599	Thesis Research (min-max applied toward the degree)	8
AE 590	Seminar (registration of 0 hours every term while in residence)	0
Aerospace Engineering breadth requirement: one course in each of two areas (http://aerospace.illinois.edu/graduate-programs/graduate-degree-programs/breadth-and-mathematics-requirements)		6-8
One mathematics course from an approved list (http://aerospace.illinois.edu/graduate-programs/graduate-degree-programs/breadth-and-mathematics-requirements)		3-4
Elective courses chosen in consultation with an advisor (subject to Other Requirements and Conditions below)		12-15
Total Hours		32

Other Requirements and Conditions ¹

Other Requirements and Conditions may overlap

	A minimum of 16 hours of AE course work at the 400-level and above. (May include up to 8 hours of AE 599.)
	A minimum of 12 500-level credit hours overall applied toward the degree, with 8 hours being AE courses. (May include up to 4 hours of AE 599.)
	No hours of AE 597 (or other independent study) may be applied in this option.
	Attendance at all Aerospace Engineering AE 590 seminars each semester while on campus.
Minimum GPA:	3.0
	A departmental petition is required to change from the thesis to the non-thesis option.

¹ For additional details and requirements refer to the department's Website (<http://aerospace.illinois.edu>) and the Graduate College Handbook (<http://grad.illinois.edu/gradhandbook>).

Non-Thesis Option

AE 590	Seminar (registration for 0 hours every term while in residence)	
Aerospace Engineering breadth requirement: one course from each of the three areas (http://aerospace.illinois.edu/graduate-programs/graduate-degree-programs/breadth-and-mathematics-requirements)		9-12
One mathematics course from an approved list (http://aerospace.illinois.edu/graduate-programs/graduate-degree-programs/breadth-and-mathematics-requirements)		3-4
Elective courses chosen in consultation with an advisor (subject to Other Requirements and Conditions below)		16-20
Total Hours		32

Other Requirements and Conditions ¹

Other Requirements and Conditions may overlap

	A minimum of 16 hours of AE course work at the 400-level and above.
	A minimum of 12 500-level credit hours overall applied toward the degree, with 8 hours being AE courses.
	A maximum of 4 hours of AE 597 (or other independent study) may be applied toward the elective course work requirement.
	Attendance at all Aerospace Engineering AE 590 seminars each semester while on campus.
Minimum GPA:	3.0
	Generally, students holding a research assistantship will not be allowed in the non-thesis option.

A departmental petition is required to change from the thesis to the non-thesis option and vice-versa.

- ¹ For additional details and requirements refer to the department's Website (<http://aerospace.illinois.edu>) and the Graduate College Handbook (<http://grad.illinois.edu/gradhandbook>).

Doctor of Philosophy

AE 599	Thesis Research (min-max applied toward degree)	32
AE 590	Seminar (continuous registration through the 4th semester after the qualifying exam for 0 hours)	0
One advanced mathematics course from an approved list (3-4 hours) (http://aerospace.illinois.edu/graduate-programs/graduate-degree-programs/breadth-and-mathematics-requirements)		3-4
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below).		28-29
Total Hours		64

Other Requirements and Conditions ¹

A minimum of 16 hours of AE course credit overall at the 500 level, beyond the bachelor's degree.

A minimum of 24 credit hours overall at the 500 level, beyond the bachelor's degree.

A maximum of 8 hours of AE 597 (or other independent study) may be applied toward the elective course work requirement.

A 25% or more teaching assistantship for at least one semester.

A Master's degree is not required for admission to the Ph.D. program, but the Master's level requirements must be met (32 hours).

Qualifying exam²

Preliminary exam

Final exam or dissertation defense

Dissertation deposit

Minimum GPA: 3.0

- ¹ For additional details and requirements refer to the department's Website (<http://aerospace.illinois.edu>) and the Graduate College Handbook (<http://grad.illinois.edu/gradhandbook>).

- ² Qualifying Exam information (<http://aerospace.illinois.edu/graduate-programs/graduate-degree-programs/phd-program/#Quals>)

Direct Entry

In addition to the traditional Ph.D., a "Direct" Ph.D. is available. This program allows a student with a bachelor's degree to go directly into the Ph.D. program without writing a M.S. thesis. For the Direct Ph.D., a B.S. student submits a graduate application. Generally, admission to the Direct Ph.D. program is granted for GPA equal to 3.75 and higher. Students currently in the M.S. program may petition the AE Graduate Policy Committee for entry into the Direct Ph.D. program before the end of the second semester after enrollment. The Direct Ph.D. requires students to complete both the M.S. and Ph.D.

Online Program

The degree requirements are the same as for the on-campus non-thesis M.S. program (p. 508)—32 hours of course work—and the degree awarded to online students is the same degree awarded to resident students. Online students have five years to complete the program.

Students should develop a course program plan in consultation with their advisor. Suggested program tracts are provided for each of the three main technical divisions in the department:

1. Aerodynamics, Fluid Mechanics, Combustion and Propulsion (AFMCP);
2. Astrodynamics, Controls and Dynamical Systems (ACDS); and
3. Structural Mechanics and Materials (SMM).

The Aerospace Systems Engineering option is also available online.

Joint M.B.A. Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements (p. 584) ([link to MBA POS](#)) and contact the M.B.A. program and their major department office for more information.

African American Studies

Ronald Bailey

1201 West Nevada

Urbana, IL 61801, (217) 333-7781, (217) 244-4809

www.afro.illinois.edu/

E-mail: aasrp@illinois.edu

Graduate Concentration: African American Studies

Participating Programs: African Studies (M.A.), Educational Policy Studies (M.A. and Ph.D.), Educational Psychology (all, except online degrees), History (all degrees), Political Science (all degrees), Sociology (all degrees)

Graduate Minor: African American Studies

Graduate Minor in African American Studies

The Department of African American Studies also offers a graduate minor in African American Studies. The minor is designed to complement graduate work in a variety of disciplines. Students wishing to take advantage of the minor must be in good standing, and must apply for acceptance into the minor.

AFRO 500	Core Probs African-Am Studies	4
Elective hours from approved departmental list, 4 of which must be at the 500 level		8
Total Hours		12

Other Requirements ¹

In addition to the minor requirements, students must also complete the requirements of their major degree.

Hours counted toward completion of a minor may not also be applied toward any other transcribed credential.

¹ For additional details and requirements refer to the department's program information online (<http://www.afro.illinois.edu/education/gradminor>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Graduate Concentration in African American Studies

The Department of African American Studies (DAAS) offers an interdisciplinary graduate concentration in African American Studies. This concentration is designed to complement doctoral work in the social sciences or humanities; applicants must demonstrate an interest in African American Studies and be in good standing in one of the following doctoral programs:

- History
- Educational Policy Studies
- Educational Psychology
- African Studies
- Sociology
- Political Science

Those wishing to apply for the concentration must submit three letters of recommendation, as well as a brief personal essay describing their background and career plans and explaining how a concentration in African American Studies enhances their primary program of study. Students must be accepted into the concentration. Students also would be expected to have a faculty member affiliated with the department on their doctoral committee. For admission to the concentration or for more information, please contact DAAS. A student's intent to pursue a graduate concentration must be approved by the student's adviser and graduate program director.

AFRO 500	Core Probs African-Am Studies	4
AFRO 597	Problems in African-Am Studies	4
AFRO 598	Res Sem in African-Am Studies	4
Elective hours from approved departmental list		12
Total Hours		24

Other Requirements ¹

In addition to the graduate concentration requirements, students must also complete the requirements of their major degree.

- ¹ *For additional details and requirements refer to the department's program information online (<http://www.afro.illinois.edu/education/gradminor>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).*

Graduate Minor: African Studies

Joint Degree Program: African Studies and Library and Information Science
Degrees offered: M.A. and M.S.

Graduate Degree Programs

The Center for African Studies administers a two-year program of area studies courses and intensive African language instruction leading to a Master of Arts degree designed to give students an interdisciplinary perspective on the study of Africa. The program provides both language and area training for three constituencies of students: those seeking to match area expertise with professional training; those proceeding to disciplinary-based doctoral work; and those for whom the degree would stand on its own. For more information about the Center's graduate programs, please visit: www.afrst.illinois.edu/academics/grad.html.

Admissions

The Center for African Studies admits students in the fall term only. Applicants to the Masters degree in African Studies should hold at least a Bachelor's degree from an accredited college or university in the United States or from a recognized institution of higher education abroad. All graduate college admission requirements also apply. The Center does not require the Graduate Record Examination (GRE) scores, but it is highly recommended for students applying for the Foreign Language and Area Studies (FLAS) fellowship. Successful applicants should have a grade point average of at least 3.0 (4.0=A) calculated for the last 60 semester hours of undergraduate course work. International applicants or applicants whose native language is not English must have a minimum TOEFL score of 550 on the paper-based test (PBT) -- 213 on the computer-based test (CBT) or 79 on the internet-based test (IBT). For more information about the Center's admission requirements and procedures, and deadlines please visit www.afrst.illinois.edu/academics/grad/apply/. Students interested in the minor must be in good standing in a graduate program, have permission from the major program, and demonstrate an interest in African Studies. For more information, contact the Center.

Faculty Research

The Center for African Studies' has both core and affiliate faculty represented in over 34 units across campus encompassing various disciplines in the humanities and social sciences, as well as in professional schools. The faculty is the backbone of the Center and constitutes the most critical element of the graduate experience. They excel in teaching at all levels and have a strong commitment to innovative research. Both Center faculty and teaching assistants have received numerous college and campus teaching awards. For more information about the Center faculty, please visit: www.afrst.illinois.edu/about/faculty.html

Facilities and Resources

Established since 1970, the Center for African Studies is one the largest and most dynamic African National resource Centers in the country. The Center promotes excellence in research and teaching on Africa in all disciplines. The Center also exists to increase and disseminate knowledge about Africa to the larger community through various outreach activities to colleges, schools, community groups and businesses. At a time when the university of Illinois is expanding its international dimension, the Center for African Studies is dedicated to promoting a vibrant African Studies program and to fostering an understanding of Africa and African peoples through research, teaching and various Africa-related programs and events. The Center organizes a wide range of activities including conferences, lectures, film festivals, art exhibits, language institutes, workshops, and symposia. In addition, the Center regularly hosts visitors from the United States and abroad, namely Africa, and is strongly committed to developing linkages with individuals and institutions based in the African continent.

The Africana Library is among the finest in the world. The collection covers all African countries and includes materials in more than 150 African languages. The collections are interdisciplinary, in all formats, and concentrated mainly in the humanities, social sciences, and agriculture. The Library

has an extraordinary collection of primary source materials for Africana, and has acquired approximately 100 printed sources and 85 microform collections (over 10,000 pieces) covering all areas of Africa. The collection also includes 120,000 pages of Arabic manuscripts and thousands of government documents. African materials in European and African languages at the University of Illinois Libraries include more than 180,000 books (including 15,000 in Arabic, and 3,000 in Bamana, Hausa, Lingala, Swahili, and Zulu); 2,800 journals; 46,000 maps; 10,000 microforms; over 250 videotapes, 37 newspapers, and several CD-ROMs.

The African studies bibliographer runs the Africana library and teaches LIS 530, one of the Center's core courses and plays a key role in the Center's graduate program. For further information about the Africana library, please visit: www.afrst.illinois.edu/resources/africana.html.

Financial Aid

The Center for African Studies is a Title VI African National Resource Center funded by the U.S. Department of Education. Each year the center is generally able to assist a limited number of graduate students in area studies through awards of Foreign Language and Area Studies (FLAS) Fellowships. The Center evaluates and ranks incoming students on the basis on academic promise. Funding usually covers the fall and spring semesters. The center cannot guarantee multiple years of funding, but considers it a priority to provide financial support to eligible students until completion of their program. African Studies MA Students can also apply for the FLAS fellowship through the Center for Global Studies. The Center for African Studies has graduate assistantships which include a tuition and fee waiver, but they are very limited. Students may be eligible to compete for other fellowships on campus. Students are also encouraged to check with the graduate fellowships office (<https://www.grad.illinois.edu/fellowship>) for funding opportunities. Students in the joint program that do not hold a FLAS fellowship are eligible for, but not guaranteed, fellowship or assistantship support in the semesters in which they are enrolled in GSLIS. Any assistantship awarded to these students provides a waiver of the base in-state tuition and service fee as well as a stipend. Non-Illinois residents must pay the difference between in- and out-of-state tuition. More information about funding opportunities is available at: www.afrst.illinois.edu/grants/index.html.

Master of Arts in African Studies

Thesis Option

LIS 530	Info Needs of Part Communities (Section M)	4
AFST 515	Practicum in African Studies (recommended)	2
AFST 522	Development of African Studies	4
Elective area studies courses, drawn from at least three different academic units		16-18
Independent Study (4 max applied toward degree)		4
Language Requirement: Must study or demonstrate proficiency in a language indigenous to Africa at the advanced (third-year) level, but these hours cannot count toward the degree requirements.		0
AFST 599	Thesis Research ((8 max applied toward degree))	8
Total Hours		34

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall: 16

Minimum GPA: 3.25

¹ For additional details and requirements refer to the department's Graduate Programs (<http://www.afrst.illinois.edu/academics/grad/masters>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

M.S. African Studies and M.S. Library and Information Science

This joint master's degree includes a program of language and area studies courses leading to an interdisciplinary Master of Arts degree in African Studies as well as a program of study leading to the Master of Science in Library and Information Science. The joint degree matches area expertise with professional education, and prepares students for professional careers in all types of information organizations, including libraries. Students will enroll in LIS their first semester and thereafter be enrolled as students in African Studies.

Thesis Option

LIS 501	Info Org and Access	4
LIS 530	Info Needs of Part Communities (Section M)	4
LIS 590	Advanced Problems in LIS (Section IL)	4
LIS 502	Libraries Info and Society	2 OR 4

Graduate Minor in African Studies

The interdisciplinary graduate minor in African Studies promotes training in African Studies for masters and doctoral students in other disciplines interested in complementing their degree program with an interdisciplinary perspective on Africa.

Note: Students within the major cannot minor in the same program.

AFST 522 Development of African Studies 4

Electives hours that relate to Africa that are outside the student's major department. At least four hours must be at the 500 level. 8

A minimum of four semesters of college level study of an African language. NOTE: Hours for language cannot be applied toward minor requirements.

Total Hours 12

Other Requirements ¹

If the student's thesis deals in whole or in part with Africa, it is strongly recommended that a faculty member from the Center be a formal member of the student's committee.

In addition to the minor requirements, students must also complete the requirements of their major degree.

Hours counted toward completion of a minor may not also be applied toward any other transcribed credential.

¹ For additional details and requirements refer to the department's *Graduate Programs* (<http://www.afrst.illinois.edu/academics/grad>) and the *Graduate College Handbook* (<http://www.grad.illinois.edu/gradhandbook>).

Agricultural Education

Richard Clark, Associate Director of Agricultural Education Programs

174 Bevier Hall
905 South Goodwin Avenue
Urbana, IL 61801, (217) 333-3165
aged.illinois.edu/

E-mail: aces-aged@illinois.edu

Major: Agricultural Education

Degrees offered: M.S.

Online and Off-Campus Programs: Agricultural Education

Degrees offered: M.S.

Graduate Degree Programs

The M.S. in Agricultural Education is a professional degree for training community and classroom based educators to address psychological, educational, and research issues as they pertain to teaching and learning in and about the agricultural, life, and environmental sciences. Students may choose among the teacher education option (teaching certification, non-thesis), applied research (non-certification, thesis) option, the program development (non-certification, non-thesis) option, and the online option. Students completing the teacher education option will be eligible for Illinois teacher certification in agricultural education for grades 9-12.

Admission

We are looking for highly motivated students with strong academic records. Students with backgrounds in education, behavioral or social sciences are especially encouraged to apply. The minimum grade-point average for admission is 3.0 (A = 4.0). Applicants for the online/off-campus program are not required to take the Graduate Record Examination (GRE), however applicants for the on-campus options must take the GRE. As a guideline, GRE scores should be greater than 500 for the quantitative and verbal tests and 4.0 for analytical writing, though the Admissions Committee may admit candidates with lower scores who demonstrate compelling strengths in other areas. International applicants from non-English-speaking countries must have official TOEFL scores of at least 575 (written version) or 233 (computer-based version) to be eligible for admission. Our application deadline for the on-campus program is January 15 for possible admission the following fall semester. Applications for the online program are accepted March 15, June 15, and November 15 for possible admission the following semester.

In addition to meeting the above criteria, applicants to the teacher education option in the Master of Science program in agricultural education must pass the Illinois Certification Testing System test of Basic Skills test prior to admission. If taking this examination prior to admission presents substantial hardship (e.g., the applicant is from another state), the applicant should contact the director of the agricultural education graduate program to discuss the possibility of a conditional admission. Students conditionally admitted must pass the examination by the end of the first semester of enrollment. Each applicant's undergraduate transcript will be evaluated for completion of general education courses required for certification by the Illinois State Board of Education. Students with deficiencies may be admitted with the stipulation that these be met before completion of the master's program.

Financial Aid

We are committed to funding all of our students who are making timely progress. The duration and amount of our commitment varies by program. Funding may include fellowships, research assistantships, and/or teaching assistantships. These opportunities typically include stipends and tuition waivers. In some cases, fees are also waived. All applicants are automatically considered for all department funding opportunities; there is no separate application process. Federal and state financial aid is completely separate from the support provided by our department. For information regarding federal and state financial aid, please refer to www.osfa.illinois.edu/.

Minimum 500-level Hours Required Overall: 12, 8 must be in the unit

Minimum GPA: 2.75

- ¹ Requirement may be waived if taken as an undergraduate at UIUC. If waived, student may substitute this credit requirement with an agricultural education or technical subject matter elective.
- ² Students may take up to four credit hours in agricultural education to fulfill the technical subject matter course requirements. This is only recommended for students completing a thesis (AGED 599 credits) or for students who desire to take an agriculture content course for teachers (i.e. AGED 500).
- ³ The applied research option requires the completion of a thesis, and the program development and online options require the completion of a project in the area of agricultural education, broadly defined, and submission of a research/professional paper.
- ⁴ For additional details and requirements refer to the department's Graduate Program Information (<http://aged.illinois.edu/grad/reqs>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Online Program

Agricultural Education can be pursued as an online degree. Please refer to aged.illinois.edu/online.php for more information.

 Illinois PSM: psmdegree@illinois.edu

Major: Agricultural Production
 Degrees Offered: M.S.
 Graduate Concentration: Professional Science Master's (M.S. only)

Graduate Degree Programs

The College of Agricultural, Consumer and Environmental Sciences (ACES) offers graduate work leading to the Master of Science degree with a Major in Agricultural Production and Concentration in Professional Science Master's (PSM). Fields of specialization within this interdisciplinary program include Food Animal Production, Crop Production, and Sustainable Production Systems. In addition to the rigorous scientific training in the area of agricultural production, instruction is provided in applied business knowledge and skills. This program is designed for those who seek careers in a science-based setting with significant managerial and leadership responsibilities.

Admission

Candidates for admission to the M.S. and Ph.D. programs must have a bachelor's degree from an accredited institution equivalent to those from the University of Illinois at Urbana-Champaign. A grade point average of 3.0 or higher (A = 4.0) for the last 60 hours of undergraduate work and for any graduate study is required for admission. Graduate Record Examination (GRE) scores are required of all applicants and the minimum acceptable Test of English as a Foreign Language (TOEFL) score is 590 on the paper-based test or 243 on the computer-based test. Applications are only accepted for the fall semester. Transfer credit may not be applied.

Financial Aid

Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted.

Master of Science in Agricultural Production, Professional Science Master's Concentration

ACES 501	Advanced Bioenergy Topics (twice)	4
28 hours of coursework required from departmental approved list in any ONE of the three specialty areas (Food Animal Production, Crop Production, Sustainable Production Systems), with a minimum of 8-hours required at the 500-level		28
Business courses prescribed by the Illinois PSM program		10
PSM 501	PSM Industry Seminar I	0
PSM 502	PSM Industry Seminar II	0
PSM 503	PSM Industry Seminar III	0
PSM 555	PSM Internship	0
Total Hours		42

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall: 12

Minimum GPA: 2.75

¹ For additional details and requirements for all degrees, please refer to the program's Graduate Degree Requirements (<http://www.psm.illinois.edu/prospectivestudents/programs/agripro.html>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Agricultural and Biological Engineering

Head of the Department: K.C. Ting
 Director of Graduate Studies: Y. Zhang
 338 Agricultural Engineering Sciences Building
 1304 West Pennsylvania Avenue

 Department Website: abe.illinois.edu
 E-mail: abe@illinois.edu

Major: Agricultural and Biological Engineering
 Degrees offered: M.S. and Ph.D.

Major: Technical Systems Management
 Degrees offered: M.S.
 Graduate Concentration: Professional Science Master's

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Agricultural and Biological Engineering and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Agricultural and Biological Engineering offers a graduate degree program which is at the forefront of the application of engineering principles to solve problems of agricultural production, utilization, environmental control, and biological systems and to improve the quality of life. Students may concentrate study in one of the faculty research interest areas listed below. Supporting course work includes: mathematics; computer science; statistics; engineering mechanics; chemical, civil, electrical, and mechanical engineering; animal science; crop sciences; food science; and other appropriate fields. Opportunity also exists for specializing in

1. computational science and engineering and
2. energy and sustainability engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (<http://cse.illinois.edu/students/graduate-program>) and the Energy and Sustainability Engineering (EaSE) Option (<http://ease.illinois.edu>)

The Medical Scholars Program (<http://med.illinois.edu/mdphd>) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Agricultural and Biological Engineering.

Admission

Admission requirements for either master's program include completion of an undergraduate program equivalent to the Agricultural and Biological Engineering (ABE) curriculum (in the case of the ABE M.S.) or the Technical Systems Management (TSM) curriculum (in the case of the TSM M.S.) with at least a 3.0 grade point average (A = 4.0) for the last two years of undergraduate course work. Applicants must submit Graduate Record Examination (GRE) scores.

Admission to the Ph.D. program is limited to individuals who have demonstrated exceptional ability through outstanding performance in obtaining a Master of Science degree and/or through a high degree of technical and professional accomplishment. Candidates must also satisfy entrance requirements for the M.S. degree program.

All applicants whose native language is not English must submit a minimum TOEFL (<http://www.toefl.org>) score of 88 (iBT), 230 (CBT) or 570 (PBT); or minimum International English Language Testing System (IELTS) (<http://www.ielts.org>) academic exam scores of 6.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (<http://grad.illinois.edu/admissions/instructions/04c>) are met. For those taking the TOEFL or IELTS, full admission status (<http://grad.illinois.edu/admissions/instructions/04c>) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status (<http://grad.illinois.edu/admissions/instructions/04c>) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (<http://linguistics.illinois.edu/students/esl/guidelines>) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Agricultural and Biological Engineering and the College of Medicine. An application to the Medical Scholars Program will also serve as the application to the Agricultural and Biological Engineering graduate program. Further information on this program is available by contacting the Medical Scholars Program (125 Medical Sciences Building, (217) 333-8146, mspo@illinois.edu).

Medical Scholars Program

Students in the Medical Scholars program must meet the specific requirements for both the medical (<https://www.med.illinois.edu/mdphd>) and graduate degrees. On average, students take eight years to complete both degrees. The first year of the combined program is typically spent meeting requirements of the Agricultural and Biological Engineering graduate degree.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program. For details of expectations, see the department's Graduate Handbook (http://abe.illinois.edu/grad_programs/handbook).

Faculty Research Interests

Current research interests of the faculty include off-road equipment engineering (robotics and machinery automation, remote sensing and precision agriculture, machinery management systems, pesticide application technology, engines and biofuels); soil and water resources (hydrology, erosion and sediment transport, water management, wetlands, and water quality); bioenvironmental engineering (building environment and energy conservation, air quality, renewable energy, biomass to bioenergy conversion, structural analysis and facility design, building materials evaluation, environmental control and ergonomic design for plant, animal, and human housing systems and facilities); food and bioprocess engineering (engineering properties of foods, physical properties of biological products, grain drying, grain quality evaluation, dry-grind corn processing, wet and dry milling, modified bioprocesses for improved co-products, fuel and chemicals, fermentation, and transport phenomenon in biological materials); or electronic and electrical systems (biosensors and controls, energy systems, machine vision, near-infrared spectroscopy applications, bionanotechnology, microfabricated devices, bioconjugation techniques, transcriptional control, modeling life support systems, and multiscale biological processes). For more details, visit the department's graduate program Web site. (http://abe.illinois.edu/grad_programs)

Financial Aid

Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted. For all other students, fellowships, supported by University, College of Agricultural, Consumer and Environmental Sciences, and College of Engineering funds, are available on a competitive basis. A limited number of assistantships, providing both teaching and research experience, are often available on a half-time basis. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (<http://grad.illinois.edu/admissions/taengprof.htm>) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

- Master of Science in Agricultural and Biological Engineering (p. 522)
- Master of Science in Technical Systems Management (p. 523)
- Master of Science in Technical Systems Management, Professional Science Masters Concentration (p. 524)

Doctor of Philosophy in Agricultural and Biological Engineering

ABE 594	Graduate Seminar (0 hours registration every term while in residence)	0
ABE 501 & ABE 502	Graduate Research I and Graduate Research II (unless taken during MS)	0-2
One MATH course beyond differential equations from an approved list (http://abe.illinois.edu/grad_programs/grad_requirements)		3-4
One course in statistical design and analysis from an approved list (http://abe.illinois.edu/grad_programs/grad_requirements) ¹		3-5
One course in instrumentation and measurement from an approved list (http://abe.illinois.edu/grad_programs/grad_requirements)		3-5
One 500-level course (taken for at least 3 credit hours) in an area of specialization – chosen in consultation with advisor		3-5
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below)		11-20
ABE 599	Thesis Research (min-max applied toward degree)	32
Total Hours		64

Other Requirements ¹

Other Requirements and Conditions may overlap

A maximum of 4 hours of ABE 597 (or other independent study) may be applied toward the elective course work requirement.

Teaching experience determined in consultation with advisor with guidance provided by the department's Graduate Handbook.

	The minimum program GPA is 3.0.
	A Masters degree is required for admission to the Ph.D. program.
Ph.D. exam and dissertation requirements:	
	Qualifying exam
	Preliminary exam
	Final Exam or dissertation defense
	dissertation deposit

¹ For additional details and requirements for all degrees, please refer to the program's Graduate Degree Requirements (<http://www.psm.illinois.edu/prospectivestudents/programs/agripro.html>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Master of Science in Agricultural and Biological Engineering

Thesis Option

ABE 599	Thesis Research (min-max applied toward the degree)	8
ABE 594	Graduate Seminar (registration for 0 hours every term while in residence)	0
One MATH course beyond differential equations from an approved list (http://abe.illinois.edu/grad_programs/grad_requirements)		3-4

Agricultural and Consumer Economics

Head of the Department: Paul N. Ellinger

326 Mumford Hall, MC-710

1301 West Gregory Drive

Urbana, IL 61801

www.ace.illinois.edu

(217) 333-1810

Fax: (217) 333-5538

Director of Graduate Studies: Amy Ando

E-mail: ace-grad@illinois.edu

Major: Agricultural and Applied Economics

Degrees offered: M.S. and Ph.D.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Agricultural and Applied Economics and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Agricultural and Consumer Economics (ACE) offers courses of study that lead to the Master of Science and the Doctor of Philosophy degrees. Applicants with a baccalaureate degree are initially admitted to the M.S. program. Students who fulfill specific requirements in the first year of the M.S. program may request transfer into the Ph.D. program.

Admission

Graduate College requirements apply, including a 3.0 (A = 4.0) GPA for the last two years of undergraduate coursework and any graduate work completed. International applicants whose native language is not English must have a Test of English as a Foreign Language (TOEFL iBT) score of at least 88 (230 computer-based and 570 paper-based) or an International English Language Testing System (IELTS) academic examination overall score of at least 6.5 with a minimum sub-section score of 6 in each of the four modules (speaking, listening, writing, and reading). Graduate Record Examination (GRE) general test scores are required for candidates seeking financial aid and are requested for all applicants. Applicants to the Ph.D. program are requested to provide a sample of their academic writing. Students having an inadequate background in theory or quantitative methods will be asked to take additional coursework to prepare for graduate study. An applicant with a master's degree in an appropriate discipline will be considered for the Ph.D. degree. Students may commence study in either semester, but initial enrollment in fall semester is preferable.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Agricultural and Applied Economics. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program and is strongly recommended for those intending to pursue an academic career.

Faculty Research Interests

The mission of the Department of Agricultural and Consumer Economics is to improve the economic and environmental well being of producers, consumers, and families. Drawing on economics, business, and law, the department analyzes issues related to individuals and families, agriculture and natural resources, and food — all ranging in scope from local to global. The department pursues its mission through rigorous baccalaureate, master's, and doctoral curricula, through research that advances knowledge and solves problems, and through public service.

Financial Aid

Graduate fellowships, assistantships, and tuition and fee waivers are awarded on a competitive basis.

Fellowships. The department offers fellowships from internal resources and by nominating students for college and campus fellowships. These fellowships, often combined with assistantship support, provide monetary stipends and, in most cases, exemptions from tuition and some student fees.

Recipients must register for the equivalent of at least 12 hours of graduate credit in each semester and four hours in an eight-week summer session. Fellowship holders are encouraged to involve themselves with research and teaching in the department.

Assistantships. Research and teaching assistantships provide an opportunity for graduate students to work with faculty. Most research assistantships are funded by grants and contracts involving the analysis of contemporary issues. Most assistantships carry waivers of tuition and some fees.

Tuition and Fee Waivers. Waivers may be awarded. In most cases they are awarded to students with fellowship support from certain external programs.

Master of Science in Agricultural and Applied Economics

The M.S. offers considerable flexibility. Students using the degree as a foundation for a doctorate emphasize economic theory and analytical research tools. Students seeking the terminal master's degree focus their study on the concepts and analytical techniques used by analysts and managers in industries, governments, and other organizations.

Students must earn a 3.0 (A = 4.0) GPA for a minimum of 32 graduate hours of credit. M.S. students entering the ACE graduate program will be admitted only to Option A. For Option A, a thesis is prepared under the supervision of a faculty advisory committee. The thesis is defended in a formal oral examination, which usually coincides with an open departmental seminar, administered by the thesis committee. Option B requires advanced coursework in lieu of a thesis. Option B is available only to students already enrolled in Option A of the ACE M.S. program or in the ACE Ph.D. program. Application for admission to Option B is by petition to the Department after at least two semesters of graduate coursework have been completed.

Thesis Option

Select one of the following:

ACE 500	Applied Economic Theory	4
ACE 592	Special Topics (Microeconomics)	
ECON 500	Microeconomics	
6 hours in quantitative and research methods from departmental list (these do not count toward the 500 level course requirement)		6
Electives		14
ACE 599	Thesis Research (min/max applied toward degree, 8 max)	8
Total Hours		32

Other Requirements ¹

Other requirements may overlap

Only 2 hours of ACE 566 may count towards the degree

Minimum Hours Required Within the Unit: 8 at the 500 level, not including 566, 599 or independent study

Minimum 500-level Hours Required Overall: 12

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's Graduate Program information for the Master's degree (<http://ace.illinois.edu/grad/masters>) and the Graduate College Handbook (<http://www.grad.uiuc.edu/gradhandbook>).

Non-Thesis Option

24 hours selected from the ACE doctoral core sequence, including at least 12 hours in applied economic theory and 8 hours in quantitative methods	24
Electives	8
Total Hours	32

Other Requirements ¹

Other requirements may overlap

Only 2 hours of ACE 566 may count towards the degree

Minimum Hours Required Within the Unit: 20 at the 500 level, not including ACE 566, 599 or independent study

Minimum 500-level Hours Required Overall: 20

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's Graduate Program information for the Master's degree (<http://ace.illinois.edu/grad/masters>) and the Graduate College Handbook (<http://www.grad.uiuc.edu/gradhandbook>).

Doctor of Philosophy in Agricultural and Applied Economics

The Doctor of Philosophy is a research-oriented degree that prepares successful candidates for positions in higher education, governmental agencies, nongovernmental organizations, and the research and management functions of the private sector. In consultation with a faculty advisor, students develop an area of specialization to fit their career aspirations. Typical areas of specialization include:

- agricultural finance
- family and consumer economics
- price analysis and agricultural marketing
- farm and agribusiness management
- international and policy economics
- natural resource, production, and environmental economics
- regional economics and public policy

Students pursue coursework in theory, quantitative methods, and their area of specialization; pass a written core exam, a second-year research paper requirement, an oral preliminary examination which includes the formal proposal for dissertation research; and complete and defend a dissertation. The core courses cover the theory and quantitative methods upon which advanced research, teaching, and service in ACE are based. The specialty courses build on the knowledge gained in the core courses and provide an understanding of the application of economic theory and the tools of economic analysis. Students are encouraged to complete substantial coursework in other departments, such as economics, finance, and business administration.

A 3.0 (A = 4.0) GPA is required in all courses completed in the program.

Core courses	24-28
8 hours in ACE at the 500 level to define primary field	8
4 hours (minimum) of quantitative methods beyond the courses specified in the core	4
8 additional hours (minimum) in quantitative methods, methods, theory, complementary field, or other area to strengthen or diversify the student's program	8
4 hours in Advanced Research and Scholarly Communication (ACE 561)	4
ACE 599 Thesis Research (max applied toward degree)	32
Total Hours	64

Other Requirements ¹

Other requirements may overlap

Minimum Hours Required Within the Unit at the 500-Level:	16 excluding indep study, 599 and core courses
A written paper in the form of a journal article approved by the research paper committee and presented at a department conference.	
Masters Degree Required for Admission to PhD?	Yes, but students meeting specific conditions may petition to move from the M.S. to the Ph.D. program after three semesters.
Written Core Exam Required	Yes
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's Graduate Program information for the Ph.D. degree (<http://ace.illinois.edu/graduate/phd-requirements>) and the Graduate College Handbook (<http://www.grad.uiuc.edu/gradhandbook>).

M.B.A. Joint Degree Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the [joint program requirements](#) and contact the M.B.A. program and their major department office for more information.

M.U.P. Joint Degree Program

For joint programs, at least 40 hours must be in Urban Planning, including all core courses and capstone requirements. The two programs must total a minimum of (a) 80 hours, or (b) the sum of 40 Urban Planning hours plus the required number of hours for the second degree, whichever is greater. (In the latter case, the other program may at its discretion count up to 8 hours of Urban Planning courses as electives in meeting its degree requirements)

as long as students are required to take no fewer than 40 additional hours in that program.) The MUP capstone requirement may be waived for a thesis completed in another program provided faculty from both programs participate on the thesis committee. Students must be in residence in Urban Planning for at least two semesters.

Consult the department's M.U.P. joint degree (http://www.urban.illinois.edu/academic-programs/mup/mup_joint.html) web page for more information about the admissions process and joint degree requirements. For additional guidance, please contact the Director of the M.U.P. Program.

Animal Biology

www.life.illinois.edu/animalbiology

Head of the Department: Andrew Suarez

515 Morrill Hall

505 South Goodwin Avenue

Urbana, IL 61801

(217) 333-7801

Fax (217) 244-4565

E-mail: ab@life.illinois.edu

Contact: Lisa J. Smith

Major: Biology

Degrees Offered: M.S., Ph.D.

Graduate Concentration: Ecology, Ethology & Evolution (in all degrees)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Biology-Ecology, Ethology & Evolution and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Animal Biology administers graduate degree programs as concentrations in biology. Areas of training include physiological, population, community, and evolutionary ecology; population, molecular and quantitative genetics; evolutionary biology, behavioral ecology and evolution, physiology, evolution and development, functional anatomy, systematics, and conservation biology.

Admission

Acceptance for graduate study in animal biology is based on the applicant's research potential and academic achievement. An undergraduate degree in the life sciences is the usual preparation, but students majoring in mathematics, computer science, or the physical and social sciences are also considered. Courses required for admission are inorganic and organic chemistry, a year of physics, and mathematics through calculus. Students lacking one or more of these courses may be admitted with the provision that such deficiencies be completed in addition to the normal graduate course load. A grade point average of at least 3.0 (A = 4.0) for the last two years of undergraduate work in a four-year undergraduate degree program or the last three years of a five-year undergraduate program and for any graduate study is mandatory, and good scores on the Graduate Record Examination (GRE) are necessary. Considerable emphasis is placed on a student's interest and ability in research as demonstrated by previous work and letters of recommendation. Applications are considered for fall admission only. The deadline for application materials is January 1. A minimum paper-based Test of English as a Foreign Language (TOEFL) score of 570 (230 on the computer-based version, 88 on the internet-based version) is preferred for international applicants.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Biology-Ecology, Ethology & Evolution. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Financial Aid

Financial aid is available in the form of fellowships and teaching and research assistantships for qualified students.

Master of Science in Biology with Concentration in Ecology, Ethology & Evolution

Thesis Option

BIOL 599	Thesis Research (0 min applied toward degree)	0
Total Hours		32

Other Requirements ¹

A concentration is required

Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Non-Thesis Option

Total Hours

32

Other Requirements ¹

A concentration is required.

Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in Biology with Concentration in Ecology, Ethology & Evolution

Candidates for the Ph.D. degree must demonstrate excellence by examination and, in consultation with an adviser and doctoral committee, plan and carry out original thesis research with distinction. A preliminary examination evaluating the ability of students to integrate subject matter related to their fields is given during the third year. Additional requirements may be prescribed by the adviser and doctoral committee. A final examination, in which the student defends the thesis, and a presentation of the thesis at the departmental seminar complete the program.

Courses in statistics are required

BIOL 599	Thesis Research (0 min applied toward degree)	0 to 16
----------	---	---------

Total Hours

64

Other Requirements ¹

A concentration is required.

Experience in Teaching is required as part of the academic work of all PH.D. candidates in this program

Masters Degree Required for Admission to PhD?	No, but Masters level requirements must be met (additional 32 hours)
Qualifying Exam Required:	No
Preliminary Exam Required:	Yes
Final Exam/Dissertation Defense Required:	Yes
Dissertation Deposit Required:	Yes
Minimum GPA:	3.0

Animal Sciences

www.ansci.illinois.edu

Head of the Department: Steve Loerch
Graduate Program Coordinator: Sandra Rodriguez-Zas
110 Animal Sciences Laboratory
1207 West Gregory Drive
Urbana, IL 61801
(217) 244-0418
E-mail: ansci-gradprog@illinois.edu

Major: Animal Sciences
Degrees offered: M.S., Ph.D.

Major: Bioinformatics
Degrees offered: M.S.
Graduate Concentration: Animal Sciences

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Animal Sciences and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Animal Sciences offers graduate work leading to the Master of Science and Doctor of Philosophy degrees. Fields of specialization include:

- animal breeding and genetics
- animal behavior
- biochemistry
- environmental physiology
- immunobiology
- meat science and muscle biology
- microbiology
- nutrition
- systems of animal management and production
- physiology of lactation
- physiology of reproduction

Beef and dairy cattle, horses, poultry, sheep, swine, and a variety of companion and laboratory animals are available for study.

The genomic and proteomic projects are generating large amounts of complex biological data that require effective storage, retrieval, analysis and interpretation. The bioinformatics degree program provides students with the skills necessary to augment the understanding and use of agricultural, biological and medical information and resources through the application of molecular, chemical, physical, computational, statistical, mathematical and informatic techniques. Students interested in this program may come with undergraduate training in one of the following areas:

1. biological and agricultural sciences,
2. statistical, mathematical and computer sciences,
3. informatics and engineering sciences.

Graduates from the Bioinformatics program will be able to integrate basic and applied concepts in the three areas and applied them to biotechnology and medical research.

Admission

Candidates for admission to the M.S. and Ph.D. programs must have a bachelor's degree from an accredited institution equivalent to those from the University of Illinois at Urbana-Champaign. A grade point average of 3.0 or higher ($A = 4.0$) for the last two years of undergraduate work and for any graduate study is required for admission. Students must take the Graduate Record Examination (GRE) and are recommended to take the advanced test in biology. The minimum Test of English as a Foreign Language (TOEFL) score is 590 on the paper-based test or 243 on the computer-based test. Emphasis is placed on a student's interest and ability in research as demonstrated by previous work and letters of recommendation. Admission is possible for spring semester.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Animal Sciences. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is encouraged as part of the academic work of all Ph.D. candidates in this program.

Financial Aid

Financial aid for graduate students is available in the form of fellowships, teaching and research assistantships, tuition and partial fee waivers, and traineeships. Qualified candidates are considered for financial support upon application. Graduate students making satisfactory progress toward their degrees generally receive a full tuition waiver and a partial fee waiver, as well as a stipend.

- Master of Science in Animal Sciences (p. 532)
- Master of Science in Bioinformatics, Animal Sciences Concentration (p. 533)

Doctor of Philosophy in Animal Sciences

Students must pass preliminary and final examinations administered by committees appointed by the dean of the Graduate College. The final examination is limited to a presentation and defense of the thesis research.

Advanced lecture and laboratory courses	20-28
Graduate seminar enrollment is required every semester (max 4 hours can be applied to the degree)	0-4

Anthropology

www.anthro.illinois.edu

Head of the Department: Andrew Orta
 Director of Graduate Studies: Christopher Fennell
 Museum Studies Program Coordinator: Susan Frankenberg
 109 Davenport Hall
 607 South Mathews Avenue
 Urbana, IL 61801
 (217) 333-3616
 E-mail: anthro@illinois.edu

Major: Anthropology
 Degrees offered: M.A., Ph.D.
 Graduate Concentration: Second Language Acquisition and Teacher Education (p. 891) (Ph.D. only)

Graduate Minor: Museum Studies

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Anthropology and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>).

Graduate Degree Programs

The Department of Anthropology offers graduate programs leading to the Master of Arts and the Doctor of Philosophy degrees.

Admission

Students without the equivalent of the department's undergraduate concentration may be admitted to either degree program, but they will be required to make up deficiencies in their anthropological backgrounds. In addition to the Graduate College admission requirements, students are required to submit Graduate Record Examination (GRE) scores. Students whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and achieve a minimum score of 550 on the paper-based test (213 computer-based test). Students are admitted for the fall term only.

Students wishing to pursue the minor in Museum Studies must be in good standing in the graduate program of an academic department, and must apply for acceptance into the minor. Admission to the minor is contingent upon approval of the student's home department and the Museum Studies Steering Committee. Students may apply to the minor during the first week of the fall and spring semesters in any academic year, and should contact the Museum Studies Program Coordinator for application instructions or more information.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Anthropology. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests and Facilities

Courses and individualized study provide broad coverage of sociocultural, linguistic, archaeological, and physical anthropology. The department provides special emphases in the analyses of state ideologies and cultural transformations; complex societies in transition; kinship and gender relationships; symbolism and cognition; cosmology, art, and religion; politics, economics, and ethnicity; language and culture; ethnomusicology; text and narrative analysis; formal analysis and mathematical modeling; medical anthropology; human evolution; agricultural origins and development; hunter-gatherer adaptations; diet and nutrition; paleoecology and paleobiology; comparative and analytical osteology; and nonhuman primate evolution, morphology, behavior, and ecology. The department's Laboratory of Anthropology has archaeological, paleoethnobotany, faunal analysis, human biology, casting, stable-isotope analysis, and ethnographic laboratories. The department is developing visual arts and networked computer laboratories.

Departmental funds and a grant from the National Science Foundation are available for graduate students' summer field research. An archaeology field school is held at various locations in Illinois and occasionally elsewhere (location varies from year to year). Graduate student programs are enriched by close departmental relationships with the interdisciplinary area studies centers on campus (African, East Asian and Pacific, Latin America and Caribbean, and Russian and East European), and with the Afro-American Studies and Research Program, Women's Studies Program, La Casa Cultural Latina, Women and Gender in Global Perspectives Program, Spurlock Museum, Museum of Natural History, Krannert Art Museum, and the Program in Ancient Technologies and Archaeological Materials.

Agreements between the University and various governments and institutes facilitate research in many nations. Training is available in various languages, including Quechua, Japanese, Chinese, Russian, Indonesian, Thai, Burmese, Swahili, Hausa, Lingala, Wolof, Arabic, and Shona. Students have ready access to the extensive computer facilities of the University and to the department's facilities, which include microcomputers, printers, software, and mainframe computer terminals, a graphic digitizer and color printer, photographic and video equipment, and other research-oriented hardware and software. The Journal of the Steward Anthropological Society, edited by graduate students, has been published since 1969.

Financial Aid

University fellowships, Graduate College fellowships for under-represented minorities, and teaching and research assistantships provide variable levels of funding for most graduate students who do not hold external awards. Tuition and service fee waivers accompany fellowships and assistantships. Foreign Language and Area Studies (FLAS) fellowships are available through various area centers. Extensive contract archaeology programs in the department provide support and research employment for graduate students, as does the U.S. Army Construction Engineering Research Laboratory in Champaign.

Master of Arts in Anthropology

The master's degree can be a first stage toward the doctorate or may be used by students wishing to apply knowledge of anthropology to a related field. Candidates must present a thesis or paper in lieu of a thesis acceptable to their advisers and another member of the graduate faculty within the department.

Thesis Option

ANTH 599	Thesis Research (min/max applied toward degree)	4
Total Hours		32

Other Requirements ¹

Other requirements may overlap

Minimum Hours Required Within the Unit: 8 at the 500 level

Minimum Hours Required Within the Unit: 12

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Non-Thesis Option

ANTH 590	Dissertation Readings (4 min)	4
Total Hours		32

Other Requirements ¹

Other requirements may overlap

Minimum Hours Required Within the Unit: 8 at the 500 level

Minimum Hours Required Within the Unit: 12

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in Anthropology

The preliminary examination consists of a pre-dissertation research paper, a proposal for doctoral research, and a written examination designed by the student's doctoral committee followed by a two-hour oral examination. The final examination is a defense of the doctoral thesis. Fieldwork is strongly recommended, although not required.

Master's degree or equivalent number of hours	32
Electives	32
Language Requirement: High proficiency in one, or reading ability in two, foreign languages is required. Statistics, computer modeling, or similar expertise, however, may be used in lieu of one foreign language.	
ANTH 599	Thesis Research (min/max applied toward degree) 0-32
Total Hours	96

Other Requirements ¹

Other requirements may overlap

Masters Degree Required for Admission to PhD?	No
Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Graduate Minor in Museum Studies

The Graduate Minor in Museum Studies is designed for MA and PhD students who wish to complement their degree program with interdisciplinary study of the theory, organization and management of museums and museum collections. The program offers broad coverage of different disciplines' approaches to museum theory, and practice, including interdisciplinary perspectives from Anthropology, Art History, Landscape Architecture, History, Education, and Library and Information Sciences. The program also focuses on the collaborative, international and multicultural nature of museum work in curating, researching and communicating the tangible and intangible evidence of people and their environment. Students acquire the applied theory required to successfully work on, with or in museums. Students may tailor the minor to their career goals by choosing among electives that emphasize different theoretical and technical aspects of museum studies.

MUSE 500	Core Prob Museum Theory & Prac	4
Electives from an approved list of museum-related courses, at least one of which must be at the 500-level.		12
The student must participate in a capstone experience consisting of an approved museum-based internship, museum-related project or museum-related research paper. Every student must provide a product of this experience in the form of either a formal professional presentation or a written document. If a student chooses to write their MS thesis or PhD dissertation on a museum topic, this will fulfill (but is not required for) the capstone experience, provided that a member of the Museum Studies Steering Committee is a formal member of the student's thesis or dissertation committee. Student may receive academic credit for their capstone experience through their home department or MUSE 590.		
Total Hours		16

Other Requirements ¹

Minimum 500-level Hours Required Overall 8

In addition to the minor requirements, students must also complete the requirements of their major degree.

Hours counted toward completion of a minor may not also be applied toward any other transcribed credential.

¹ For additional details and requirements refer to the department and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Architecture

www.arch.illinois.edu

Director of the School: Peter Mortensen, PhD

Director of Graduate Studies: William Worn

117 Temple Hoyne Buell Hall

611 Taft Drive

Champaign, IL 61820

(217) 244-4723

E-Mail: arch-grad@illinois.edu

Major: Architecture

Degrees Offered: M. Arch, Ph. D.

Graduate Concentration: Medieval Studies (p. 810) (M. Arch and Ph. D.)

Major: Architectural Studies

Degrees Offered: M.S.

Joint Degree Program: the Master of Architecture can be earned jointly with the following

Degrees Offered:

M.B.A. in Business Administration

M.C.S. in Computer Science

M.U.P. in urban Planning

M.S. in Civil Engineering (Construction Engineering and Management) or (Structures)

Graduate Degree Programs

The School of Architecture offers two graduate programs, leading to a Masters degree:

1. a two-year Master of Architecture (Professional Degree) and
2. a one-year Master of Science in Architectural Studies (Post-professional Degree).

The Master of Architecture program is for students holding a four-year Bachelor of Science in Architectural Studies (or similar degree in architecture). One may be admitted to the Master of Architecture program with Limited Standing if the student holds a bachelor's degree (or higher) in any field other than architecture. Student in M. Arch (Limited Standing) typically take two years to complete undergraduate prerequisite courses to attain full standing in the M. Arch program. The Master of Architecture degree is a professional degree accredited by the National Architectural Accreditation Board (NAAB).

The Master of Science in Architectural Studies (Post-professional Degree) program is for students holding a five-year Bachelor of Architecture professional degree. The MSAS degree is not accredited by NAAB.

The School of Architecture, together with the graduate programs of business administration, computer science, urban and regional planning, and civil and environmental engineering, offers graduate programs leading to the following joint degrees: Master of Architecture and Master of Business Administration, Master of Architecture and Master of Computer Science, Master of Architecture and Master of Urban Planning, and Master of Architecture and Master of Science in Civil and Environmental Engineering (Construction Engineering and Management) (Structures).

The School of Architecture, together with the Department of Landscape Architecture, offers a graduate program leading to the Doctor of Philosophy degree.

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty's recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant's past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the Web site above. Application may be made on-line. Completed applications for the Masters or Doctoral programs must reach the Graduate Programs Office by January 15; students are admitted in the fall semester

only. Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants; the GRE is required for all Doctor of Philosophy applicants.

All applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL) scores. A minimum score of 590 on the paper-based test or 243 on the computer-based test or 96 on the internet-based test is required. The University of Illinois also accepts IELTS (academic exam) score in lieu of TOEFL, with a minimum score of 6.5 and 6 in all sub-sections required.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

- Master of Architecture (Professional Degree) (p. 540)
- Master of Architecture (Limited Standing) (p. 539)
- Master of Science in Architectural Studies (Post-professional Degree) (p. 541)

Doctor of Philosophy in Architecture

This program offers advanced, rigorous education for those students whose goal is the advancement of the intellectual base of the discipline through a career of research and scholarship. Three areas of concentration are offered: history and theory, environment and technology, and behavioral and cultural factors in design. The program is administered jointly with the Department of Landscape Architecture.

All students are required to enroll in the PhD colloquium during the fall of their first year of course work.

Elective coursework in major field	28
ARCH 589 PhD Colloquium (twice)	2
Outside study (courses outside of Landscape Architecture and Architecture)	8
Electives	32
Language Requirement: Required for all students in the History/Theory option and for some Social and Cultural Factors students	
ARCH 599 Thesis Research (min/max applied toward degree)	32
Total Hours	96

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall:	24 (not including 599)
Professional Degree Required for Admission to PhD?	No
Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	2.75

¹ For additional details and requirements refer to the department's program page (<http://www.arch.illinois.edu/degrees/phd-architecture>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Master of Architecture and Master of Urban Planning

This joint degree program offers an opportunity to obtain an education for a career that combines the disciplines of architecture and urban planning. For entry into this program, applicants must satisfy the admission requirements of each academic unit. Application for admission may be made either simultaneously to both units or in sequence.

Candidates entering the program with a four-year baccalaureate in architectural studies must complete at least 86 hours of graduate work (54 in Architecture and 32 in Urban Planning) and, if admitted with full status, may complete the program in six semesters and one summer session. Candidates entering the program with a five-year Bachelor of Architecture degree must complete at least 64 hours of graduate work (32 in Architecture and 32 in Urban Planning) and, if admitted with full status, may complete the program in four semesters and a summer session.

Master of Architecture and Master of Business Administration

This joint master's degree program prepares graduate degree candidates for the broad range of management activity now developing in architectural practice.

For entry into this program, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission may be made simultaneously to both units or admission to one unit may be sought after gaining entry to the other.

Candidates entering the Master of Architecture/Master of Business Administration joint degree program with a four-year baccalaureate in architectural studies must complete 110 hours of graduate work, 50 hours in Architecture and 60 hours for the M.B.A.

Master of Architecture and Master of Computer Science

This joint master's degree program prepares graduate degree candidates for the broad range of management activity now developing in architectural practice.

For entry into this program, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission may be made simultaneously to both units or admission to one unit may be sought after gaining entry to the other.

The combination of Master of Architecture and Master of Computer Science degrees requires 74 graduate hours if no prerequisites are needed in computer science. Candidates entering either of these programs with a five-year bachelor of architecture degree must complete at least 64 hours of graduate work and, if admitted with full status, may complete the program in four semesters.

Master of Architecture and Master of Science in Civil Engineering (Construction Management) or (Structures)

This joint degree program offers qualified applicants the opportunity to develop competence in a career that combines the disciplines of architecture and civil engineering (construction management) or (structures). For entry into these programs, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission should be made to the School of Architecture. Admission to the other unit may be sought after the first semester of graduate study in architecture.

Candidates entering the program with a four-year baccalaureate in architectural studies must complete at least 78 (32 in Civil Engineering and 46 in Architecture) hours of graduate work and, if admitted with full status, may complete the program in five semesters. Candidates entering the program with a five-year Bachelor of Architecture degree must complete 64 hours of graduate work and, if admitted with full status, may complete the program in four semesters.

Master of Architecture Limited Standing

The variable-length professional degree program has been designed for applicants who have a bachelor's degree in any field other than architecture. Emphasis is placed on the development of sufficient background in introductory architectural studies so that the applicants may successfully complete the equivalent of the two-year graduate program described above.

Applicants accepted into this program will initially be admitted with limited status. Full status may be attained by completion of introductory architectural studies. Once full status is attained, a minimum of 54 hours of graduate work is required for completion.

The time necessary to complete the program will depend on the nature of undergraduate coursework completed by the applicant.

Candidates attaining full standing may complete the program in two years of full-time academic study.

Thesis Option

One course in architectural practice

One core elective each from a select list of courses in architectural thought

One core elective each from a select list of courses in professional practice

Four studios including two semesters of comprehensive design

One course in structural planning

Students must also complete prerequisites, which are determined individually and do not count toward the required number of hours required

ARCH 599	Thesis Research (min/max applied toward degree)	0

Master of Architecture Professional Degree

The two-year professional degree program, intended for students entering with a four-year baccalaureate in architectural studies, emphasizes further study in architectural disciplines, study in depth in one optional area of specialization, and/or participation in research.

The two-year graduate program is comprised of advanced study in architectural disciplines, building upon the fundamentals established in a four-year undergraduate study program.

Students may elect to concentrate in any one of the areas of specialization including Design, Structures, Technology, History and Preservation as well as newly developing areas of research by taking additional courses in those areas.

Candidates admitted with full or limited status to the two-year professional degree program must complete at least 62 hours of graduate work. Candidates admitted with full status may complete the program in two years of full-time academic study.

Thesis Option

One course in architectural practice

One core elective each from a select list of courses in architectural thought

One core elective each from a select list of courses in professional practice

Master of Science in Architectural Studies

Post-Professional Degree

Applicants who hold the five-year Bachelor of Architecture degree are considered to have earned the first professional degree. For those applicants, a one-year degree program has been developed emphasizing further study in depth of one optional area of concentration and/or participation in research, which is similar to the final year of the professional degree program.

Candidates admitted with full status may complete the program in one year of full-time academic study.

Major: Art and Design

Degree offered: M.F.A.

Concentrations: Crafts, Graphic Design, Industrial Design, Metals, Painting, Photography, Printmaking, Sculpture

Major: Art Education

Degrees offered: Ed.M., M.A., Ph.D.

Graduate Concentrations: Writing Studies (Ph.D. only)

Major: Art History

Degrees offered: M.A., Ph.D.

Graduate Concentrations: Medieval Studies (available to M.A. and Ph.D.); Writing Studies (Ph.D. only)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Art Education or Art History and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The School of Art and Design offers the Master of Arts in Art Education and in Art History, the Master of Education in Art Education, the Master of Fine Arts in Art and Design, the Doctor of Philosophy in Art Education, and the Doctor of Philosophy in Art History. In addition to the listed concentrations, we also offer a specialization in New Media in the M.F.A. program.

Admission

Applications are considered for Fall Semester admissions only. The Art History Program requires Graduate Record Examination (GRE) scores.

International applicants or applicants who are not native English speakers must present a TOEFL score of at least 590 on the paper-based version, 250 score on the Computer-based exam, and a score of 96 on IBT exam. Applications are not currently being accepted for the concentration in Printmaking.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Art History and Art Education. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for master and doctoral students.

Facilities and Resources

Resources for graduate students in art and design include the Krannert Art Museum's excellent permanent collections and changing exhibitions; the Ricker Library of Art and Architecture, one of the largest art and architecture libraries in the nation; the Krannert Center for the Performing Arts; School of Art and Design facilities, which include extensive computer laboratories, digital photography and video editing equipment, wireless networking, ink-printing facilities, ceramic, woodworking, and metal shops, rapid prototyping and laser cutting, black/white and color darkrooms, shooting studios, and a wide selection of production and presentation equipment via reservation and checkout facility. A variety of lectures, symposia, musical programs, dramatic productions, and other cultural events associated with a large and progressive university complement the Art and Design Facilities.

Financial Aid

Fellowships, assistantships, and tuition and service fee waivers are awarded each year on a competitive basis, with consideration given to the applicant's grade point average and, in the case of applicants for the M.F.A. programs, quality of creative work.

- Master of Education in Art Education (p. 546)
- Master of Arts in Art Education (p. 546)
- Master of Arts in Art History (p. 545)
- Master of Fine Arts in Art and Design (p. 547)
- Doctor of Philosophy in Art Education (p. 544)
- Doctor of Philosophy in Art History (p. 544)

Doctor of Philosophy in Art Education

The doctoral program in art education is designed for advanced graduate students who want to pursue scholarly study and research in art education. Doctoral level coursework includes studies in both art education and in relevant disciplines and departments within the university. Applicants for admission must hold a master's degree in art education or the equivalent from an accredited institution. Admission is determined by a sample of academic writing, official records of previous education and experience, and letters of recommendation.

Course work Hours (in residency on this campus)	64
ARTE 599 Thesis Research ((min/max applied toward degree))	0
Total Hours	64

Other Requirements ¹

Other requirements may overlap

Masters Degree Required for Admission to PhD?	Yes
Qualifying Exam Required	Yes
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	2.75

¹ For additional details and requirements refer to the department's graduate studies requirements and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in Art History

The program leading to the degree of Doctor of Philosophy in Art History is designed to prepare students for scholarship and for teaching at the college level. Applicants must have the Master of Arts in Art History or the equivalent. Students earning the master's degree must pass the qualifying examination with a high score and write a thesis or research paper of superior quality in order to be admitted to the doctoral program. Students taking the master's degree elsewhere must satisfy the Graduate Committee on the History of Art and Architecture as to their preparation to undertake work on a doctoral level. Students usually elect to major and write a dissertation in one of various fields:

- Classical
- Medieval
- Renaissance
- Baroque
- Modern

- Contemporary
- American
- African
- Asian or Latin American

Coursework Hours (in residency on this campus)	32
Language Requirement: An effective reading knowledge two languages chosen with the approval of the student's academic adviser and the program chair is required. Language requirements must be met before the student has earned 32 hours of graduate credit beyond the requirements for the master's degree.	
ARTH 599	Thesis Research (min/max applied toward degree)
Total Hours	64

Other Requirements ¹

Preliminary Exam Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	2.75

¹ For additional details and requirements refer to the department's graduate studies requirements and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Master of Arts in Art History

This program provides basic preparation for teaching at the college level, background in the history of art for museum work, and preliminary study for the doctoral degree. In addition to the general requirements, the prerequisite for admission is ordinarily an undergraduate degree in art history or a strong preparation in related humanistic studies. Applicants with little background in art history but who have done exceptionally well as undergraduates in other disciplines will be seriously considered. A thesis or scholarly essay is required for completion of the degree.

Thesis Option

Graduate hours in the history of art and architecture, including 16 hours in art history graduate seminars	24
Language Requirement: Proficiency in a language outside of English and appropriate to the student's field of study must be demonstrated by the end of the first year of residence.

Master of Arts, Art Education

The program of study leading to the degree of Master of Arts in Art Education is designed to provide advanced level professional study for students who are interested in research in art education. It can serve as preparation for a variety of careers, such as museum education, community arts, arts advocacy, arts policy formation; professional development for art teachers and supervisors in the public schools; and as preparation for the doctoral degree.

In addition to required courses in art education, students can choose electives from studio, art education and art history, and any other graduate courses offered by the university that complement their studies or professional aspirations. Specific course selection is determined in consultation with the student's adviser. Students may simultaneously study for teaching certification but graduate credit is not usually granted for such study. A thesis is required.

Master of Fine Arts in Art and Design

The degree of Master of Fine Arts in Art and Design is designed to prepare qualified individuals for distinctive achievement in the professional area of their choice. Fields of concentration include Graphic Design, Industrial Design, Photography, Metal, Ceramics, and an interdisciplinary Studio which includes concentrations in Painting, Sculpture, and specialization in New Media. A minimum of 64 hours of graduate credit is required for the M.F.A. degree, requiring three years of full-time residence. Individual studio space and specialized resources essential to the acquisition of a high-quality professional education are available to students in all areas of study. The Graphic Design, Photography, Metal, Ceramics, and interdisciplinary Studio which includes Painting, Sculpture, and New Media programs require a graduation exhibition of creative work and a written thesis approved by a thesis committee for deposit in the School of Art and Design's graduate office. The Industrial Design Program requires a graduation exhibition, a written thesis approved by a thesis committee and a thesis deposit in the Graduate College Thesis Office. Admission for all programs is determined by a faculty review of a portfolio of the applicant's creative work, records of previous education and experience, letters of recommendation, and other significant achievements that may be viewed as predictors for success in the program.

Astrochemistry

Ben McCall, Coordinator
166 Roger Adams Laboratory
600 S. Mathews Avenue
Urbana, Illinois 61801, (217) 244-0230

E-mail: bjmccall@illinois.edu

Graduate Concentration: Astrochemistry
Participating Programs: Astronomy (PhD only) and Chemistry (PhD only)

Graduate Degree Programs

Astrochemistry is an interdisciplinary area of knowledge at the intersection between chemistry and astronomy. As a few examples, topics of active research in this area include identifying organic molecules in interstellar space, building models of the chemical reactions that occur in interstellar space, laboratory measurements of astronomically important molecules, searching for Earthlike planets using molecular signatures, and understanding the contributions of interstellar molecules to the chemical origin of life. In order to succeed in this field, students require training in both of the traditional disciplines of chemistry and astronomy.

The Astrochemistry graduate concentration (<http://astrochemistry.illinois.edu>) is intended for Ph.D. students in Chemistry or Astronomy who wish to gain the necessary background to perform original research in the emerging interdisciplinary field of astrochemistry. It is an addition to the Chemistry and Astronomy Ph.D. programs at Illinois and offers transcript recognition that will ensure that students are recognized as qualified by scientists in both traditional fields (chemistry and astronomy).

Admission

As the Astrochemistry graduate concentration (<http://astrochemistry.uiuc.edu/concentration.php>) is a part of the Chemistry and Astronomy Ph.D. programs, students should submit applications directly to either the Department of Chemistry (<http://chemistry.uiuc.edu/graduates>) or the Department of Astronomy.

Faculty Research Interests

A variety of faculty members in the departments of Chemistry, Astronomy, and Physics have research interests related to astrochemistry. A partial listing of research groups is available on the Astrochemistry concentration website (<http://astrochemistry.illinois.edu/groups.php>).

Facilities and Resources

Facilities that can be utilized by astrochemistry students in their thesis research include a wide variety of laboratory spectroscopy equipment in Chemistry, the Combined Array for Research in Millimeter-wave Astronomy, computing facilities in both Chemistry and Astronomy, and other national and international observational astronomy facilities.

Financial Aid

Financial aid in the form of teaching assistantships and/or research assistantships is generally provided for admitted students by the Departments of Chemistry and Astronomy.

The requirements for the Astrochemistry graduate concentration (<http://astrochemistry.illinois.edu/concentration.php>) are supplemental to the degree requirements of the Ph.D. in either Chemistry or Astronomy, and are summarized in the table below. For this concentration, at least 24 hours of graduate level coursework (at the 400- and 500- level) are required, of which at least 12 must be in chemistry courses and at least 12 in astronomy courses. A list of recommended courses is given on the Astrochemistry concentration website (<http://astrochemistry.illinois.edu/concentration.php>), but students may substitute other courses with consent of the Astrochemistry concentration steering committee. All students in the concentration are required to take CHEM/ASTR 450, Astrochemistry, which may count toward either the astronomy or chemistry requirements. Students concentrating in astrochemistry should have at least one member from each department on their thesis committee.

Graduate level Chemistry courses	12
Graduate level Astronomy courses	12
ASTR/CHEM 450	Astrochemistry (required, but may be taken to satisfy required Chemistry or Astronomy courses above)
Total Hours	24

Other Requirements ¹

Other requirements may overlap

At least one member of each department must serve on the PhD thesis committee.

Thesis research must be related to astrochemistry.

In addition to the graduate concentration requirements, students must also complete the requirements of their major degree.

¹ For additional details and requirements refer to the department's graduate concentration program (<http://astrochemistry.illinois.edu/concentration.php>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Astronomy

www.astro.illinois.edu

Chair of the Department: Brian Fields

103 Astronomy Building

1002 West Green Street

Urbana, IL 61801

(217) 333-3090

E-mail: astronomy@illinois.edu

Major: Astronomy

Degrees offered: M.S., Ph.D.

Graduate Concentration: Astrochemistry (p. 548) (Ph.D. only)

Graduate Degree Programs

The Department of Astronomy offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. The goal of the graduate program in astronomy is to provide broadly based training in modern astrophysics and astronomy for a small and carefully selected student body. Individually designed programs involving close contact with faculty members are encouraged, and an understanding of fundamental principles and techniques and their applications to research problems of current interest is emphasized. Students are expected to acquire a solid knowledge of modern physics as well as of general astronomy. A major objective is to maintain an exciting intellectual environment in which students can develop their scientific creativity and their enthusiasm for astronomy.

Admission

Admission to the astronomy graduate program requires an outstanding record of accomplishment and clear evidence of considerable academic promise, as judged by test scores, resume (or c.v.), letters of recommendation, personal statement, and strong intellectual achievements. A bachelor's degree or its equivalent in astronomy, physics, chemistry, mathematics, or another related technical field from an accredited college or university in the U.S. or an approved institution of higher learning abroad is required for admission.

A minimum grade point average of 3.0 ($A = 4.0$) and satisfactory scores on the Graduate Record Examination (GRE) (verbal, quantitative, and advanced physics portions) are required for admission. Course preparation in intermediate and advanced undergraduate physics and astronomy are essential. Students are expected to make up deficiencies during the first graduate year.

All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency, as required by Graduate College policy. More information on the English Proficiency Requirement can be found at the Graduate College Admissions Web site (<http://www.grad.illinois.edu/admissions/instructions/04c>).

Admission decisions are normally made once a year in the spring. Applications for admission and financial assistance must be received by January 15. In rare circumstances, applicants may be admitted for the spring semester, in addition to the customary fall semester admissions.

See the Astronomy graduate admissions Web site (www.astro.illinois.edu/academics/graduate/) for more information and application materials.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

Research activity in the Department of Astronomy includes observational and theoretical investigations of a wide array of astronomical objects:

- Large-scale structure of the universe (galaxy clusters, cosmic nucleosynthesis, cosmic microwave background, and cosmology)
- Extragalactic systems (galaxy structure and evolution, interacting galaxies, active galaxies, jets, and quasars)
- Interstellar medium (multiple phases, molecular clouds, HII regions, bubbles and superbubbles, planetary nebulae, supernova remnants, magnetic fields, and galactic structure)
- Stars (formation, structure and evolution, atmospheres, nucleosynthesis, novae, supernovae, pulsars, and stellar statistics)
- Comets (chemistry)

Theoretical astrophysics is also a strong research interest many faculty members in the Department of Astronomy and the Department of Physics. Current activity centers on:

- Astrophysical fluid dynamics, magnetohydrodynamics and radiation hydrodynamics
- Physics of dense stellar matter
- Accretion phenomena
- High energy and relativistic astrophysics
- Nuclear and particle processes in cosmology and astrophysics
- Black hole physics and astrophysics
- Gravitational wave phenomena

Facilities and Resources

- The Combined Array for Research in Millimeter-wave Astronomy is operated jointly by a consortium of the California Institute of Technology, the University of California Berkeley, the University of Chicago, the University of Illinois, and the University of Maryland, with the partner Universities having guaranteed observing time. At a new high-altitude site in eastern California, CARMA provides unparalleled sensitivity, broad frequency coverage, sub-arcsecond resolution and wide-field heterogeneous imaging capabilities, along with innovative technologies and educational opportunities. It is currently the most powerful telescope of its type in the world.
- The UNISIS (University of Illinois Seeing Improvement System) laser guided adaptive optics system at the Mt. Wilson 2.5-m telescope produces near-diffraction limited images over the wavelength range 900 nm to 2.5 m. Two imaging cameras, one for visible wavelengths and one for near-IR, simultaneously collect data.
- A number of projects in the Department of Astronomy are partnering with the National Center for Supercomputing Applications (NCSA) at Illinois. This includes development and application of astrophysical simulations such as the FLASH package and general relativistic magnetohydrodynamic codes that provide insight into the nature of structure formation and the physics of black holes. Astronomy faculty also leverage NCSA's pioneering development of cyberinfrastructure environments to facilitate data transport for the Sloan Digital Sky Survey (SDSS), the Palomar-Quest project, the CARMA project, the Dark Energy Survey, the Square Kilometer Array, and the Large Synoptic Survey Telescope. NCSA and the Astronomy Department also jointly founded the Laboratory for Cosmological Data Mining to apply novel algorithms to the rich datasets now available for cosmological analysis, including those from the SDSS and Wilkinson Microwave Anisotropy Probe.

Financial Aid

University fellowships are available and may be combined with part-time teaching assistantships. Most resident students are supported for their first two or three years by half-time teaching assistantships. The typical teaching assistant takes two or three graduate courses per semester and spends twenty hours per week handling quiz sections in elementary astronomy courses. Teaching assistantships are responsible positions, and the concomitant duties are considered to be a valuable part of the student's educational experience. Advanced students may compete for research assistantships offered by faculty members whose research is partially supported by federal grants.

Master of Science in Astronomy

ASTR 501	Radiative Processes	4
ASTR 502	Astrophysical Dynamics	4
Additional formal coursework (excluding thesis research, non-thesis research, and independent study credit hours, e.g., ASTR 599, ASTR 590)		16
Research/Project/Independent Study Hours (e.g. ASTR 590; min/max applied toward degree): ¹		4-8
Based on Placement Exam results, students may be required to complete ASTR 404, ASTR 405, ASTR 406, and/or ASTR 414 during their first year. A maximum of 8 hours of these courses may be applied to the degree (Max. 8) ²		8
Total Hours		24

Other Requirements ³

Other requirements may overlap

Of the additional formal coursework, the minimum number of hours in the unit (excluding thesis research, non-thesis research, and independent study credit hours) 8

Of the additional formal coursework, the minimum number of 500-level hours (excluding thesis research, non-thesis research, and independent study credit hours) 4

¹ Research Project (minimum 4 hours)

- The student will complete a research project with an Astronomy Department faculty member (i.e. ASTR 590). A paper reporting the results is required, which must be prepared in scientific journal style and approved by the faculty member.

2 Demonstrated Proficiency in Astronomy

(ASTR 404, ASTR 405, ASTR 406 and ASTR 414)

Students must show proficiency in the four courses by one of the following options:

- Pass the appropriate section of the placement exam (four sections aligned to the four courses), which is offered at the start of every Fall semester. A student can petition to take the exam once more the following year. The decision on petition approval by the graduate advisor will depend on the student's background and proficiency plan.
- Pass the course with a B grade or better.
- Students who have had an equivalent course at another institution (B grade or better) may petition for those courses to count as proficiency.

3 For additional details and requirements refer to the department's *Graduate Programs* (<http://www.astro.illinois.edu/academics/graduate/programs>) and the *Graduate College Handbook* (<http://www.grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in Astronomy**Entering with approved M.A./M.S. degree**

ASTR 501	Radiative Processes	8
& ASTR 502	and Astrophysical Dynamics ¹	

Based on Placement Exam results, students may be required to complete ASTR 404, ASTR 405, ASTR 406, and/or ASTR 414 during their first year. A maximum of 8 hours of these courses may be applied to the degree. ²

Research/Project/Independent Study Hours (e.g. ASTR 590 min/max applied toward degree):	4-24
ASTR 599 Thesis Research (min/max applied toward degree)	32-52

Total Hours 64

Other Requirements ³

Other requirements may overlap

Students may add a graduate concentration in Astrochemistry.

Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

⁴ Of the additional formal coursework, 8 is the minimum number of hours in the unit (excluding thesis research, non-thesis research, and independent study credit hours)

⁵ Of the additional formal coursework, 8 (with 4 in the unit) is the minimum number of 500-level hours (excluding thesis research, non-thesis research, and independent study credit hours)

Atmospheric Sciences

www.atmos.illinois.edu

Head of the Department: Robert M. Rauber
 Director of Graduate Studies: Robert M. Rauber
 101 Atmospheric Science Building
 105 South Gregory Street
 Urbana, IL 61801
 (217) 333-2046
 E-mail: dept@atmos.uiuc.edu

Major: Atmospheric Sciences
 Degrees offered: M.S., Ph.D.

Graduate Degree Programs

Graduate programs leading to the Master of Science and Doctor of Philosophy degrees are offered. Opportunity also exists for specializing in computational science and engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (<http://www.cse.illinois.edu/academics>).

Admission

Applications for admission are encouraged from students with bachelor's degrees in atmospheric sciences, meteorology, physics, mathematics, computer science, geography, engineering, oceanography, and related fields. It is strongly recommended that students who intend to study for advanced degrees in atmospheric sciences know the fundamentals of classical physics and applied mathematics. Applicants whose native language is not English are required to take the English Placement Test if accepted. All applicants are required to take the Graduate Record Exam (GRE) and submit three letters of reference.

Faculty Research Interests

The atmospheric science degree programs are designed for students interested in research and applications on a wide variety of atmospheric topics. Faculty areas of research include the physics of aerosol, clouds and precipitation; atmospheric radiative processes, radar and satellite meteorology, remote sensing, convective phenomena including severe storms, synoptic and mesoscale meteorology, boundary layer meteorology, tropical meteorology, numerical weather prediction, atmospheric dynamics, climate variability and climate modeling including chemical, radiative, and transport effects; atmospheric chemistry, land-atmosphere interactions, boundary layer meteorology, human and natural perturbations of global ozone and climate, biogeochemical cycles, and climate impacts and policy. This research is carried out in national field campaigns, in theoretical studies, and in numerical modeling efforts using a wide range of models.

Research Facilities

With more than 2.5 computers per person, the department maintains a capable and extensive computing infrastructure as this is a vital component of all of its educational, research and outreach endeavors. All graduate students, staff, and faculty members have a desktop computer, usually a Windows PC or Mac. There is a departmental computer lab for hands-on class exercises, computers and display projectors in each of the classroom areas and wireless access throughout the buildings. An up-to-date high-capacity network connects these to various departmental computing resources including e-mail, file and web servers, resources provided by the campus as well as our linux-based research computing systems.

These research systems include the department's ever-expanding computing cluster, dozens of terabytes worth of storage, other departmental systems and a number of systems specific to each faculty member's research group. These systems are used for numerical simulations, analysis and modeling of atmospheric processes ranging from the formation of individual ice crystals to century long climate simulations over the globe and are used for storing, analyzing and visualizing the results.

We receive and process a large quantity of real-time meteorological data and numerical forecasts from a variety of sources including agencies like NOAA, UCAR, international sources and other peer institutions. These are available for visualization with a variety of tools to aid in the understanding of current weather events and case studies of recent major events. We have a synoptic lab that is used for weather briefings. The synoptic lab includes a 15 panel "electronic map wall", which normally displays current weather maps but is used for research visualization purposes as well, as is our 3D Geowall display.

Because computers are only good when they work and you understand how to use them, the department maintains a dedicated computer support staff which is responsible for maintaining everything and personally assisting users with problems, questions and accomplishing their research goals.

Additionally we have access to the resources of the University as well as supercomputing centers, such as those at NCSA (which is on campus), NCAR and others.

Financial Aid

Financial aid is available in the form of research and teaching assistantships, University fellowships, and waivers of tuition and service fees. More information is available at the Department Website (http://www.atmos.illinois.edu/academics/grad_financial_aid.html).

A student may select either the thesis or non-thesis option. Further information can be obtained from the department's description of the Master's Degree requirements (http://www.atmos.illinois.edu/academics/grad_ms.html) on the Department Website (<http://www.atmos.illinois.edu>).

Master of Science in Atmospheric Sciences

Thesis Option

ATMS 599	Thesis Research (min/max applied toward degree)	4 or 8
Total Hours		32

Other Requirements ¹

Other requirements may overlap

The student is required to write a thesis and give a seminar on his/her thesis research.

Minimum Hours Required Within the Unit:	16 (not including 599)
Minimum 500-level Hours Required Overall in Program:	12
Minimum GPA:	3.0

Non-Thesis Option

Research/Project Hours (min/max applied toward degree):	4
Total Hours	32

Other Requirements ¹

Other requirements may overlap

The student is required to develop a project that focuses on a topic in one of three areas and present an informal (non-seminar series) talk to a committee.

Minimum Hours Required Within the Unit:	16
Minimum 500-level Hours Required Overall in Program:	12
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's Graduate Programs (<http://www.atmos.illinois.edu/academics/graduate.html>) website and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in Atmospheric Sciences

All candidates for the Ph.D. degree are required to pass a qualifying examination on basic principles of atmospheric sciences, a preliminary examination based on a written thesis proposal, and a final examination based on the completed thesis. Further information on course requirements and these examinations can be obtained from the department Website (http://www.atmos.illinois.edu/academics/grad_phd.html) description of the Ph.D. program.

ATMS 599	Thesis Research (min/max applied toward degree)	0 min
Total Hours		64

Other Requirements ¹

Other requirements may overlap

Student must take at least one course per semester (not including 599) until preliminary exam is passed.

Masters Degree Required for Admission to PhD?	No, but Masters Degree is strongly encouraged before pursuing the Ph.D. and Masters level requirements must be met (32 hours min)
Qualifying Exam Required	Yes
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes

Dissertation Deposit Required	Yes
Minimum GPA:	3.0

- ¹ For additional details and requirements refer to the department's Graduate Programs (<http://www.atmos.illinois.edu>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Biochemistry

www.mcb.illinois.edu/departments/biochemistry

Acting Head of the Department: James Morrissey
Associate Head of Department: Robert B. Gennis
Director of Graduate Studies: David M. Kranz
419 Roger Adams Laboratory
600 South Mathews Avenue
Urbana, IL 61801
(217) 333-2013
E-mail: biochem@mcb.uiuc.edu

Major: Biochemistry
Degrees offered: M.S., Ph.D.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Biochemistry and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Biochemistry offers graduate programs leading to the Master of Science and the Doctor of Philosophy degrees. For an application and departmental materials that provide greater detail on programs, offerings, admission, degree requirements, and financial aid, visit our website at www.mcb.illinois.edu/graduate/gradprospect.html.

The Department of Biochemistry is a part of the School of Molecular and Cellular Biology (MCB), which also includes the Departments of Cell and Developmental Biology, Microbiology and Molecular and Integrative Physiology as well as Programs in Biophysics and Neurosciences. The Department is part of an umbrella program in MCB that encompasses over 70 different research laboratories. Students admitted into any of these departmental graduate programs can select faculty thesis advisors from these active research laboratories in the School. In addition, dual degrees via the Medical Scholars Program are offered. Close ties are also maintained with the School of Integrative Biology, the School of Chemical Sciences, the College of Medicine, and the College of Veterinary Medicine.

Admission

Interested students must apply directly to the School of Molecular and Cellular Biology (www.mcb.illinois.edu/graduate/gradprospect.html). During the first semester, students perform three laboratory rotations, choosing from any laboratory in the School. Students select a laboratory for their thesis research in December in mutual agreement with their desired advisor and formally join the appropriate graduate program/department at that time.

Students electing biochemistry as a major for an advanced degree should have a strong background in chemistry, biology, physics, and calculus and a grade point average of a 3.0 or higher ($A = 4.0$). Admission requirements include: a bachelor's degree; Graduate Record Examination (GRE) scores. In addition to the above requirements, international students must attain a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 590 (243 on the computer-based test). A score of 96 on the internet-based test (iBT), with a score of 24 on the speaking section, is also accepted. The department does not normally admit students directly into the M.S. program.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Biochemistry. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Faculty Research Interests

Faculty research in the Department of Biochemistry covers a broad spectrum of the most dynamic areas of current research in biological chemistry and molecular biology: physical approaches to the structure and function of macromolecules and membranes; nucleic acid biochemistry and enzymology,

enzyme mechanisms and evolution; membrane biochemistry and bioenergetics; protein-lipid interactions; protein-nucleic acid interactions and molecular recognition; molecular biological approaches to gene organization and expression; immunology; microbial physiology, and signal transduction.

Centers, Programs, and Institutes

Biochemistry faculty are appointed and active in several cross-campus academic and research units, including the Center for Biophysics & Computational Biology, the Beckman Institute for Advanced Science and Technology, the Institute for Genomic Biology, as well as the interdepartmental graduate programs in Biophysics & Computational Biology, and Neuroscience, and the joint M.D./Ph.D. Medical Scholars Program of the College of Medicine.

Facilities and Resources

Campus resources for science research are state-of-the-art and available to all faculty research programs. Notably among these is the Roy J. Carver Biotechnology Center, which comprises the W.M. Keck Center for Comparative and Functional Genomics (Custom Library Services, High-Throughput Sequencing and Genotyping, DNA Core Sequencing, Fragment Analysis, Oligonucleotide Synthesis, Functional Genomics and Bioinformatics), Proteomics Services (Protein Science Facility, Immunological Resource Center and Flow Cytometry Facility), a Metabolomics Center and a Transgenic Mouse Facility. It also provides career counseling through the Career Services Office. Many other cross-campus facilities are important for the faculty research programs in Biochemistry, including the Fred Seitz Materials Research Laboratory, the National Center for Supercomputing Applications (NCSA), the high-field VOICE NMR Laboratory, Mass Spectrometry Center, Microanalysis Laboratory, Cell Media Facility, and many electronics, machine and glass shop service facilities. The University of Illinois is also a full member of the LS-CAT beamline for macromolecular crystallography at the Advanced Photon Source, Argonne National Laboratory.

Financial Aid

Financial aid for Ph.D. graduate students in biochemistry is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. In addition, interdepartmental training grants from the National Institutes of Health support multidisciplinary training programs. Qualified candidates are considered for financial support upon application. Graduate students making satisfactory progress toward their degrees generally receive a stipend, as well as a full tuition waiver and a partial fee waiver.

Master of Science Biochemistry

A coursework master's degree requires a minimum of two full-time semesters. A thesis master's degree usually requires a minimum of three semesters.

Thesis Option

Core curriculum	20
BIOC 599	Thesis Research (12 max applied toward degree)
Total Hours	32

Other Requirements ¹

Other requirements may overlap

Minimum Hours Required Within the Unit:	8
Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's Program of Study (<http://www.mcb.illinois.edu/departments/biochemistry/gradpgmstudy.html>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Non-Thesis Option

Core curriculum	32
Total Hours	32

Other Requirements ¹

Other requirements may overlap

Minimum Hours Required Within the Unit:	8
Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's Program of Study (<http://www.mcb.illinois.edu/departments/biochemistry/gradpgmstudy.html>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in Biochemistry

Biochemistry/MCB core courses and advanced elective courses	32
BIOC 599 Thesis Research (min/max applied toward degree)	64
Total Hours	96

Other Requirements ¹

Other requirements may overlap

A minimum of one year of teaching in lecture or laboratory courses is required.

A thesis based on original research must be presented to a review committee at least two weeks before the final oral examination.

Masters Degree Required Before Admission to PhD?	No, but Masters level requirements must be met (32 hours)
Qualifying Exam Required	Yes, students must pass an oral research qualifying examination within the first 18 months of residence.
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes, and the final examination is limited to a defense of the thesis research.
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's Program of Study (<http://www.mcb.illinois.edu/departments/biochemistry/gradpgmstudy.html>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Bioenergy

bioenergy.illinois.edu

Director of Graduate Studies: Hans Blaschek
 Rooms 34-36 Animal Sciences Laboratory
 1207 W. Gregory Drive
 Urbana, IL 61801
 (217) 244-9270
 E-mail: blascheck@illinois.edu

Major: Bioenergy
 Degrees Offered: M.S.
 Graduate Concentration: Professional Science Master's (p. 869) (M.S. only)

Graduate Degree Programs

The Center for Advanced Bioenergy Research in the College of ACES offers a Master of Science with a Major in Bioenergy and a Concentration in Professional Science Master's. In addition to receiving training in the general field of bioenergy, students gain relevant professional experience in business and related topics through coursework and an internship. This program is designed for those who seek careers in a science-based setting with significant managerial and leadership responsibilities.

Admission

In addition to meeting the Graduate College admission requirements, applicants should have a baccalaureate degree in a recognized field of biological, physical, agricultural, socio-economic or engineering science. Graduate Record Examination (GRE) scores are required of all applicants. The minimum recommended Test of English as a Foreign Language (TOEFL) score is 580 on the paper-based test, 237 on the computer-based test, and 79 on the internet-based test. Applications are only accepted for the fall semester. Transfer credit may not be applied to this program due to the cohort nature of this program.

Financial Aid

Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted.

Master of Science in Bioenergy

The curriculum requires 42 graduate hours, consisting of a core and elective program, in addition to the required PSM concentration. The areas of specialty are Plants, Soils and Feedstocks; Production, Processing and Use; Environment, Economics and Policy & Law, and Tools and Methods.

ACES 409	Bioenergy Systems	3
or ACES 509	Advanced Bioenergy Systems	
ACES 501	Advanced Bioenergy Topics	2
Courses (7 to 9) in the area of specialty from a designated list, and in consultation with the Director of Graduate Study		27
Business courses prescribed by the Illinois PSM program		10
PSM 501	PSM Industry Seminar I	0
PSM 502	PSM Industry Seminar II	0
PSM 503	PSM Industry Seminar III	0
PSM 555	PSM Internship	0
Total Hours		42

Other Requirements ¹

Other requirements may overlap

A concentration is required.

Minimum 500-level Hours Required Overall:	12
Minimum Hours Required Within the Unit:	8 at the 500 level

Students will not be eligible to transfer graduate credit into this major. See individual program pages for specific details of disciplinary requirements.

Minimum GPA:	2.75
--------------	------

¹ For additional details and requirements for all degrees, please refer to the program's Graduate Degree Requirements (<http://www.bioenergy.illinois.edu/education/major.html>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

 Major: Bioinformatics
 Degrees Offered: M.S.
 Graduate Concentration: Bioengineering

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Bioengineering and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Bioengineering offers studies leading to the Master of Science in Bioengineering and the Doctor of Philosophy in Bioengineering. The Bioengineering Graduate Program provides students with educational and research experiences that integrate the sciences of biology and medicine with the practices and principles of engineering. Areas of focus include Bio-imaging, Cell & Tissue Engineering, Micro and Molecular Technologies, and Computational Biology. Opportunity also exists for specializing in (1) computational science and engineering and (2) energy and sustainability engineering via the Computational Science and Engineering (CSE) Option (<http://cse.illinois.edu/students/graduate-program>) and the Energy and Sustainability Engineering (EaSE) Option (<http://ease.illinois.edu>). The Medical Scholars Program (<https://www.med.illinois.edu/mdphd>) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Bioengineering.

Admission

Applicants should have an undergraduate degree in a natural science, computer science, or engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. Applicants should show evidence of strong quantitative skills and of serious interest in the life sciences. Applicants with a grade point average of greater than 3.00 (A = 4.00) may be considered for admission to the Ph.D. program. In addition, applicants to the Ph.D. program must submit results from the Graduate Record Examination (GRE) (<http://www.ets.org>) general test.

All applicants whose native language is not English must submit a minimum TOEFL (<http://www.toefl.org>) score of 97 (iBT), 243 (CBT), or 590 (PBT); or minimum International English Language Testing System (IELTS) (<http://www.ielts.org>) academic exam scores of 6.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (<http://grad.illinois.edu/admissions/instructions/04c>) are met. For those taking the TOEFL or IELTS, full admission status (<http://grad.illinois.edu/admissions/instructions/04c>) is granted for scores of 103 (TOEFL iBT) or greater, 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status (<http://grad.illinois.edu/admissions/instructions/04c>) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (<http://linguistics.illinois.edu/students/esl/guidelines>) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Degree Requirements

For additional details and requirements for all degrees, please refer to the department's Graduate Studies Web site (<http://bioengineering.illinois.edu>) and the Graduate College Handbook (<http://grad.illinois.edu/gradhandbook>).

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Bioengineering. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Bioengineering and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. An application to the Medical Scholars Program will also serve as the application to the Bioengineering graduate program. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146, mspo@illinois.edu or at www.med.illinois.edu/mssp.

Faculty Research Interests

Bioengineering faculty perform research in the areas of Bio-Imaging at Multi-Scale, Molecular, Cellular and Tissue Engineering, Bio-Micro and Nanotechnology, Computational Bioengineering, and Synthetic Bioengineering. In addition to Bioengineering faculty (<http://bioengineering.illinois.edu/directory>), Department of Bioengineering has more than 50 affiliate faculty (<http://bioengineering.illinois.edu/directory>).

Financial Aid

Qualified students may apply for financial aid in the form of fellowships, teaching and research assistantships, and waivers of tuition and service fees. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (<http://grad.illinois.edu/admissions/taengprof.htm>) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

Major: Biology
Degrees Offered: M.S., Ph.D.

Graduate Degree Programs

The M.S. in Biology allows students to increase their knowledge of biology and become involved with graduate-level research in biology without the long-term commitment of a Ph.D. program. The work is personally designed by each student in consultation with an adviser. Breadth of training is encouraged.

Admission

The Master of Science in Biology Program is being phased out and is no longer accepting applications or transfer students.

Financial Aid

Financial assistance is not available to M.S. students through the program.

Master of Science in Biology

To maintain active status in the program students must register for 12 credit hours in 400- or 500-level biology courses per semester. If a student has a teaching or research appointment he or she may register for 8 credit hours. A research report or thesis is required of all candidates for the degree. To maintain active status in the program students must register for 12 credit hours in 400- or 500-level biology courses per semester. Center Director: Taekjip Ha
179 Loomis
1110 West Green Street
Urbana, IL 61801
Contact: Cindy Dodds
(217) 333-1630
E-mail: biophysics@life.illinois.edu

Major: Biophysics and Computational Biology
Degrees offered: M.S. and Ph.D.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Biophysics and Computational Biology and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

Biophysics and Computational Biology offers a doctor of philosophy degree program. In rare circumstances and with special permission of the director and advisor, a current student may obtain a terminal master's degree after meeting the requirements of the degree. Biophysics students are not admitted initially into the program for a Master's Degree. Opportunity also exists for specializing in computational science and engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (<http://www.cse.illinois.edu/admissions/biop>).

Admission

The objective of the program in biophysics program is to give students sufficient training in physics, chemistry, and biology to enable them to apply the conceptual, instrumental, and mathematical approaches of the physical sciences for solving biological problems. The curriculum is broadly based and provides sufficient flexibility for students entering with either previous training in the physical sciences or for students with a background in biology and some experience in the physical sciences.

Admission requirements are usually one year of college biology, one year of college physics, chemistry through organic chemistry, and mathematics through calculus; however deficiencies in one of these areas can be corrected during the first two years of study. Most applicants who are accepted into the program have general Graduate Record Examination (GRE) scores in the 70%-90% range. The Biophysics and Computational Biology Program does not require the subject GRE for admission. The Test of English as a Foreign Language (TOEFL iBT) or IELTS is required for international applicants.

Please refer to the Biophysics and Computational Biology Admissions Web page (<http://www.life.illinois.edu/biophysics/program/admissions.html>) for additional information and application deadlines.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Biophysics and Computational Biology. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program. Every biophysics student is required to serve as a teaching assistant for one semester at the quarter time level or higher.

Faculty Research Interests

Over 40 faculty members from the Schools of Molecular and Cellular Biology, Chemical Sciences, and Medicine, and the College of Engineering are affiliated with the Center for Biophysics and Computational Biology. Faculty interests range from experimental biophysics (single molecule spectroscopy, protein and RNA folding, molecular dynamics, cellular biophysics, imaging, etc.) to computational and theoretical biophysics (utilizing a wide range of computer platforms to simulate diverse biological phenomena at many levels as well as bioinformatics). Individual faculty interests can be found on the Biophysics Website (<http://biophysics.illinois.edu/people/faculty>).

Facilities and Resources

Center faculty and students have access to world-class research facilities at the University of Illinois, including the Beckman Institute, the Illinois Electron Paramagnetic Resonance Research Center, the Biomedical Imaging Center, the Institute for Genomic Biology, the Biotechnology Center, the National Center for Supercomputing Applications, and the School of Chemistry Mass Spectroscopy Lab.

Financial Aid

As a rule, all graduate students in biophysics are guaranteed financial support throughout their studies, provided they remain in good standing. This support can be in the form of research assistantships, teaching assistantships, traineeships, or fellowships. After the first semester of study, most students are supported directly by their research advisor in the form of a research assistantship, which continues until graduation.

Master of Science in Biophysics and Computational Biology

Thesis Option

10 hours of 500-level biophysics courses with a minimum GPA of 3.25 (does not include seminar courses and/or research units and can include no more than 2 hours of tutorials). 500-level courses in other departments count towards this 500-level formal course requirement if they are on the approved Biophysics course list. 10

BIOP 401	Introduction to Biophysics (or equivalent)	3
Elective hours approved by Center Director to bring total hours to		32
BIOP 599	Thesis Research (4 min applied toward degree)	4
Total Hours		32

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's *Student Handbook* (<http://biophysics.illinois.edu/programs/courses.html>) and the *Graduate College Handbook* (<http://www.grad.illinois.edu/gradhandbook>).

Non-Thesis Option

10 hours of 500-level biophysics courses with a minimum GPA of 3.25 (does not include seminar courses and/or research units and can include no more than 2 hours of tutorials). 500-level courses in other departments count towards this 500-level formal course requirement if they are on the approved Biophysics course list. 10

BIOP 401	Introduction to Biophysics (or equivalent)	3
Research/Project Hours (4 min applied toward degree)		4
Elective hours approved by Center Director to bring total course work hours to		32
Total Hours		32

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's *Student Handbook* (<http://biophysics.illinois.edu/programs/courses.html>) and the *Graduate College Handbook* (<http://www.grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in Biophysics and Computational Biology

The Ph.D. degree is a research degree, and the program is designed with a major emphasis on individual research.

A qualifying examination is offered each spring. This qualifier must be passed by the end of the second year. After formulating a definite research problem, and by the end of the third year, the student takes a preliminary examination where the chosen research topic is presented to the student's faculty committee. The committee also examines the candidate on their chosen general research area. Finally, a thesis is defended at the final

examination. The Ph.D. thesis is based on original work of the student. The thesis and the exam must demonstrate a thorough knowledge of theory and techniques in one of the areas of biophysics.

BIOP 401	Introduction to Biophysics (or equivalent)	3
BIOP 595	Biophysics Seminars (Sections A & B)	3
BIOP 586 & BIOP 590	Special Topics in Biophysics and Individual Topics	10
MCB 580	Res Ethics & Responsibilities	1
BIOP 581	Lab Rotation I	2
BIOP 582	Lab Rotation II	2
BIOP 583	Lab Rotation III	2
Two 500-level courses from the pre-approved Biophysics course list		
One computational or experimental lab course – based on the student's research focus		
BIOP 599	Thesis Research (32 max applied toward degree)	32
Total Hours		64

Other Requirements ¹

Other requirements may overlap

Students are required to teach for a minimum of one semester during their graduate career

Masters Degree Required in Biophysics and Computational Biology for Admission to PhD?	No, but Masters level requirements must be met (32 additional hours min)
Qualifying Exam Required	Yes
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

Graduate Degree Programs

The Department of Business Administration offers graduate programs leading to the Master of Science in Technology Management, Master of Science and the Doctor of Philosophy (Ph.D.) in Business Administration degrees.

Admission

Admission to the Ph.D. program requires an undergraduate degree with a scholastic average of at least B for the last 60 hours, acceptable scores on the Graduate Management Admission Test (GMAT) or Graduate Records Examination (GRE), three letters of recommendation, and a statement of career goals including research interests.

Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL), CBT, iBT or IELTS. Ph.D. candidates must achieve the University minimum scores on these examinations.

www.grad.illinois.edu/admissions/apply

The Ph.D. program allows fall admission only. Please check the Departmental listing for current requirements and program information:

www.business.illinois.edu/ba/programs/phd/

Admission to the MS in Technology Management program requires an undergraduate degree with a scholastic average of at least B for the last 60 hours, three letters of recommendation, and a statement of career goals.

Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL), CBT, iBT or IELTS. Candidates must achieve the University minimum scores on these examinations (currently 550 on the paper-based TOEFL or 213 on the computer-based TOEFL or 79 on the iBT).

Inquiry regarding the M.S. should be made to the Department of Business Administration.

Faculty Research Interests

Faculty research interests are in the areas of marketing, organizational behavior, organization theory, decision sciences, information systems, strategic management, risk analysis, judgment under uncertainty, international business, production and operations management, accounting, economics, entrepreneurship, and finance. The College of Business houses computer facilities, a behavioral science laboratory, and a separate library. The college

maintains contacts with industry and government through its Survey Research Laboratory, Illinois Business Consulting, the Academy for Entrepreneurial Leadership and several professional and scholarly journals edited by its faculty.

www.business.illinois.edu/ba/people/

Financial Aid

Most Ph.D. students receive some form of financial assistance. This assistance is likely to be in the form of a teaching or research assistantship, which includes a waiver of tuition and some fees, and/or the award of a merit-based fellowship. The M.S. in Business Administration and the M.S. in Technology Management do not provide assistantships.

- Master of Science in Business Administration (p. 578)
- Master of Science in Technology Management (p. 579)

Doctor of Philosophy in Business Administration

This program offers an in-depth education in teaching and research in selected areas of business and administration. Doctoral students can specialize in marketing, organizational behavior/theory, management science/process management, information systems, and strategic management. The program is intensive, flexible, and adapted to individual needs.

Each student's program entails sufficient study and preparation to achieve the following:

1. competence in a common core covering substantive and research methods courses, which are formulated by the faculty in each area;
2. in-depth expertise in a major area;
3. expertise in at least one area in addition to the chosen major area, with this minor area selected from within or outside the department;
4. teaching experience; and
5. research or problem-solving competence.

Competency is determined by comprehensive written and/or oral examinations. Following successful completion of all coursework and comprehensive examinations in major and minor areas, students must propose and gain approval of a thesis topic at a public colloquium. The final program requirement is the successful oral defense of the thesis. Applicants should contact the department for current requirements and program design.

The program usually is completed in four years. Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Entering with approved M.S./M.A. degree

Business Administration core requirement	4
Concentration area courses (12 min)	12
Minor area courses (12 min)	12
3 courses in research methodology (12 min)	12
Students are required to attend pro-seminars in their respective areas	0-4
BADM 599 Dissertation Research (min/max applied toward degree)	32
Total Hours	64

Other Requirements ¹

Other requirements may overlap

Ph.D. candidates must maintain continuous registration through the approval of a dissertation proposal, unless a leave has been approved by the department.

Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	2.75

¹ For additional details and requirements refer to the department's Programs of Study (<http://www.business.illinois.edu/ba/programs/phd>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Graduate Concentration in Corporate Governance and International Business

The concentration in Corporate Governance and International Business is designed to develop leaders in various business fields who understand international business and corporate governance issues within the global economy. It specifically covers topics such as (1) how to create value for multinational partners, employees with diverse cultural backgrounds, and shareholders by designing better organizations and corporate governance structures; and (2) how managerial practices differ in various national/cultural contexts and why managers must be able to understand the strategic, financial, and economic implications of these differences in managing multinational corporations. The concentration will provide a strong foundation in the International Business and Governance area and can be tailored to fit the specific career needs of students.

This concentration requires submission of twelve graduate hours of Corporate Governance and International Business related coursework. Successful completion of the concentration assumes certain knowledge of business and prior coursework.

Admission to the concentration requires a Graduate Student Request Form submitted to the Department and Graduate College and admission to one of these programs:

- Master of Science in Business Administration
- Master of Business Administration
- Master of Science in Accountancy
- Master of Science in Finance
- Master of Accounting Science

Admission is limited, and acceptance is on a competitive basis.

Select three of the following:

12

BADM 532	Sust Products for Subsistence
BADM 582	Multinational Management
BADM 583	Current Topics in Intl Bus
BADM 584	Global Marketing
BADM 586	Intl Comparative Management
BADM 590	Seminar in Business Admin (US Corporate Governance)
BADM 590	Seminar in Business Admin (Technology and Globalization)
BADM 590	Seminar in Business Admin (Global Strategy)

Total Hours

12

Other Requirements

Course substitutions may be approved by the Department after consultation with the IB & Business Law Area faculty.

In addition to the concentration requirements, students must also complete the requirements of their major degree.

Graduate Concentration in Information Technology and Control

The concentration in Information Technology and Control is designed to develop leaders in various business fields who understand (1) how to leverage information technology to create value for customers, external partners, and shareholders by designing better information systems to improve business processes and controls; and (2) how managers can assess the strategic, financial, and economic benefits and risks of investing in advanced information systems. The concentration will provide a strong foundation in the IS/IT area and can be tailored to fit the specific career needs of students.

This concentration requires submission of twelve graduate hours of Information Technology and Control related coursework. Successful completion of the concentration assumes certain knowledge of business and prior coursework.

Admission to the concentration requires a Graduate Student Request Form submitted to the Department and Graduate College and admission to one of these programs:

- Master of Science in Technology Management
- Master of Business Administration
- Master of Science in Accountancy
- Master of Science in Finance
- Master of Accounting Science

Admission is limited, and acceptance is on a competitive basis.

Select three of the following:

12

Total Hours		12
BADM 554	Enterprise Database Management	
BADM 555	Info Sys Development and Mgt	
BADM 556	Electronic Commerce	
BADM 557	Dec Support and Knowledge Mgt	
BADM 559	Enterprise IT Governance	

Other Requirements

In addition to the concentration requirements, students must also complete the requirements of their major degree.

Course substitutions may be approved by the Department after consultation with the IT Area faculty.

Graduate Concentration in Supply Chain Management

The concentration in Supply Chain Management is designed to develop leaders who understand (1) how to assess the trade-offs and make the decisions necessary to sustain high quality products and services at lower costs while maintaining the flexibility necessary to adapt and to respond to evolving market trends; and (2) how to coordinate and integrate supply chain solutions across various intra -organizational and inter -organizational

interfaces in any business or organization. The minor or concentration not only will provide a strong foundation in supply chain management principles and practices, but also can be tailored to fit the specific needs of students interested in careers across a wide variety of industries. This minor or concentration requires submission of twelve graduate hours of Supply Chain Management coursework. Successful completion of the minor or concentration assumes certain knowledge of business and prior coursework.

Admission to the minor or concentration requires submitting a Curriculum Change Form to the Department and Graduate College and admission to one of these programs:

- Master of Science in Technology Management
- Master of Science in Business Administration
- Master of Business Administration
- Master of Science in Accountancy
- Master of Accounting Science

Admission is limited, and acceptance is on a competitive basis.

BADM 566	Supply Chain Management	2-4
BADM 567	Process Management	2-4
Select from the following:		
BADM 568	Planning and Control Systems	
BADM 569	Res Topics in Operations Mgt	
BADM 590	Seminar in Business Admin (Section OM)	
BADM 590	Seminar in Business Admin (Section SS)	
Total Hours		12

Other Requirements

In addition to the concentration requirements, students must also complete the requirements of their major degree.

Graduate Minor in Corporate Governance and International Business

The minor in Corporate Governance and International Business is designed to develop leaders in various business fields who understand international business and corporate governance issues within the global economy. It specifically covers topics such as

1. how to create value for multinational partners, employees with diverse cultural backgrounds, and shareholders by designing better organizations and corporate governance; and
2. how managerial practices differ in various national/cultural contexts and why managers must be able to understand the strategic, financial, and economic implications of these differences in managing multinational corporations.

The minor will provide not only a strong foundation in the International Business and Governance area but could be tailored to fit the specific career needs of our students.

This minor requires twelve graduate hours of related coursework. Admission to the minor requires an application to the Department and admission to one of the M.S. programs in the College of Business or a graduate program in a related discipline approved by the Department. Admission is limited and acceptance is on a competitive basis.

Select three of the following:		12
BADM 582	Multinational Management	
BADM 583	Current Topics in Intl Bus	
BADM 584	Global Marketing

---------------------	----

Other Requirements

In addition to the minor requirements, students must also complete the requirements of their major degree.

Please contact your department for more information regarding the addition of a minor to your program of study.

Master of Science in Business Administration

The Master of Science in Business Administration is a 40 graduate hours master's program best suited for those with a strong technical expertise in one of the concentrations offered within the Ph.D. program. The focus is on preparation for advanced study in the doctoral program or for a research-oriented position. The coursework can usually be completed in four semesters. A major must be specified from one of six areas offered within the Department of Business Administration: organizational behavior/theory, strategic management, marketing, decision sciences and information systems, and process management/management science. At least two courses should be chosen from another area within the Department of Business Administration or a related area outside the department or college. Currently the department does not admit students directly for this degree.

Total Hours 40

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall:	12
Minimum GPA:	2.75

¹ For additional details and requirements refer to the department's Program Curriculum (<http://business.illinois.edu/msba/academics>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Master of Science in Technology Management

The Master of Science in Technology Management is focused on understanding how to manage the dynamic environment found in a technology-based enterprise. The curriculum covers core business topics tailored to address the issues and challenges inherent in companies that depend on technology. The course work of this intensive 12-month long program includes product development, marketing, simulation and risk analysis, finance, and strategy, as well as managing processes, intellectual property, innovation, human resources, and an option of an internship or curricular practical training - all focusing on technology. This is an intensive program for those who use, deploy, shape, or create technology.

In addition to formal coursework, students participate in a series of management development seminars, which provide an overview of American business concepts and practices. Business and industry field trips, seminars with American executives, and other special activities provide another dimension to the program.

Currently, the MSTM program is offering two tracks, Graduate and Advancement. The Graduate Track is designed for students recently graduated from undergraduate programs in the sciences, mathematics, engineering, and business. The Advancement track is designed for career professionals. To reflect the experiential knowledge possessed by members of the Advancement track, coursework requirements are slightly different in each track.

Major: Business Administration
Degrees offered: M.B.A.

Graduate Degree Programs

The College of Business offers a degree program leading to the Master of Business Administration (M.B.A.) in three delivery modes. The traditional full-time MBA and the part-time, evening MBA are offered on the Urbana campus. The Executive MBA is offered weekends in downtown Chicago.

Admission

The Executive MBA begins a new class cohort each September in Chicago. Admissions decisions are made on a rolling basis beginning in January. Candidates must have a minimum of seven years of full-time, professional work experience to be considered for the program.

Master of Business Administration (MBA) - Chicago

The program culminates with an international study experience in which students consult on real business issues with international organizations and travel overseas to present their recommendations to these companies.

This program caters to senior executives. Each course in the EMBA program is conducted over four weekends. Since the class schedule is compressed over a short period of time, exams / final projects / final assignments are due two weeks after the last class meeting.

E-mail: mba@illinois.edu - Full-time MBA

IllinoisPTMBA@illinois.edu - Professional MBA

Major: Business Administration

Degrees offered: M.B.A.

Graduate Concentration: Accountancy (p. 500), Corporate Governance and International Business (p. 573), Information Technology and Control (p. 574), Supply Chain Management (p. 574)

Joint Degree Program: the M.B.A. can be earned jointly with any master's or Ph.D. program offered on campus as well as:

J.D. in Law (p. 776),

M.D. in Medicine (Medical Scholars Program (<http://www.med.illinois.edu/mdphd>))

Graduate Degree Programs

The College of Business offers a degree program leading to the Master of Business Administration (M.B.A.) in two delivery modes. The traditional full-time MBA and the Professional (part-time) MBA are offered on the Urbana campus.

Admission

Admission to the Illinois MBA is dependent upon an earned undergraduate degree, acceptable scores on the Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE), two letters of recommendation, professional resume and essays. Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL) or the IELTS. For additional requirements the applicant should refer to the MBA application.

The full-time MBA program begins in August only. Admissions decisions are made by rounds with the first deadline of October 5 and subsequent deadlines of January 18 and March 15. May 24 is the late application deadline for domestic students only. Decisions will be made in early January for the first round of applications and within six weeks for each of the following rounds. For admission to a joint program, students must apply to both programs separately.

The Professional MBA program begins in January only. Applicants must submit the same materials and information as the full-time MBA program. The Professional MBA application does not require the GMAT or GRE. All applicants are expected to be employed full-time while pursuing the degree. The application deadline for the Professional MBA is October 1 with admission decisions made on a rolling basis beginning in September.

Financial Aid

The Illinois MBA offers a limited number of merit scholarships to outstanding domestic and international applicants. The merit scholarships are awarded at the time of admission. U.S. citizens and permanent residents may be eligible for federal and private student loans.

- Master of Business Administration (MBA), Full-time option (p. 584)
- Master of Business Administration (MBA), Professional (part-time) option (p. 584)

M.B.A. and Master's or Ph.D.

The M.B.A. can be earned jointly with any masters or Ph.D. program offered on campus. All joint degree programs require the completion of 60 credit hours of MBA coursework, as well as the requirements of the other program, as described here (p. 583). For admission to a joint program, students must receive approval from both programs.

M.B.A. and Master of Architecture in Architecture

For entry into this program, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission may be made simultaneously to both units or admission to one unit may be sought after gaining entry to the other.

Candidates entering the Master of Architecture/Master of Business Administration joint degree program with a four-year baccalaureate in architectural studies must complete 110 hours of graduate work, 50 hours in Architecture and 60 hours for the M.B.A.

M.B.A and Master of Human Resources and Industrial Relations

This joint program with the Master of Human Resources and Industrial Relations (p. 767) program is usually completed in two-and-one-half years. Independent admission decisions are made by each unit, and the student must be accepted by both. The degrees are awarded simultaneously upon completion of all joint degree requirements.

M.B.A. and J.D. in Law

Contact the M.B.A. program for more information about the joint program with Law.

M.B.A. and M.D. in Medicine

Contact the M.B.A. program for more information about the joint program with Medicine.

M.B.A. and Master's or Ph.D.

Joint M.B.A. Program

The M.B.A. can be earned jointly with any masters or Ph.D. program offered on campus. All joint degree programs require the completion of 60 credit hours of MBA coursework, described below, as well as the requirements of the other program. For admission to a joint program, students must receive approval from both programs.

MBA 501 & MBA 502	Foundations of Business I and Foundations of Business II	20
MBA 503 & MBA 504 & MBA 505	Prin & Proc of Management I and Prin & Proc of Management II and Topics in Management	20
Area of concentration		16
Free electives		4
M.B.A. Total Hours:		60

Joint degree students must complete all the requirements of the other degree.

Other Requirements ¹

Other requirements may overlap

Joint degree students must complete all the requirements of the other degree.

Minimum Hours Required Within the College of Business:	56
Minimum 500-level Hours Required Overall in Business:	60

Students in joint degree programs must be registered as full-time MBA students for a minimum of three semesters

Joint degrees are only awarded simultaneously.

Students enrolled in joint degree programs must meet the higher of the two minimum GPA requirements of the joint degree programs in order to maintain satisfactory academic progress and to graduate.

¹ For additional details and requirements refer to the department's graduate curriculum (<http://www.mba.uiuc.edu/m>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Master of Business Administration, Full-Time Option

The Illinois MBA emphasizes co-curricular activities designed to complement classroom experiences while further developing leadership skills, including communications, teamwork, and self-awareness technical training in current computer software, and career services with a focus on internships and permanent placements.

MBA 501 & MBA 502	Foundations of Business I and Foundations of Business II	20
MBA 503 & MBA 504 & MBA 505	Prin & Proc of Management I and Prin & Proc of Management II and Topics in Management	20
Area of concentration		16
Free electives		16
Total Hours		72

Other Requirements ¹

Other requirements may overlap

Minimum Hours Required Within the College:	56
Minimum 500-level Hours Required Overall:	72
It is the expectation that all MBA students will have an internship during the summer	
MBA students must enroll on a full-time basis during the fall and spring semesters for the two years of the MBA	
Minimum GPA:	2.75

¹ For additional details and requirements refer to the department's graduate curriculum (<http://www.mba.illinois.edu/academics>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Master of Business Administration, Professional (part-time) Option

The Professional MBA program provides a general management curriculum and focus. The curriculum includes 72 credit hours that are completed over a two and a half year period. This program is designed especially for employed professionals who want to continue working while they pursue the MBA degree.

Cell and Developmental Biology

mcb.illinois.edu/departments/cdb/

Head of the Department: Andrew S. Belmont
 B107 Chemical and Life Sciences Laboratory
 601 South Goodwin Avenue
 Urbana, IL 61801
 (217) 333-6118
 E-mail: mcbinfo@life.uiuc.edu (biochadm@scs.uiuc.edu)

Major: Cell and Developmental Biology
 Degrees Offered: M.S., Ph.D.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Cell and Developmental Biology and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Program

The graduate curriculum in Cell and Developmental Biology is designed to educate students for careers in research and teaching in the biological sciences. Departmental faculty are concerned with the structural and functional relationships of cells and organisms, with research emphases upon eukaryotic cell and molecular biology, neurobiology, developmental biology, and molecular genetics. The department has embarked on a major program to develop research strengths in molecular aspects of developmental, neural, structural, and eukaryotic cell biology to complement existing faculty interests. Students are not admitted to the M.S. program; M.S. requirements are completed as part of the Ph.D. program.

Admission

Students interested in this program must apply directly to the School of Molecular and Cellular Biology (www.mcb.illinois.edu/graduate/gradprospect.html). During the first semester, students perform three laboratory rotations, choosing from any laboratory in the School. Students select a laboratory for their thesis research in December and formally join the appropriate graduate program/department at that time.

Important factors in the evaluation of applications are general academic performance, background in the biological and chemical sciences and mathematics, Graduate Record Examination (GRE) scores, and letters of recommendation from college professors. The department does not admit students to the M.S. program.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Cell and Developmental Biology. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Facilities and Resources

Facilities include modern, well-equipped laboratories for cellular, developmental, genetic, molecular, and structural studies. The University offers exceptional and broadly based research support services. These include the Center for Electron Microscopy, with state-of-the-art instrumentation; the Center for Biotechnology, which includes facilities for molecular cloning, DNA and protein synthesis and sequencing, and transgenic animals; the Cell Science Center, which houses and staffs a hybridoma facility and flow cytometry unit; School of Molecular and Cellular Biology-subsidized shops; and a superb university library system, the third largest in the nation. The University offers outstanding computer services and is home to the National Center for Supercomputing Applications. The Beckman Institute for Advanced Science and Technology combines research in the physical and biological sciences. Opportunities for interaction in the cellular and molecular sciences are also available in many other units within the Schools of Molecular and Cellular Biology, Integrative Biology, and Chemical Sciences and the Colleges of Medicine, Agricultural, Consumer and Environmental Sciences, and Engineering.

Financial Aid

Financial aid is available to qualified applicants in the form of university fellowships (awarded on a competitive basis), teaching assistantships (awarded by the department), research assistantships, and tuition and fee waivers. Outstanding applicants are nominated for support from the Cell and Molecular Biology, Molecular Biophysics.

Chemical Physics

www.chemistry.illinois.edu

Head of the Department of Chemistry: Steven C. Zimmerman

Head of the Department of Physics: Dale Van Harlingen

Students with undergraduate degrees in chemistry should direct inquiries and applications to the Department of Chemistry

106 Noyes Laboratory

505 South Mathews Avenue, Urbana, IL 61801.

Students with undergraduate degrees in physics should direct inquiries and applications to the Graduate Advising Office, Department of Physics

227 Loomis Laboratory of Physics

1110 West Green Street, Urbana, IL 61801-3080

Major: Chemical Physics

Degree Offered: Ph.D.

Graduate Degree Programs

A chemical physics program leading to the Doctor of Philosophy makes it possible for students to gain the necessary background and perform original research in this interdisciplinary field of science. Fundamental research on many properties of molecular and solid-state systems is based on an understanding of chemistry, physics, and mathematics that can best be obtained by training in more than one department. Students may use the facilities in both the School of Chemical Sciences and the Department of Physics.

Admission

Applicants who have fulfilled the usual undergraduate course requirements, including at least 25 semester hours in chemistry (properly distributed) and a grade point average of 3.0 (A = 4.0), may be considered for admission to the graduate programs. Applications from students with less than the usual preparation in chemistry or with grade point averages below 3.0 may be considered on an individual basis. In addition, applicants must submit results from the Graduate Record Examination general test and the Graduate Record Examination chemistry subject test.

International students whose native language is not English are required to have a minimum paper-based TOEFL score of 580 (237 on the computer-based test). In addition, teaching is a requirement in the Chemistry graduate program and there are special requirements for applicants whose native language is not English. The University requires a minimum Test of Spoken English (TSE) score of 50 for a contact teaching assistant appointment. Any applicant whose native language is not English is expected to provide TSE scores in order to receive full consideration for admission and financial aid.

Please contact chemistry graduate admissions for further information.

Financial Aid

Students may apply for fellowships and assistantships from either the Department of Chemistry or the Department of Physics.

Doctor of Philosophy in Chemical Physics

In addition to taking a series of appropriate courses determined mainly by their research interests, students must pass either the qualifying examination in the Department of Physics or the formal review in the Department of Chemistry. Knowledge of basic quantum mechanics and statistical mechanics must also be demonstrated (for example, by passing the final examination in appropriate courses). In addition, students must pass an oral preliminary examination concerned with their preparation for doing research. Research for the thesis is performed under the direction of faculty members who are currently active in chemical physics. Many of these staff members are affiliated with the Materials Research Laboratory (MRL). MRL is a multidisciplinary facility shared by staff and students from the Departments of Physics, Chemistry, Materials Science and Engineering, Electrical and Computer Engineering, and other related departments that have common interests in materials science.

Chemical and Biomolecular Engineering

chbe.illinois.edu

Head of the Department: Paul J.A. Kenis
114 Roger Adams Laboratory
600 South Mathews Avenue
Urbana, IL 61801
(217) 244-9214
E-mail: ChBE-GradRecruiting@Illinois.edu

Major: Chemical Engineering
Degrees Offered: M.S., Ph.D.

Major: Bioinformatics
Degree Offered: M.S.
Graduate Concentration: Chemical and Biomolecular Engineering

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Chemical Engineering and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.uiuc.edu/mdphd>)

Graduate Degree Programs

The Department of Chemical and Biomolecular Engineering offers graduate programs leading to the Master of Science and the Doctor of Philosophy degrees. Those interested should write to the address above for application materials and a departmental brochure, which gives greater detail on programs, offerings, admission, degree requirements, and financial aid. Opportunity also exists for specializing in computational science and engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (<http://cse.illinois.edu/students/why-cse>).

Admission

Candidates for advanced degrees in chemical engineering should have a background in chemistry and chemical engineering comparable to the training offered in the undergraduate chemical engineering curriculum at the University of Illinois at Urbana-Champaign. Students whose prior training is deficient in one or more basic areas of chemistry or chemical engineering will be admitted with the understanding that their deficiencies will be removed to the extent prescribed by their advisers. Graduate College admission requirements also apply. In addition, applicants must submit results from the Graduate Record Examination (GRE) general test.

International students whose native language is not English are required to have a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 610 (257 on the computer-based test). In addition, teaching is a requirement in the chemical engineering graduate program and there are special requirements for applicants whose native language is not English. The University requires a minimum Test of Spoken English (TSE) score of 50 for a contact teaching assistant appointment. It is desirable for applicants whose native language is not English to provide TSE scores in order to receive full consideration for admission and financial aid.

Multi-institutional Ph.D. Degree with National University of Singapore

Students in this program will spend approximately equal proportions of their study at the Urban-Champaign campus and at the National University of Singapore (NUS), taking courses and/or working on their research. The project comprising the research component of the Ph.D. will be cooperatively overseen by faculty at Illinois and NUS. Students pursuing the multi-institutional degree must meet all of the requirements of the existing Ph.D. programs at each of the two institutions. Courses taken at each university must be approved by the other university before they are taken in order to be credited toward degree requirements.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Chemical Engineering. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Urbana, IL 61801
(217) 333-0711
E-mail: chemadm@scs.uiuc.edu

Major: Chemistry
Degrees Offered: M.A., M.S., Ph.D.
Graduate Concentration: Astrochemistry (p. 548) (Ph.D. only)

Major: Teaching of Chemistry
Degree Offered: M.S.

Joint Degree Program: the Master of Science in Chemistry can be earned jointly with the following
Degrees Offered:
J.D. in Law
M.B.A. in Business Administration

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Chemistry and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The degrees offered in chemistry are the Master of Science in Chemistry, Master of Science in the Teaching of Chemistry, and Doctor of Philosophy in Chemistry. This catalog also provides information on a joint program leading to the Doctor of Philosophy in Chemical Physics (see Chemical Physics (p. 589)). Opportunity also exists for specializing in computational science and engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (<http://www.cse.illinois.edu/academics>).

Admission

Graduate College requirements apply. Further, applicants should have at least 25 semester hours in chemistry (properly distributed) and a grade point average of 3.0 (A = 4.0), to be considered for admission to the graduate programs. Applications from students with less than the usual preparation in chemistry or with grade point averages below 3.0 may be considered on an individual basis. In addition, we ask applicants to submit results from the Graduate Record Examination (GRE) General Test and the GRE Chemistry Subject Test.

International students whose native language is not English are required to have a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 580 (237 on the computer-based test). In addition, teaching is a requirement in the chemistry graduate program, and there are special requirements for applicants whose native language is not English. The University requires a minimum Test of Spoken English (TSE) score of 50. Any applicant whose native language is not English is expected to provide TSE scores in order to receive full consideration for admission and financial aid.

Students who are currently enrolled in other graduate programs are advised that they should complete degree work before moving to another university. While students might be admitted without a degree from their current institution, there must be exceptional circumstances. We require a statement from the applicant detailing the situation and a letter from the applicant's research adviser or department head.

Contact chemistry graduate admissions for further information. The department does not accept applications for the MA program.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Chemistry. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Financial Aid

Support for graduate students is available through fellowships and assistantships. All candidates are considered for these upon application. Graduate students making normal progress toward their degrees generally receive a tuition waiver as well as a stipend.

- Master of Science in Chemistry (p. 597)
- Master of Science in Teaching of Chemistry (p. 598)

Doctor of Philosophy in Chemistry

Doctoral programs are offered in a wide range of specialties, including the traditional areas of analytical, inorganic, organic, and physical chemistry as well as materials chemistry and chemical biology. Students usually require from three to five years to complete the requirements. Besides completing formal coursework, students will have a formal review of progress following the completion of coursework, are required to pass an oral preliminary examination on research preparation, and must submit a thesis on original research, which is defended at a final oral examination.

In order to enter the joint degree program, students must be admitted separately to each program. Each program's application requirements and deadlines for admission must be met.

- J.D. in Law and M.S. in Chemistry (p. 597)
- M.B.A. Joint Degree Program (p. 597)

J.D. in Law and M.S. in Chemistry

This joint degree program is intended principally for law students who desire to specialize in an area of law in which expertise in chemistry would be a clear asset. Students electing the joint degree option will select a major area of emphasis within chemistry that complements their chosen area of legal emphasis. Each student must develop and gain approval of a coherent, focused plan of study that draws upon related coursework in both law and chemistry.

The JD/MS program involves interdisciplinary work and a flexible plan of study. Students will consult with a faculty adviser in selecting courses. While enrolled in the Department of Chemistry, students have the opportunity to hold an assistantship with a tuition and service fee waiver. It is possible that joint degree students may accelerate their programs by attending summer sessions over one or more summers and thus complete the requirements for both the MS and the JD degrees in three years.

Chemistry (may include up to 12 hours of thesis credit)	32
Law	78

Civil and Environmental Engineering

cee.illinois.edu or cee.illinois.edu/environmental

Interim Head of the Department: Benito Marinas
 Director of Graduate Studies: Jeffery Roesler
 1110 Newmark Civil Engineering Laboratory
 205 North Mathews Avenue
 Urbana, IL 61801
 (217) 333-8038
 Fax (217) 333-9464
 Email: civil@illinois.edu

Major: Civil Engineering
 Degrees Offered: M.S., Ph.D.

Major: Environmental Engineering in Civil Engineering
 Degrees Offered: M.S., Ph.D.

Online Program: Civil Engineering
 Degrees offered: M.S.

Joint Degree Program: the M.S. in Civil Engineering can be earned jointly with the following
 Degrees Offered:
 M.Arch. in Architecture (p. 538) (Construction Management or Structures),
 M.B.A. in Business Administration (p. 581)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Civil Engineering or Environmental Engineering in Civil Engineering and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Civil and Environmental Engineering, consistently ranked as having one of the best graduate programs in the country, offers graduate work leading to master's and doctoral degrees. These are in a variety of specialized areas through departmental and joint programs which are described on this page. Opportunity also exists for earning certificates in

1. computational science and engineering and
2. energy and sustainability engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (<http://cse.illinois.edu/students/graduate-program>) and the Energy and Sustainability Engineering (EaSE) Option (<http://ease.illinois.edu>).

The Medical Scholars Program (<https://www.med.illinois.edu/mdphd>) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Civil and Environmental Engineering. In working toward the department's graduate degrees, an emphasis is placed on advanced study and participation in creative research.

Admission

Admission to the Graduate College with full status in civil engineering or in environmental engineering in civil engineering is granted to graduates of accredited institutions whose requirements for the bachelor's degree are substantially equivalent to those of the University of Illinois, provided the applicant's preparation is appropriate for advanced study in his or her chosen major field and his or her scholastic average is at least 3.00 (A = 4.00). The Graduate Record Examination (GRE) (<http://www.ets.org/portal/site/ets/menuitem.fab2360b1645a1de9b3a0779f1751509/?vgnnextoid=b195e3b5f64f4010VgnVCM10000022f95190RCRD>) is required. Applications are considered for both spring and fall admissions. In general, a 3.00 grade point average for the last two years of the undergraduate program and for any previous graduate work is a minimum requirement for admission to the M.S. program. Requirements for admission to the Ph.D. program are variable, but are usually substantially higher. For additional information, see the departmental Web site (<http://cee.illinois.edu/programs/Grad/GradApps>).

All applicants whose native language is not English must submit a minimum TOEFL (<http://www.toefl.org>) score of 79 (iBT), 213 (CBT), or 550 (PBT); or minimum International English Language Testing System (IELTS) (<http://www.ielts.org>) academic exam scores of 6.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (<http://grad.illinois.edu/admissions/instructions/04c>) are met. For those taking the TOEFL or IELTS, full admission status (<http://grad.illinois.edu/admissions/instructions/04c>) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status (<http://grad.illinois.edu/admissions/instructions/04c>) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (<http://linguistics.illinois.edu/students/esl/guidelines>) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Applicants to the joint M.Arch or M.B.A degree programs must meet the admissions standards for both programs and be accepted by both programs.

Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Civil and Environmental Engineering and the College of Medicine. An application to the Medical Scholars Program will also serve as the application to the Civil and Environmental Engineering graduate program. Further information on this program is available by contacting the Medical Scholars Program (125 Medical Sciences Building, 217-333-8146, mspo@illinois.edu).

Medical Scholars Program

Students in the Medical Scholars program must meet the specific requirements for both the medical (<https://www.med.illinois.edu/mdphd>) and graduate degrees. On average, students take eight years to complete both degrees. The first year of the combined program is typically spent meeting requirements of the graduate degree.

Faculty Research Interests

Areas of study and research pursued by our world-renowned faculty are focused in the following specializations:

- construction management
- environmental engineering and science
- environmental hydrology and hydraulic engineering
- geotechnical engineering
- information technology
- materials
- structural engineering
- transportation engineering
- sustainable and resilient infrastructure systems
- energy-water-environment sustainability
- societal risk management

Within these specializations, current research programs include:

- air quality
- aquatic biology and ecology;
- computer-aided engineering systems (artificial intelligence, expert systems, and neural networks)
- construction engineering and management
- construction materials (concrete composition, microstructure, and engineering properties)
- earthquake engineering
- environmental chemistry
- environmental fluid mechanics
- geotechnical engineering (rock mechanics, soil mechanics, and foundation engineering)
- hazardous-waste management
- hydrology and hydraulic engineering
- information technology including distributed sensors and monitoring
- nondestructive diagnostics
- railway engineering
- river mechanics and morphology, stochastic structural dynamics and random vibrations
- structures (analysis, design, and behavior)
- structural and computational mechanics
- traffic engineering
- transportation (facilities, planning, systems design, and operations)
- water quality process engineering
- water resources and environmental systems analysis

Centers, Programs, and Institutes

Mid-America Earthquake (MAE) Center (<http://mae.cce.illinois.edu>) – originally established by the National Science Foundation, works to develop an integrated framework and application tools for loss assessment due to earthquake and other disruptive events, disaster planning, response and mitigation strategies, and decision-making engines that enable policy makers to effectively manage risk.

Illinois Center for Transportation (ICT) (<http://ict.uiuc.edu>) – funded by the Illinois Department of Transportation and the State of Illinois, promotes innovation and progress in transportation through interdisciplinary research.

Center of Excellence for Airport Technology (CEAT) (<http://www.ceat.uiuc.edu>) – founded in 1995 as a Federal Aviation Administration (FAA) Center of Excellence, aims to develop new scientific knowledge and technology for the development, maintenance, and operation of airports.

Fabricated Geomembrane Institute (<http://www.fabricatedgeomembrane.com>) – conducts research and disseminates technical information about geomembranes that can be factory fabricated, transported to a project, and deployed, e.g., polypropylene, PVC, LDPE, and EPDM geomembranes, and answers technical questions regarding testing, design, fabrication, installation, and performance of these geomembranes.

Safe Global Water Institute (http://cce.illinois.edu/SGWI_established)—founded in 2012 with the goal of seeking sustainable solutions to the world's safe water and sanitation challenges.

Facilities and Resources

The Newmark Structural Engineering Laboratory (NSEL) features a nearly 6,000 square foot structural testing floor (strong floor), a three-story clear height, and a multiplicity of testing equipment (including a shake table, stand-alone universal testing machines, reaction frames, actuators, controllers, transducers, and a data acquisition) that can be used for conducting large-scale experimental structural, materials, and earthquake engineering research. The Environmental Engineering and Science Laboratories contain over 11,000 square feet with state-of-the-art analytical equipment. The Hydrosystems Laboratory covers an area of more than 11,000 square feet and includes several flumes, a rainfall generator, a stratified flow tank, and a water tunnel. The Advanced Transportation Research and Engineering Laboratory (ATREL) is a unique and comprehensive transportation research, educational, and testing laboratory. It is located on 47 acres, 15 miles north of the main campus, and it contains 60,000 square feet of laboratories, continuing education classrooms, office space, and a technical library. It is home to the Illinois Center for Transportation (ICT). The Multi-Axial Full-Scale Sub-Structured Testing and Simulation (MUST-SIM) Facility is one of 15 networked national facilities conducting research that will lead to significant advances in seismic design and analysis. It provides a new experimental environment for conducting integrated distributed hybrid tests on components of large bridge and building structures. The Smart Structures Technology Laboratory seeks to implement advanced sensing and control technologies to more effectively monitor and protect our nation's civil infrastructure. The Laboratory houses a new medium-scale 6 Degree-of-Freedom seismic simulator, as well as extensive instrumentation and telepresence capabilities.

Financial Aid

Financial aid is available in the form of fellowships and research and teaching assistantships. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (<http://www.grad.illinois.edu/admissions/taengprof.htm>) by achieving a minimum score of 50 or 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

Master of Science, all majors

Thesis Option

CEE 599	Thesis Research (min-max applied toward degree)	4-12
Elective courses (subject to Other Requirements and Conditions below)		20-28
Total Hours		32

Other Requirements ¹

Other Requirements and Conditions may overlap

Individual programs are developed by the students in consultation with their academic advisors.

A minimum of 16 hours of credit within the major field with 8 graded and at the 500 level.

A minimum of 12 hours at the 500 level overall.

A maximum of 8 hours of CEE 597 (or other independent study) may be applied toward the elective course work requirement.

At least half of the minimum hours required for the degree must be in Illinois courses meeting on the Urbana-Champaign campus or in courses meeting in other locations approved by the Graduate College for resident credit for the degree.

The minimum program GPA is 2.75

¹ For additional details and requirements refer to the department's Graduate Handbook (<http://cee.illinois.edu/handbooks>) and the Graduate College Handbook (<http://grad.illinois.edu/gradhandbook>).

Non-Thesis Option

Elective courses (subject to Other Requirements and Conditions below)	36
Total Hours	36

Other Requirements ¹

Other Requirements and Conditions may overlap

Individual programs are developed by the students in consultation with their academic advisors.

A minimum of 16 hours of credit within the major field with 8 graded and at the 500 level.

A minimum of 12 hours at the 500 level overall.

A maximum of 8 hours of CEE 597 (or other independent study) may be applied toward the elective course work requirement.

At least half of the minimum hours required for the degree must be in Illinois courses meeting on the Urbana-Champaign campus or in courses meeting in other locations approved by the Graduate College for resident credit for the degree.

The minimum program GPA is 2.75

¹ For additional details and requirements refer to the department's Graduate Handbook (<http://cee.illinois.edu/handbooks>) and the Graduate College Handbook (<http://grad.illinois.edu/gradhandbook>).

Doctor of Philosophy, all majors

The degree of Doctor of Philosophy, primarily a research degree, requires from three to four years of graduate study beyond the master's degree. The major area of specialization encompasses courses and research that are closely related, but the courses need not be offered by a single major department. Candidates must demonstrate a capacity for independent research by preparing an original thesis on a topic within the major field of study, must meet the qualifying requirements or examination in the area of specialization, and must pass both preliminary and final examinations.

CEE 599	Thesis Research (min-max applied toward degree)	32
Elective courses (subject to Other Requirements and Conditions below)		32
Total Hours		64

Other Requirements ¹

Other Requirements and Conditions may overlap

A maximum of 8 hours of CEE 597 (or other independent study) may be applied toward the elective course work requirement; approval required.

There is no department-wide foreign language requirement. However, the faculties of some areas of specialization may require foreign language proficiency if essential to the conduct of research in that area.

64 graduate hours must be completed in residence.

A Masters degree is required for admission to the Ph.D. program.

Ph.D. exam and dissertation requirements:

Qualifying exam²

Preliminary exam

Final exam or dissertation defense

Dissertation deposit

The minimum program GPA is 2.75.

- ¹ For additional details and requirements refer to the department's *Graduate Handbook* (<http://cee.illinois.edu/handbooks>) and the *Graduate College Handbook* (<http://grad.illinois.edu/gradhandbook>).
- ² *Qualifying Exam Information* (<http://cee.illinois.edu/PhDQualificationProcedures>)

Joint Degree Programs

Master of Science in Civil Engineering and Master of Architecture

The M.Arch.-M.S.C.E. joint degree program with the School of Architecture requires a total of 78 graduate hours (Architecture Track II), 70 graduate hours (Architecture Track III), or 64 graduate hours (Architecture Track I). Full details of requirements are presented at the School of Architecture's Web site (<http://arch.illinois.edu/programs/degree/march/options>); the thesis option is not available.

Joint M.B.A. Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements (p. 584) and contact the M.B.A. program and their major department office for more information.

Online Program

The degree requirements are the same as for the on-campus non-thesis M.S. program—36 hours of course work—and the degree awarded to online students is the same degree awarded to resident students. Online students have five years to complete the program.

The M.S. degree in Civil Engineering offered online is currently available for specialization in Construction Management, Infrastructure, Structural Engineering, and Transportation Engineering. Students can also develop cross-disciplinary programs in consultation with their advisers. Courses are available online in the following areas of concentration to complement the student's area of specialty: Construction Materials, Environmental Engineering and Science, Environmental Hydrology and Hydraulic Engineering, Geotechnical Engineering and Structural Engineering.

Classics

www.classics.illinois.edu

Head of the Department: Ariana Traill
Director of Graduate Studies: Craig Williams
4080 Foreign Languages Building
707 South Mathews Avenue
Urbana, IL 61801
(217) 333-1008
E-mail: classics@illinois.edu

Major: Classics
Degrees offered: M.A.
Graduate Concentrations: Greek (p. 607), Latin (p. 606), Medieval Studies (p. 811)

Major: Teaching of Latin
Degrees offered: M.A.

Major: Classical Philology
Degrees offered: Ph.D.
Graduate Concentration: Medieval Studies

Graduate Degree Programs

The Department of the Classics offers programs of study leading to the Master of Arts in Classics. Within the master's degree program, students may choose from three options: both Greek and Latin (= Classics), Greek, or Latin. In addition, the department offers the Master of Arts in the Teaching of Latin and the Doctor of Philosophy in Classical Philology. A further concentration in Medieval Studies is available to students pursuing graduate degrees in the Classics.

Although the graduate program is designed to provide a thorough education in classical studies in the widest sense, students may concentrate at different stages upon Greek and Latin language and literature (including papyrology, paleography, gender studies, and medieval and renaissance Greek and Latin authors); classical archaeology; ancient philosophy or, in conjunction with the appropriate department, comparative literature, ancient history, and classical linguistics. Additional information is available at: www.classics.illinois.edu.

Admission

Applicants for admission to the master's program in the classics curriculum must ordinarily present a minimum of 20 semester hours in either Greek or Latin and 15 semester hours in the other language; candidates for admission to the master's program with specialization in Greek or Latin or the teaching of Latin must ordinarily present at least 20 semester hours in that language. Previous work in ancient history, ancient art and archaeology, philosophy, literary criticism, or linguistics is desirable.

Applicants should apply online (www.grad.illinois.edu/admissions/apply) and submit a statement of purpose, three letters of recommendation and a writing sample of approximately 20 pages (one or two papers) that showcases the applicant's ability to work in the original classical languages and incorporates relevant secondary sources as appropriate. Original transcripts showing all undergraduate and graduate work completed should be sent to:

SLCL Graduate Student Services
3070 Foreign Languages Bldg.
707 S. Mathews Ave.
Urbana, IL 61801

Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

Certifications

Students wishing to add teacher certification in Latin to an MAT, M.A. in Latin, or Ph.D. must apply to the Foreign Language Teacher Education Program and consult its Director, Hugh Bishop (hbishop@illinois.edu) about requirements.

Students must complete an M.A. in Classics with a concentration in Latin, an M.A. in Classics with a concentration in Greek and Latin or an M.A. in the Teaching of Latin in order to receive certification.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Classical Philology. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program, and almost all students teach. Non-native English speakers must first pass a test of their oral English ability (see www.grad.illinois.edu/admissions/taengprof.htm).

Faculty Research Interests

Greek and Latin literature of all periods, Greek and Roman epic, Greek and Roman tragedy, Greek and Roman comedy, Greek and Latin epigraphy, ancient philosophy (Epicureanism, Hellenistic moral theory), Greek political theory, Greek and Roman religion, Roman historiography and biography, gender studies of the Greco-Roman world, ancient Greek music theory, Greek mythology, Medieval Greek and Latin philology, the ancient world in film, the reception of Greek and Latin literature history of classical scholarship, Greek and Roman archaeology. For details see www.classics.illinois.edu/people/

Facilities and Resources

The superb Classics Library (see www.library.illinois.edu/clx/) at the University of Illinois houses over 60,000 volumes on open shelves and boasts two specialist librarians. The University of Illinois Library's Rare Book Room houses the Turyn Archive of Greek manuscript photographs and the American Center of the International Photographic Archive of Papyri. The Department of the Classics also publishes the journal *Illinois Classical Studies* and its Supplements. The Krannert Art Museum and the Spurlock Museum of World Cultures have outstanding collections of ancient vases and other artifacts.

Financial Aid

University fellowships are available for the academic year. Teaching assistantships are available for both the academic year and Summer Session II.

The Master of Arts may be taken in Classics requiring advanced work in both Greek and Latin (Master of Arts in Classics), or with a concentration in either Greek, or a concentration in Latin. Only the Master of Arts in Classics leads to Ph.D. level work in Classical Philology. The master's degrees with concentrations in Latin or Greek and likewise the Master of Arts in the Teaching of Latin are all terminal degrees.

- Master of Arts in Classics (p. 606)
- Master of Arts in Classics, Greek Concentration (p. 607)
- Master of Arts in Classics, Latin Concentration (p. 606)
- Master of Arts in Teaching of Latin (p. 608)

Doctor of Philosophy in Classical Philology

The Doctor of Philosophy is offered only in classical philology, which requires advanced work in both Greek and Latin. Candidates for the Ph.D. program are eligible for acceptance upon completion of the master's degree in classics or its equivalent. Once admitted, they must complete at least 64 additional graduate hours of coursework. Admission to Stage III requires passing examinations in Greek and Latin sight-translation, the history of Greek and Latin literature, and a special author, as well as the preliminary oral examination.

CLCV 550	Intro to Teaching of Classics (if not taken previously)	0 or 4
24 hours of Greek and Latin, with at least eight hours in each language and at least twenty at the 500 level, including:		24
GRK 595 or LAT 595	Intro to Classical Studies (if not taken previously) Intro to Classical Studies	
GRK 511 or LAT 511	Advanced Composition (if not taken previously) Advanced Prose Composition	
GRK 580	Greek Seminar	
LAT 580	Latin Seminar	
Elective		4-8

Language Requirement: Reading knowledge of two ancillary languages: German and either French or Italian. Knowledge of one of these languages must be demonstrated at the time of admission to Stage II and the second before the start of the second year at Stage II.

Fax: (217) 333-0015
E-mail: gpp@illinois.edu

Major: Engineering
Degrees Offered: M.Eng.
Graduate Concentration: Energy Systems (p. 845)

Graduate Degree Programs

The College of Engineering offers a Master of Engineering (M.Eng.) degree program for students whose primary intent is a professional career in industry or government. This degree differs from the Master of Science (M.S.) degree in that it is a terminal degree and not a pathway to a doctoral program. The Major in Engineering for the M.Eng. degree requires the selection of an interdisciplinary concentration.

Admission

Students with bachelor's or master's degrees in engineering or related sciences will be considered for admission if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. Admission is possible for the spring semester, but most admissions are for the fall semester. Full details of admission requirements are on the Web page of the department offering the concentration. Currently a Concentration in Energy Systems is offered by the department of Nuclear, Plasma and Radiological Engineering.

All applicants whose native language is not English must submit a minimum TOEFL (<http://www.toefl.org>) score of 103 (iBT), 257 (CBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) (<http://www.ielts.org>) academic exam scores of 7.0 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (<http://grad.illinois.edu/admissions/instructions/04c>) are met. Full admission status (<http://grad.illinois.edu/admissions/instructions/04c>) is granted for those meeting the minimum requirements and having taken the TOEFL or IELTS since the scores required for admission to M.Eng. are above the minimum scores demonstrating an acceptable level of English language proficiency.

Available Concentrations

Energy Systems (p. 845), Department of Nuclear, Plasma, and Radiological Engineering (p. 843).

Master of Engineering in Engineering, must include a Concentration

Professional Development (an internship with a company, laboratory, or agency with a subsequent archiveable report; a design project; or business-oriented or leadership courses)

4

Concentration hours

28

Technical course work in primary area and one course from outside the primary area (12-20 hours)

Elective courses 0-8 hours chosen in consultation with advisor.

Total Hours

32

Other Requirements and Conditions ¹

Other Requirements and Conditions may overlap

A concentration is required.

A minimum of 12 500-level credit hours with a minimum of 8 500-level credit hours applied toward the concentration.

A minimum of 8 hours must be in ENG or the home unit of the concentration.

Minimum program GPA:

3.0

- ¹ *For additional details and requirements, please refer to the Web page of the concentration's home unit and the Graduate College Handbook (<http://grad.illinois.edu/gradhandbook>).*

Communication

Acting Head of the Department: John Caughlin
Director of Graduate Studies: Leanne Knobloch
3001 Lincoln Hall, 702 S. Wright Street
(217) 333-2683
communication@illinois.edu

Major: Communication

Degrees Offered: M.A., Ph.D.

Graduate Concentrations: Medieval Studies (available to all degrees), Second Language Acquisition and Teacher Education (Ph.D. only), Writing Studies (Ph.D. only)

Online Program: Health Communication

Degrees offered: M.S.

Online Program: Communication (not currently offered; apply to M.S. in Health Communication)

Degrees offered: M.A.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Communication and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Communication offers a broad curriculum in communication research. In consultation with an advisor, students assemble individualized programs, concentrating in organizational and group communication, interpersonal and family communication, health communication, communication technology, political communication, rhetoric and public discourse, communication in cultural contexts, or mass communication. Interdisciplinary programs are also encouraged.

Admission

An application must include official transcripts from every post-secondary institution the applicant has attended; scores on the general aptitude parts of the Graduate Record Examination (GRE); at least three letters of recommendation, preferably from academic recommenders; a major paper or essay as a sample of academic writing; and a statement of purpose. Students whose native language is not English must present their official scores on the Test of English as a Foreign Language (TOEFL) examination as part of their applications. The department follows the Graduate College's recommendations for English proficiency. Detailed information about admissions and financial aid can be found on the department's Web site (<http://www.communication.illinois.edu/prospective/grad/apply>). Ordinarily, students are admitted to begin graduate study in the fall semester; admission to begin in the spring term is rarely permitted.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Communication. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Financial aid is usually offered in the form of part-time teaching assistantships; some fellowships and research assistantships are available.

- Master of Arts in Communication (p. 612)
- Master of Science in Health Communication (p. 614)

Doctor of Philosophy in Communication

To be accepted as a candidate for the Ph.D. degree, a student must either present a well-rounded undergraduate education with an emphasis in communication and a master's in a cognate discipline, or hold a master's degree in communication from an accredited institution.

In addition to meeting general requirements of the Graduate College, the student must satisfactorily complete written and oral preliminary examinations, an oral defense of the thesis prospectus, and an oral defense of the thesis. Students must demonstrate competency in research procedures and tools that may include proficiency in one or more foreign languages, various research methods, or cognate academic work. Students must enroll in CMN 595 in the semester of the preliminary examination and in CMN 599 (thesis hours) in semesters spent working on the dissertation.

Minimum in appropriate research method; these are in addition to the 40 hours of additional coursework. (8 min)	8
Courses from outside the department	12
Elective hours (not in method or thesis hours)	40
Independent Study Hours (8 max applied toward degree)	8
Language Requirement: based on major	
CMN 599 Thesis Research (0 min applied toward degree)	0
Total Hours	64

Other Requirements ¹

Other requirements may overlap

Minimum Non-Method/Thesis Hours Required Within the Unit:	20
Masters Degree Required for Admission to PhD?	Yes
Qualifying Exam Required:	No
Preliminary Exam Required:	Yes
Final Exam/Dissertation Defense Required:	Yes
Dissertation Deposit Required:	Yes
Minimum GPA:	2.75

¹ For additional details and requirements refer to the department's Graduate Programs (<http://www.communication.illinois.edu/prospective/grad/> degrees) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Online Program in Health Communication

The Department of Communication also offers an online Master of Science degree (M.S.) in Health Communication. The required hours are shown above. Apply to the Master of Science program only; applications to the online Master of Arts in Communication are not being accepted. More information about the online program is available at www.hcom.illinois.edu.

Master of Arts in Communication

The entering student should present the equivalent of 16 semester hours of undergraduate work in communication or a related area. In some cases an oral examination is also stipulated. A thesis is optional.

Thesis Option

Elective hours	24
Independent Study Hours (4 max applied toward degree)	0-4
CMN 599 Thesis Research (8 max applied toward degree)	8

Department of Kinesiology and Community Health
Head of the Department: Wojtek Chodzko-Zajko
Director of Graduate Studies: Steven Petruzzello
113 Freer Hall
906 South Goodwin
Urbana, IL 61801
(217) 333-1083
Email: jjenkns@illinois.edu

Major: Community Health
Degrees offered: M.S.P.H., M.S., Ph.D.

Major: Public Health
Degrees offered: M.P.H.

Major: Rehabilitation
Degrees offered: M.S.

Joint Degree Program: the M.P.H. can be earned jointly with the following:

Community Health, Ph.D.
Food Science and Human Nutrition, Ph.D. (p. 713)
Human & Community Development, Ph.D. (p. 742)
Kinesiology, Ph.D. (p. 763)
Nutritional Science, Ph.D. (p. 850)
Social Work, Ph.D. (p. 901)
Urban Planning, M.U.P. (p. 942)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Community Health and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.uiuc.edu/mdphd>)

Graduate Degree Programs

The Community Health Program in the Department of Kinesiology and Community Health offers programs of study leading to the Master of Science in Community Health, Master of Science in Rehabilitation, Master of Science in Public Health (M.S.P.H.), Master of Public Health (M.P.H.), and Doctor of Philosophy in Community Health degrees.

The Chronic Disease, Disability, and Society specialization prepares graduates for advanced research or as health specialists who are well versed in social determinants of health. Graduates from this specialization will have a strong foundation related to health disparities, chronic disease and disability. The specialization in Epidemiology prepares students for the analysis of disease occurrences and problems in populations and instruction in the various methodologies, statistical techniques and designs for obtaining such understanding. The Global Health specialization focuses on international health from an interdisciplinary perspective. Students in this concentration may take courses that provide a broad view of global health contexts from various departments across campus. Finally, the specialization in Health Policy and Administration prepares students for the examination of management principles related to health care institutions and in procedures and methods for the analysis of health policy development, implementation and evaluation.

The M.S. in Community Health has specializations in Chronic Disease, Disability, and Society; Epidemiology; Global Health; and Health Policy and Administration. The M.S.P.H. program is not currently accepting applications, and individuals interested in pursuing a Master's degree in public health are encouraged to apply to the M.P.H. degree program. The M.P.H. degree is a professionally focused degree designed to prepare students for a career in public health practice. The M.P.H. degree offers a specialization in health policy and management and an area of concentration in health behavior and promotion. The Ph.D. program is designed to prepare graduates for positions of leadership in teaching, research, and service in universities, industries, and private and government agencies in the United States and in other countries.

Admission

Applications for all degrees except the Master of Public Health (MPH) are due on January 15 for fall admission. Applications for spring semester are also considered (due October 1). Applications for the Master of Public Health (MPH) degree are accepted for Fall admission until April 1, and for spring admission until January 10th.

The Graduate College admission requirements apply for all applicants. Candidates for admission to master's degree programs should have a grade point average of at least 3.0 (A = 4.0) for the last 60 semester hours of their undergraduate degree work (excluding fieldwork, student teaching, and

physical activity courses). In addition, satisfactory scores on the Graduate Record Examination (GRE) are required. Applicants should have a bachelor's degree in a health or disability-related discipline and/or a strong background in social and biological sciences and quantitative methods. A statement of education and career goals, and three letters of recommendation are required. All degree programs with the exception of the Master of Public Health (MPH) require one example of professional writing with the date of its completion.

Admission requirements for the Ph.D. program include the following: a grade point average of at least 3.0 (A = 4.0) for the last 60 hours of undergraduate degree work (excluding fieldwork, student teaching, and physical activity courses), a GPA of 3.6 for master's degree work with thesis, and acceptable scores on the Graduate Record Examination. Candidates are encouraged to have a personal interview with the coordinator of graduate studies or other representative of the department. Preference is given to students who have had at least two years of professional experience.

Applicants for all degrees whose native language is not English, or who have not obtained a university degree from an institution in a country where the native language is English, are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Applicants submitting TOEFL scores must obtain a minimum score of 600 on the paper-based, 250 on the computer-based, or 100 on the internet based (iBT) Test of English as a Foreign Language (TOEFL). Applicants submitting IELTS scores must obtain a 6.5 on all sub-sections. Applicants whose native language is not English and who are seeking a teaching assistantship must provide evidence of spoken English language proficiency by meeting minimum score requirements specified by the University (see www.grad.illinois.edu/admissions/taengprof.htm).

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Community Health. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

Faculty research interests cover a wide range of subjects, including global health, health education, community health development, health behavior, health policy, health planning and management, rehabilitation and disability studies, chronic disease, epidemiology, biostatistical and epidemiologic research methodology, health economics, evaluation research, and aging studies.

Financial Aid

Financial aid is available on a competitive basis to qualified students in the form of teaching and research assistantships, as well as tuition and service fee waivers.

- Master of Science in Community Health (p. 618)
- Master of Science in Rehabilitation (p. 620)
- Master of Science in Public Health (p. 620)
- Master of Public Health (p. 618)

Graduate course experience in public health and statistics with grades of B or better is expected prior to admission. Before admission to the Ph.D. program, students may be required to take up to 12 hours of additional coursework to remedy deficiencies. The candidate is required to pass written preliminary examinations covering disciplinary and professional aspects of community health, the literature and theoretical perspectives in the major area of study and methodological perspectives and research techniques. Students must also pass an oral preliminary examination on the area of specialization and dissertation proposal; and to pass an oral defense of dissertation research.

Master of Public Health and Master of Urban Planning

The M.P.H. can be earned jointly with the Master of Urban Planning, M.U.P. Joint degree programs provide the opportunity to complete two degrees in a compressed time frame. For the joint program, at least 40 hours must be in Urban Planning, including all core courses and capstone requirements. The two programs must total a minimum of 88 hours, however the M.U.P. program may at its discretion count up to 8 hours of Urban Planning courses as electives in meeting its degree requirements as long as students are required to take no fewer than 40 additional hours in the M.P.H. program. Students must be in residence in Urban Planning for at least two semesters. Consult the department's M.U.P. joint degree (http://www.urban.illinois.edu/academic-programs/mup/mup_joint.html) web page for more information about the admissions process and joint degree requirements. For additional guidance, please contact the Director of the M.U.P. Program.

Master of Public Health

The MPH degree program requires a minimum of 48 hours. The program includes:

1. six required core courses in basic content areas of public health;
2. three required courses in the Health Behavior and Promotion concentration, as well as one additional concentration course from an approved list;
3. a practicum;
4. a capstone project; and
5. seminars and electives.

MPH students must complete all core coursework before enrolling in the MPH practicum. It is highly preferable for the practicum to occur during summer term. The capstone project must be completed in the last term of study. There is no thesis requirement. A pre-requisite for applying to the MPH program is a college level course in mathematics, statistics, biostatistics, or epidemiology. Applications for the Master of Public Health (MPH) are only accepted for Fall admission, and are accepted until April 1. The program generally takes 1.5 to 2 years to complete. University of Illinois undergraduate students who major in Kinesiology, Community Health, or I-Health are eligible to apply for a 5 year joint BS MPH degree program after their 3rd (junior) year of undergraduate study. Students in the BS MPH program begin some MPH coursework in their 4th (senior) year of undergraduate study, and take MPH coursework in a 5th year of study in fall, spring, and summer terms.

Master of Science in Community Health

The specializations in Epidemiology and Health Policy & Administration require completion of 12 hours of core courses, which are intended to provide overall knowledge of the public health field and the tools necessary for successful functioning as a health specialist.

Students entering the Epidemiology specialization will be expected to have completed undergraduate coursework in data collection and processing, including issues of measurement and questionnaire design, computerization, descriptive health measures, and statistical analysis through regression. Courses must have been completed with grades of B or better. Deficiencies in these areas will require additional coursework, as necessary, for successful completion of the Master of Science degree.

The specialization in Health Policy and Administration generally takes two years, depending upon prior education and experience. Students entering the program are expected to have completed undergraduate coursework in economics, social sciences, and data collection and processing, which includes issues of measurement, questionnaire design, computerization, descriptive health measures, and statistical analysis through regression. Courses must have been completed with grades of B or better. Deficiencies in these areas will require additional coursework, as necessary, for successful completion of the degree.

Master of Science in Public Health

The program generally takes two years, depending upon prior education and experience. The program includes 26 hours of required courses that are intended to provide an overall knowledge of the public health field and the tools necessary for successful functioning as a community health education specialist; hours of fieldwork experience in the summer; and a thesis. Students entering the program are expected to have completed undergraduate course work in data collection and processing, including issues of measurement and questionnaire design, computerization, descriptive health measures, and statistical analysis through regression. Courses must have been completed with grades of B or better. Deficiencies in these areas will require additional course work, as necessary, for successful completion of the degree. A non-thesis option is available with permission from the department.

Master of Science in Rehabilitation

Candidates for the M.S. in Rehabilitation may choose to complete the CORE accredited counseling program, for which a minimum of 48 hours must be completed. Students entering the program will be expected to have completed an undergraduate degree in a rehabilitation-related discipline and/or have a strong background in the social and biological sciences, and a course in introductory statistics. A full-time student can complete the program in three or four semesters. As with all programs, the Graduate College allows students to petition to transfer up to 12 hours of coursework completed prior to admittance to the department. Any approved graduate courses taken on campus in the summer immediately prior to admission count toward the degree and do not have to be transferred.

 Email: amfain@illinois.edu

Major: Comparative Literature
 Degrees Offered: M.A., Ph.D.
 Graduate Concentration: Medieval Studies (p. 811) (available to all degrees)

Graduate Degree Programs

The Program in Comparative & World Literature offers graduate programs leading to the degrees of Master of Arts and Doctor of Philosophy and is designed to provide a systematic study of subjects and problems common to several literatures. Its purpose is to enable students who have varied linguistic competence and preparation to explore the theory of literature and criticism; the interrelations of several literatures; the main currents, periods, and movements in literary history; the development of literary themes and types; and the relations between literature and the other arts.

Admission

A student entering the program should have an undergraduate major in Comparative Literature, English, the classics, or a foreign language. Majors in history and philosophy or other humanistic areas that present suitable linguistic and literary competence may also be granted admission by the Admissions Committee. All students are admitted at the MA level. Students entering with a recognized Masters degree from another university or from another department of this University have the option of taking the comparative literature and critical theory component and a literary component of this program's regular Master of Arts examination at the end of the first year as a qualifying test. For internal applicants to the Ph.D. curriculum, the Master of Arts will function as the qualifying test.

Applicants should apply online (www.grad.illinois.edu/admissions/apply/), submit a statement of purpose, three letters of recommendation and a writing sample.

Original transcripts showing all undergraduate and graduate work completed should be sent to SLCL Graduate Student Services, 3070 Foreign Languages Bldg., 707 S. Mathews Ave., Urbana, IL 61801. Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 105 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. Non-native English speakers must first pass a test of their oral English ability (see www.grad.illinois.edu/admissions/taengprof.htm).

Financial Aid

A limited number of University fellowships and teaching assistantships, in cooperation with other departments, are available.

Master of Arts in Comparative Literature

The candidate must demonstrate a competency in at least two foreign languages as well as in English. Latin is required for students specializing in European and/or American literatures before 1800. Competence in the languages offered is measured either by the successful completion of one advanced course in the literature of each of the languages chosen or by passing an examination administered by the program in comparative literature with the assistance of an expert in the language concerned. This choice is intended to provide for languages that may not be taught in regular departments.

The candidate must complete a minimum of 32 gh of credit, including two courses in the theory of literature (CWL 501 and CWL 502), and two seminars in comparative literature selected from CWL 551, CWL 561, CWL 571, and CWL 581. At least 12 of the other 16 gh should be taken in two or three national literatures in a distribution approved by the adviser. The candidate must pass a written examination based on a reading list, which is designed to test knowledge of literary history as well as ability to interpret a literary or critical text.

CWL 501 & CWL 502	Theory of Literature and Methods of Comparative Lit	8
Select two of the following:		8
CWL 551	Seminar Lit Movements	
CWL 561	Seminar Genres - Forms	
CWL 571	Seminar in Literary Relations	
CWL 581	Seminar Lit Themes	
One or two courses in the major literature		4-8
At least one course in the minor literature		4
One or two courses from the above categories. (A student may take one course in a non-literary field that will provide cultural and historical contexts for the study of the student's literatures.)		4-8
Total Hours		32

Other Requirements ¹

Other requirements may overlap

The candidate must pass a written examination based on a reading list, which is designed to test knowledge of literary history as well as ability to interpret a literary or critical text.

Minimum 500-level Hours Required Overall: 20

Minimum GPA: 3.25

¹ For additional details and requirements refer to the department's graduate handbook (http://www.complit.illinois.edu/Graduate_files/Grad%20Handbook.pdf) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in Comparative Literature

A candidate for the Doctor of Philosophy degree must fulfill the general requirements of the Graduate College in addition to those specified for the master's degree. At least 12 additional gh of work, normally at the 500 level, should be taken in courses regularly offered by the literature departments; among these, courses cross listed with the program in comparative literature are especially recommended. The candidate is responsible for a knowledge of the history of the literature in one modern language. The student also selects a period of major interest and is responsible for a knowledge of two other literatures in this period, which are considered as minors. The periods may be the Middle Ages, Renaissance, Neoclassicism and the Enlightenment, or the modern (nineteenth and twentieth centuries). Some chronological variations in coordinating the minors will be allowed for students studying non-Western literatures. A preliminary examination, i.e. a four-part written examination based on the individual program, and an oral examination with emphasis on the thesis project must be passed. The candidate must present an acceptable thesis embracing several national literatures and pass a final oral examination on the thesis.

CWL 582	Proseminar	4
Select three of the following: ¹		12
CWL 551	Seminar Lit Movements	
CWL 561	Seminar Genres - Forms	
CWL 571	Seminar in Literary Relations	
CWL 581	Seminar Lit Themes	
Two courses in the major literature		8
One course in each of the minor literatures of specialization		8
Language Requirement: Command of at least three languages besides English. Three of these four languages must coincide with the student's areas of specialization and with the dissertation field.		
CWL 599	Thesis Research (min/max applied toward degree)	24-32
Total Hours		64

Other Requirements ²

Other requirements may overlap

Students must be enrolled in graduate seminars until the preliminary examinations are taken and passed.

Masters Degree Required for Admission to PhD? Yes

Qualifying Exam Required: No

Preliminary Exam Required:	Yes
Final Exam/Dissertation Defense Required:	Yes
Dissertation Deposit Required:	Yes
Minimum GPA:	3.25

¹ One of these courses must be cross-cultural.

² For additional details and requirements refer to the department's graduate handbook (http://www.complit.illinois.edu/Graduate_files/Grad%20Handbook.pdf) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Major: Computer Science

Degrees Offered: M.S., M.C.S., Ph.D.

Major: Bioinformatics

Degrees Offered: M.S.

Graduate Concentration: Computer Science

Online Program: Illinois Internet Computer Science (I2CS)

Degrees Offered: M.C.S. in Computer Science

Joint Degree Programs: the M.C.S. in Computer Science can be earned jointly with the following

Degrees Offered:

M.Arch. in Architecture

J.D. in Law

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Computer Science and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Computer Science is one of the longest established computer science departments in the world and is consistently ranked as a top-5 graduate program. The department offers graduate work leading to a master's or doctoral degree, with an interdisciplinary master's degree program in bioinformatics. In addition, the department offers an online master's degree to reach students who are working full-time and unable to come to campus. Opportunity also exists for specializing in

1. computational science and engineering and
2. energy and sustainability engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (<http://cse.illinois.edu/academics>) and the Energy and Sustainability Engineering (EaSE) Option (<http://ease.illinois.edu>).

The Medical Scholars Program (<https://www.med.illinois.edu/mdphd>) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Computer Science. Computer Science is not currently admitting to any joint master's programs at this time.

Admission

Applicants must hold a bachelor's degree equivalent to that granted by the University of Illinois at Urbana-Champaign. The recommended background for graduate students entering a Computer Science graduate degree program is a bachelor's or master's degree in computer science or computer engineering. The Graduate Record Examination (GRE) (<http://www.ets.org>) general aptitude tests (Verbal, Quantitative, and Analytical) are no longer required. However, in some cases, GRE general scores may provide helpful supporting information.

Applicants to the computer science Ph.D. program must have a minimum grade point average (GPA) of 3.40 (A = 4.00) in their undergraduate studies (international GPAs are systematically converted) to be considered; MS and MCS applicants must have a minimum GPA of 3.20. If an applicant also holds a graduate degree, the minimum GPA for that degree must be 3.00. Full details of the programs offered by Computer Science, admissibility, application procedures, and deadlines can be found at the department's Prospective Graduate Student Information Web site (<http://cs.illinois.edu/prospective-students/graduate-students>). To apply, click here (<http://www.grad.uiuc.edu/admissions/apply>).

All applicants whose native language is not English must submit a minimum TOEFL (<http://www.toefl.org>) score of 79 (iBT), 213 (CBT); or minimum International English Language Testing System (IELTS) (<http://www.ielts.org>) academic exam scores of 6.5 overall and 6.0 in all subsections. For those taking the TOEFL or IELTS, full admission status (<http://grad.illinois.edu/admissions/instructions/04c>) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT) or 6.5 (IELTS). Limited status (<http://www.grad.illinois.edu/admissions/instructions/04c>) is granted for lesser scores and requires

enrollment in English as a Second Language (ESL) courses (<http://linguistics.illinois.edu/students/esl/guidelines>) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Computer Science and the College of Medicine. An application to the Medical Scholars Program will also serve as the application to the Computer Science graduate program. Further information on this program is available by contacting the Medical Scholars Program (125 Medical Sciences Building, 217-333-8146, mspo@illinois.edu).

Medical Scholars Program

Students in the Medical Scholars program must meet the specific requirements for both the medical (<https://www.med.illinois.edu/mdphd>) and graduate degrees. On average, students take eight years to complete both degrees. The first year of the combined program is typically spent working on requirements of the Computer Science graduate degree.

Faculty Research Interests

Illinois has been an international leader in computing research for almost five decades. Broadly organized around 9 research areas (<http://cs.illinois.edu/research>), 60+ faculty members conduct research (<http://cs.illinois.edu/directory/faculty>) with about 480 graduate students, and about 30 research staff members. They regularly collaborate with researchers across campus, in other departments or research units.

Facilities and Resources

The home of the Department of Computer Science at Illinois is the Thomas M. Siebel Center for Computer Science (<http://cs.illinois.edu/about-us/about-siebel-center>), a state-of-the-art building that opened its doors in 2004. On the north side of campus, home to the College of Engineering (<http://engineering.illinois.edu>), Siebel Center is an interactive computing habitat, made possible by a gift from alumnus Tom Siebel. The vision for the building was not only to create a magnificent space to work in, but to offer opportunities to investigate and apply computing tools on the building itself. Advanced wireless and wired communication networks, sensors, actuators, video capture and display equipment, video walls and information panels and storage and computing capabilities within the building allow researchers to examine communication and computation issues related to pervasive computing, multimedia infrastructure, building intelligence, security and privacy, and art.

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships (the most common form of financial aid for new graduate students in the department) must demonstrate spoken English language proficiency (<http://grad.illinois.edu/admissions/taengprof.htm>) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 5 is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

Master of Computer Science and Master of Architecture

A total of 74 graduate hours of credit are required: 36 for the M.C.S. degree as prescribed above and 38 for the Master of Architecture (p. 538) degree. Course credit required for the individual degrees is mutually exclusive.

Master of Computer Science and Juris Doctor in Law

Specific graduate hours of credit for each degree are required: 32 hours for the M.C.S. as prescribed above and 90 for the Juris Doctor (p. 775). However, some credits used in each program may apply to the other, allowing students to earn both degrees in a shorter time. For the M.C.S. degree

1. at least 12 credit hours must be law course work relating to legal protections for intellectual property or in related business law fields and
2. at least 6 credit hours must be from approved law courses as determined by the College of Law.

For the J.D. degree, 12 credit hours may be computer science or other scientific course work leading to the M.C.S. degree.

Online Program

Master of Computer Science (I2CS M.C.S.)

The Illinois Internet Computer Science option allows individuals to earn a Master of Computer Science (p. 628) degree from a leader in information technology entirely online with no required campus visits. All students receive the same lectures, class assignments, exams and projects as on-campus students. The degree requirements are the same as for the on-campus M.C.S. program as prescribed above. Off-campus students have 5 years in which to complete the program. The degree awarded is the same as the on-campus M.C.S. degree. Admissions procedures and forms can be found at Degree Admissions (<http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-apply-now>).

Master of Computer Science

This degree (<http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs>) is offered as an on-campus program or via the Internet through the I2CS program.

Breadth Requirement: four different courses, each from a different core area out of the eight core areas. (http://cs.illinois.edu/current-students/graduate-students/professional-masters-mcs)	12-16
Advanced courses – chosen from CS 500 - CS 590 and CS 598; CS 597, or an approved non-CS 500-level course may satisfy 4 credit hours of this requirement.	12
Elective courses (subject to Other Requirements and Conditions below)	4-8
Total Hours	32

Other Requirements and Conditions ¹

Other Requirements and Conditions may overlap

A minimum of 24 CS credit hours must be taken from the University of Illinois at Urbana-Champaign campus.

A minimum of 12 500-level credit hours overall.

A maximum of 4 hours of CS 591 and CS 491 may be applied toward the degree.

A grade of B- or higher is required for Breadth course work.

At most, 12 semester credit hours of previous graduate course work may be transferred and applied to the M.C.S. degree requirements and 12 credit hours of non-degree graduate courses completed in the Department of Computer Science at the University of Illinois at Urbana-Champaign campus may be transferred and applied to the M.C.S. degree requirements.

All degree requirements must be completed within three consecutive semesters (only fall and spring semesters are counted).

Off-campus students have 5 years in which to complete this degree.

The minimum program GPA is 3.0.

¹ For additional details and requirements refer to the department's Graduate Degree Requirements (<http://cs.illinois.edu/prospective-students/graduate-students>) and the Graduate College Handbook (<http://grad.illinois.edu/gradhandbook>).

Master of Science in Bioinformatics, Computer Science Concentration

The CS concentration for the M.S. in Bioinformatics is an interdisciplinary degree that can be counted toward the Computer Science Ph.D.

CS 411 & CS 473	Database Systems and Fundamental Algorithms	8
STAT 410	Statistics and Probability II	4
One bioinformatics course chosen from a departmental list of bioinformatics courses. (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)		4
One biological science course chosen from a departmental list of biological sciences courses. (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)		4

CS electives, chosen from a departmental list of CS electives. (http://cs.illinois.edu/prospective-students/graduate-students/ms-bioinformatics-program/degree-requirements)	12
One additional 4-credit hour graduate course (may be from the bioinformatics or biological science categories above)	4
Total Hours	36

Other Requirements

Other Requirements and Conditions may overlap

A minimum of 12 500-level credit hours overall.

The Minimum program GPA is 3.0

All degree requirements must be completed within five consecutive semesters (only fall and spring semesters are counted).

³ For additional details and requirements refer to the department's *Graduate Degree Requirements* (<http://cs.illinois.edu/prospective-students/graduate-students>) and the *Graduate College Handbook* (<http://grad.illinois.edu/gradhandbook>).

Master of Science in Computer Science

The Master of Science (M.S.) in Computer Science is a research-oriented degree that can be counted toward the Computer Science Ph.D.

CS 599	Thesis Research (minimum applied toward degree)	4
Breadth Requirement - One course from each of three different (out of eight) core areas (http://cs.illinois.edu/current-students/graduate-students/ms-thesis)		9-12
Advanced courses – One 500-level course from one of the three areas selected in the Breadth Requirement; Remaining hours from any 500-level CS course (500-590 or 598) except CS 591 or CS 597. An approved 500-level non-CS course may satisfy 4 credit hours of this requirement; CS 599 (thesis) may satisfy 4 credit hours of this requirement.		12
Elective courses (subject to Other Requirements and Conditions below)		4-7
Total Hours		32

Other Requirements ¹

Other Requirements and Conditions may overlap

A minimum of 16 CS credit hours must be taken from the University of Illinois at Urbana-Champaign campus.

A minimum of 12 500-level credit hours overall.

A maximum of 4 hours of CS 591 and CS 491 may be applied toward the degree.

A grade of B- or higher is required for Breadth Requirement course work.

At most, 12 semester credit hours of previous graduate course work may be transferred and applied to the M.S. degree requirements and 12 credit hours of non-degree graduate courses completed in the Department of Computer Science at the University of Illinois at Urbana-Champaign may be transferred and applied to the M.S. degree requirements.

It is each student's responsibility to secure a M.S. thesis advisor and start thesis research no later than the beginning of the third semester in the program.

All degree requirements must be completed within five consecutive semesters (only fall and spring semesters are counted).

The minimum program GPA is 3.0.

¹ For additional details and requirements refer to the department's *Graduate Degree Requirements* (<http://cs.illinois.edu/prospective-students/graduate-students>) and the *Graduate College Handbook* (<http://grad.illinois.edu/gradhandbook>).

Creative Writing

creativewriting.english.illinois.edu/

Head of the Department: Michael Rothberg
 Director of Graduate Studies: Stephanie Foote
 Director of Creative Writing: Jodee Stanley
 Associate Director of Creative Writing: Steve Davenport
 210 English Building
 608 South Wright Street
 Urbana, IL 61801
 (217) 333-3646
 E-mail: engl_resources@ad.uiuc.edu

Major: Creative Writing
 Degrees offered: M.F.A.

Graduate Degree Programs

The Department of English offers a program of study leading to a Master of Fine Arts. A candidate for the MFA must spend at least four semesters or the equivalent in residence and complete at least 48 graduate hours. A full-time student typically completes this program in three academic years.

Admission

Graduate Record Examination (GRE) scores are required, but the GRE subject test for literature in English is not. All applicants whose native language is not English are required to submit Test of English as a Foreign Language (TOEFL) scores. Currently, a minimum score of 550 on the paper-based test (213 on the computer-based test) is required. Before a teaching assistantship involving classroom instruction or student consultation can be awarded to a non-native speaker of English, the applicant must take the Test of Spoken English (TSE) and achieve a score of 50 or higher (230 or higher before 1996). Because applications for admission usually far exceed capacity, in recent years undergraduate grade point averages of students admitted have been significantly higher than the 3.0 (A = 4.0) required by the Graduate College. The committee on admissions tends to select those applicants who have a solid array undergraduate courses, strong recommendations, and a compelling writing sample: in short, an academic record that shows promise of a student capable of doing outstanding work in the field and earning a degree within a reasonable time. Preference is given to applicants who will be full-time students and active degree candidates. Applicants are considered only in spring for fall admission, and the deadline for submitting applications is December 17.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all MFA candidates in this program.

Financial Aid

Financial aid is available to students in the form of fellowships, teaching assistantships, and waivers of tuition and service fees. For complete information about the program, prospective applicants should consult our website at www.english.illinois.edu/graduate/program/.

Master of Fine Arts in Creative Writing

Workshops	16
Craft course in the appropriate genre	4
Proseminar	4
Approved Literature courses at the 400 and 500 level	8

	8-12
Total Hours	48

Other Requirements ¹

Other requirements may overlap

Four semesters in residence

Teaching experience is required.

A public reading from the completed project is required for graduation

Minimum 500-level Hours Required Overall: 12

Minimum GPA: 2.75

- ¹ For additional details and requirements refer to the department's program requirements (<http://creativewriting.english.illinois.edu/graduate/requirements>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Crop Sciences

www.cropsci.illinois.edu

Head of the Department: G. A. Bollero
 AW-101 Turner Hall
 1102 South Goodwin Avenue
 Urbana, IL 61801
 (217) 244-0396
 E-mail: sdcarson@illinois.edu

Major: Crop Sciences
 Degrees Offered: M.S., Ph.D.

Major: Bioinformatics
 Degrees Offered: M.S.
 Graduate Concentration: Crop Sciences

Online Program: Crop Sciences
 Degrees Offered: M.S.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Crop Sciences and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Crop Sciences offers programs leading to the Master of Science and Doctor of Philosophy degrees. Great flexibility exists for planning programs in various areas, and no rigid curricula are prescribed. The following areas of specialization, along with some of the corresponding disciplines, indicate the breadth of opportunities:

- plant pathology including epidemiology, control, mycology, phytobacteriology, virology, nematology, and host plant resistance;
- plant breeding and genetics including cytogenetics, molecular genetics, quantitative genetics, and genetics of host-pathogen interactions;
- molecular biology and physiology including biochemistry, plant physiology, tissue culture, and plant-pathogen interactions;
- crop production including management, crop ecology, plant nutrition, and international crop production;
- weed science including biology, control, and ecology;
- bioinformatics;
- biometry including experimental design and data analysis;
- integrated pest management including response of crops to climate changes and fate of agricultural chemicals.

These areas of specialization apply to both agronomic and horticulture crops including ornamentals, turf grasses, fruits and vegetables.

The genomic and proteomic projects are generating large amounts of complex biological data that require effective storage, retrieval, analysis and interpretation. The bioinformatics degree program provides students with the skills necessary to augment the understanding and use of agricultural, biological and medical information and resources through the application of molecular, chemical, physical, computational, statistical, mathematical and informatic techniques. Students interested in this program may come with undergraduate training in one of the following areas:

1. biological and agricultural sciences,
2. statistical, mathematical and computer sciences,
3. informatics and engineering sciences.

Graduates from the bioinformatics program will be able to integrate basic and applied concepts in the three areas and apply them to biotechnology and medical research. For additional information, please see our website at cropsci.illinois.edu/graduate/programs/.

Admission

Applicants are considered for admission to the Master of Science program if they have a bachelor's or equivalent degree comparable to that granted by the University of Illinois. Admission to the Ph.D. program will be considered for applicants with the M.S., those nearing completion of the M.S., and in some cases, those with the B.S. Because of the diversity of programs in the Department of Crop Sciences, the preparation that is needed varies considerably. Strong letters of reference, evident motivation to undertake graduate study, and good preparation in basic science courses enhance an applicant's credentials. For some programs, greater emphasis is given to previous training in plant sciences, chemistry, or mathematics. A grade point average equivalent to at least a B in the last 60 semester hours of undergraduate course work plus any graduate level work completed is required. All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Official

scores are required to be submitted directly from TOEFL/ETS or IELTS to the University. Additional information for international applicants can be found at: www.grad.illinois.edu/prospective/international.htm. Results of the Graduate Record Examination (GRE) are required for applicants to all programs except the Online Master of Science degree program. Please see our web page for additional information: cropsci.illinois.edu/graduate/admission.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Crop Sciences. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

Please refer to the following webpage for a detailed listing of our faculty and their areas of interest cropsci.illinois.edu/directory/faculty.

Facilities and Resources

The department of crop sciences has excellent laboratory, greenhouse, and field research facilities available for all types of research. A network of experimental locations throughout the state and cooperative arrangements with other states make thesis research possible under a wide range of environmental and climatic conditions. The department's involvement in international programs may provide opportunities to conduct thesis research abroad. All phases of research, from bioinformatics, molecular biology and biophysics to field testing and crop production, are supported by state-of-the-art facilities. A map of the facilities can be seen at cropsci.illinois.edu/about/facilities.

Financial Aid

Fellowships and assistantships are available to outstanding students on a competitive basis. Awards for financial assistance are based principally on a candidate's academic record, statement of plans, letters of reference, and GRE scores.

- Master of Science in Crop Sciences (p. 635)
- Master of Science in Bioinformatics, Crop Sciences Concentration (p. 634)

Doctor of Philosophy in Crop Sciences

Students are required to pass a preliminary examination within five semesters of first enrolling, not including the summer terms, and after substantial completion of the Ph.D. graded coursework requirement. The preliminary examination is comprised of both an oral and written component and students are expected to defend their Thesis Proposal at the oral component of the examination. Those students on the BA to PhD plan must also pass a Qualifying Exam. An acceptable dissertation is required. Residence requirements are the same as those of the Graduate College.

Entering with approved M.S./M.A. degree

Coursework approved by the graduate guidance committee including CPSC 594, with a grade point average of at least a B, including 16 hours outside the core specialization area are required. (CPSC 594 is not required if it was taken in fulfillment of the master's degree.)	32
CPSC/PLPA 599	Thesis Research (min/max applied toward degree)
Total Hours	64

Other Requirements ¹

Other requirements and conditions may overlap

64 hours of in-residence credit beyond the M.S.

Minimum 500-level Hours Required Overall:	33
Qualifying Exam Required:	No
Preliminary Exam Required:	Yes
Final Exam/Dissertation Defense Required:	Yes
Dissertation Deposit Required:	Yes
Minimum GPA:	3.0

- ¹ For additional details and requirements refer to the department's graduate handbook (http://cropsci.illinois.edu/sites/cropsci.illinois.edu/files/pdf/Grad_Student_Handbook_2013.pdf) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Entering with approved B.S./B.A. degree

Coursework approved by the graduate guidance committee including CPSC 594, with a grade point average of at least a B, including 16 hours outside the core specialization area are required. (CPSC 594 is not required if it was taken in fulfillment of the master's degree.) 64

CPSC/PLPA 599	Thesis Research (min/max applied toward degree)	32
Total Hours		96

Other Requirements¹

Other requirements and conditions may overlap

64 hours of in-residence credit beyond the M.S.

Minimum 500-level Hours Required Overall:	36
Qualifying Exam Required:	Yes
Preliminary Exam Required:	Yes
Final Exam/Dissertation Defense Required:	Yes
Dissertation Deposit Required:	Yes
Minimum GPA:	3.0

- ¹ For additional details and requirements refer to the department's graduate handbook (http://cropsci.illinois.edu/sites/cropsci.illinois.edu/files/pdf/Grad_Student_Handbook_2013.pdf) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

The Online M.S. in Crop Sciences program enables students to strengthen their education typically through part-time study, as most students are working professionals. Courses are delivered mainly through online and other distance education technologies and occasional site-based programming (site-based courses are optional and not required to complete the degree). The Crop Sciences online M.S. program is typically completed as a non-thesis degree, but a thesis option can be pursued pending Departmental approval. (p. 635) The program has a 30-plus year history of providing high quality University of Illinois courses and began granting off-campus MS degrees in 1986 to agriculture professionals across Illinois, as well as in neighboring states. Students may enroll in individual courses for personal or professional advancement or may apply for admission to the master's degree program in Crop Sciences. Students who successfully complete three qualifying courses may also receive a Professional Development Certificate in Crop Sciences.

The Online M.S. in Crop Sciences program also works in conjunction with the Natural Resources and Environmental Studies Online M.S. program and the Agriculture Education Online M.S. program to offer a diverse set of courses. The Department of Crop Sciences is looking to the future and the needs of non-traditional students. Therefore, new courses are continually in development for online delivery and blended formats. A student may complete their entire degree requirements online from anywhere in the world and they are available to in-state students and out-of-state students at the same tuition rates. For more information on Crop Sciences, the Online M.S. in Crop Sciences degree program or certificate offerings, please visit cropsci.illinois.edu/online-program.

Master of Science in Bioinformatics, Crop Sciences Concentration

The Crop Sciences concentration within the M.S. degree in Bioinformatics can be earned with a thesis option or a non-thesis option, which requires optional supervised research experiences.

Thesis Option

One biology course from approved list (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)	4
CS 411 Database Systems	4
or CS 473 Fundamental Algorithms	
One bioinformatics course from approved list (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)	4
Seminar (1 per semester)	
Electives	16
CPSC/PLPA 599 Thesis Research	4
Total Hours	32

Other Requirements ¹

Other requirements and conditions may overlap

A concentration is required

Minimum Hours Required Within the Unit: 5

Minimum 500-level Hours Required overall: 12

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's graduate handbook (http://cropsi.illinois.edu/sites/cropsi.illinois.edu/files/pdf/Grad_Student_Handbook_2013.pdf) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Non-Thesis Option

One biology course from approved list (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)	4
CS 411 Database Systems	4
or CS 473 Fundamental Algorithms	
One bioinformatics course from approved list (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)	4
Electives	24
Total Hours	36

Other Requirements ¹

Other requirements and conditions may overlap

A concentration is required.

Minimum Hours Required Within the Unit: 3

Minimum 500-level Hours Required overall: 12

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's graduate handbook (http://cropsi.illinois.edu/sites/cropsi.illinois.edu/files/pdf/Grad_Student_Handbook_2013.pdf) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Master of Science in Crop Sciences

Candidates must complete 32 hours of graduate study as approved by their graduate guidance committee with at least a B average. An oral final examination is required of all M.S. candidates, and written examinations may be required at the option of the examining committee.

Thesis Option

CPSC 594 Professional Orientation CPSC	1
CPSC 598 Seminar (when presenting)	1
Electives including at least 4 hours of graded coursework at the 500 level other than CPSC 599	18
CPSC/PLPA 599 Thesis Research (min-max applied toward degree)	12
Total Hours	32

Other Requirements ¹

Other requirements and conditions may overlap

Minimum Hours Required Within the Unit: 5

Minimum 500-level Hours Required overall: 12

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's graduate handbook (http://cropsi.illinois.edu/sites/cropsi.illinois.edu/files/pdf/Grad_Student_Handbook_2013.pdf) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Non-Thesis Option

CPSC 594 Professional Orientation CPSC	1
CPSC 598 Seminar (when presenting)	1

Electives including at least 4 hours of graded coursework at the 500 level other than CPSC 599	30
Total Hours	32

Other Requirements ¹

Other requirements and conditions may overlap

Minimum Hours Required Within the Unit: 1

Minimum 500-level Hours Required overall: 12

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's graduate handbook (http://croppsci.illinois.edu/sites/croppsci.illinois.edu/files/pdf/Grad_Student_Handbook_2013.pdf) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Curriculum and Instruction

education.illinois.edu/ci

Head of the Department: Fouad Abd El Khalick
Director of Graduate Studies: Karla Möller
Graduate Admissions Information: Myranda Lyons
311 Education Building
1310 South Sixth Street
Champaign, IL 61820
(217) 244-8286
E-mail: cigradprograms@ed.illinois.edu

Major: Curriculum and Instruction
Degrees offered: Ed.M., M.S., M.A., C.A.S., Ph.D., and Ed.D.
Graduate Concentration: Second Language Acquisition and Teacher Education (Ph.D. only), Writing Studies (Ph.D. only)

Major: Early Childhood Education
Degrees offered: Ed.M. with teacher licensure

Major: Elementary Education
Degrees offered: Ed.M. with teacher licensure

Major: Secondary Education
Degrees offered: Ed.M. with teacher licensure
Graduate Concentrations: English, Mathematics, Sciences, Social Studies

Off-Campus Program: Curriculum and Instruction
Degrees offered: Ed.M.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Curriculum and Instruction and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Curriculum and Instruction offers graduate programs leading to the degrees of Master of Education (Ed.M.), Master of Science (M.S.), Master of Art (M.A.), Certificate of Advanced Study (C.A.S.), Doctor of Philosophy (Ph.D.), and Doctor of Education (Ed.D.). Students may work with faculty who specialize in:

- Aesthetics Education
- Bilingual/ESL Education
- Curriculum Studies
- Early Childhood Education
- Early Literacy
- Elementary Education
- English Education
- Literature for Children and Adolescents
- Mathematics Education
- Multicultural Education
- Reading Education
- Science Education
- Second Language Literacy
- Secondary Education
- Social Studies Education
- Teacher Education
- Technology Studies
- Writing Education

Graduate students interested in writing can obtain a concentration in Writing Studies (<http://www.cws.illinois.edu/graduate>) at the Ph.D. level.

Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competent and better informed practitioners who serve as leaders for educational reform in local schools and school districts.

Also offered are master's degree programs leading to teacher licensure for individuals who have a degree in a field other than education and who wish to become teachers. The three majors leading to licensure are Early Childhood Education, Elementary Education, and Secondary Education. Students in these programs follow the same sequence of professional education courses as undergraduate students, in addition to completing the courses required for an Ed.M. degree.

Only master's students wishing to become licensed teachers in one of these three areas should apply to the Early Childhood Education, Elementary Education, or Secondary Education majors. Master's candidates who do not wish to become teachers, or are already teachers, should apply to the major in Curriculum and Instruction.

Two doctoral degree programs are offered. The Ph.D. program prepares degree candidates for careers involving research and scholarship, including those in colleges and universities where research is generally combined with teacher education. The Ed.D. Program prepares scholarly practitioners for leadership positions in teacher training institutions, state education agencies, and public school districts.

Length of time for a degree: an Ed.M. program can be completed in a calendar year, while the M.S. takes longer. The Ed.M. with licensure typically takes two years to complete. Doctoral programs usually require four to five years of full time study.

Admission

Applicants should apply online at www.education.illinois.edu/ci/admissions. In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. Scores for the Graduate Record Examination (GRE) must be submitted for Ph.D. applicants who wish to specialize in mathematics, science, instructional technology, or early childhood. No test scores are necessary for other areas of study or degrees. A scholarly writing sample in English, such as a master's thesis, article, or paper, is required for application to the doctoral program. Applicants for the master's degree with teacher licensure must submit passing scores on the Illinois Licensure Testing System Test of Academic Proficiency (TAP) or use their ACT/SAT score in lieu of passing the TAP (<http://education.illinois.edu/students/prospective-students/ACT>) and if required for your area of licensure, the appropriate content area examination. Note: The master's with teacher licensure program admits students only during the fall term.

International applicants must submit TOEFL scores. The Department of Curriculum and Instruction's TOEFL requirement for full status admission is greater than 102; the minimum score for limited status is 550 on the paper-based test, 79 on the internet-based test and 213 on the computer-based test. International applicants must also submit a Declaration and Certification of Finances. Please note: TOEFL or IELTS scores must be less than two years old from the first day of class at the proposed term of entry in order to be valid. In addition, individual academic programs may require a higher score, or evidence of spoken English language proficiency; contact your proposed program of study office (<http://www.grad.illinois.edu/admissions/depts>) for the minimum TOEFL, TSE, or IELTS requirement for admission. For additional details, refer to the Graduate College Handbook www.grad.illinois.edu/admissions/instructions/04c.

Degree Requirements

- Masters (p. 639)
- Doctoral (p. 639)
- C.A.S. (p. 639)

For additional details and requirements refer to the department's Web site (<http://www.education.illinois.edu/ci>), the College of Education Graduate Programs Handbook (http://www.ed.illinois.edu/students/grad_handbook), and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Curriculum and Instruction. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Faculty Research Interests

For information about specific faculty research interests, current grants, and publications, please visit the Faculty Research Profiles web site: www.ed.illinois.edu/ci/frp.

Facilities and Resources

Departmental resources consist of cooperation with Children's Research Center, Center for Small Urban Communities, as well as other resources in the College. Students who are interested in second language acquisition can become a part of the SLATE program. The department is connected to the University of Illinois Writing Project and the following journals: *International Journal of Education & the Arts*, *Journal of Curriculum Studies*, and *American Educational Research Journal*. We also have resources for graduate students such as the Language and Literacy Student Organization and other student-initiated groups in Curriculum, Aesthetics, and Teacher Education; and Mathematics, Science, and Technology.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at www.grad.illinois.edu/campus-resources.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college and campus. There are opportunities available through the department (<http://education.illinois.edu/ci>), the College of Education (<http://education.illinois.edu/students/graduate-financialaid>), and the Bureau of Educational Research. (<http://www.ed.illinois.edu/ber/fundingresources.html>) **Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship.** Campus opportunities can be found at the Graduate College (<http://www.grad.illinois.edu/funding-jobs>) and the Office of Student Financial Aid (<http://www.osfa.illinois.edu>).

Certificate of Advanced Study (C.A.S.), Curriculum and Instruction

The University of Illinois at Urbana-Champaign's College of Education complies with the U.S. Department of Education's Gainful Employment requirements by disclosing information to applicants regarding our Certificate of Advanced Study program. Required information can be found here (http://provost.illinois.edu/ProgramsOfStudy/2014/fall/programs/graduate/CAS_C&I/Gedt.html).

If the student does not have a Master's degree from the University of Illinois at Urbana-Champaign, Foundation Courses must be completed as prerequisites:

Psychological Foundations Courses in Educational Psychology

Select one of the following:

4

EPSY 400	Psyc of Learning in Education
EPSY 401	Child Language and Education
EPSY 402	Sociocultural Infl on Learning
EPSY 405	Personality and Soc Dev
EPSY 406	Psyc of Classroom Management
EPSY 407	Adult Learning and Development
EPSY 408	Learn and Human Dev wi Ed Tech
EPSY 430	Early Adolescent Development
EPSY 490	Developments in Educ Psyc

OR EPSY 485 for 2 hours plus 2 hours of a previously named EPSY course

Philosophical and Social Foundations Courses in Educational Policy Studies

Select one of the following:

4

EPS 400	History of American Education
EPS 401	History of Educational Ideas
EPS 402	Asian American Education

EPS 403	European Education to 1600	
EPS 404	European Education since 1600	
EPS 405	Historical & Social Barriers	
EPS 410	Philosophy of Education	
EPS 411	School and Society	
EPS 412	Critical Thinking for Teachers	
EPS 413	Aesthetic Education	
EPS 415	Technology & Educational Reform	
EPS 420	Sociology of Education	
EPS 421	Racial and Ethnic Families	
EPS 423	Politics of Education	
EPS 424	Economics of Education	
EPS 426	Comparative Education	
Elective Hours:		24-32
General Coursework Required: 16 hours		
Research/Project/Independent Study Hours (min/max applied toward degree):		0-8
Total Hours		32

Other Requirements ¹

Other requirements may overlap

Enrollment must be preceded by at least two years of acceptable professional work experience.

500-Level Hours Required: 16 hours (Independent Study included)

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's Web site (<http://education.illinois.edu/ci>), the *College of Education Graduate Programs Handbook* (http://education.illinois.edu/students/grad_handbook), and the *Graduate College Handbook* (<http://www.grad.illinois.edu/handbooks-policies>).

Joint M.B.A. Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements (p. 583) and contact the M.B.A. program and their major department office for more information.

Doctor of Education in Curriculum and Instruction

Cognate Requirement (minimum applied toward degree)	16
Research Methods	8
Elective Hours:	36
General Course Work	
Research/Project/Independent Study Hours (min/max applied toward degree):	0-12
CI 599	Thesis Research (min/max applied toward degree)
Total Hours	64

Other Requirements¹

Master's Degree Required for Admission to Ph.D.

Residency 2 consecutive full-time (12 hours) semesters of study on campus

Qualifying Exams

Human Subjects Approval

Preliminary Exam

Final Exam/Dissertation Defense

Dissertation Deposit

Dance

www.dance.illinois.edu

Head of the Department of Dance: Jan Erkert
MFA Program Director: Jennifer Monson
907 1/2 West Nevada Street
Urbana, IL 61801
(217) 333-1010
Fax: (217) 333-3000
E-mail: dance@illinois.edu

Major: Dance
Degrees Offered: M.F.A.

Graduate Degree Program

The Department of Dance offers a graduate program leading to the Master of Fine Arts degree. The mission of the MFA Program is to foster substantive choreographic research that posits dance as a force in contemporary culture. The program embraces a wide spectrum of individual movement research and embodied practice to create a dynamic learning atmosphere for critical engagement with choreographic process.

The Dance Department expects MFA candidates to conduct a creative inquiry that leads to the development of a sophisticated sense of self-definition. Individual research and analysis should culminate in the development of a personal artistic process and mission and should be evident in the following contexts:

Choreographing- Candidates will develop a distinctive choreographic research methodology and demonstrate its skillful application in a performative context. This artistic process/vision/field of interest must establish a solid foundation for ongoing research and engagement that contributes to the global dialogue about dance and contemporary culture.

Communicating- Candidates will develop the ability to express their choreographic vision and process in verbal and written language that is clear, cogent, and demonstrates clear analytic skill, critical thinking, awareness of historical context, and knowledge of contemporary culture.

Moving- Candidates will demonstrate a commitment to movement investigation and practice that defines, advances, and sustains their choreographic vision.

Teaching-Candidates will apply their research vision in clear pedagogic principles while fostering a stimulating teaching/learning environment.

Developing a Career Plan- Candidates will devise bold and innovative career strategies in order to advance their artistic mission in the field and demonstrate the capacity to implement these plans with professionalism in all the above contexts.

Admission Requirements

Prerequisites for admission to the MFA program are:

1. An undergraduate degree in dance is preferred, but we do accept students with undergraduate degrees in other subjects. Depending on background and skills, students may be expected to complete other dance requirements.
2. Demonstrated potential to engage in critical thinking and writing.
3. Demonstrated choreographic achievement and potential to make innovative contributions to the field.
4. A minimum grade point average of 3.0 on a 4 point scale, computed from the last 60 hours of undergraduate work and any graduate work completed.

International students must have a minimum TOEFL score of 79 on the internet-based test, 213 on the computer-based tests, or 550 on the paper test for limited status admission. Students with these minimum scores must take the English as a Second Language Placement Test (EPT) upon entry to the University. International students who receive a score greater than 103 on the internet-based test, 257 on the computer-based test, or 613 on the paper test are eligible for full status admission. Students with these scores are exempt from the English as a Second Language Placement Test. The GRE is not required.

Faculty Research Interests

An extraordinary faculty of artists, researchers and scholars has gathered at Illinois, who are creating new paradigms for interactions between the professional arena and the academic training ground. Our group of professional artists includes Jan Erkert, Sara Hook, Philip Johnston, Linda Lehovec, Jennifer Monson, Rebecca Netti-Fiol, Tere O'Connor, Cynthia Oliver, Kirstie Simson, John Toenjes, and Renee Wadleigh, all of whom share a commitment to teaching and preparing students for leadership roles in the field of dance.

Financial Aid

Two forms of financial aid are offered to graduate students by the Department of Dance:

- Teaching, video and administration assistantships are available to graduate students. Assistantships of 25% or greater qualify the student for a tuition waiver. All students are required to apply for Federal Work Study.
- A variety of Fellowships are available through The Graduate College each year, including: (A full listing of Fellowships can be found at: www.grad.illinois.edu/fellowships)
 - The Creative and Performing Arts Fellowship, which may include stipends up to a maximum of \$6,000 for a student demonstrating outstanding choreographic and performance talent.
 - The Graduate College Fellowship for Underrepresented Students provides fellowships in the amount of \$8,000 and are available to outstanding minority students.

Graduate teaching assistantships are awarded to experienced teachers. Prospective students who have had prior teaching experience may apply for a teaching interview by completing the enclosed Teaching Audition Application Form. A letter of recommendation from a dance professional who has observed the applicant's teaching is required with the application.

Prospective MFA candidates are encouraged to apply for financial assistance through the Office of Student Financial Aid, 420 Student Services Bldg., University of Illinois at Urbana-Champaign, Champaign, IL 61820. (217) 333-0100.

Master of Fine Arts in Dance

Some degree of curricular flexibility is permitted depending on previous experience and current interests and goals. Cross-disciplinary work and independent study in areas of interest are encouraged. The ability of the candidates to pursue graduate study is assessed at the midterm of the second semester in the first and second year in residence, at which time a decision is made regarding continuation in the program and the length of the residency requirement.

In rare cases, the department (in collaboration with the Graduate College) will waive up to a maximum of 12 hours of credit because of extensive prior experience which is defined by "exhibiting a large scope and depth of successful practice in the field of dance." These hours may be in one of or a combination of Composition, Performance, or Technique. This consideration for waiver of credit will not be made unless the prior dance experience is of the highest quality (on a national or international level) and has been sustained consistently over a number of years (at least a decade). This experience must be well documented and must be confirmed and demonstrated by the candidate's contributions to the department. Therefore, such waivers cannot be considered until well into the student's program of study.

Physical Practice		12-18
DANC 510	Grad Seminar/Special Topics	4
DANC 531	MFA Prof Practice Seminar	1
DANC 532	Digital Media for Dancers	2

Research/Project Hours (min/max applied toward degree)		8
Total Hours		60

Other Requirements ¹

Other requirements may overlap

Course work taken to completed undergraduate deficiencies will not receive graduate credit.

Residency requirement of three years (six semesters)

Minimum 500-level Hours Required Overall: 12

Minimum GPA: 2.75

¹ For additional details and requirements refer to the department's MFA Handbook (<http://dance.uiuc.edu/for-current-students-and-faculty/handbooks-and-policies>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

East Asian Languages and Cultures

www.ealc.illinois.edu

Head of Department: Gary Xu
Director of Graduate Studies: Makoto Hayashi
2090 Foreign Languages Building
707 South Mathews Avenue
Urbana, IL 61801
(217) 244-1432
E-mail: ealc@illinois.edu

Major: East Asian Studies
Degrees Offered: M.A.

Major: East Asian Languages and Cultures
Degrees Offered: Ph.D.
Graduate Concentration: Medieval Studies (p. 811) (Ph.D.), Second Language Acquisition and Teacher Education (p. 891) (Ph.D. only)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in East Asian Languages and Cultures and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.uiuc.edu/mdphd/>).

Graduate Degree Programs

The Department of East Asian Languages and Cultures offers academic programs in the languages and the humanistic cultures of China, Japan, and Korea, and of the East Asian region, leading to the Master of Arts in East Asian Studies and the Doctor of Philosophy in East Asian Languages and Cultures.

www.ealc.illinois.edu/programs/graduate/

Admission

Applicants are expected to have a strong background in at least one East Asian language; normally, this means a minimum of two years of formal study. Applicants to the graduate program must submit an application for admission online (www.grad.illinois.edu/admissions/apply) and submit a statement of purpose, three letters of reference completed by teachers, advisers, or recent employers, and a 10-20 page writing sample. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should be sent to:

SLCL Graduate Student Services
3070 Foreign Languages Bldg.
707 S. Mathews Ave.
Urbana, IL 61801

Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 103 on the internet-based test (iBT) for admission with full standing; they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c). Students with a B.A. or B.S. only should apply to the M.A. Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu. (slclgradservices@illinois.edu)

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including East Asian Languages and Cultures. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at <https://www.med.illinois.edu/mdphd/>.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. Therefore, applicants are requested to include information on teaching background as part of the application, and students can normally be expected to teach at least one semester as part of their graduate experience. Non-native English speakers must first pass a test of their oral English ability.

www.grad.uiuc.edu/admissions/taengprof.htm (<http://www.grad.uiuc.edu/admissions/taengprof.htm>)

Financial Aid

The Department makes every effort to assist graduate students in securing financial aid. Financial aid packages usually combine some form of fellowship support with teaching or research assistantships in a manner that allows for both teaching experience and timely completion of the degree. In recent years, the vast majority of EALC graduate students have received some form of financial support. Financial aid for graduate students in the Department of East Asian Languages and Cultures may include:

- University Fellowships
- Foreign Language and Area Studies (FLAS) Fellowships
- University Dissertation Completion Fellowships
- Minority Academic Partnership Plan (MAPP) Fellowships
- teaching assistantships
- research assistantships

All awards of financial aid are made following competitive application.

Doctor of Philosophy in East Asian Languages and Cultures

Applicants to the Ph.D. program normally must hold a master's degree in East Asian studies or a related discipline with an East Asian concentration.

Candidates for the Ph.D. may specialize in culture (e.g., religion, literature, history), language acquisition, or language pedagogy, with a major concentration in China, Japan, or Korea.

Other general requirements include: an annual review of progress, including an evaluation of research capability; a written and oral preliminary examination in the major and two minor fields (after completion of coursework); presentation of a dissertation proposal (often as part of the preliminary exam); and completion and defense of the dissertation. www.grad.illinois.edu/gradhandbook/chapterVI/section01

Entering with approved M.S./M.A. degree

Courses in the major field defined by culture and discipline (500-level)	16
--	----

Research seminars (500-level)	8
-------------------------------	---

Elective 500-level courses	8
----------------------------	---

Two graduate courses in a second discipline and two in a second culture must be completed as part of the Ph.D. coursework

Language Requirement:

Candidates must demonstrate a knowledge of one East Asian language at the fourth-year level by satisfactory completion of appropriate (400-level) coursework or examination and passage of a written examination covering material studied while in residence.

Demonstration of proficiency in a second language relevant to the student's course of study usually Chinese, Japanese, Korean evidenced by either a) completion of minimum of two years of an approved sequence courses; or b) by examination.

EALC 599	Thesis Research (32 max applied toward degree)	0-32
----------	--	------

Total Hours	64
-------------	----

Other Requirements ¹

Other Requirements may overlap

In addition to the language requirements noted above, Ph.D. students whose primary focus is Japan are required to take one year of classical Japanese, and those whose primary focus is China are required to take one year of classical Chinese. These may be counted toward degree requirements.

Qualifying Exam Required	No
--------------------------	----

Preliminary Exam Required	Yes

Economics

www.economics.illinois.edu

Head of the Department: Martin Perry

Associate Head: George Deltas

214 David Kinley Hall

1407 W. Gregory Dr.

Urbana, IL 61801

(217) 333-0120

Fax: (217) 244-6571

E-mail: econ@illinois.edu

Major: Economics

Degrees Offered: M.S., M.A., Ph.D.

Graduate Concentration: Policy Economics (M.S. only)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Economics and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Economics offers graduate programs leading to the Master of Science in Policy Economics and Doctor of Philosophy degrees. The candidate for a Ph.D. may specialize in the following fields:

- microeconomic theory
- public economics
- macroeconomic theory
- international economics
- labor economics
- development economics
- mathematical economics
- econometrics
- industrial organization

The department is not admitting students to the M.A. at this time.

Admission

Admission to the Ph.D. program is available only for the fall semester. In addition to the standard undergraduate preparation in economics, students are expected to have had at least two semesters of calculus and one of linear algebra to be admitted to the Ph.D. program. The results of the Graduate Record Examination (GRE) should accompany applications for admission. Graduate College admission requirements apply. In addition, international students must submit Test of English as a Foreign Language (TOEFL) or IELTS results; if they wish to apply for a teaching assistantship, the Test of Spoken English (TSE) or completion of the speaking section of the TOEFL-iBT or IELTS is also required.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Economics. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the Department of Economics and the College of Medicine. Students in the combined program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at <https://www.med.illinois.edu/mdphd/>.

Graduate Teaching Experience

Experience in teaching is considered an important part of the graduate program and is encouraged as part of the academic work of all Ph.D. candidates in this program.

Financial Aid

In recent years, the Department of Economics has been able to offer assistantships to most students who meet the standards for admission or continuation in the PhD program. In order to qualify for a teaching assistantship, non-native speakers of English must pass a speaking proficiency test of the English language.

- Master of Science in Economics (p. 654)
- Master of Science in Economics, Policy Economics Concentration (p. 655)

Doctor of Philosophy in Economics

Students must pass comprehensive qualifying examinations on Econometrics, Macroeconomics and Microeconomics. Those who fail the comprehensive examinations will have a 2nd chance in the start of the fall semester and a 3rd chance at the end of the fourth semester (in this 3rd chance they will take the exams with the first year students of the next cohort). Students who have failed the 3rd chance will not be allowed to register for the following year. Upon meeting course and GPA requirements, they will be eligible to receive a master's degree in Economics, provided they have not previously received such a degree from another institution.

Candidates must also successfully complete two fields through coursework and/or a written examination. A research paper must be submitted prior to the start of the third year and approved prior to the end of that year. Students who fail to meet these deadlines will have reduced financial support and be placed on academic probation. Unless they return to good standing by satisfying the requirement, they will be dropped from the program at the end of the following semester.

A dissertation is also required. In addition, candidates are required to give an oral defense of the dissertation proposal and pass an oral final examination covering the research. A student with an appropriate background who devotes full time to graduate work can complete the Ph.D. degree in four years beyond the bachelor's degree. An additional year or more is usually necessary, especially for those holding part-time assistantships. Students in the Ph.D. program may earn a master's degree as they work toward the Ph.D. degree.

Optional: A not-for-credit Math Camp after campus orientation, consisting of 12 hours of instruction. The aim of the Math Camp is to prepare students with no master's level coursework in mathematical economics for the program's first year classes. However, it will be open to all incoming students.

Additional information can be found at www.economics.uiuc.edu/programs/phdprogram/ (<http://www.economics.illinois.edu/programs/phdprogram>).

Master of Science in Economics, Policy Economics Concentration

This is a specially designed one- to two-year program to address the needs of two groups of students. One is promising young professionals and administrators who need additional training in the areas of economic analysis and quantitative techniques. The other is students who are potentially interested in pursuing a Ph.D. degree but require additional qualification to enable them to do so. While earning the master's degree and acquiring the necessary tools for further studies, they will learn if the pursuit of a Ph.D. degree is within their reach and suits their purposes.

Students enter the program only in the fall term.

The required coursework is further enriched through

1. academic advising wherein an academic advisor with an open-door policy allows the MSPE students to drop by his office at their convenience, discuss their academic questions with him, and re-optimize their program of study on a continual basis. The academic advisor also provides guidance on study plans beyond graduation and provides support in achieving them;
2. an orientation program that includes an intensive mathematics course; this course serves as a refresher for the math content to be utilized during the students' courses in the program;
3. opportunities to participate in field trips to observe the operation of financial institutions, modern industrial production facilities, federal and state government agencies, and international institutions;
4. scheduled lectures by outstanding, internationally known economists;
5. discussion groups and tutoring for participants who are having difficulty;
6. program staff assistance with visas, housing, and other nonacademic concerns; and
7. participation in social activities, including graduation dinners, holiday parties, picnics, and special luncheons.

This is a designated full-cost recovery program and no financial aid is available for the students in this program.

Please see www.mspe.illinois.edu for detailed information on the MSPE Program.

Phone: (217) 333-0807
Fax: (217) 244-5632
E-mail: epol@illinois.edu

Major: Human Resource Education
Degrees offered: Ed.M., M.S., C.A.S. Ph.D.
Graduate Concentrations: Human Resource Development (Ed.M., M.S., Ph.D. only)

Major: Educational Organization and Leadership
Degrees Offered: Ed.M., M.S., C.A.S., Ed.D., Ph.D.
Graduate Concentrations: Higher Education (available to all degrees), Educational Administration and Leadership (available to all degrees)

Major: Educational Policy Studies
Degrees Offered: Ed.M., M.A., Ph.D.
Graduate Concentration: African American Studies (M.A., Ph.D.), Global Studies in Education (Ed.M., M.A., Ph.D.)

Off-Campus Program: Educational Organization and Leadership
Degrees Offered: Ed.M., C.A.S., Ed.D.

Online Programs: Human Resource Education, Ed.M. (Graduate Concentrations: Human Resource Development; Community College Teaching and Learning; Learning Design and Leadership);
Educational Organization and Leadership, Ed.M.; Educational Policy Studies, Ed.M.

Graduate Minor: College Teaching

Joint Degree Program: Human Resource Education and Business Administration
Degrees Offered: Ed.M. and M.B.A.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Educational Organization, and Leadership, Educational Policy Studies, or Human Resource Education and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

Degree programs in the Department of Education Policy, Organization and Leadership are designed to meet the academic and professional interests of individuals preparing for careers as academic professionals, adult educators, college professors, corporate trainers, educational policy analysts, governmental administrators, instructional designers/technologists, non-profit representatives, organizational development specialists, and university administration leaders. The department is organized into the following areas of specialization:

1. Education Policy
2. Higher Education
3. Educational Administration and Leadership
4. Human Resource Development
5. Social and Philosophical Foundations
6. Global Studies in Education

Admission

The Department of Education Policy, Organization and Leadership carefully considers all applicants for graduate study. Applicants should consult the department website for more detailed information and should apply online at <http://education.illinois.edu/epol/admissions/howtoapply>. (<http://education.illinois.edu/eol/admissions/howtoapply>) The quality of the applicant's undergraduate and graduate training and grade point average are primary considerations. Other important factors evaluated include the three letters of recommendation and statement of purpose. International applicants must submit a TOEFL score. Graduate Record Examination (GRE) scores obtained in the last four years are required for PhD candidates in the Human

Resource Education and the Educational Organization and Leadership majors. For additional admission details refer to the department's Web site (<http://education.illinois.edu/epol>).

Off-Campus Programs

The EPOL department offers selected off-campus programs in the Chicago region, through the use of a cohort model. The Ed.M. and C.A.S. degree options with General Administrative Endorsement are offered in the Chicago region. Two Ed.D. degree cohorts also are available: Community College Executive Leadership and Superintendent Endorsement. Students enrolled in the Ed.D. program also attend selected classes on the Urbana-Champaign campus. Requirements for the off-campus Ed.M., C.A.S., and Ed.D. programs are identical to the on-campus degrees.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Facilities and Resources

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at www.grad.illinois.edu/campus-resources.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college and campus. There are opportunities available through the department (<http://education.illinois.edu/epol>), the College of Education (<http://education.illinois.edu/students/graduate-financialaid>), and the Bureau of Educational Research (<http://www.ed.illinois.edu/ber/fundingresources.html>). Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship. Campus opportunities can be found at the Graduate College (<http://www.grad.illinois.edu/financial-aid>) and the Office of Student Financial Aid (<http://www.osfa.illinois.edu>).

Graduate Minor in College Teaching

The Department of Education Policy, Organization and Leadership (EPOL) offers a Graduate Minor in College Teaching. The minor provides students with the opportunity to explore the scholarly literature on and practice of teaching and learning in postsecondary settings. Students in good standing in the Illinois Graduate College are eligible to apply for the minor. For additional information, please contact EPOL.

Note: Students within the major can not minor in the same program.

EOL 572	The College Student	4
EOL 585	College Teaching	4
Select one of the following:		4
EOL 573	The Community College	
EOL 574	Diversity in Higher Education	
EOL 582	College Student Development	
EOL 586	Changing College Curriculum	
Total Hours		12

Other Requirements ¹

In addition to the minor requirements, students must also complete the requirements of their major degree.

Hours counted toward completion of a minor may not also be applied toward any other transcribed credential.

¹ For additional details and requirements refer to the department's Web site, the College of Education Graduate Programs Handbook, and the Graduate College Handbook.

We offer a Master of Education degree and online certificate programs that enable students to receive a University of Illinois education without ever coming to our campus. The online master's degree is available in the following areas of study:

Master of Education in Human Resource Education - Online

- Community College Teaching and Learning Concentration (p. 676)
- Learning Design and Leadership Concentration (p. 678)
- Human Resource Development Concentration (p. 677)

Master of Education in Educational Organization and Leadership

- Educational Leadership and Policy specialization (p. 669)

Master of Education in Educational Policy Studies

- Diversity and Equity Issues in Education specialization (p. 673)
- Global Studies in Education Concentration (p. 674)
- New Learning and New Literacies specialization (p. 675)
- Teaching Critical Thinking specialization (p. 675)

M.B.A. Joint Degree Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the [joint program requirements](#) and contact the M.B.A. program and their major department office for more information.

Certificate of Advanced Study in Educational Organization & Leadership, Educ Admin Concentration

The University of Illinois at Urbana-Champaign's College of Education complies with the U.S. Department of Education's Gainful Employment requirements by disclosing information to applicants regarding our Certificate of Advanced Study program. Required information can be found here (http://provost.illinois.edu/ProgramsOfStudy/2014/fall/programs/graduate/CAS_EOL/Gedt.html).

If the student does not have a Master's degree from the University of Illinois at Urbana-Champaign, Foundation Courses must be completed:

Psychological Foundations Courses in Educational Psychology

Select one of the following:

4

EPSY 400	Psyc of Learning in Education
EPSY 401	Child Language and Education

Master of Education in Educational Organization & Leadership, Educ Leader & Policy Specialization

This Master of Education degree focusing on Educational Leadership and Policy represents a unique opportunity to gain a P-20 perspective, with an enhanced policy focus on issues related to educational organizations. This program strives to develop primary, secondary, and postsecondary educational leaders, administrators, and policy analysts who seek to understand and address critical P-12 and higher education issues. Students will study different educational leadership and policy practices and theories with particular focus paid to educational access, equity, and excellence. This program does not provide administrative licensure.

Master of Education in Educational Policy Studies, Diversity & Equity Issues in Educ specialization

Diversity and Equity Issues in Education is an interdisciplinary college-wide online program is designed to expose students to the historical and contemporary social issues related to diversity, equity and learning in education. The classes emphasize various aspects of diversity related to school leadership, race, gender, sexual orientation, disability, and curriculum and pedagogical implications. An innovative capstone project is required for the degree.

Master of Education in Educational Policy Studies, Global Studies in Education Concentration

The Global Studies in Education program examines the changing forms of global interconnectivity and interdependence and their implications for thinking about and researching education policy and governance and its connection to theories of globalization, postcoloniality, and the politics of representation and culture. The program also addresses education and the emerging role of international and non-government organizations in shaping the context of educational policy in a globalized world.

Master of Education in Human Resource Education, Community College Teaching & Learning Concentration

Our CCTL program is one of the only online or on-campus programs in the country specifically geared to improve the teaching effectiveness of community college faculty. The program provides conceptual foundations and practical, hands-on projects for faculty members at community and technical colleges. The program is especially beneficial for faculty members who have subject-matter expertise, but no formal training in teaching methods. Our CCTL program succeeds in improving the instructional capacity of faculty who educate a vital aspect of our workforce.

Master of Education in Human Resource Education, Human Resource Development Concentration

The HRD online program was one of the first 100% online degree programs in the world. As the field of HRD has grown in importance, so has our program. The program emphasizes a conceptual understanding of adult learning, training, and organization development, while requiring the development of specific skills through hands-on projects. Students, alumni, and employers consistently report that the program has expanded their horizons of HRD and that course projects have directly impacted their organizations.

Educational Psychology

www.education.illinois.edu/edpsy

Chair: Jose Mestre
Director of Graduate Studies: Kiel Christianson
Graduate Admissions Information: Myranda Lyons
288 Education Building
1310 South Sixth Street
Champaign, IL 61820-6990
Phone: (217) 333-2245
Fax: (217) 244-7620
edpsy@illinois.edu

Major: Educational Psychology

Degrees offered: Ed.M., M.S., M.A., C.A.S., Ph.D.

Graduate Concentration: African American Studies (<http://www.afro.illinois.edu/education/gradconc>) (available to all on-campus degrees), Second Language Acquisition and Teacher Education (<http://www.french.illinois.edu/grad/specializations/SLATE>) (Ph.D. only)

Online Program: Educational Psychology

Degree offered: Ed.M.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Educational Psychology and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Educational Psychology offers doctoral programs in the following areas of specialization:

- Cognitive Science of Teaching and Learning (CSTL)
- Child Development
- Studies in Interpretive, Statistical, Measurement, and Evaluative Methodologies for Education (QUERIES)
- Counseling

Students entering without a master's degree must first complete the requirements for a Master of Science (including a master's thesis).

The Department offers terminal master's degrees:

- An on-campus Master of Science (M.S.) degree, with a focus on Studies in Interpretive, Statistical, Measurement, and Evaluative Methodologies for Education (QUERIES)
- An online Master of Education degree (Ed.M.) degree, with focus on Evidence-Based Reasoning.

The Department offers a Certificate of Advanced Study (C.A.S.), a terminal degree for education professionals beyond the master's degree (http://education.illinois.edu/saao/handbooks/g handbook_dr_cas).

Admission

The department accepts applications for the Ph.D. degree, from both applicants who have completed their bachelor's degrees and those who have a master's degree. Students who enter the program without a prior master's incorporate their master's class work and research into their doctoral program, and earn a master's degree as the first step toward their Ph.D. The department offers two terminal master's programs, an on-line Master of Education (Ed.M.) degree with a focus on Curriculum, Technology, and Education Reform (CTER) and an on-line Master of Education (Ed.M.) degree with a focus on Quantitative Literacy.

Applications

Doctoral applicants must submit a complete application for university admission, including three letters of reference, transcripts from all schools where undergraduate and graduate degrees were awarded or expect to be awarded prior to the application enrollment term, and other items listed in the department Web site (<http://www.education.illinois.edu/edpsy>). Applicants to our doctoral program apply for Fall enrollment. Current deadlines are posted on our department Web site (<http://www.education.illinois.edu/edpsy>). Applicants for both of our online Ed.M. program apply for Spring and Summer enrollment. Admissions requirements are somewhat different from the doctoral program. Applicants should consult the department's on-line program Web site (<http://cterport.ed.uiuc.edu>) for current admissions criteria, deadlines and program description.

Doctoral candidates are admitted into one of four divisions: CSTL, Child Development, QUERIES and Counseling. When making admission decisions, division committees consider academic performance (e.g., grade-point average, GPA), GRE scores, letters of recommendation, and statement

of purpose. Preference is given to those with research experience and research interests that are aligned with existing research programs in the Department.

Master's candidates are only admitted into QUERIES.

Grade Point Average

The preferred department standard for grade point average is 3.5 on a 4.0 scale. The University calculates undergraduate GPAs on the last two years of grades for degreed applicants and in the last one year for students who have not yet completed their bachelor's degree. Graduate GPAs are calculated on the total of all graduate level courses taken beyond the undergraduate degree.

Test of English as a Foreign Language (TOEFL)

International applicants must have demonstrated English language competence with TOEFL scores of greater than 610 (paper and pencil test), greater than 253 (computer-based test), or greater than 102 iBT. An IELTS score of greater than 6.5 overall, with at least 6 in each sub-section, can be substituted for the TOEFL score. Students who are accepted with lower scores will be required by the University to enroll on a limited status basis for at least their first semester.

Area of Study Affiliation

All applicants to the Educational Psychology doctoral program must specify one of four areas in which they wish to study:

- Cognitive Science of Teaching and Learning (CSTL)
- Counseling Psychology (Counseling);
- Child Development
- Studies in Interpretive, Statistical Measurement, and Evaluative Methodologies for Research (Queries)

Detailed information about each area and about the research interests of the faculty can be found on the department Web site (<http://www.education.illinois.edu/edpsy>).

Although all Ph.D. students are admitted to a specific area of study, the actual coursework, research, and faculty often overlap area boundaries. Departmental policy makes it possible for a student to change advisers and affiliation from one area to another when interests and research foci become more clearly defined or change. Many faculty members are affiliated with more than one area of study.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Educational Psychology. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Faculty Research Interests

The faculty's research agendas span a wide range of topics related to the study and application of psychological principles to develop and inform educational interventions and facilitate human development across the life span. Faculty conduct basic and translational research that explores the cognitive, life-span developmental, social-emotional, and socio-cultural factors that affect behavior, learning, and achievement in educational, clinical, and community contexts. They also engage in research on approaches to educational inquiry and the development of quantitative, qualitative and evaluative methodologies that underpin the development of evidence-based, policy-relevant studies. Faculty research profiles are available on the department Web site (<http://www.education.illinois.edu/edpsy>).

Center, Programs, and Institutes

Department faculty are affiliated with both research centers and institutes in the College of Education and the university more broadly, including the Adult Learning Lab, the Center for Education in Small Urban Communities, the Center for Advanced Study, the Beckman Institute, the Center for the Study of Reading, the Social Development Consortium, and others.

Facilities and Resources

The Department of Educational Psychology puts a high priority on working with its graduate students to secure fellowships and other awards.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education entitles candidates seeking a Professional Educator License and

provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on University resources can be found at www.grad.illinois.edu/campus-resources.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college and campus. There are opportunities available through the department (<http://education.illinois.edu/edpsy>), the College of Education (<http://www.ed.illinois.edu/students/graduate-financialaid>), and the Bureau of Educational Research. (<http://www.ed.illinois.edu/ber/fundingresources.html>) Please note: Graduate students employed as Staff by the University of Illinois at Urbana-Champaign are not eligible for a College of Education Award or Scholarship. Campus opportunities can be found at the Graduate College (<http://www.grad.illinois.edu/funding-jobs>) and the Office of Student Financial Aid (<http://www.osfa.illinois.edu>).

The department does not require a separate financial aid application.

- Certificate of Advanced Study (C.A.S.) in Educational Psychology, African American Studies Concentration (p. 687)

Master of Education in Educational Psychology

Educational Psychology offers an online professional Master of Education (Ed.M.) degree specialization in Evidence-Based Decision Making. Admissions requirements are somewhat different and applicants should consult the college's on-line program Web site (<http://education.illinois.edu/online/inhttp://education.illinois.edu/online-offcampus/ebdm/mdex.html>) for current admissions criteria and specific course requirements.

Psychological Foundation Course		4
EPSY 400	Psyc of Learning in Education	
Social and Philosophical Foundation Course		4
EPS 415	Technology & Educational Reform	
EPSY 480	Educational Statistics	4
EPSY 486	Principles of Measurement	4
EPSY 501	Evaluation in Society	4
EPSY 505	Data, Evidence, & Decisions	4
EPSY 507	Econ Analysis & Ed Policy	4
EPSY 590	Advanced Seminar in Educ Psyc (Section CP)	0 to 4
Total Hours		28

Other Requirements:¹

Minimum of 12 hours at the 500 level

Minimum GPA 3.0

¹ For additional details and requirements refer to the department's Web site, (<http://education.illinois.edu/edpsy>) the College of Education Graduate Programs Handbook, and the Graduate College Handbook.

Certificate of Advanced Study (C.A.S.) in Educational Psychology

The University of Illinois at Urbana-Champaign's College of Education complies with the U.S. Department of Education's Gainful Employment requirements by disclosing information to applicants regarding our Certificate of Advanced Study program. Required information can be found here (http://provost.illinois.edu/ProgramsOfStudy/2014/fall/programs/graduate/CAS_C&I/Gedt.html).

If the student does not have a Masters degree from the University of Illinois at Urbana-Champaign, Foundations Courses must be completed:

Psychological Foundations Courses in Educational Psychology

Select one of the following:

4

EPSY 400	Psyc of Learning in Education
EPSY 401	Child Language and Education
EPSY 402	Sociocultural Infl on Learning
EPSY 405	Personality and Soc Dev
EPSY 406	Psyc of Classroom Management
EPSY 407	Adult Learning and Development
EPSY 408	Learn and Human Dev wi Ed Tech
EPSY 430	Early Adolescent Development
EPSY 490	Developments in Educ Psyc

OR EPSY 485 for 2 hours plus 2 hours of a previously named EPSY course

Philosophical and Social Foundations Courses in Educational Policy Studies

Select one of the following:

4

EPS 400	History of American Education
EPS 401	History of Educational Ideas
EPS 402	Asian American Education
EPS 403	European Education to 1600
EPS 404	European Education since 1600
EPS 405	Historical & Social Barriers
EPS 410	Philosophy of Education
EPS 411	School and Society
EPS 412	Critical Thinking for Teachers
EPS 413	Aesthetic Education
EPS 415	Technology & Educational Reform
EPS 420	Sociology of Education
EPS 421	Racial and Ethnic Families
EPS 423	Politics of Education
EPS 424	Economics of Education
EPS 426	Comparative Education

Elective Hours:

32

500-Level Hours Required: 16 hours (Independent Study included)

General Coursework Required: 16 hours

Research/Project/Independent Study Hours (min/max applied toward degree):

0-8

Total Hours

32

Other Requirements: ¹

Enrollment must be preceded by at least two years of acceptable professional work experience.

Minimum GPA 3.0

¹ For additional details and requirements refer to the department's Web site, (<http://education.illinois.edu/edpsy>) the College of Education Graduate Programs Handbook, and the Graduate College Handbook.

Certificate of Advanced Study in Educational Psychology, Concentration in African American Studies

The University of Illinois at Urbana-Champaign's College of Education complies with the U.S. Department of Education's Gainful Employment requirements by disclosing information to applicants regarding our Certificate of Advanced Study program. Required information can be found here (http://provost.illinois.edu/ProgramsOfStudy/2014/fall/programs/graduate/CAS_EPSY/Gedt.html).

If the student does not have a Masters degree from the University of Illinois at Urbana-Champaign, Foundations Courses must be completed:

Electrical and Computer Engineering

ece.illinois.edu

Head of the Department: William H. Sanders
Director of Graduate Studies: Steven J. Franke
Graduate Programs
2090 Electrical and Computer Engineering Building
306 N. Wright St.
Urbana, IL 61801
(217) 300-2414
Email: ece-grad-apps@illinois.edu

Major: Electrical and Computer Engineering
Degrees Offered: M.S., Ph.D.

Online Program: Electrical and Computer Engineering
Degrees offered: M.S.

Medical Scholars Joint Degree Program: Doctor of Philosophy (Ph.D.) in Electrical and Computer Engineering and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The department offers graduate study and research in electrical and computer engineering leading to the degrees of Master of Science and Doctor of Philosophy. Virtually every specialty within electrical and computer engineering is represented. Courses and research opportunities exist in the following areas:

- applied computation theory
- bioengineering, acoustics, and magnetic resonance engineering
- communications
- computer-aided design and test
- computer systems
- computer vision and robotics
- decision and control
- electromagnetic fields
- electrooptics, lasers, and plasmas
- integrated circuits
- microelectro-mechanical systems
- mobile computing and communication
- optoelectronics
- power and energy systems
- power electronics
- remote sensing and propagation
- semiconductor materials and devices
- semiconductor physics and computational electronics
- signal, image, and speech processing

The programs are very flexible to encourage interdisciplinary studies and research. Opportunity also exists for specializing in:

1. computational science and engineering and
2. energy and sustainability engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (<http://cse.illinois.edu/students/graduate-program>) and the Energy and Sustainability Engineering (EaSE) Option. (<http://ease.illinois.edu>)

The Medical Scholars Program (<https://www.med.illinois.edu/mdphd>) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Electrical and Computer Engineering. The department is not currently accepting applications for the online M.S. degree.

For complete program information, visit the Electrical and Computer Engineering graduate program Web site (<http://www.ece.illinois.edu/students/grad>).

Admission

Applicants must have completed an electrical engineering curriculum or a computer engineering curriculum substantially equivalent to those of the University of Illinois at Urbana-Champaign. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, because of space limitations, applicants with GPAs below 3.50 are rarely admitted. All applicants must submit scores from the general test of the Graduate Record Examination (GRE) (<http://www.ets.org>).

A master's degree is required for admission to the PhD program. Applicants with master's degrees are admitted only if a faculty member is willing to serve as the Ph.D. thesis advisor. Accordingly, such applicants should write, call, or e-mail prospective Ph.D. advisors and discuss their research interests and potential Ph.D. thesis topics well in advance of application deadlines. Admission for the spring semester is possible, in addition to the usual fall semester admissions.

Graduates of curricula in the physical sciences, mathematics, and computer science may be admitted if they are judged to have the necessary background to profit from graduate work in electrical and computer engineering.

All applicants whose native language is not English must submit a minimum TOEFL (<http://www.toefl.org>) score of 96 (iBT), 243 (CBT), or 590 (PBT); or minimum International English Language Testing System (IELTS) (<http://www.ielts.org>) academic exam scores of 6.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (<http://grad.illinois.edu/admissions/instructions/04c>) are met. For those taking the TOEFL or IELTS, full admission status (<http://grad.illinois.edu/admissions/instructions/04c>) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status (<http://grad.illinois.edu/admissions/instructions/04c>) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (<http://linguistics.illinois.edu/students/esl/guidelines>) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Electrical and Computer Engineering and the College of Medicine. An application to the Medical Scholars Program will also serve as the application to the Electrical and Computer Engineering graduate program. Further information on this program is available by contacting the:

Medical Scholars Program
125 Medical Sciences Building
(217) 333-8146
mspo@illinois.edu

Medical Scholars Program

Students in the Medical Scholars program must meet the specific requirements for both the medical (<https://www.med.illinois.edu/mdphd>) and graduate degrees. On average, students take eight years to complete both degrees. The first year of the combined program is typically spent meeting requirements of the Electrical and Computer Engineering graduate degree.

Faculty Research Interests

Research interests of the Electrical and Computer Engineering faculty include the broad areas of study described in the graduate programs section and more. Many faculty members hold affiliate status with other departments, and a number of faculty members from other departments hold affiliate status with the department. In addition, some faculty hold appointments in the Beckman Institute for Advanced Science and Technology, the Coordinated Science Laboratory, the Materials Research Laboratory, and the Micro and Nanotechnology Laboratory. All these affiliations provide opportunities for graduate student appointments to conduct research. For a detailed list of current research interests of the faculty, visit the department's research Web site (<http://ece.illinois.edu/research>).

Centers, Programs, and Institutes

There are numerous interdisciplinary programs, laboratories, and centers for research within the department. These are described at the department's research Web site (<http://ece.illinois.edu/research>).

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are available for the majority of students who are admitted. International applicants generally are not awarded teaching assistantships but are eligible for the other forms of financial aid. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (<http://grad.illinois.edu/admissions/taengprof.htm>) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 5 is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

Master of Science in Electrical and Computer Engineering

A non-thesis and an online option exist for the M.S., but students are no longer admitted to these programs.

Thesis Research – ECE 599 (min-max applied toward degree)	8
ECE 500 ECE Colloquium (registration for 0 hours every term while in residence)	0
Elective courses (subject to Other Requirements and Conditions below)	24
Total Hours	32

Other Requirements and Conditions ¹

Credit in ECE 411, ECE 415, ECE 445, ECE 590 or ECE 596, PHYS 404, PHYS 435, and PHYS 436 and STAT 400 does not count toward the degree.

No course used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.

A maximum of 4 hours of ECE 597 (or other individual study) may be applied toward the elective course work requirement.

There is no final examination for the M.S. degree.

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's Graduate Study Manual (<http://ece.illinois.edu/current/grad/overview>) and the Graduate College Handbook (<http://grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in Electrical and Computer Engineering

ECE 599 Thesis Research (min-max applied toward degree)	32-40
ECE 500 ECE Colloquium (registration for 0 hours every term while in residence)	0
3 permanent 500-level courses in 3 different Ph.D. Breadth Requirement areas (http://www.ece.illinois.edu/students/grad/overview/#breadth)	12
Elective courses (subject to Other Requirements and Conditions below)	12-20
Total Hours	64

Other Requirements and Conditions ¹

Other Requirements and Conditions may overlap

Credit in ECE 411, ECE 415, ECE 445, ECE 590 (seminar), ECE 596, ECE 597 (individual study), PHYS 404, PHYS 435, and PHYS 436, STAT 400, or any other seminar or individual study course does not count toward the degree.

At least one ECE 500-level course must be taken.

No course used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.

A Masters degree is required for admission to the Ph.D. program.

Ph.D. exam and dissertation requirements:

Qualifying exam²

Preliminary exam

Final exam or dissertation defense

Dissertation deposit

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's Graduate Study Manual (<http://ece.illinois.edu/current/grad/overview>) and the Graduate College Handbook (<http://grad.illinois.edu/gradhandbook>).

Major: English

Degrees Offered: M.A., Ph.D.

Graduate Concentrations: Medieval Studies (p. 811) (available to all degrees), Writing Studies (p. 954) (Ph.D. only)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in English and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>)

Affiliated Programs offering certificates or minors:

- Department of African American Studies
- Gender and Women's Studies Program
- American Indian Studies
- Unit for Criticism and Theory
- Unit for Cinema Studies
- Asian American Studies Program

Graduate Degree Programs

The Department of English offers programs of study leading to the Master of Arts and the Doctor of Philosophy degrees. The Ph.D. program is, in general, designed to educate and train teacher-scholars who will take positions in colleges and universities throughout the country. We consider the Master of Arts program to be the first step toward the Ph.D. degree; we expect students admitted to the M.A. program to receive the M.A. and go on to complete a Ph.D. We therefore do not offer a formal terminal M.A. program. We welcome qualified students who wish to pursue their interests in English, American, and Anglophone language, literature and film beyond the undergraduate level. Both the Master of Arts and doctoral degrees may be earned with a specialization in writing studies. Doctoral students may in addition earn a graduate concentration in Writing Studies. A graduate program in creative writing has recently been approved and has accepted applications since 2002, see Creative Writing (p. 630).

Admission

A student who wishes to be considered for admission to graduate studies in English must present the equivalent of at least 20 semester hours of undergraduate work in English and American literature, excluding required work in rhetoric or composition. Graduate Record Examination (GRE) scores for the verbal and subject tests are required for those applying for the literature program. The GRE subject test for literature in English is not required of writing studies applicants. All applicants whose native language is not English are required to submit Test of English as a Foreign Language (TOEFL) scores. Currently, a minimum score of 550 on the paper-based test (213 on the computer-based test) is required. Before a teaching assistantship involving classroom instruction or student consultation can be awarded to a non-native speaker of English, the applicant must take the Test of Spoken English (TSE) and achieve a score of 50 or higher (230 or higher before 1996). Because applications for admission usually far exceed capacity, in recent years undergraduate grade point averages of students admitted have been significantly higher than the 3.0 (A = 4.0) required by the Graduate College. The committee on admissions tends to select those applicants who have a solid array of undergraduate courses, knowledge of a foreign language, strong recommendations, and a compelling writing sample: in short, an academic record that shows promise of doing outstanding work in the field and earning degrees within a reasonable time. We do not admit part-time students. Applicants are considered only in spring for fall admission, and the deadline for submitting applications is noon on December 17th.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including English. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting:

Medical Scholars Program

125 Medical Sciences Building
(217) 333-8146
or at www.med.illinois.edu/msp

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and all M.A. and Ph.D. candidates will have ample opportunity to teach undergraduate writing classes.

Financial Aid

Financial aid is available to students in the form of fellowships, teaching assistantships, research assistantships, and waivers of tuition and service fees. For complete information about the program, prospective applicants should consult our website at www.english.illinois.edu/graduate/program/ or write to the above address.

Master of Arts in English

A full-time student can complete this program in two academic years. Students must choose to complete a specialization in Literature or Writing Studies.

Virtually every student will teach rhetoric classes, and is required to enroll in a teaching proseminar (ENGL 593). 4

Course work selected from list below in consultation with advisor

Language Requirement: Students must demonstrate a reading knowledge of at least one foreign language.

Total Hours 32

Other Requirements ¹

Other requirements may overlap

At least two semesters or the equivalent in residence

Minimum Hours Overall Required Within the Unit: 24 (12 at 500-level)

Minimum 500-level Hours Required Overall: 16

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's *Graduate Studies in English* (<http://www.english.illinois.edu/graduate>) Website and the *Graduate College Handbook* (<http://www.grad.illinois.edu/gradhandbook>).

Course work listing for M.A. requirements for the Literature Specialization:

Eight semester-long courses in British and American Literature and Critical Theory.

Courses (worth four hours of credit each) must be taken in six of the following nine areas:

- Medieval British Literature (beginning to 1485)
- Renaissance British Literature (1485-1660)
- Restoration/Eighteenth-Century British Literature (1660-1800)
- Nineteenth-Century British Literature (1800-1900)
- Twentieth-Century British Literature (1900-2000)
- Early American Literature (beginning to Civil War)
- Later American Literature(Civil War to present)
- Anglophone Literature (other than British and American)
- Critical Theory

Candidates may substitute another area (such as film) for one on the above list with the permission of the Director of English Graduate Studies. However, all students must take at least one course in a period before 1660, and one course in either Early or Later American Literature.

At least four of the eight courses must be in 500-level graduate seminars (limited to 14-18 students). The others may (but need not) be in 400-level courses (limited to 36 students) in which graduate students complete work beyond that expected of undergraduates.

In their first year of teaching, students are required to complete a Professional Seminar in the teaching of composition or business and technical writing for four hours of credit. (ENGL 593)

The Foreign Language Requirement may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways:

1. By completing the equivalent of three full years of undergraduate work
2. By passing a proficiency exam administered by a UIUC foreign language department
3. By passing a non-credit 501 language course with a grade of B or better

Course work listing for M.A. requirements for the Writing Specialization:

Eight semester-long courses in Writing Studies, Literature, and Theory.

Courses (worth four hours each) must be taken as follows:

At least 16 of the 32 required hours must be in 500-level courses. Eight of the 16 hours must be ENGL 505 and 1 course from the following list: ENGL 506, ENGL 582, ENGL 583, ENGL 584. In addition, students must take two courses in Literature or Theory and four courses approved by the Writing Studies advisor.

At least four of the eight courses must be 500-level graduate seminars (limited to 14-18 students). The others may (but need not) be 400-level courses (limited to 36 students) in which graduate students complete work in addition to that expected of undergraduates.

In their first year of teaching, students are required to complete a Professional Seminar (ENGL 593) in the teaching of composition or the teaching of business and technical writing for four hours of credit.

The Foreign Language Requirement may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways:

1. By completing the equivalent of three full years of undergraduate work
2. By passing a proficiency exam administered by a University of Illinois foreign language department
3. By passing a non-credit 501 language course with a grade of B or better.

Doctor of Philosophy in English

Students in the program who have earned their master's degrees must apply formally to the Ph.D. program. Applicants who have completed their master's degrees elsewhere may also apply. Seldom are applicants accepted with graduate grade point averages below 3.5. Students must choose to complete a specialization in Literature or Writing Studies. In addition, students may choose to complete the graduate concentration in Writing Studies (p. 954).

Interdisciplinary work is encouraged. Students may take courses outside of English. The special field examination is taken as the student completes coursework and prepares to write the thesis. The student then goes on to complete and defend the thesis under the direction of a committee composed of four professors. A full-time student can complete this program in four years beyond the master's degree.

Virtually every student will teach rhetoric classes, and is required to enroll in a teaching proseminar (ENGL 593) if s/he has not taken such a class at the Master's level.

Elective hours selected from the list below in consultation with advisor, to bring total course work hours to 32		32
Language Requirement: Students must demonstrate knowledge of one foreign language in a level equivalent to that required of master's candidates in the English Department's program.		
ENGL 599	Thesis Research (32 max applied toward degree)	32
Total Hours		64

Other Requirements ¹

Other requirements may overlap

The special field examination is taken as the student completes coursework and prepares to write the thesis.

Masters Degree Required for Admission to PhD?	Yes
Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's *Graduate Studies in English* (<http://www.english.illinois.edu/graduate>) Website and the *Graduate College Handbook* (<http://www.grad.illinois.edu/gradhandbook>).

Course work listing for Ph.D. requirements for the Literature Specialization:

- Eight additional semester-long courses at the 400 and 500 level. These, selected in consultation with a faculty advisor, either focus on the proposed field of specialization and allied fields--in English or in other disciplines--or fill gaps in the student's background.
- Doctoral students in literature will either take a Professional Seminar in the teaching of literature or film or act as a teaching assistant for two semesters in a large lecture course before they teach literature courses. They are expected to teach at least one literature course during their Ph.D. work.
- The Foreign Language Requirement (if not already satisfied at the M.A. level) may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways: By completing the equivalent of three full years of undergraduate work; By passing a proficiency exam administered by a UIUC foreign language department; By passing a non-credit 501 language course with a grade of B or better.
- Completion of a Special Field Examination (oral, written, or both). The exam, administered by a committee of four faculty members selected by the student, is based upon the student's approved Special Field list of primary and secondary sources, including a discussion of its rationale and relation to the proposed dissertation topic. Approved fields include historical periods, genres, film, and critical theory.
- Completion and two-hour oral defense of a dissertation. Students working on their dissertations are eligible for fellowship support or released time from teaching. All students in good standing and making good progress will ordinarily receive at least one semester free from teaching. A few students receive a year or more of fellowship aid to work full-time on their dissertations.

Course work listing for Ph.D. requirements for the Writing Studies Specialization:

- Eight additional semester-long courses at the 400 and 500 level. At least 8 courses, normally at the 500-level, and including ENGL 505-ENGL 506 and 2 methodology courses (at least one of which is an ENGL 582; the second methodology course should be approved by the advisor and typically will be approved by the Center for Writing Studies for the methodology requirement in its Writing Studies Graduate Concentration). In addition, students must take one course in Literature or Theory. Specific courses taken at the MA level (ENGL 505, ENGL 506, ENGL 582) are counted as fulfilling those specific requirements at the PhD level.
- Students who enter the Ph.D. program with an M.A. from another institution must show demonstrated reading knowledge of a foreign language.
- Completion of a Special Field Examination (oral, written, or both). This exam, administered by a committee of four faculty members selected by the student, is based upon the student's approved special field list--which includes a discussion of its rationale and relation to the proposed dissertation topic. Lists are representative of the field of Writing Studies and include two or three concentrations within it. Approved fields include: Cognition and Composition, Computers and Composition Studies, Classical Rhetoric, Critical Theory, Discourse Processes, Gender and Writing, Literacy Studies, Technical Communication, Writing Across the Curriculum, Writing in the Disciplines, and Writing Assessment. Other combinations of fields are possible, including those that combine disciplines (e.g. African-American Studies, women's studies, and literacy).
- Completion and two-hour oral defense of a dissertation. Students working on their dissertations are eligible for fellowship support or released time from teaching. All students in good standing and making good progress will ordinarily receive at least one semester free from teaching. A few students receive a year or more of fellowship aid to work full-time on their dissertations.

Entomology

www.life.illinois.edu/entomology/

Head of the Department: May R. Berenbaum
320 Morrill Hall
505 South Goodwin Avenue
Urbana, IL 61801
(217) 333-2910
E-mail: entowork@life.uiuc.edu

Major: Entomology
Degrees Offered: M.S., Ph.D.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Entomology and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Entomology offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. The program is designed to accommodate incoming students with a wide range of entomological expertise. The goal of the program is to provide students with a strong background in basic biology as it relates to insects and to equip them with the specialized intellectual and technical skills to pursue a career in research, teaching, and service in entomology and related biological disciplines.

Major areas of specialization within the department include systematics, evolutionary biology, molecular genetics, genomics, phytochemical ecology, population biology, toxicology, neurophysiology, neuroanatomy, developmental biology, behavior, sociobiology, endocrinology, and integrated pest management.

Admission

Graduate Record Examination (GRE) general and biology subject tests are not required, but strongly recommended. A Test of English as a Foreign Language (TOEFL) score of 550 or better is preferred. Previous training in entomology is unnecessary. It is recommended that students who intend to study for advanced degrees in entomology gain a thorough grounding in the physical and biological sciences, mathematics, and the liberal arts. Spring Admission is possible.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Entomology. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program and is strongly recommended.

Financial Aid

Graduate student awards are available, including teaching and research assistantships. In addition, fellowships and traineeships are offered by the Graduate College and the School of Integrative Biology, and the Program in Ecology, Evolution and Conservation Biology. A single application to the department is sufficient for consideration for all awards currently available.

Master of Science in Entomology

A candidate for the M.S. degree is expected to become knowledgeable in entomology through coursework and independent research and to complete a research thesis in an area of interest chosen in consultation with an adviser.

Select four of the following:

16

IB 427	Insect Physiology
IB 444	Insect Ecology

IB 468	Insect Classification and Evol	
IB 482	Insect Pest Management	
IB 504	Genomic Analysis of Insects	
ENT 599	Thesis Research (0 min applied toward degree)	0
Total Hours		32

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall:	12
The grade point average required for degree certification is 3.0 (A = 4.0).	
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's Graduate Handbook (<http://www.life.illinois.edu/entomology/handbook.html>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in Entomology

A candidate for the Ph.D. degree should be conversant with entomological aspects of ecology, genetics, systematics, physiology, and integrated pest management. The candidate must demonstrate professional competence in a specialized area by presenting an acceptable thesis based on original research designed in consultation with a faculty adviser and approved by a graduate faculty thesis committee.

Entering with approved M.S./M.A. degree

Select 0-20 hours from the following: 0-20

IB 427	Insect Physiology	
IB 444	Insect Ecology	
IB 468	Insect Classification and Evol	
IB 482	Insect Pest Management	
IB 504	Genomic Analysis of Insects	
IB 526	Seminar in Entomology (Special Topics)	3
Statistics course		4
ENT 599	Thesis Research (0 min applied toward degree)	0
Total Hours		64

Other Requirements ¹

Other requirements may overlap

Prescription Exam Required (administered upon entrance into program)	Yes
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
The grade point average required for degree certification is 3.0 (A = 4.0).	
Minimum GPA:	3.0

Entering with approved B.S./B.A. degree

Select 20 hours from the following: 20

IB 427	Insect Physiology	
IB 444	Insect Ecology	
IB 468	Insect Classification and Evol	
IB 482	Insect Pest Management	
IB 504	Genomic Analysis of Insects	
IB 526	Seminar in Entomology (Special Topics)	3

European Union Studies

www.euc.illinois.edu

Director of the European Union Center: Anna Westerstahl Stenport
 European Union Center
 International Programs and Studies
 328 International Studies Building, MC-429
 910 S. Fifth Street
 Champaign, IL 61820
 Contact: Matthew A. Rosenstein
 (217) 265-7515
 Email: eucenter@illinois.edu

Major: European Union Studies
 Degrees Offered: M.A.

Graduate Minor: European Union Studies

Graduate Degree Programs

The European Union Center administers an interdisciplinary program of language and area courses leading to a Master of Arts degree. The program is intended to serve three constituencies of students: those seeking to combine area expertise with professional training; those proceeding to disciplinary-based doctoral work; and those seeking a stand-alone, professional degree.

Admission

Applicants for admission to the Master of Arts program should have completed at least two years of a language of the European Union and hold a bachelor's degree from an accredited institution of higher education. The Graduate Record Examination (GRE) is required. Admission requirements of the Graduate College also apply. The minimum paper-based Test of English as a Foreign Language (TOEFL) score is 550 (213 on the computer-based test or 79 on the iBT).

Applicants must submit the Graduate College application for admission, certified transcripts of all undergraduate and graduate work, Graduate Record Examination (GRE) scores (verbal, quantitative, and written), a writing sample, and three letters of reference. Applicants must also submit to the European Union Center a statement of purpose showing how the M.A. degree in European Union Studies fits into their educational and career plans. This statement must show that the interdisciplinary nature of the MA in EU Studies will serve the student better than a disciplinary degree. Admission is ordinarily limited to the fall semester, but exceptions are made for spring and summer admission.

Master of Arts in European Union Studies

Students pursuing the thesis option are required to conduct an oral thesis defense before an MA thesis committee. The thesis committee must consist of at least two individuals, with at least one member drawn from the EU Center Executive Staff. The thesis advisor (committee chair) must be a member of the Graduate Faculty.

Thesis Option

EURO 501 & EURO 502	EU Institutions and Governance and The EU in a Global Context	8
Language Requirement: A candidate must demonstrate proficiency in a language of the European Union, other than English, at the advanced (third-year) level. Up to seven hours of advanced language (third or fourth-year) course work may be used toward the MA total hours. (Max 7)		7
EURO 599	Thesis Research (min/max applied toward degree)	0-8
Total Hours		36

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required overall: 12

Coursework must come from at least three different academic units

Up to twelve hours may be credited for MA-equivalent study abroad courses or eight hours for internship placement.

Minimum GPA: 2.75

- ¹ For additional details and requirements refer to the department's graduate degree requirements (<http://euc.illinois.edu/academic/degree.html>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Non-Thesis Option

EURO 501 & EURO 502	EU Institutions and Governance and The EU in a Global Context	8
Language Requirement: A candidate must demonstrate proficiency in a language of the European Union, other than English, at the advanced (third-year) level. Up to seven hours of advanced language (third or fourth-year) course work may be used toward the MA total hours. (Max 7)		7
Total Hours		36

Other Requirements ¹

Other Requirements may overlap

Minimum 500-level Hours Required overall: 12

At least two substantial research papers on European Union topics as part of course work, when relevant to the candidate's professional orientation, are required.

Coursework must come from at least three different academic units

Up to twelve hours may be credited for MA-equivalent study abroad courses or eight hours for internship placement.

Minimum GPA: 2.75

- ¹ For additional details and requirements refer to the department's graduate degree requirements (<http://euc.illinois.edu/academic/degree.html>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Graduate Minor in European Union Studies

The graduate minor in European Union Studies complements PhD programs in many departments and provides an opportunity for students to pursue an area studies program as well as their primary field. Graduate students may also come from professional schools, such as law, business, and education, and departments with professional degree programs, such as urban and regional planning.

Graduate students seeking admission to the graduate minor in European Union Studies program should check with an academic advisor in their major degree-granting school or department to confirm eligibility prior to pursuing an application. Students must submit a graduate minor application, available from the Center, and if approved, a petition to the Graduate College requesting to add the European Union Studies minor.

Students in the European Union Studies graduate minor program must earn at least 16 hours of graduate credit in approved courses in at least two departments. Two of the courses must be EURO 501 and EURO 502. The graduate minor requires that students demonstrate the equivalent of two years of college-level study of a language of the European Union other than English, to support development of a technical vocabulary in fields such as business, law, and agriculture. A list of courses fulfilling the minor is available from the Center.

Note: Students within the major can not minor in the same program.

EURO 501 & EURO 502	EU Institutions and Governance and The EU in a Global Context	8
Courses from the Center's approved course list. Courses must be from two departments		8
Language Requirement: Students demonstrate the equivalent of two years of college-level study of a language of the European Union other than English, to support development of a technical vocabulary in fields such as business, law, or agriculture.		0
Total Hours		16

Other Requirements ¹

Other requirements may overlap

In addition to the minor requirements, students must also complete the requirements of their major degree.

Hours counted toward completion of a minor may not also be applied toward any other transcribed credential.

- ¹ For additional details and requirements refer to the department's graduate degree requirements (<http://euc.illinois.edu/academic/graduate.html>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Finance

www.business.illinois.edu/finance

Chair of the Department: Louis Chan
 Director of Graduate Studies: Martin Widdicks (MSF); Heitor Almeida (PhD)
 330 Wohlers Hall
 1206 S. Sixth Street
 Champaign, IL 61820
 PH (217) 244-2239
 FX (217) 333-1144

Major: Finance

Degrees Offered: M.S., Ph.D.

Graduate Concentrations: Accountancy (p. 500) (M.S. only), Business and Public Policy (p. 709) (M.S. only), Corporate Governance and International Business (p. 573) (M.S. only), Information Technology and Control (p. 574) (M.S. only)

Graduate Minor: Finance

Graduate Concentrations: Business and Public Policy, Finance

Graduate Degree Programs

The Department of Finance offers graduate work leading to the Master of Science and Doctor of Philosophy degrees. The following fields are available for specialization: banking and financial institutions, corporate finance, insurance and risk management, investments, and real estate and urban land economics.

Admission

The minimum required grade point average for admission is 3.0 (A = 4.0). To be admitted without deficiencies, the applicant should have completed one undergraduate course each in computer science, financial accounting, managerial accounting, and principles of economics as well as two courses each in calculus, probability and statistics, and financial management. Courses to remove deficiencies may be taken after beginning the program, but such courses will not count toward the departmental requirements for graduation. All applicants are required to submit Graduate Management Admission Test (GMAT) or GRE scores. Most international applicants are also required to submit Test of English as a Foreign Language (TOEFL) IELTS or iBT scores. The test scores will be used by the Admissions Committee, along with other information, in evaluating the applicant's qualifications for graduate study.

Master of Science in Finance

Terminal masters: The Master of Science in Finance (terminal master's) is a one-year program designed primarily for practitioners in finance-related positions. The program is designed to be completed in 12 months, beginning in early June.

Admission requirements and other details about the program can be found at www.business.illinois.edu/msf.

Core courses	16
Graduate level finance courses	12
Elective graduate coursework	12
Total Hours	40

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall	12
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's graduate programs (<http://www.business.illinois.edu/finance/program.aspx>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Ph.D. only option

For Ph.D. students: A Master of Science degree is available for students in the Ph.D. program. Ph.D. students may earn a masters degree as they work toward the Ph.D. degree. Students interested in a terminal masters degree are not admitted to the Ph.D. program. Options available at this University for

a terminal masters degree in finance include the M.S. in Finance (terminal masters) described above, and the MBA with a track in finance as described under the section on Business Administration - MBA.

Total Hours

32

Other Requirements ¹

Other Requirements may overlap

Minimum 500-level Hours Required Overall	12
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's graduate programs (<http://www.business.illinois.edu/finance/program.aspx>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in Finance

The first stage toward the degree of Doctor of Philosophy ends when the candidate receives a master's degree in finance or earns the equivalent credit (a minimum of 32 graduate hours at this University or 32 semester hours or 48 quarter hours of acceptable work at another recognized university). The second stage comprises certain minimum coursework, fulfillment of other departmental requirements, and successful completion of qualifying and preliminary examinations. The third stage includes research, preparation of the dissertation, and the final examination. The minimum number of graduate hours required for the second and third stages combined is 64. A student plans courses and research with his or her adviser. Consideration is given to previous academic training, career objective, and the general requirements of the Graduate College and the department. The student should become familiar with these requirements and satisfy them as soon as possible.

To enter the third stage of the doctoral program, a candidate must pass the qualifying examinations to test his or her qualifications for further advanced study and research, as well as teaching. The examinations are written and oral. A written preliminary examination is required for the field of finance. An oral defense of the proposal for the dissertation is the final step in the second stage.

The Doctor of Philosophy is primarily a research degree, and the candidate must demonstrate the capacity for independent research by producing an original thesis on a topic within his or her major field of study. The subject of the thesis must be reported to the doctoral committee and to the Graduate College at the time of the preliminary examination. The candidate is admitted to the final oral examination by the dean of the Graduate College upon completion of the dissertation and the recommendation of the department.

The doctoral program generally begins in the fall semester. The application period typically runs the beginning of October through the beginning of February.

Additional details on the program may be found at www.business.illinois.edu/finance/phd/default.aspx.

ECON 502	Economic Statistics (and prerequisites if required (ECON 500, ECON 501, ECON 506)	4-16

Graduate Minor in Finance

The graduate minor in Finance is reserved for students admitted to the Master of Accounting Science program. Accountants with expertise in finance are increasingly highly valued by many employers. The graduate minor in Finance is designed to allow students in the MAS program to demonstrate substantive competency in the field of Finance. Counting the prerequisite requirement, the graduate minor is the equivalent of four graduate courses. Admission is limited and acceptance is on a competitive basis.

Prerequisites for the Minor

Admission to the minor requires the completion of either FIN 221 and FIN 300 or FIN 520 as a prerequisite. All courses must have been taken for a grade.

Admission to the Minor

Admitted MAS students should first consult with the MAS Program Advisor to determine if the minor is appropriate for the student. Information on how to apply will be available through the MAS Program Advisor. Students admitted to the MAS program may also email finance@illinois.edu for more information on the Finance Minor.

Advising Notes

The graduate minor can only be completed within the Fall semester of the fifth year of the MAS program. The three required graduate courses are not available in the Spring semester. Students who drop any of the three required courses in Fall will be treated as having dropped the minor.

Students should have already completed FIN 300 before enrolling in the graduate minor. Students may apply while enrolled in FIN 300; however, the application decision may be deferred until successful completion of FIN 300. FIN 300 must be taken on this campus. Students who plan to take the graduate minor SHOULD NOT register for FIN 321, FIN 411, or FIN 412 as undergraduates. Students who have completed any of the following courses are not eligible to pursue the minor: FIN 411, FIN 321, or FIN 412.

Note: Students within the major can not minor in the same program.

FIN 511	Investments	4
FIN 512	Financial Derivatives	4
FIN 521	Advanced Corporate Finance	4
Total Hours		12

Other Requirements ¹

The Finance minor consists of these 3 courses, designated for the MAS students, completed during the Fall semester. There are no substitute courses.

In addition to the minor requirements, students must also complete the requirements of their major degree.

Please contact your department for more information regarding the addition of a minor to your program of study.

¹ For additional details and requirements refer to the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Graduate Concentrations

- Finance (p. 709)
- Business and Public Policy (p. 709)

Graduate Concentration in Business and Public Policy

Today's business leaders must make strategic decisions in an extremely complex world. In addition to navigating the rapidly changing market forces in their industry, companies operate in an environment that is strongly influenced by regulatory and public policy considerations. Furthermore, our public sector leaders must also understand how market forces can help or hinder alternative solutions to society's most pressing problems. The business and public policy graduate concentration is designed to provide graduate business students a framework for evaluating the impact of public policy on firms and the markets in which they operate.

The concentration is open to all master's programs (Master of Accountancy Science, Master of Science in Accountancy, Master of Science in Finance, Master of Science in Business Administration, Master of Science in Technology Management, and Master of Science in Business Administration (International Management)) in the College of Business but required of none.

Candidates will apply to the Department of Finance for admission into the concentration. Students wishing to be admitted to the concentration should consult with their program advisor before applying.

Complete 12 hours from the following list:

12

FIN 536	Government Insurance Programs
FIN 571	Retirement Policy
FIN 572	Health Care Policy
FIN 573	Competition Policy
FIN 574	Individual Tax Policy
FIN 575	Business Tax Policy
FIN 576	Domestic Environmental Policy
FIN 577	International Environmental Policy
FIN 578	Govt Market Economy

Total Hours

12

Other Requirements

In addition to the concentration requirements, students must also complete the requirements of their major degree.

Graduate Concentration in Finance

This concentration is only available to students enrolled in the Master of Accounting Science program. The Finance concentration consists of these 3 courses, with sections designated for the MAS students, completed during the Fall semester. There are no substitute courses.

Admitted MAS students should first consult with the MAS Program Advisor to determine if the concentration is appropriate for the student. Information on how to apply will be available through the MAS Program Advisor. Students admitted to the MAS program may also email finance@illinois.edu for more information on the Finance Concentration.

FIN 511	Investments	2,4
FIN 512	Financial Derivatives	4
FIN 521	Advanced Corporate Finance	4

Total Hours

10-12

Other Requirements

In addition to the concentration requirements, students must also complete the requirements of their MAS degree.

Degree offered: M.S.

Graduate Degree Programs

This Master of Science in Financial Engineering (MSFE) degree program is jointly sponsored by the Department of Industrial and Enterprise Systems Engineering (IESE) in the College of Engineering and the Department of Finance in the College of Business. Graduates from this program receive the MSFE degree awarded by the Graduate College. The MSFE program complements other Finance (<http://www.business.illinois.edu/finance>) and IESE (<http://www.iese.illinois.edu>) graduate programs offered by the sponsoring departments.

Financial Engineering (FE) is a relatively young, multidisciplinary field that pertains to the application of engineering approaches and methods to the analysis and management of financial problems, particularly in the financial asset arena. Common problems involve identifying and managing financial risk in asset portfolios and asset positions and pricing of financial derivatives. Other applications exist in proprietary security trading operations, as well as in practically all practical domains where risk is an important concern. The field has emerged as the result of the ever growing complexity required in describing and solving these business problems whose resolution requires fundamental economic principles and finance theory coupled with state-of-the-art mathematical methods, computational tools, and computer programming expertise.

Admission

Successful applicants to the MSFE Program will have a Bachelor's degree with one year of calculus, one semester of linear algebra and differential equations, one semester of programming (preferably in C/C++), and one semester of probability and statistics. Knowledge of basic finance and economics is helpful but not necessary. Given its technical emphasis, applicants to this program typically will have completed a Bachelor's degree in an engineering field, mathematics, physics, computer science, or economics that provides sufficient preparation to facilitate a fast-paced, in-depth learning environment.

All applicants are expected to have a minimum grade point average of at least 3.25 (A=4.00) for the last two years of undergraduate study and a 3.50 for any previous graduate work completed. Scores on the Graduate Record Examination (GRE) general test are required of all applicants. All applicants whose native language is not English must submit a minimum Test of English as a Foreign Language (TOEFL) score of at least 103 (iBT), 257 (CBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) academic exam scores of 7.0 overall and 6.0 in all subsections.

Master of Science in Financial Engineering

Covering topics in finance, economics, numerical methods, stochastic calculus, and computer programming, the MSFE is a rigorous, three-semester, 48-credit, resident degree program with a summer internship opportunity. Twelve courses each of 4 graduate credits are required for graduation; they are expected to be taken in sequence in the respective semesters. Details on the program may be found at msfe.illinois.edu.

Core Courses	40
Project	4
Elective Graduate Coursework, may be 400 or 500 level	4
Total Hours	48

Other Requirements ¹

Minimum 500-level Hours Required Overall: 44

Minimum GPA: 2.75

Major: Food Science and Human Nutrition
Degrees Offered: M.S., Ph.D.
Graduate Concentrations: Food Science (all degrees), Human Nutrition (all degrees),
Professional Science Master's (p. 718) (M.S. only)

Off-Campus Program: Food Science and Human Nutrition
Degree Offered: M.S.

Joint Degree Program: Doctor of Philosophy in Food Science and Human Nutrition and Master of Public Health (p. 618)
Degrees Offered: Ph.D. and M.P.H.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Food Science and Human Nutrition and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Food Science and Human Nutrition offers traditional graduate programs leading to the Master of Science and Doctor of Philosophy degrees with either a food science and/or human nutrition concentration. In addition to receiving training in the general field of food science or human nutrition, students have the opportunity to conduct research in the following areas of specialization:

- food processing and food engineering
- food packaging
- food chemistry
- food biochemistry
- food microbiology
- food safety
- biotechnology
- human nutrition through the life cycle
- nutritional aspects of exercise
- nutrient metabolism
- nutrition and disease interactions
- nutrient composition of foods
- sensory and instrumental evaluation of food quality
- community nutrition
- clinical nutrition

For additional information go to fshn.illinois.edu/graduate.

The department also offers a Professional Science Master's (PSM) concentration. The PSM involves rigorous scientific training in the area of food science and/or human nutrition; additionally, instruction is provided in applied business knowledge and skills. This program is designed for those who seek careers in a science-based setting with significant managerial and leadership responsibilities. For additional information go to psm.illinois.edu/prospectivestudents/programs/foodscience.htm.

Admission

In addition to meeting the Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose. Graduate Record Examination (GRE) scores are required of all applicants, and those whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Minimum TOEFL and IELTS scores

can be found at grad.illinois.edu/admissions/instructions/04c. Students can be admitted to start in fall, spring, or summer semesters except for the PSM concentration, which admits fall semester only. For information on the role faculty have in the admissions process go to fshn.illinois.edu/graduate/ applying.

Internship in Dietetics

The Department of Food Science and Human Nutrition offers a dietetic internship for master's and doctoral students specializing in human nutrition. Completion of the degree and the internship qualifies the student to take the Academy of Nutrition and Dietetics registration examination administered by the Commission on Dietetic Registration. For information on our dietetic internship program please contact Dr. Sharon Donovan (sdonovan@illinois.edu).

Off-Campus Program

A Master of Science in Food Science and Human Nutrition degree program is offered online in live, synchronous sessions using distance education technology. Courses are typically offered in the evening or on Saturdays. Most students in this program choose the non-thesis option. For requirements, see table above and for additional information, please contact Dr. Dawn Bohn at dbrehart@illinois.edu.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Food Science and Human Nutrition. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Teaching is neither a Graduate College nor a FSHN requirement. A limited number of teaching assistantships are available to FSHN graduate students. Students are selected to be Graduate Teaching Assistants by the Department Head in consultation with the course instructor.

Financial Aid

Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted. Financial aid for non-PSM graduate students is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. Qualified candidates are considered for financial support upon application. Additional information on financial aid for graduate students can be found at fshn.illinois.edu/graduate/financial-assistance.

Doctor of Philosophy in Food Science and Human Nutrition, Food Science Concentration

If a candidate has a master's degree in a related area, a minimum of 64 graduate hours, including up to 38 graduate hours of thesis research, must be completed. In consultation with the adviser and advisory committee, the remainder of the 64 graduate hours required for the degree consists of courses selected from inside or outside the department that are appropriate for training in the student's field of specialization. Upon completion of all necessary formal courses and special options, the student is required to take an oral preliminary examination. After passage of the preliminary examination, the student's activities are primarily devoted to thesis research. Upon submission of the dissertation, the candidate is required to pass a final oral examination before a graduate faculty committee. The Ph.D. degree may be combined with an M.D. in the Medical Scholars Program.

French and Italian

www.french.illinois.edu

Head of the Department: Marcus Keller
Director of Graduate Studies: Zsuzsanna Fagyal
2090 Foreign Languages Building
707 South Mathews Avenue
Urbana, IL 61801
(217) 333-2020
E-mail: french@illinois.edu

Major: French

Degrees Offered: M.A., Ph.D.

Graduate Concentration: Medieval Studies (p. 810) (available to all), Romance Linguistics (Ph.D.) (p. 885), Second Language Acquisition and Teacher Education (p. 891) (Ph.D. only)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in French and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>)

Major: Italian

Degrees Offered: M.A., Ph.D.

Graduate Concentration: Medieval Studies (p. 810) (available to all), Romance Linguistics (Ph.D.) (p. 885), Second Language Acquisition and Teacher Education (p. 891) (Ph.D. only)

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Italian and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of French and Italian offers graduate programs leading to the Master of Arts and the Doctor of Philosophy degrees in French, and in Italian. Candidates for the master's degree may specialize in French Studies, French Linguistics, or French Language Learning. Candidates for the doctoral degree may choose one of three specializations: French Studies, French Linguistics, or Second Language Acquisition and Teacher Education (SLATE).

The following minors and certificates may be pursued: Cinema Studies (p. 963), Gender and Women's Studies (p. 964), Translation Studies (<http://www.translation.illinois.edu/programs/certificate1.html>), Criticism and Interpretive Theory (<http://criticism.english.illinois.edu>)

Admission

French

Students considering admission to the master's program should usually have had a college major in French. Applicants should apply online (www.grad.illinois.edu/admissions/apply) and submit a statement of purpose, three letters of recommendation and two writing samples (5-10 pages each), at least one of which must be in French. Original transcripts showing all undergraduate and graduate work completed should be sent to SLCL Graduate Student Services. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24. See <http://www.grad.illinois.edu/Admissions/instructions/04c.cfm>. Admission for the spring semester is rare. Students seeking admission to the Ph.D. program with a Master of Arts degree earned elsewhere are expected to have a minimum 3.5 grade point average in graduate coursework. The master's degree should be in French literature, French studies, or French linguistics, except that candidates seeking admission to the Ph.D. specialization in Second Language Acquisition and Teacher Education may hold a Master of Arts in Teaching degree.

For more information about how to apply, see www.french.illinois.edu/grad/apply/. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

Italian

The normal prerequisite for a graduate major is an undergraduate major in Italian or consent of the department. Students doing graduate work for any advanced degree in Italian must possess a command of the language. Applicants should apply online (www.grad.illinois.edu/admissions/apply) and submit a statement of purpose, three letters of recommendation and a writing sample of approximately 10-20 pages in the form of one or two papers, at least one of which must be written in Spanish. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should also be uploaded. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to

institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 88 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in second discipline, including French and Italian. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in a graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, the department requires Ph.D. candidates to do some teaching as part of their academic work because such experience is considered a vital part of the graduate program. Non-native English speakers must first pass a test of their oral English ability. See www.grad.illinois.edu/admissions/taengprof.htm.

Teaching Assistants in French are required to take FR 505 (Teaching College and Secondary French, 4 hours) or SPAN 571 as part of their contractual obligation. The course does not count toward the graduate degrees.

Faculty Research Interests

Our faculty (<http://www.french.uiuc.edu/people/faculty>) possess strengths in literary interpretation, critical theory, the study of civilization, cinema, theoretical and applied linguistics, and computer-assisted teaching. Members of the faculty have received national and international recognition; graduates serve on the faculties of numerous colleges and universities both in this country and abroad. View the faculty's areas of research (<http://www.french.illinois.edu/people/faculty>) at www.french.illinois.edu/people/faculty.

Centers, Programs, and Institutes

Our faculty hold appointments with the Departments of African American Studies, Gender and Women's Studies, Linguistics, Media and Cinema Studies, as well as the European Union Center and the Center for South Asian and Middle Eastern Studies, the Programs in Comparative and World Literature, the Program in Jewish Culture and Society, the Program in Medieval Studies, and the Unit for Criticism and Interpretive Theory, broadening opportunities for interdisciplinary work.

Facilities and Resources

A language learning lab provides computer-based access to resources and audio-video services. The phonetics lab contains state-of-the-art equipment available to graduate student researchers. The Kolb-Proust Archive for Research, a unit of the Library, houses a wealth of information about Marcel Proust and his time, including the important collection of notes and materials assembled by Philip Kolb, who was a professor in the Department of French. Documents from the collection are accessible on the World-Wide Web through a searchable SGML-encoded Virtual Archive (www.library.illinois.edu/kolbp).

Financial Aid

All students who apply for admission are considered for financial aid. Subject to budgetary conditions, and assuming satisfactory academic and teaching performance, the Department offers two years of financial aid toward the M.A. degree and an additional four years of support toward completion of the Ph.D.

Teaching Assistantships are the most common form of graduate student support. The usual appointment requires teaching three courses during the academic year.

Research Assistantships require the recipient to assist with a faculty member's research for a specific number of hours per week. A research assistantship may be combined with a teaching assistantship.

Fellowships are offered for new and continuing students. No separate application form is required.

Tuition and Fee Waivers are included with waiver-generating fellowship, teaching assistantship, and research assistantship awards.

Several graduate students in French each year may spend the academic year abroad under exchange agreements with universities in France, Belgium, and Canada, employed as teaching assistants.

For further information, see www.french.illinois.edu/grad/aid.

Masters Degree Required for Admission to PhD?	Yes
Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	2.75

¹ For additional details and requirements refer to the department's graduate programs (<http://www.french.illinois.edu/grad>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Specialization in French Studies

The doctoral program in French Studies is designed to prepare specialists in literature and culture. Candidates are required to include courses in textual criticism, linguistics or linguistically oriented textual theory, and French/Francophone literature and culture. Students are expected to demonstrate a reading proficiency in one modern foreign language (other than French or English). They may fulfill this requirement by passing a fourth-semester reading course with a grade of B or better or by demonstrating an equivalent ability by examination. In addition, students specializing in medieval or Renaissance studies must demonstrate an equivalent reading knowledge of Latin. Students may choose to complete a minor in Cinema Studies, Gender and Women's Studies, or to obtain a certificate in Medieval Studies, Translation Studies or in Criticism, and Interpretive Theory.

Specialization in French Linguistics

This Ph.D. curriculum in linguistics offers training in French and Romance linguistics in cooperation with the Department of Spanish, Italian and Portuguese and the Department of Linguistics. Candidates selecting this option are required to complete course work in at least three areas of linguistic theory, advanced study of French language and culture, and French and Romance linguistics beyond the requirements of the M.A. Advanced course work related to the candidate's research area is chosen in consultation with the advisor from courses offered by participating departments. Students are expected to demonstrate proficiency in at least one other Romance language and may select a concentration in Romance Linguistics.

Doctor of Philosophy in Italian

Areas of specialization offered in Italian are literary and cultural studies, Italian linguistics, and Romance linguistics.

Coursework selected in consultation with advisor

SPAN 571	Proseminar For Lang Tchg (is required of all teaching assistants)	4
Language Requirement: Students in all programs except SLATE must demonstrate reading proficiency in two languages besides the foreign language of specialization (not including English).		
ITAL 599	Thesis Research	32
Total Hours		64

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall:	16
Masters Degree Required for Admission to PhD?	Yes

Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's guidelines for graduate students and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Master of Arts in French

Candidates in French Studies must take an examination based on a reading list covering the fields of French literature and culture. The examination in French linguistics is based on a list of readings in linguistics and in literature and/or civilization. The examination in French language learning/teaching includes readings in second-language acquisition and teaching methods in addition to selected readings in French literature and/or civilization. Candidates in all programs are required to demonstrate, at the time of the master's examination, an ability to communicate effectively in both written and oral French.

Course work dependent on specialization area	32

Geography and Geographic Information Science

www.geog.illinois.edu/

Head of the Department: Sara L. McLafferty

255 Computer Applications Building, 605 East Springfield Ave.
Champaign, IL 61820
(217) 333-1880
Fax: (217) 244-1785
E-mail: geograph@illinois.edu

Major: Geography
Degrees Offered: M.A., M.S., Ph.D.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Geography and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Geography and Geographic Information Science offers programs leading to the Master of Arts, Master of Science and Doctor of Philosophy degrees in Geography. The department's specializations are organized into three programs:

1. River, Watershed and Landscape Dynamics (fluvial geomorphology, watershed science and management, and ecosystem dynamics);
2. Society, Space and Environments (political ecology, environmental policy and social vulnerability, urban analysis, health geography and geopolitical analysis);
3. Geographic Information Science (geographic information systems, dynamic modeling of ecological and social systems, geocomputation and cyber GIS, aerial photogrammetry, remote sensing, interregional input-output modeling, regional science and spatial analysis). Detailed descriptions of these programs may be obtained from the departmental office.

Admission

Students applying for admission to the master's program are expected to have a strong undergraduate background in geography and/or related disciplines. In addition to other Graduate College admission requirements, a grade point average of at least 3.0 (A = 4.0) in the undergraduate major is required. Ph.D. candidates are generally expected to have at least a 3.5 average in previous graduate work.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. We have implemented a professionalization program in our department, where graduate students work with faculty members to receive advice and gain first-hand experience in teaching undergraduate courses. Several graduate students have also been provided an opportunity to teach introductory undergraduate courses over the last few years.

Facilities and Resources

The department maintains two computer-based laboratories for instruction - a main instructional facility containing 30 computers and a satellite facility containing 15 computers. In addition, a dedicated computer laboratory is available exclusively for graduate student use. The Regional Economics Applications Laboratory focuses on the development of models of urban and regional economies for impact analysis and economic forecasting. The Cyberinfrastructure and Geospatial Information Laboratory (CIGI) provides a cutting-edge cyberinfrastructure-enhanced GIS facility that is established as a virtual organization. The laboratory houses several high performance computers and servers for performing computationally intensive geographic analysis and problem solving in various research, education, and outreach contexts. The soil laboratory has a wide array of equipment for physical and chemical analysis of earth materials. The department is a participant in the Social Dimensions of Environmental Policy (SDEP) strategic initiative, which aims to understand the social and political-economic forces shaping just and sustainable environmental policy.

Map and Geography Library

The University Library has a substantial collection of geography books and journals. Most of the new and more recent books are located in the Social Sciences, Health, and Education Library (SSHEL); nearly all geography journals are available full-text through the University Library's website. The Map Library holds a collection of over 626,000 maps and aerial photographs. Additionally, the Map Library houses an extensive collection of books on cartography and geographic information science. The Map Library also has a small collection of geospatial data on CD-ROM, and assistance in locating geospatial data can be obtained in either the Map Library or the University Library's Scholarly Commons.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Geography. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Financial Aid

Fellowships, teaching and research assistantships, and waivers of tuition and some fees are available in the department.

Master of Arts or Master of Science in Geography

Successful candidates for the master's degree whose backgrounds are largely in physical geography or geographical information science are recommended for the Master of Science; others receive the Master of Arts.

Thesis Option

At least one course on geographic information systems (GIS) and related geospatial techniques

GEOG 471	Recent Trends in Geog Thought	4
GEOG 491	Research in Geography	2
Each student must also fulfill program requirements specific to his/her specialty area

Doctor of Philosophy in Geography

Admission presupposes distinction in undergraduate and graduate study. In the doctoral program, the student develops depth in the program chosen for specialization and further advances in research competence. A student must complete the course requirements as determined by an individually planned program, initiate and complete research projects, and qualify for candidacy by passing the departmental qualifying and preliminary examinations. Although there is no departmental foreign language requirement, students may study a foreign language as a research tool.

Entering with approved M.S./M.A. degree

Geology

www.geology.illinois.edu

Head of the Department: Thomas Johnson
156 Computer Applications Building
605 E. Springfield Ave
Champaign, IL 61820
(217) 333-3542
E-mail: mkt@illinois.edu

Major: Geology
Degrees Offered: M.S., Ph.D.

Major: Teaching of Earth Science
Degrees Offered: M.S.

Graduate Degree Programs

The Department of Geology offers programs leading to the Master of Science in Geology, the Doctor of Philosophy in Geology, and the Master of Science in the Teaching of Earth Science. Students have a wide variety of choices in their courses and research programs. Departmental research programs include many aspects of geology, geochemistry, and geophysics.

Admission

The admission requirements of the Graduate College apply. In addition, scores for the aptitude test of the Graduate Record Examination (GRE) are required for admission to graduate work in geology, as well as completion of at least one year each of study in college-level calculus, chemistry, and physics. For more information, write to the graduate secretary. Under special circumstances, students can be admitted at the beginning of the spring term.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Candidates for graduate degrees are usually supported through fellowships, research assistantships, teaching assistantships, and work-study programs. Fellowships and assistantships include tuition and service fee waivers. Awards for financial assistance are based principally on a candidate's academic record, statement of plans, and letters of reference. Continuation of financial aid depends on student performance and, in the case of teaching assistants, on the receipt of good evaluations. Some assistants are appointed by the State Geological Survey located on campus.

- Master of Science in Geology (p. 729)
- Master of Science in Teaching of Earth Science (p. 730)

Doctor of Philosophy in Geology

Ph.D. students are evaluated by three oral examinations: a qualifying examination, a preliminary examination, and a final examination. The qualifying examination tests breadth of knowledge as well as the ability to define and defend a research proposal in a specialized field at an early stage of graduate study. The preliminary examination tests advanced knowledge in a specialized field and the ability to define and defend a Ph.D. dissertation proposal. The final examination tests the ability to complete and defend Ph.D. dissertation research.

Entering with approved M.S. degree

Formal Coursework (must include 4 hours of electives outside Geology)	32

If the GPA falls below this minimum after 12 or more graduate hours of graded coursework, it must be raised to 3.0 or above after the completion of 12 additional graduate hours of graded coursework and must be maintained at or above the minimum thereafter.

¹ For additional details and requirements refer to the department's Graduate Degree Programs (<http://www.geology.illinois.edu/grad/programs>) and the Graduate College Handbook (<http://www.grad.uiuc.edu/gradhandbook>).

Master of Science in Geology

Students in the Master of Science program can follow the "standard" (or thesis) option or the "applied geology" (or non-thesis) option. The non-thesis option is intended as a terminal degree for students preparing for professional work in environmental and engineering geology or in applied geophysics and who have already been admitted to the program. We do not currently accept new students for the non-thesis master's degree. Admitted students must declare their intent to pursue the non-thesis option at least one semester prior to completing degree requirements.

Thesis Option

German

www.germanic.illinois.edu

Department of Germanic Languages and Literatures

Interim Head of the Department: Craig Williams

Director of Graduate Studies: Yasemin Yildiz

2090 Foreign Languages Building

707 South Mathews Avenue

Urbana, IL 61801

E-mail: mwade@illinois.edu or germanic@illinois.edu

Major: German

Degrees Offered: M.A., Ph.D.

Graduate Concentration: Medieval Studies (p. 811) (available to all degrees), Second Language Acquisition and Teacher Education (p. 891) (Ph.D. only)

Graduate Degree Programs

The Department of Germanic Languages and Literatures offers graduate programs leading to the degrees of Master of Arts in German, and Doctor of Philosophy in German. Students in the department may choose an additional specialization in Cultural Studies and Interpretive Research (<http://www.germanic.illinois.edu/graduate>) or a concentration in Medieval Studies. Candidates for the Ph.D. in German may additionally obtain a certificate in Second Language Acquisition and Teacher Education (<http://www.slate.uiuc.edu>) (SLATE Certificate).

Admission

Applicants should apply online (www.grad.illinois.edu/admissions/apply/) and submit a statement of purpose, three letters of recommendation and a sample of their written work in English or German or both. For admission to the Master of Arts program, the writing sample might be a term paper, and for admission to the doctoral level, a master's thesis or seminar paper. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should be sent to:

SLCL Graduate Student Services

3070 Foreign Languages Bldg.

707 S. Mathews Ave.

Urbana, IL 61801

Graduate Record Examination (GRE) scores are required. The applicant should ask the ETS to submit scores to institution 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program, and all students teach. Non-native English speakers must first pass a test of their oral English ability (see www.grad.illinois.edu/admissions/taengprof.htm).

Research Interests

The department faculty includes nationally and internationally recognized scholars in all areas of research within the field. These areas include older and modern German literature, Scandinavian literature, comparative literature, medieval studies, Renaissance studies, gender and women's studies, film, American-German relations, historical and synchronic Germanic linguistics, German civilization, and German language pedagogy. The University Library has one of the nation's outstanding collections of works pertaining to study and research in Germanic literatures of all periods and in Germanic and general linguistics.

Financial Aid

All students accepted into the program have financial support, usually in the form of a Teaching Assistantship (see www.grad.illinois.edu/admissions/taengprof.htm).

Generally, the department selects one student annually to study for a year at the University of Gottingen with an assistantship there; and one graduate student to serve as administrative assistant to the program director in the Austria-Illinois Exchange Program in Vienna. The stipends for these fellowships and assistantships are comparable to those for students serving in the department as half-time assistants. The department further has

contacts with a variety of universities and institutions in German-speaking countries; these cooperative endeavors also include arrangements for graduate students to study and teach abroad.

For continuing graduate students, the awarding of financial aid of all types is contingent upon making satisfactory progress toward a degree.

Master of Arts in German

Applicants should have completed undergraduate studies similar to the concentration in German at the University of Illinois at Urbana-Champaign, have a grade point average of 3.0 (A = 4.0) for the last 60 hours of undergraduate coursework, and be able to follow lectures in the German language. Acquaintance with German history and culture in their relation to the general European background is desirable. Admission to the program is on a competitive basis.

Candidates for the Master of Arts degree may emphasize either German literature or linguistics. All candidates must take courses in both literature and linguistics.

Thesis Option

GER 510	Introduction to Graduate Study	4
GER 515	Middle High German	4
or GER 520	History of the German Language	
A 500 level course (not including GER 593) in German literature before 1800		4
A 500 level course (not including GER 593) in German literature after 1800		4
Electives within or outside of the department with advisor's approval		0-16
Language Requirement: proficiency in reading one language other than English and German.

Doctor of Philosophy in German

Applicants must meet the admission standards outlined for the Master of Arts and, in addition, hold a Master of Arts in German (or equivalent) with a graduate grade point average of 3.5 (A = 4.0). Admission to the program is on a competitive basis.

Candidates for the Ph.D. in German may specialize in older German literature, modern German literature, Germanic linguistics, or Scandinavian literature.

Students working toward the Ph.D. degree must have completed all requirements for the Master of Arts degree given above and must complete an additional 40 graduate hours of coursework approved by the graduate adviser. At least 32 graduate hours must be for courses in Germanic Languages and Literatures. No more than 8 hours of credit in 400 level courses beyond those presented for the M.A. will be counted toward these ten units. The 40 hours may include up to 4 hours of GER 593, but may not include any credit for GER 496 for work taken as independent study. Residence requirements are those of the Graduate College.

One course in German or Scandinavian literature before 1500	4
One course in German literature since 1500	4
One course in German, Germanic, or Scandinavian linguistics	4
GER 582 Theories of German Lang Tchg	4
GER 515 Middle High German	0-8
& GER 520 and History of the German Language (unless completed during masters)	
Course work electives at the 500 level (to total 40)	
GER 593 Research in Special Topics (4 max hours applied toward degree)	4
Language Requirement: a reading knowledge of two research languages other than English and German	
GER 599 Thesis Research (min/max applied toward degree)	12-32
Total Hours	72

Other Requirements ¹

Other requirements may overlap

Credit in GER 496 will not count toward degree requirements

Teaching of elementary or intermediate German (at least one half-time appointment as teaching assistant for one academic year).

Minimum Hours Required in the Unit:	32 (not including GER 599)
Minimum 500-level Hours Required Overall:	72
Masters Degree Required for Admission to PhD?	Yes
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

 Degrees offered: M.A., Ph.D.
 Graduate Concentrations: African American Studies (p. 511) (available to all degrees), Medieval Studies (p. 811) (available to all degrees)

Major: Social Studies, Teaching of
 Degrees offered: M.A.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in History and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.uiuc.edu/mdphd>)

Graduate Degree Programs

The Department of History offers graduate courses leading to the Doctor of Philosophy degree, complete details of which may be found in the Graduate Studies section of the department's web site. Students are not normally admitted to a terminal master's degree program.

Admission

Applicants should have a minimum of 20 semester hours of undergraduate work in history and cognate disciplines with an overall GPA of 3.25 in the last two years. Applicants who have a master's degree should have a grade point average of 3.5 for previous graduate-level work. All applicants are required to submit Graduate Record Examination (GRE) scores (verbal, writing, and quantitative are mandatory; history is optional). All applicants are required to submit a writing sample. Language preparation may be weighted heavily, depending upon the field of specialization. Foreign students whose native language is not English need a paper-based Test of English as a Foreign Language (TOEFL) score of at least 600 (250 on the computer-based test). Most successful applicants have GRE verbal scores of over 80% and/or TOEFL scores of over 630 (260 computer). Only in exceptional circumstances are students admitted for the spring term. The department is not currently admitting to the Teaching of Social Studies program. For additional details refer to www.history.illinois.edu/graduate/prospective/.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including History. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Facilities and Resources

The extraordinary University Library is the department's main research facility; within it, the History, Philosophy & Newspaper Library, the Rare Book Room, and the area studies libraries (Slavic, Africana, Latin American, Asian Libraries) all serve faculty and students with expert bibliographers and focused collections. Among other special collections much used by historians are Afro-Americana and Women's Studies; the library is also a major repository for government documents.

Financial Aid

Financial aid is almost always awarded on an academic-year basis. Applications by incoming students are considered with admission applications. All fellowships and assistantships include a stipend plus tuition and service fee waiver.

Both University and department endowment fellowships are available to entering students and to advanced doctoral students embarked on their research or the writing of their dissertations. Foreign Language and Area Studies (FLAS) Fellowships may support first- and second-year students who have special interests in foreign area studies. Entering students from underrepresented groups may be awarded one- to three-year Graduate College Fellowships. The Illinois Consortium for Educational Opportunity Program (ICEOP) offers renewable fellowships to underrepresented minority students who are Illinois residents and plan academic careers within the state. Half-time teaching assistantships are the department's primary form of financial aid for graduate students in the Ph.D. program. Students who progress satisfactorily toward their degrees and demonstrate effective teaching will have their teaching assistantships renewed for a second, and usually a third, year.

Master of Arts in History

Students enrolled in the Ph.D. program can usually petition to earn a Master of Arts in History within three semesters.

Thesis Option

HIST 598 (2 hours per term) is required of candidates who hold teaching assistantships, during each semester they hold an appointment

HIST 593 & HIST 594	Approaches to History and Intro Historical Writing	8
Two additional 500-level courses in history		8
Two courses in each of two of the fields of specialization offered by the department.		16
Language Requirement: candidate must demonstrate ability to read one foreign language related to his or her field of interest as approved by the graduate advisers		
HIST 599	Thesis Research (8 max applied toward degree)	8
Total Hours		32

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall:	16
---	----

At least one research seminar (HIST 596) with a grade of B or better must be included.

Students may take up to two of the required eight courses in departments other than History, if approved.

Minimum GPA:	2.75
--------------	------

¹ For additional details and requirements refer to the department's graduate degree requirements (<http://www.history.illinois.edu/graduate/current/requirements>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Non-Thesis Option

HIST 598 (2 hours per term) is required of candidates who hold teaching assistantships, during each semester they hold an appointment

HIST 593 & HIST 594	Approaches to History and Intro Historical Writing	8
Two additional 500-level courses in history		8
Two courses in each of two of the fields of specialization offered by the department.		16
Language Requirement: candidate must demonstrate ability to read one foreign language related to his or her field of interest as approved by the graduate advisers		
Total Hours		32

Other Requirements ¹

Other requirements may overlap

Minimum 500-level Hours Required Overall:	16
---	----

At least one research seminar (HIST 596) with a grade of B or better must be included.

Students may take up to two of the required eight courses in departments other than History, if approved.

Minimum GPA: 2.75

¹ For additional details and requirements refer to the department's graduate degree requirements (<http://www.history.illinois.edu/graduate/current/requirements>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Doctor of Philosophy in History

In certain circumstances, a student in British history may substitute courses in quantitative skills for the second language. For the preliminary examination, the candidate customarily offers three fields in history - one major and two minor fields. At least one of these must be a "geographical/chronological field" and one must be a "comparative/thematic" field. One must involve a period of time before 1815. At least two geographical areas must also be represented by the fields offered for the examination. One of the three fields may be in a specialization outside the Department of History or may be a "constructed" field specially designed by the candidate in consultation with field examiners and the major advisor.

Entering with approved M.S./M.A. degree

HIST 598 (2 hours per term) is required of candidates who hold teaching assistantships during each semester they hold an appointment; students with research assistantships may enroll for HIST 596 for 2 hours credit per semester during the assistantship.

HIST 593 & HIST 594	Approaches to History and Intro Historical Writing	8
Research seminars (or HIST 596), under the direction of at least two faculty members (may be reduced by one four-hour course at the discretion of the advisor)		8
Three additional courses at the 500 level		12
HIST 591	History and Social Theory	4
HIST 597	Reading Course (Oral History)	4
To fulfill the minimum requirement of 64 or 96 graduate hours, 16 graduate hours in disciplines other than history may be applied.		0-16
Language Requirement: The department requires proven competence in two foreign languages for the Ph.D. degree, except for students of US History who must demonstrate competence in one foreign language. Language competence means the ability to read and comprehend a foreign language well enough to paraphrase a scholarly article in English. Students admitted into the Ph.D. program are expected to demonstrate competence in the second language within four semesters and always before they take their last prelim exam. A major advisor may require a student to acquire a reading knowledge of more than two languages, or more than one for US History students.		
HIST 599	Thesis Research (32 max applied toward degree)	32
Total Hours		64

Other Requirements ¹

Other requirements may overlap

Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	2.75

¹ For additional details and requirements refer to the department's graduate degree requirements (<http://www.history.illinois.edu/graduate/current/requirements>) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Entering with approved B.S./B.A. degree

HIST 598 (2 hours per term) is required of candidates who hold teaching assistantships during each semester they hold an appointment; students with research assistantships may enroll for HIST 596 for 2 hours credit per semester during the assistantship.

HIST 593 & HIST 594	Approaches to History and Intro Historical Writing	8
Research seminars (or HIST 596), under the direction of at least two faculty members (may be reduced by one four-hour course at the discretion of the advisor)		12
Three additional courses at the 500 level		12
HIST 591	History and Social Theory	4
HIST 597	Reading Course (Oral History)	4
To fulfill the minimum requirement of 64 or 96 graduate hours, 16 graduate hours in disciplines other than history may be applied.		0-16

Language Requirement: The department requires proven competence in two foreign languages for the Ph.D. degree, except for students of US History who must demonstrate competence in one foreign language. Language competence means the ability to read and comprehend a foreign language well enough to paraphrase a scholarly article in English. Students admitted into the Ph.D. program are expected to demonstrate competence in the second language within four semesters and always before they take their last prelim exam. A major advisor may require a student to acquire a reading knowledge of more than two languages, or more than one for US History students.

HIST 599	Thesis Research (32 max applied toward degree)	32
Total Hours		96

Other Requirements ¹

 Degrees offered: M.S.

Graduate Degree Programs

The University of Illinois at Urbana-Champaign has established a Master of Science Program in Human Factors. This program involves a broad and diverse group of faculty and students based in academic units including the Institute of Aviation's Human Factors Division, the Departments of Psychology, Department of Industrial and Enterprise Systems Engineering, Department of Mechanical Science and Engineering, Computer Science, and the Human-Computer Intelligent Interaction Group at the Beckman Institute. The program focuses on a wide variety of cognitive human factors issues within both aviation and non-aviation systems.

Admission

This program is currently not accepting applications.

Master of Science

PSYC 406	Statistical Methods I	4
PSYC 407	Statistical Methods II	4
PSYC 456	Human Performance and Cognition in Context	4
PSYC 527		4
AVI 455	Aviation Accident Analysis	4
AVI 497	Special Topics in Aviation	2-4
Electives		3-7
AVI 599	Thesis Research (min/max applied toward degree)	4-9
Total Hours		36

Other Requirements ¹

Other Requirements may vary

Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

¹ For additional details and requirements refer to the department's graduate program requirements (http://www.humanfactors.illinois.edu/teaching/prospectiveStudents/educational_programs.aspx) and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

The Institute of Aviation offers a graduate program leading to the Master of Science degree. This degree is awarded as a terminal degree to candidates who have satisfactorily completed 36 graduate hours of graduate work in this area and who have completed a thesis.

Human and Community Development, Concentration in Human Development and Family Studies

www.hcd.illinois.edu

Head of the Department: Susan Koerner
Director of Graduate Programs: Ramona Faith Oswald
222 Bevier Hall
905 South Goodwin Avenue
Urbana, IL 61801
(217) 333-3790
Fax: (217) 244-6144

Major: Human and Community Development
Degrees offered: M.S. and Ph.D.
Graduate Concentrations: Human Development and Family Studies (Ph.D. only)

Graduate Minor: Gender Relations in International Development

Joint Degree Program: Doctor of Philosophy in Human and Community Development and Master of Public Health (p. 620)
Degrees Offered: Ph.D. and M.P.H.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Human and Community Development and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.uiuc.edu/mdphd>)

Graduate Degree Programs

The Department of Human and Community Development (HCD) offers one graduate concentration at the doctoral level. Students who enter the doctoral program without a master's will complete one as the first part of their doctoral requirements.

The doctoral concentration in Human Development and Family Studies (HDFS) focuses on positive development and resilience of diverse children, youth, and families in everyday life contexts. Our doctoral concentration is interdisciplinary, drawing upon the canons of anthropology, economics, education, family studies, human development, psychology, and sociology. Further, we value qualitative, quantitative, and mixed methodologies.

Admission

Admission is based upon both academic record and the applicant's fit with faculty research programs. We examine grade point average (GPA), Graduate Record Examination (GRE, we will accept MCAT scores for Medical Scholar applicants) scores, letters of recommendation, and a personal statement. International applicants from non-English speaking countries must have an official paper Test of English as a Foreign Language (TOEFL) score of at least 103 on the internet based test. We will not admit anyone with a GPA less than 3.0 on a 4.0 scale. All applicants are required to submit official GRE scores (MCAT in the case of Medical Scholar applicants) and to have previous coursework in a relevant area of social or behavioral sciences. GRE, MCAT and TOEFL scores should be taken no more than two years prior to application. Our application deadline is January 15 for possible admission the following fall semester. We admit students for fall enrollment only. Please refer to our department website for further information.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Human and Community Development. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

We do not require our students to teach but recognize the importance of teacher development for their future marketability. Thus, we make teaching assistantships available and encourage students to pursue a variety of teaching experiences as well as mentorship from experienced instructors. We also encourage our students to utilize the variety of teacher training resources that are available across campus.

Faculty Research Interests

Faculty information is available on our department website at www.hcd.illinois.edu/about/faculty_staff.html

Centers, Programs, and Institutes

Child Care Resource Service (<http://ccrs.hcd.uiuc.edu>)

Child Development Lab (www.cdl.illinois.edu)

Doris Kelly Christopher Hall

Early Child Development Lab

Financial Aid

We are committed to funding all of our students who are making timely progress. The duration and amount of our commitment varies by program. Funding may include fellowships, research assistantships, and/or teaching assistantships. These opportunities typically include stipends and tuition waivers. In some cases, fees are also waived. All applicants are automatically considered for all department funding opportunities; there is no separate application process. Federal and state financial aid is completely separate from the support provided by our department. For information regarding federal and state financial aid, please refer to www.osfa.illinois.edu/.

Doctor of Philosophy in Human and Community Development, Concentration in Human Development and Family Studies

The HCD doctoral program prepares students to be researchers, educators, policy developers, or professionals who develop, evaluate, and implement programs for children, families, and communities. Those entering the doctoral program without a master's degree will complete one within their first two years in the doctoral program. Students entering with a non-thesis master's will be required to complete a "thesis equivalency" paper within the first two years of their doctoral program. Requirements for the Ph.D. include 66 graduate hours beyond the M.S. degree, completion of the written qualifying examination, defense of the written dissertation proposal, and a final thesis defense upon completion of the dissertation. Doctoral students may also complete a supporting program in "applied HDFS." This 16 graduate hour option includes 4 hours in program development or policy studies, 4 hours in program evaluation, and two 4 hour internships. The applied optional supporting program prepares students to enter careers in administration, human services, social policy, international aid agencies, and government, as well as traditional careers in teaching and research.

Theory Courses

HDFS 501	Human Development Theories	4
HDFS 521	Family Theories	4
HCD 533	Community In American Society	4

Substantive Courses

Select four of the following: 8-16

HDFS 503	Social-Emotional Development	
HDFS 505	Advanced Adolescence	
HDFS 523	Ethnic Families	
HDFS 525	Family Interaction	
HDFS 526	Intimate Partner Violence	
HDFS 527	Family Resiliency

kereadel@illinois.edu

Major: Bioinformatics

Degrees Offered: M.S.

Graduate Concentrations: Animal Sciences, Bioengineering, Crop Science, Library and Information Science, Chemical and Biomolecular Engineering, Computer Science

Major: Informatics

Degrees Offered: Ph.D.

Graduate Degree Programs

The Illinois Informatics Institute (I3) at the University of Illinois offers two graduate degrees: a Ph.D. in Informatics, and Masters of Science in Bioinformatics. Both are interdisciplinary programs with many participating departments. Students can earn the Master of Science in Bioinformatics with a concentration in one of the following departments: Animal Sciences, Crop Sciences, Library and Information Science, Chemical and Biomolecular Engineering, Computer Science. The program is overseen by I3, but students are also members of the department of their concentration. Students can earn the Ph.D. in Informatics with concentrations in Bioinformatics; Medical Informatics; Spatial Informatics; Art and Cultural Informatics; Design, Technology, and Society; Data Analytics and Information Visualization; Cognitive Science and Language Processing.

Facilities

University research centers in this area include the Center for Biophysics and Computational Biology (<http://www.life.uiuc.edu/biophysics>) and an NIH Resource for Macromolecular Modeling and Bioinformatics (<http://www.ks.uiuc.edu>). The campus also offers state-of-the-art experimental bioinformatics facilities, including those in the Keck Center for Comparative and Functional Genomics (<http://www.biotech.uiuc.edu>) and the Institute for Genomic Biology (<http://www.igb.illinois.edu>). The National Center for Supercomputing Applications (<http://www.ncsa.uiuc.edu>) (NCSA), located at the University, offers opportunities for accessing, developing, and experimenting with state-of-the-art computational facilities for bioinformatics.

Master of Science in Bioinformatics

The M.S. degree can be taken in a thesis or non-thesis format, depending on the department. For either format, the research adviser must be affiliated with the Bioinformatics program. Departments may have requirements in addition to those below. See the departmental entries in this Program of Study for more information.

Thesis Option

One biology course from approved list (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)	4
CS 411 Database Systems	4
or CS 473 Fundamental Algorithms	
One bioinformatics course from approved list (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)	4
Thesis Hours Required (min/max applied toward degree):	4-8
Total Hours	32 or 36

Other Requirements ¹

Minimum Hours Required Within the Unit:	8
Minimum 500-level Hours Required Overall:	12

A concentration is required.

Non-Thesis Option

One biology course from approved list (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)	4
CS 411 Database Systems	4
or CS 473 Fundamental Algorithms	
One bioinformatics course from approved list (http://www.informatics.illinois.edu/academics/bioinformatics-ms/bioinformatics-ms-core-courses)	4
Total Hours	36

Other Requirements ¹

Other requirements may overlap

A concentration is required.

Minimum Hours Required Within the Unit:	8
Minimum 500-level Hours Required Overall:	12

Non-thesis programs must require students to participate in a research experience supervised by a faculty member.

¹ For additional details and requirements refer to the degree requirements (<http://www.informatics.illinois.edu/academics/bioinformatics-ms>), the appropriate department's graduate handbook, and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Admission

Applicants must hold a bachelor's degree equivalent to that granted by the University of Illinois at Urbana-Champaign. The recommended background for graduate students entering the Bioinformatics degree program is a bachelor's or master's degree in life sciences, computer and mathematical sciences, or engineering, with a minimum of five hours of molecular and cell biology, six hours of general chemistry, nineteen hours of mathematics and statistics, and three hours of introduction to computing. Prerequisites vary somewhat for the different departmental concentrations. Students should view the web page of the specific department they wish to apply to for detailed information about admission criteria and degree requirements. Those links are below:

- Department of Animal Sciences (<http://www.ansci.illinois.edu>)
- Department of Bioengineering (<http://bioengineering.illinois.edu>)
- Department of Chemical and Biomolecular Engineering (<http://chbe.illinois.edu>)
- Department of Computer Science (<http://cs.illinois.edu>)
- Department of Crop Sciences (<http://www.cropsci.illinois.edu>)
- Graduate School of Library and Information Science (<http://www.lis.illinois.edu>)

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis by the admitting department. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships (the most common form of financial aid for new graduate students in the department) must submit a score of at least 50 on the Test of Spoken English (TSE) (<http://www.grad.illinois.edu/admissions/taengprof.htm>).

Doctor of Philosophy in Informatics

The Chair of the Governing Committee of the Informatics Ph.D. Program will appoint the supervising committee to approve each student's program of study, which will be called the Advisory Committee (first half of studies) and then the Dissertation Committee (second half of studies). The membership of these committees should remain constant for each half of the student's studies, except in unusual circumstances, but may typically change when it is constituted for the dissertation. In any case, changes to the supervising committees must be approved by the Governing Committee. This Committee must contain faculty with expertise in both the Applications area and the Foundations area chosen by the student, including at least four faculty members affiliated with the Informatics Program. The supervising committee will provide each student with a review of his or her progress at the end of each academic year.

Entering with approved M.S. degree

INFO 500	Orientation Seminar (taken twice: once for 0 hours, once for 1 hour)	1
Research Practicum (4 hrs., two semesters)		8
Applications Courses (2 courses at the 500 level from approved list)		8
Foundations Courses (2 courses at the 500 level from approved list)		8

Dissertation Deposit Required	Yes
Minimum GPA:	2.75

¹ For additional details and requirements refer to the degree requirements (<http://www.informatics.illinois.edu/academics/admission>), the appropriate department's graduate handbook, and the Graduate College Handbook (<http://www.grad.illinois.edu/gradhandbook>).

Admission

The admissions process will consist of a formal application, specifying experiences, courses, interests, and letters of recommendation. The Informatics PhD Program will admit graduate students who are approved by the Governing committee in conjunction with representatives of the Areas. With the approval of the appropriate committees, students may be admitted to the program with only a Bachelor's degree. They will work with their Advisory Committee to define appropriate courses to fulfill the 32 hours of Masters-level work. If they wish to receive a Masters degree, they will need to apply to a relevant department and meet the departments existing Masters degree requirements. If they already hold a Masters degree approved by the IPP Governing Committee, they will receive graduate credit for 32 hours. All applicants whose native language is not English must submit a minimum TOEFL score of 100 (IBT), 250 (CBT), or 600 (PBT); or minimum International English Language Testing System (IELTS) academic exam scores of 6.5 overall and 6.0 in all subsections. For those taking the TOEFL or IELTS, full admission status is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses based on an ESL Placement Test (EPT) taken upon arrival to campus.

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency by achieving a minimum score of 50 on the Test of Spoken English (TSE), 24 on the speaking subsection of the TOEFL iBT, or 8 on the speaking subsection of the IELTS. For students who are unable to take the TSE, iBT, or IELTS, a minimum score of 50 is required on the SPEAK test, offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching conducted prior to the start of the semester.

Industrial and Enterprise Systems Engineering

ise.illinois.edu

Head of Department: Rakesh Nagi
 Associate Head for Graduate Studies: Ramavarapu S. Sreenivas
 117 Transportation Building
 104 South Mathews Avenue
 Urbana, IL 61801
 (217) 333-2731
 E-mail: ge-grad@illinois.edu

Major: Industrial Engineering
 Degrees Offered: M.S., Ph.D.

Major: Systems and Entrepreneurial Engineering
 Degrees Offered: M.S., Ph.D.

Joint Degree Program: Master of Science in Industrial Engineering or Systems and Entrepreneurial Engineering and Master of Business Administration (p. 581)
 Degrees Offered: M.S. and M.B.A.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Industrial Engineering or Systems and Entrepreneurial Engineering and Doctor of Medicine (M.D.) through the Medical Scholars Program (<https://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

The Department of Industrial and Enterprise Systems Engineering (ISE) offers graduate study leading to master's and doctoral degrees in Industrial Engineering (IE) and Systems and Entrepreneurial Engineering (SEE). The program offers an approach to industrial engineering and systems engineering, engineering design, and entrepreneurial engineering that crosses disciplinary lines. The IE program is based in advanced studies that focus on operations research, optimization, supply chain management, financial engineering, quality and reliability engineering and production management, with the aim to advance modeling, simulation, analysis and decision making for complex engineering and economic systems. The SEE program is founded on the premise of dual competency in both traditional engineering and in the business side of engineering. The SEE program offers flexibility by permitting the student to select from a menu of advanced courses and take a wide range of electives to meet individual career goals. Graduates of these programs are prepared to enter academic and professional engineering positions in universities, industry, government, and private practice. Opportunity also exists for specializing in:

1. computational science and engineering and
2. energy and sustainability engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (<http://cse.illinois.edu/students/graduate-program>) and the Energy and Sustainability Engineering (EaSE) Option (<http://ease.illinois.edu>).

The Medical Scholars Program (<https://www.med.illinois.edu/mdphd>) permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Industrial Engineering or Systems and Entrepreneurial Engineering. The Department is a joint sponsor with the Department of Finance for the M.S. degree in Financial Engineering (p. 710).

Admission

Applicants who have completed degree requirements in an accredited engineering program or its equivalent are eligible to apply for admission. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required.

Scores on the Graduate Record Examination (GRE) (<http://www.ets.org>) general test are required of all applicants. Based upon the previous preparation of the student for either program, prerequisite courses may be specified by the advisor, but the credit may not be applied toward a degree.

All applicants whose native language is not English must submit a minimum TOEFL (<http://www.toefl.org>) score of 103 (iBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) (<http://www.ielts.org>) academic exam scores of 7.0 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (<http://grad.illinois.edu/admissions/instructions/04c>) are met. Full admission status is granted for those meeting the minimum requirements and having taken the TOEFL or IELTS since the scores required for admission to ISE are above the minimum scores demonstrating an acceptable level of English language proficiency.

Applicants to the joint M.B.A. degree program must meet the admissions standards for both programs and be accepted by both programs.

Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both Industrial and Enterprise Systems Engineering and the College of Medicine. The application to the Medical Scholars Program will also serve as the application to the Industrial and Enterprise Systems Engineering

graduate program. Further information on this program is available by contacting the Medical Scholars Program (125 Medical Sciences Building, (217)-333-8146, mspo@illinois.edu).

Joint Degree Programs

Current requirements for the joint Master of Science in Industrial Engineering and Master of Business Administration or the joint Master of Science in Systems and Entrepreneurial Engineering and Master of Business Administration are that students must complete all of the requirements for the engineering M.S. degree with a thesis as prescribed above, plus 60 graduate hours for the M.B.A. degree (<http://www.mba.illinois.edu/academics/joint-degrees.aspx>), including 40 hours of M.B.A. core course work; and 20 hours of M.B.A. elective course work to fulfill the requirements of a concentration.

Medical Scholars Program

Students in the Medical Scholars program must meet the specific requirements for both the medical (<https://www.med.illinois.edu/mdphd>) and graduate degrees. On average, students take eight years to complete both degrees. The first year of the combined program is typically spent meeting requirements of the Industrial or Systems and Entrepreneurial Engineering graduate degree.

Faculty Research Interests

Faculty research by Systems and Entrepreneurial Engineering faculty is pursued in the following fields:

- computer-aided design
- optimization
- design systems
- manufacturing systems
- nondestructive testing and evaluation
- system dynamics and simulation
- control
- robotics
- real-time decision making
- reliability
- entrepreneurial engineering
- operations research/management science
- biomechanics

In Industrial Engineering, research is conducted in operations research, production engineering, quality and reliability engineering, and supply chain and logistics, transportation, financial engineering, and business analytics. Study in the areas of cognitive engineering, computer-aided manufacturing, ergonomics, facilities planning, human-machine interaction, large-scale systems analysis, machine tool systems design, mathematical programming and optimization, production planning and control, and project management is aimed at improving the design and implementation of integrated systems of persons, materials, planning, and equipment.

Facilities and Resources

Members of the ISE Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department's research laboratories Web site (<http://ise.illinois.edu/research/ise-labs.html>).

Financial Aid

Qualified students may compete for financial assistance in the form of teaching/graduate/research assistantships, fellowships, grants, and tuition waiver scholarships. Under certain conditions, fellowships may be augmented by part-time assistantships. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (<http://grad.illinois.edu/admissions/taengprof.htm>) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the English Proficiency Interview (http://cte.illinois.edu/testing/oral_eng/epi_overview.html) (EPI), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

- Master of Science in Industrial Engineering (p. 752)
- Master of Science in Systems and Entrepreneurial Engineering (p. 754)
- Doctor of Philosophy in Industrial Engineering (p. 750)
- Doctor of Philosophy in Systems and Entrepreneurial Engineering (p. 751)

Joint M.B.A. Program

Students in this unit may choose to earn their major degree and simultaneously complete an M.B.A., with 12 fewer required hours than when pursuing both degrees independently. Students must be enrolled in the M.B.A. program for three terms and complete all the requirements of their primary degree. Interested students should see the joint program requirements (p. 584) and contact the M.B.A. program and their major department office for more information.

Doctor of Philosophy in Industrial Engineering

A Master's degree is not required for admission to the Direct Ph.D. program.

The 96 graduate hours of credit may be divided into three stages of 32 hours each, consisting of 32 hours generally represented by an M.S. degree or equivalent (Stage I), 32 hours of course work beyond the M.S. degree (Stage II), and 32 hours of thesis work for the doctoral thesis (Stage III). Stage I requirements are satisfied by completion of an M.S. degree in the Department or in a related engineering or technical discipline from the University of Illinois or other accredited university. A non-technical M.S. or MBA would normally not count toward the completion of Stage I. Such students would be required to enroll in one of the Master of Science Programs in the Department and satisfy the requirements therein in order to satisfy Stage I of the Ph.D. degree.

To advance to Stage II all students must pass the Qualifying Examination. To advance from Stage II to Stage III the student must pass the Preliminary Exam. Stage III is comprised of a minimum of 32 hours of GE 599 (Thesis Research) credit and a written dissertation followed by a final oral thesis defense.

The Preliminary Examination is taken after the Qualifying Examination. A minimum of six months should elapse between the successful completion of the doctoral Preliminary Examination and the doctoral final examination (oral dissertation defense).

Entering with approved M.S./M.A. degree

IE 599	Thesis Research (min-max applied toward the degree)	32
IE 590	Seminar (registration for 0 hours every term while in residence)	0
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below)		32
Total Hours		64

Other Requirements and Conditions ¹

Other Requirements and Conditions may overlap

Minimum 500-level Hours Required Overall: 16 (max of 4 of 597)

4 hours of the elective courses must be from a College of Engineering department, including ABE and CHBE.

A maximum of 4 CR-graded credit hours in non-IE courses may be applied toward the degree.

Ph.D. exam and dissertation requirements:

Qualifying exam:² Qualifying examinations should be taken as early as possible

Preliminary exam

Final exam or dissertation defense

Dissertation deposit

Minimum GPA: 3.0

Doctor of Philosophy in Systems and Entrepreneurial Engineering

A Master's degree is not required for admission to the Ph.D. program.

Students in the SEE master's program must take the Qualifying Examination before obtaining the M.S. degree; students entering the program with a master's degree earned elsewhere must pass the Qualifying Examination before or during their third semester in the Ph.D. program.

The 96 graduate hours of credit may be divided into three stages of 32 hours each, consisting of 32 hours generally represented by an M.S. degree or equivalent (Stage I), 32 hours of course work beyond the M.S. degree (Stage II), and 32 hours of thesis work for the doctoral thesis (Stage III). Stage I requirements are satisfied by completion of an M.S. degree in the Department or in a related engineering or technical discipline from the University of Illinois or other accredited university. A non-technical M.S. or MBA would normally not count toward the completion of Stage I. Such students would be required to enroll in one of the Master of Science Programs in the Department and satisfy the requirements therein in order to satisfy Stage I of the Ph.D. degree.

To advance to Stage II all students must pass the Qualifying Examination. To advance from Stage II to Stage III the student must pass the Preliminary Exam. Stage III is comprised of a minimum of 32 hours of GE 599 credit and a written dissertation followed by a final oral thesis defense.

The Preliminary Examination is taken after the Qualifying Examination. A minimum of six months should elapse between the successful completion of the doctoral Preliminary Examination and the doctoral final examination (oral dissertation defense).

Entering with approved M.S./M.A. degree

Minimum 500-level credit hours applied toward the degree, all of which must from a College of Engineering department, including ABE and CHBE. 28

The Elective courses must be at the 500- level and from a College of Engineering department including ABE and CHBE.

A maximum of 8 hours of IE 597 (or other approved independent study) may be applied toward the elective course work requirement.

At least 64 hours of credit, which may include GE 599, must be earned in residence.

Ph.D. exam and dissertation requirements:

Qualifying exam:²

Preliminary exam

Final exam or dissertation defense

Dissertation deposit

Minimum GPA: 3.25

¹ For additional details and requirements refer to the department's Graduate Programs Web site (<http://ise.illinois.edu/graduate/graduate-programs>) and the Graduate College Handbook (<http://grad.illinois.edu/gradhandbook>).

² Qualifying Exam Information (<http://ise.illinois.edu/graduate/qualifying-prelim-final-exams>)

Master of Science in Industrial Engineering

Thesis Option

IE 599 Thesis Research (min-max applied toward the degree)	8
IE 590 Seminar (registration for 0 hours every term while in residence)	0
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below)	24
Total Hours	32

Other Requirements and Conditions ¹

Other Requirements and Conditions may overlap

A minimum of 12 500-level credit hours applied toward the degree, 8 of which must be IE.

A maximum of 4 hours of IE 597 (or other approved independent study) may be applied toward the elective course work requirement.

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's Graduate Programs Web site and the Graduate College Handbook.

Non-Thesis Option

IE 590	Seminar (registration for 0 hours every term while in residence)	0
IE 597	Independent Study (4 hours)	4
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below)		32
Total Hours		36

Other Requirements and Conditions ¹

Other Requirements and Conditions (may overlap):¹

A minimum of 12 500-level credit hours applied toward the degree, 8 of which must be IE.

Departmental approval is required to pursue the non-thesis option, for students terminating their studies with the M.S. degree.

For students in the non-thesis option, 4 hours of IE 597 are required (4 hours maximum allowed towards the M.S. degree), because each student must show evidence of the ability to do independent research.

Minimum GPA: 3.0

¹ For additional details and requirements refer to the department's Graduate Programs Web site and the Graduate College Handbook.

Master of Science in Systems and Entrepreneurial Engineering

Institute of Communications Research

www.media.illinois.edu/icr/

Interim Director: Dr. William E. Berry
Director of Graduate Studies: James Hay
228 Gregory Hall
810 South Wright Street
Urbana, IL 61801
(217) 333-1549
E-mail: icr@illinois.edu

Major: Communications and Media
Degrees Offered: Ph.D.

Medical Scholars Program: Doctor of Philosophy (Ph.D.) in Communications and Media and Doctor of Medicine (M.D.) through the Medical Scholars Program (<http://www.med.illinois.edu/mdphd>)

Graduate Degree Programs

Please note: The ICR no longer has information regarding our programs of study available in hard copy format. All information can be found via the Web. On the graduate level, the Institute of Communications Research offers a doctoral degree in Communications and Media; students wishing to study for a master's degree do so in related fields outside the Institute.

The Institute cooperates with the University of Illinois' College of Medicine in offering the combined M.D. and Ph.D. degrees. The Medical Scholars Program (<http://www.med.illinois.edu/msp>) is the largest and broadest program of its kind in the world, with more than 150 students enrolled in fifty graduate programs. Equipped with an excellent medical education and Ph.D. training, graduates of the Medical Scholars Program have the credentials to assume leadership roles in academic medicine, medical research, and health policy.

The Institute's faculty and graduate students are also active in the Department of Advertising (<http://www.comm.uiuc.edu/Advertising>), the Department of African American Studies (<http://www.afro.illinois.edu>), the Asian American Studies Program (<http://www.aasp.illinois.edu>), the Unit for Cinema Studies (<http://www.cinema.uiuc.edu>), the Unit for Criticism and Interpretive Theory (<http://criticism.english.uiuc.edu>), the Gender and Women's Studies Program (<http://www.gws.uiuc.edu>), the Illinois Program for Research in the Humanities (<http://www.iprh.uiuc.edu>), the Campus Informatics Initiative (<http://www.cii.uiuc.edu/about.php?link=2>), the Department of Journalism (<http://www.comm.uiuc.edu/journalism>), the Latino/a Studies Program (<http://www.lis.uiuc.edu>), the Center for Latin American and Caribbean Studies (<http://www.clacs.uiuc.edu>), and the Program in Media Studies (<http://media.illinois.edu/macscs>).

Admission

Any student with a bachelor's or master's degree and with a substantial background in the humanities, social sciences, or physical sciences is eligible to apply to the doctoral program. It is suggested but not required that students have or will have a master's degree. All candidates for admission must submit an application for admission along with the application fee, official transcripts of all undergraduate and graduate courses taken and grades earned, three letters of recommendation, and Graduate Record Examination scores.

Our application process is now conducted primarily via the World Wide Web, using the University of Illinois' web-based application for admission called ApplyYourself (<http://www.grad.illinois.edu/admissions/apply>). We encourage you to apply electronically using the web application. If applying on the web is inconvenient for you, please print out a paper copy of the application and send it (by first class or air mail) to our mailing address listed above.

Foreign students from non-English-speaking countries are required to take the Test of English as a Foreign Language (TOEFL) before they come to the University. Depending on the results, they may be required to take further instruction in English after their arrival.

Students are normally admitted to start the program only during the fall term. Only under exceptional circumstances are they allowed to begin it in the spring or summer term. All material for fall admission should be submitted by January 15.

Medical Scholars Program

The Medical Scholars Program permits highly qualified students to integrate the study of medicine with study for a graduate degree in a second discipline, including Communications and Media. Students may apply to the Medical Scholars Program prior to beginning graduate school or while in the graduate program. Applicants to the Medical Scholars Program must meet the admissions standards for and be accepted into both the doctoral graduate program and the College of Medicine. Students in the dual degree program must meet the specific requirements for both the medical and graduate degrees. On average, students take eight years to complete both degrees. Further information on this program is available by contacting the Medical Scholars Program, 125 Medical Sciences Building, (217) 333-8146 or at www.med.illinois.edu/msp.

Graduate Teaching Experience

The ICR feels strongly about the teaching component and tries very hard to afford students the opportunities to teach courses relevant to communication studies.

Faculty Research Interests

www.media.illinois.edu/faculty/icr.html

Financial Aid

Financial aid is available in the form of assistantships, fellowships, and tuition and fee waivers. Students of color underrepresented in communications research are eligible for University fellowships. Most Institute students receive financial support. The application for admission includes a section to be completed if you wish to be considered for financial aid. Insofar as possible, the Institute makes financial aid and admission decisions simultaneously.

Teaching assignments are also periodically available in other University departments or programs - for example, Advertising, Journalism, Speech, English, Business and Technical Writing, Unit for Cinema Studies, and Agricultural Communications - and in the communications program at Parkland College. Students with editing, writing, computer programming, tutoring, or other skills often can find support in other units of the University. Usually these positions must be obtained once you are on campus and can arrange interviews. A few students also find part-time employment with the local media.

See also UIUC Graduate College Financial Aid (<http://www.grad.illinois.edu/funding-jobs>) and Fellowship Office (<http://www.grad.illinois.edu/fellowships>).

Doctor of Philosophy in Communications and Media

Coursework: ICR requires 64 credits of coursework, of which 16 may have been earned in previous graduate work. Students are responsible for designing their own programs of coursework, which are submitted for approval by the Institute's Program Evaluation Committee. Although students are given the broadest latitude in designing interdisciplinary programs, they must include courses that fill certain requirements.

Because students are admitted from diverse backgrounds, the Proseminar first introduces them to the history of communication research. The second semester revolves around the current debates in the field of communications research. While gaining an overview of the central issues and learning a common language, students in the Proseminar are also able to locate their own interests more precisely within the field of communications research in its historical and contemporary forms.

Proseminar

MDIA 571	Proseminar I	4
MDIA 572	Proseminar II	4
Two research methods courses, 1 quantitative and 1 qualitative		8
MDIA 599	Thesis Research (min/max applied toward degree)	32
Total Hours		96

Other Requirements ¹

Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

Overview Courses

While flexibility is the hallmark of ICR's program, students are strongly urged to take two or more overview courses that augment their area of specialization. Such courses, systematically extending proseminar material, give a broad overview of a significant body of scholarship in established areas of communications research, enable students to locate their own interests within the field as a whole, and provide solid preparation for courses that many students are likely to teach. Overview courses ensure breadth of knowledge within an interdisciplinary program such as the Institute's, where students have great latitude in designing their programs and are encouraged to take courses outside the field of communications research.

A number of currently available courses accomplish these goals. Specific examples are listed below, and the list is periodically updated to reflect developments in the field and available faculty resources. Though these courses are not formal requirements for obtaining the Ph.D., students are expected to include at least two of them in their proposed program of study for the Program Evaluation Committee. In preparing proposals, students should consult with their faculty advisors; they are welcome to seek additional help from other experienced faculty, including members of the Program Evaluation Committee.

MDIA 560	Feminist Media Studies	4
MDIA 568	Political Economy of Comm	4
MDIA 570	Popular Culture	4
MDIA 573	Freedom of Expression	4
MDIA 575	Cult Studies and Crit Interp	4
MDIA 577	Philosophy of Technology	4
MDIA 578	Communication Ethics	4
MDIA 580	Advanced Interpretive Methods	4
MDIA 590	Special Topics (Many courses listed as MDIA 590 also qualify as overview courses. Recent examples include International Communications, US Media History, and New Media Theory.)	2-8

Research Methods

Students must complete at least 8 hours in research methods. In order to provide a competent background for constructively understanding the field's wide-ranging literature, students are required to take one quantitative and one qualitative course.

In addition to methodology courses taught by the College of Media faculty, students are encouraged to consider relevant courses in quantitative or non-quantitative methods elsewhere on campus. Listings of such courses are available in the ICR office.

Preliminary Exams
