TALENTED IT GRADUATE/FRESHER PROGRAM

Top 3 Reasons To Join Us

- International professional working environment
- Clear career path with strong academy system
- Keep up with the latest technology trends

The Job

Do you want to be part of one of Northern Europe's most successful IT Companies, where you will have a unique opportunity to make an impact on our many exciting projects?

You'll be working on some of the largest, most complex and technically innovative IT programmes and projects for some of the most prestigious organizations in the world. As our new IT graduate you will work with a lot of different and exciting solutions and technologies like AngularJS, gulp, Sass, React and node.js on Java and .NET. Besides that we work with Sharepoint, Microsoft Dynamics CRM, Microsoft SQL-server, Sitecore, Oracle and Weblogic to name just a few.

Netcompany is currently looking for ambitious graduates to join our strong and dedicated team based in Ho Chi Minh City. Besides our office in Vietnam we have offices in Denmark, Norway, UK and Poland. Globally we employ more than 1800 employees.

Job Description

- Analyze and understand business and technical requirements and work with clients across different domains and industries
- Produce high-quality design deliverables that describes how the solution will accommodate business and technical requirements
- Design, develop, and maintain efficient, reusable, and reliable code using best practices
- Conduct continuous unit and manual testing and deliver high quality solutions.
- Identify bottlenecks and bugs, and devise solutions to troubleshoot and address issues.
- Work in an agile international cross country collaboration environment with experienced and skilled colleagues in Vietnam and Europe

Your Skills and Experience

- Bachelor or Master's degree within a relevant IT specialization
- Good English skills both in writing and verbally
- Strong understanding of object-oriented programming and data modelling
- Familiar with various design, architectural patterns and modern system development
